White describes D'Aubuisson as a "psychopathic killer." He, along with opponents of the junta, believes that the fact the former major is known to have plotted at least two attempted overthrows of the current military-civilian coalition government, that he was arrested on good evidence of such activity last year and quickly released by the military, and that he still walks the streets of San Salvador, provide strong evidence for what many charge is a very thin line between the right-wing extremists and active-duty members of the armed forces, if any line at all.

THE LEFT

The October coup was no less a shock to El Salvador's extreme left, an unorganized array of doctrinaire Moscow-oriented Communists, armed Marxist-Leninist guerrillas and socialist-leaning students, peasant, professional and intellectual groups. In the space of 16 months, this motley collection of leftists would coalesce sufficiently to launch a "final offensive" that would fail totally on the ground but which would promote them to international attention and a place on the maps in the Reagan administration's situation rooms.

According to the State Department's current top Latin American specialist, John Bushnell, the left is responsible for 6,000 of last year's 10,000 politically motivated deaths, by its own prideful admission.

Other experts dispute this figure. White testified in late February that the evidence showed "the chief killer of Salvadorans are the security forces" and argued that guerrilla claims were greatly inflated for propaganda reasons.

The traditional atmosphere of nonpolitical vendetta in El Salvador, poor communications, and the fact that many of the dead are peasant civilians outside the range of military confrontations has confused, some believe hopelessly, the question of responsibility for the deaths.

At the time of the coup even the Salvadoran military was willing to admit that the threat posed by the violent left was composed of a few hundred hard-core cadres with antiquated arms, divided into groups that warred against each other as much as the government. But they had managed for several years to kidnap for ransom high government officials, diplomats and businessmen, murdering a number of them in the process. They could also claim a number of direct assassinations.

Despite Cuban efforts to "export" revolution and a surge of guerrilla activity in neighboring Guatemala in the 1960s, the Salvadoran left had remained largely nonviolent until the end of that decade, consisting primarily of the aging stalwarts of the Salvadoran Communist Party, remnants of the 1932 "Bolshevik revolution."

Many Salvadoran guerrilla fighters date their radicalization from the 1972 overturning of the election results. The military government closed the national university and banned student organizations and convinced many that clandestine fighting was the only route open to them.

But the Salvadoran guerrillas still had a long way to go. A group of Marxist union leaders who broke away from the pro-Moscow Communist Party, bolstered by newly disgruntled student members, named itself the Popular Forces of Liberation, Farabundo Marti (FPL), after the peasant leader of the 1932 uprising. Another group of students and disenchanted young politicians, believing the FPL strategy of longterm popular war, led from the rural hills into the urban areas, to be too slow, formed Popular Revolutionary Army (ERP).

The ERP, led by Ernesto Jovel, local student poet Roque Dalton, Joaquin Villalobos and Ferman Cienfuegos, placed a heavy emphasis on strict militarism and quick results. Through a series of kidnappings for ransom of prominent businessmen, it quickly amassed a heavy warchest.

Those same tactics, however, caused tensions among its large leadership and, in 1975, after a "popular trial," Dalton was executed by the group for "treason." As a result, Jovel and Cienfuegos broke off to form their own guerrilla group, the Armed Forces of National Resistance (FARN), which stressed the need to organize and indoctrinate the masses before calling them to insurrection:

Each of the three main guerrilla groupings spent the next several years harassing the military and economic power structure. Each was known for a particular type of revolutionary tactic—the FPL for targeted political assassinations, the ERP for bombings and, along with the FARN, kidnapings. At the same time, each promoted the formation of its own coalition of union and peasant organizations that could hold the front, and public line, against the government through strikes, propaganda, protest demonstrations and peaceful embassy occupations.

Although the Sandinista victory in Nicaragua in July 1979 convinced the guerrillas that outright leftist victory also was possible in El Salvador, they continued to disagree bitterly on tactics and strategy. At the same time, the Nicaraguan success persuaded Havana, which had largely ignored the Salvadoran guerrillas except for occasional training in Cuba itself, to lend them an organizational hand.

That decision and the October coup in El Salvador would reach forward into the Reagan administration. Within a week of the coup, the guerrilla factions all had declared all-out war against the new junta.

EL SALVADOR: WHERE REAGAN DRAWS THE LINE

(By Karen DeYoung)

In its first week in office, the Reagan administration trumpeted a bold departure in foreign policy for America. The president warned that international terrorism would be met with "swift and effective retribution," and Secretary of State Alexander M. Haig Jr. warned that action would also be taken against the "terrorist governments" of the Soviet Union and its "Cuban proxy."

"International terrorism will take the place of human rights" as a priority in the Reagan administration, Haig added, "and it's time that it be addressed with greater clarity and greater effectiveness by Western nations and the United States as well."

The message was clear, and in its first phase brought no sharp demur from American public opinion or allied governments. Jimmy Carter, through the emphasis he placed on human rights, had made the United States look soft against the Soviets, in the words of one new official, President Reagan would show that he knew where to "draw the line."

In what the official described as a "fortuitous combination of coincidences and circumstances," a specific crisis already was under way in which Reagan could demonstrate his resolve—the ongoing attempts by leftist guerrillas to overthrow the U.S.-backed government of El Salvador. It was from that steamy, little-known Central American republic that Reagan, White House press secretary Jim Brady said recently, would "send a message to Moscow."

Haig launched what Carter's human-rights specialist, Patt Derian, later would call "a political blitzkrieg" in mid-February by dispatching his top European affairs aide, Lawrence Eagleburger, to tell U.S. allies that El Salvador had become a test of Western solidarity. The administration charged that Cuba was arming the left there. The mission produced mild disquite in some capitals, but was by and large welcomed as a reassuring sign of a new American assertiveness on the world scene.

French President Valery Giscard d'Estaing for example, said in a private conversation on Feb. 20 that he would have no problem with an active American role in a region on Washington's doorstep, and Reagan could count on French support as long as the conflict was not escalated into a global and public challenge to the Soviets.

Within hours of that remark, the administration appeared to many Europeans and Americans to have done just that by letting it be known to the press that at private briefing to foreign ambassadors in Washington, officials had said that the administration's "most urgent objective" was to stop the flow of communist arms to Salavadoran guerrillas and warned that the United States was prepared to "go to the source" to stop the arms.

Those comments, delievered by Haig's deputy secretary, William P. Clark, clearly were intended to leave the impression that Reagan was ready to stage a 1980s version of the 1962 Cuban missile crisis confrontation with the Soviet Union unless his demands on El Salvador were met. Public reaction this time was quick, and sharp, with both liberals and conservatives suddenly raising the

question of whether El Salvador was worth those kind of stakes.

At the same time, some officials in the government and on Capitol Hill have begun to question whether the evidence the administration has presented—an inch-thick compendium of alleged leftist documents uncovered by Salvadoran security forces—proves that the involvement of a "worldwide communist network" in El Salvador is as extensive or threatening as the administration says.

Haig has proposed to counter the "massive" amount of arms received by the left with the shipment of $25 million in U.S. military supplies and an initial 57-member contingent of U.S. military personnel. Yet, according to one Pentagon source, the "200 tons" of weaponry the guerrillas are reported by the documents to have received is a "spit in the bucket" that "a company of soldiers—200 troops—could go through in a week."

Other officials have questioned the State Department's descriptions of guerrilla strength and of Salvadoran government requests that have conflicted with accounts coming out of El Salvador itself.

In the last week, administration officials have begun to take a somewhat different tack. Deemphasized as the showpiece of the newly tough United States, El Salvador is no longer cited as the first example of how Reagan is different from Carter. In fact, the officials stress, if anyone should be credited with current U.S. policy in El Salvador, it is Carter.

"I didn't start the Salvador thing," Reagan said somewhat defensively at his news conference Friday. "I inherited it." And in any case, he noted, while the previous administration campaigned with warnings that Reagan would be a threat to peace, "they were doing what we're doing" in Salvador, "sending aid . . . of the same kind we're sending."

This sequence of events has done far more than rivet the nervous attention of American citizens and foreign leaders on Central America's smallest and most heavily populated country. It has demonstrated a certain style of decision-making within the new administration that is likely to be an important feature of its future dealing with the rest of the world. And it has cast into bold relief the policies of the Carter administration that Reagan came to office denouncing and that he now says he is carrying out, in one country at least. The question is whether or not those policies are likely to work any better for Reagan than they did for Carter.

El Salvador was the stage on which Jimmy Carter would give perhaps his most anguished version of Hamlet as played by a policymaker.

In the last, frustrating year of his presidency, he did on some days favor military involvement of the kind and scale Reagan has brought into being. This was the Carter who ordered a U.S. military team into El Salvador to mount "Golden Harvest," an operation in which the Salvadoran military command was able to halt guerrilla plans to destroy the annual harvest of cash crops.

On other days, however, according to officials who worked with the White House on this problem, Carter looked at plans for increasing the number of military advisers the United States would send to the increasingly messy insurgency and would seem to recall both the approaching November election and his prideful assertion that no American lives had been lost in combat during his administration.

"Carter just decided not to do it," one such official said. "He had a tendency to blink at critical moments."

The problem that most bedeviled Carter was the one that in the final analysis probably will pose the key test for Reagan's assertions of continuity in policy when it comes to dealing with El Salvador: whether to link U.S. military aid, which the Salvadoran military establishment wanted but the civilians on the junta were less certain about, to the social and political changes the civilians were pushing but the military leadership was stonewalling.

Reagan refused at his press conference Friday to rule out a continuation of military aid if the military takes complete control of the government, breaking with the kind of linkage that Carter had insisted on, at least in public.

This vagueness is beginning to drive a wedge between the administration and members of Congress who are sympathetic to the idea of cutting off shipments of arms from the outside but who wonder about the priorities that are being placed on getting U.S. military advisers into El Salvador.

"The Reagan administration claims to be committed to the same course, but appears to be much more open-ended in its commitment to the junta than Carter was," Rep. Stephen J. Solarz (D-N.Y.), said. "There is an implicit repudiation of linkage of reforms and aid, and this is particularly strange coming from an administration that insists that linkage is the key to our own relations with the Soviet Union."

That same lack of linkage of American help to political solutions is increasingly bothering European allies. European officials who met with Haig and his aides in the week following the disclosure of the willingness to "go to the source" came away convinced that the crisis in El Salvador has crystallized in a small inner circle of decision-makers within the State Department who give priority to a hard line in East-West relations over regional aspects of foreign policy problems yet to come.

In that circle, these officials said, are Policy Planning Director Paul D. Wolfowitz, an expert in strategic arms limitation negotiations; Counselor Robert C. (Bud) McFarland, former military assistant on the National Security Council; Richard Burt, former New York Times reporter who is now head of Politico-Military Affairs; Eagleburger and one or two others. Clark is directing the special group dealing with El Salvador.

Thus far, however, there is no sign that Haig is encountering significant dissent to his policies from the regional specialists who have been held over from the Carter administration. In his bid to win congressional support, Haig is said to be assuring conservatives on Capitol Hill that those officials have "done a 180-degree turn" on El Salvador.

Even so, Haig's nomination of Thomas O. Enders to head the department's Latin American affairs bureau is likely to be held hostage by Sen. Jesse Helms (R-N.C.) in an attempt to trade approval for promises by Haig to go slow on the land reform and economic changes in El Salvador that have infuriated Helms. "This is no place for on-the-job training," a Helms associate said.

The effort by Carter to hold together a linkage approach to El Salvador came apart in one tragic week last November, shortly after his own crushing defeat at the polls. On Nov. 27, six nonguerrilla politicians, leaders of the opposition Democratic Revolutionary Front, were kidnaped and killed in San Salvador by men the embassy believed had at least the protection, if not a direct link with, government security forces. Less than a week later, in an action that first focused the attention of most Americans on El Salvador, four American churchwomen disappeared while driving outside the capital. Their bodies were found three days later, with strong indications that the security forces again were involved.

Those events broke open problems that had existed for El Salvador's shaky coalition since its first day of existence, Oct. 15, 1979. And as the following weeks would show, they were problems that swirled not only through San Salvador's cool, high ceilinged Presidential Palace, but also through the hallways of the Washington policy-making bureaucracy.

The bloodless coup that put the coalition in power had gone off without a hitch, as a group of liberal young Salvadoran Army officers, simply informed then-president Carlos Romero that he and his aides would be leaving. Himself a somewhat faceless general, Romero was the latest representative of a system that for half a century had ruled a downtrodden peasant majority through feudal landownership.

In addition to two "progressive" Army colonels in the new junta, there were a civilian businessman and a Catholic university rector who was known to be among the strongest critics of military human-rights abuses. To round out the five-man junta, they added Guillermo Ungo, a social democratic politician whose 1972 vice presidential victory had been blatantly stolen by the armed forces.

For the Cabinet, the military insisted only on retaining control of the Defense Ministry, while other posts were filled with civilian political activists, liberal technocrats and even members of the local communist-front party.

All appeared to agree that the new government's goals were three—to end repression by government security forces, change the country's inequitable social, economic and political structures and prevent the left from taking over.

It was only a matter of weeks, however, before the weight of El Salvador's past, as well as its present, began to chip away at what began as a marriage of happy convenience. Although the goals might be the same, the priority, timetable and strategy for achieving them were not.

The arguments within the government tended to go in circles. As long as the military threat from the left persisted—guerrilla efforts to infiltrate and mobilize towns and villages and near daily armed strikes against armed forces installations—it was difficult to rein in the government troops. Yet, the civilians argued, as long as the troops continued to rampage, indiscriminately killing citizens while seeking subversives, the population would continue to distrust the government and be open to the left.

Immediate and extensive reforms, as promised, were also vital to gaining popular confidence in the government, the civilians argued. Yet a powerful minority in El Salvador, those who owned the large plantations designated to be expropriated under land-reform proposals, and those who ran the banks to be nationalized, wanted no reforms at all.

Many in the military, which as an institution had traditionally enjoyed a symbiotic relationship with the economic oligarchs that kept both groups in power, wanted to go more slowly with the reforms, or scrap them altogether.

In the first four months following the coup, the only thing that changed for most Salvadorans was that more of them died in politically motivated warfare including the guerrillas, the military and free-lancers who sold their services to the highest bidder.

By early January, all civilians in the government had resigned, protesting what they charged was continuing military repression.

Less than two months later, many of them also resigned, again charging that the armed forces were out of control.

José Napoleón Duarte, the populist Christian Democratic leader who had recently been allowed to return from seven years of exile in Venezuela, was made a junta member. Ironically, Ungo had been his running mate when he won the 1972 presidential elections that the military overturned.

In Washington, policy-makers and analysts in a dozen different government departments

were undergoing similar debates. While the U.S. military relationship with the Salvadoran government had been severed amid charges of human rights abuses early in Carter's term, many officials—particularly in the Defense Department—argued that it should be reinstated as a show of confidence in what was still largely a military regime.

Advisers in the National Security Council and a number of Latin American experts in the State Department agreed. "Military assistance is an essential component of any strategy in El Salvador," one official said recently of the debate at that time. "They are the center of power, and most of what you want, you have to get from them, or with their approval."

Unless the Salvadoran armed forces could be offered a carrot in the form of a military relationship with the country that had long been their mentor, they might continue to balk at taking a firm hand against human rights abuses.

While others within the administration argued that the Salvadoran government—meaning the military—had shown no great sincerity in its efforts to stop repression and thus deserved an ongoing stick rather than a carrot, the case for military aid was bolstered by alarming intelligence reports, coming from both Defense and the CIA, of growing guerrilla strength and increased Cuban involvement in training and advising the left.

Several of the leftist groups had also announced the formation of a coalition to fight the government, an ominous sign indicating strength among previously bickering factions.

Listening to both sides, Carter opted for a compromise. In December, the White House sent to Congress a request for a small military training program, with no equipment included, designed to make the Salvadoran military more efficient and humane.

At the same time, he accepted, in theory, a proposal drawn up by the State Department policy planning office to send $50 million in economic aid to the Salvadoran junta, along with up to $7 million in military sales and credits and 36 U.S. Army advisers.

In exchange for the military aid, the department asked for immediate implementation of the still languishing agrarian reform and bank nationalization programs. After extensive negotiations with junta member Col. Jaime Abdul Gutiérrez and Defense Minister José Guillermo Garcia and his armed forces associates, a deal was struck.

In Washington, however, priorities had changed. The president who carried a humanrights banner "wasn't that comfortable at any time with military aid," one official said. In addition, when word that the program was under consideration had leaked to the press, a number of influential Democratic congressmen had personally protested, and Carter had received a letter from San Salvador's powerful archbishop, Oscar A. Romero, a leading human rights activist, urging that all military aid to the junta be stopped.

Guerrilla action at the time was steadily increasing and appeared to have shifted from urban areas to the countryside, where leftist leaders hoped to establish small zones of "liberated territory" from which to launch a coordinated offensive. Many of these areas, from which peasants fled in fear of what was to come, became virtually off limits for the armed forces.

In San Salvador, however, Carter had installed a new ambassador, Robert White, who disputed most of the CIA and U.S. military claims that Cuba and Nicaragua were materially aiding the leftists. White brought in a new intelligence staff and strongly disagreed, through cable channels to Washington, with what he said in congressional testimony last month were "frequent" recommendations by the embassy military group to send in U.S. advisers.

"The intelligence community in Washington and their representatives in Central America," White testified, "were on a constant state of alert to find any evidence of armaments coming in to support the guerrillas." Until reecntly, he said, "there was never any convicing evidence of this.

"I think that there is a driving need, which I do not pretend to understand, by the American military to involve themselves on the ground in Central America."

State Department Latin American chief John Bushnell has briefed a number of congressional committees and testified as often as White, whose figures and analysis of the Salvadoran situation he consistently disputes. The United States, Buhnell points out, sent no guns or bullets at all to El Salvador between January 1977 and January 1980. It was the Communists who started the escalation of armaments, Bushnell said last week.

At the same time, Bushnell said that the Salvadoran government "is trying very hard to bring [military abuses] under control" and promised reforms are well under way.

White testified that on Jan. 19, the last day of the Carter administration, the head of the embassy military group asked his approval to send the Pentagon a request for immediate dispatch of 75 U.S. military advisers to El Salvador. "I asked him how he could possibly justify presenting me with a message that would totally change U.S. policy on the eve of a new administration," White said.

"He told me there was severe pressure from the Pentagon and from Southcom [the U.S. military Southern Command headquarters in Panama] to have this message before the new administration," White testified. "I refused to let it go out and explained that my whole purpose over the past four or five months was to work to keep the situation in such a way that the new administration would have time to consider what choices it should follow in El Salvador."

But despite White's concerns, and Carter's sporadic efforts to place his Central American policy emphasis on right rather than might, a number of decisions placing the Pentagon on the ground there were already made for Reagan.

As early as last spring, the Carter administration was taking some of the intelligence—and pressure from the U.S. military—seriously enough to begin substantially hedging its bets on peaceful reform in Central America. With little public or congressional notice, the focus of U.S. military activity was switched to neighboring Honduras—a country with little or no domestic guerrilla movement, a relatively peaceful military government in transition to civilian rule and long borders with both Nicaragua and El Salvador.

It was along that border that the guerrillas had established some of their most impregnable strongholds—entire communities that gradually were emptied of their fleeing population, which poured into refugee centers in the Honduran hills.

In the spring, an administration proposal to send $5.7 million in "nonlethal" military transportation and communication equipment was hotly debated and finally approved in Congress. Little attention was given at the time to another section in the same proposal authorizing $3.5 million in military aid to Honduras, including "$555,000 to equip and support units patrolling Honduran border areas . . . $2 million to equip and support one engineer battalion and $354,000 toward the purchase of miscellaneous equipment" such as "Marine communications, small arms and patrol boats."

Also included were at least 10 U.S. helicopters, with U.S. military trainers, and $620,000 to pay the personnel and upkeep of the equipment.

During public hearings last March, a Pentagon spokesman testified that the equipment was needed because "Honduras plays a key role in the movement of men and materiel to El Salvadoran insurgents. The Hondurans believe," said Pentagon official Franklin D. Kramer, "and our intelligence agrees, that their territory is being used as a conduit for men and weapons into El Salvador by insurgents with Cuban support, and they are also concerned that should El Salvador fall to the extremist left forces, Honduras will be among the next primary targets."

According to military sources in Honduras, 54 U.S. military advisers arrived in that country to give four-to-six month training programs in rural counterinsurgency between July and December. Sixteen more advisers on a rotating program, the sources said, arrived last Jan. 15.

Some U. S. officials dispute the purpose of the buildup, maintaining it was designed to facilitate U.S.-Honduran cooperation in resupplying the Salvadoran military in the event of a large-scale insurrection, to facilitate the shipment of arms to the Salvadoran government from third country sources across Honduran territory and to prevent the use of Honduran border areas by Salvadoran guerrillas seeking safe havens.

A similar scenario was presented last November in a so-called "dissent paper," allegedly written by anonymous administration officials opposed to the Carter policy and widely circulated in Washington. Although administration officials at the time discredited the document, as does the Reagan State Department, one high-level source from the Carter administration now says that the information in the document was "essentially true."

By fall in El Salvador, both the political and military battle had sharply escalated. Bickering guerrilla factions had announced their unification under the banner of the "Farabundo Marti National Liberation Front." Ungo's social democrats, dissident Christian Democrats and a wide assortment of political, union and professional groups had formed their own coalition and joined the guerrilla command in an umbrella "Democratic Revolutionary Front," headquartered in Mexico.

But it was a rapidly unfolding series of events at the end of the year, beginning with Carter's electoral loss, that sent his often conflicting carrot-and-stick policy into a virtual roller coaster ride.

Just after Reagan's electoral victory in early November, the Salvadoran guerrillas announced they were preparing for an all-out offensive that would present the new American president with a *fait accompli* of leftist control on inauguration day.

While few in the U.S. Embassy in San Salvador took the threat seriously on its face, it coincided with new intelligence that former naysayers, including White and U.S. Ambassador to Nicaragua Lawrence Pezzullo, began to take seriously.

Newly obtained intelligence photographs, captured witnesses and a group of documents obtained in a raid by Salvadoran security forces on a guerrilla safehouse all pointed in the direction of newly coordinated arms shipments from Soviet Bloc countries into Cuba and through Nicaragua to El Salvador. Once again, debate picked up within the administration over an increase in U.S. military aid to El Salvador.

It was then that the killings of the six politicians and the American churchwomen stopped the debate in its tracks.

Although Carter immediately and angrily suspended all U.S. military and economic

assistance to the Salvadoran junta while the deaths of the Americans were under investigation, "reform" of the security forces was quickly overtaken by the need to counter leftist revolt—the declaration of a "final offensive" against the junta and the launching of a series of coordinated guerrilla attacks on Jan. 10.

While the guerrilla offensive was quickly defeated, Reagan entered office on Jan. 20 with a $10 million program of "lethal" U.S. military aid to the Salvadoran armed forces well underway, a packet of captured documents indicating communist weapons shipments to Salvadoran guerrillas and a Carter-written plan to send additional U.S. military advisers there lying on his desk.

Ironically, and perhaps more conveniently than is comfortable for many who served in the Carter administration, those programs, plans and documents reflect what the most conservative of Reagan's foreign-policy advisers long ago warned of and programmed for in El Salvador.●

PHARMACY CRIME A NATIONAL PROBLEM

● Mr. SASSER. Mr. President, on January 5, I introduced S. 20 which would make the robbery of drug stores a Federal crime. The response I have received from various pharmacists has convinced me further of the need for this legislation. However, few of the letters I have received are more convincing than the one I recently received from Kenneth E. Harris, a registered pharmacist with a business in Cleveland, Tenn.

Cleveland is a small peaceful town near Chattanooga in southeastern Tennessee. Although small, Cleveland is not immune from crime against its drugstores. Mr. Harris' letter describes a long series of pharmacy crimes against his one retail business. It is powerful testimony about the crime in his profession.

Mr. Harris is not only a determined and dedicated small business owner, but also lucky. Many pharmacists have lost their lives in their line of business. There is no reason that these men and women who are dedicated to the public welfare should be forced to live in daily fear for their lives and property.

This letter is just one example of the need to bring the power of the Federal law enforcement to bear against pharmacy crimes.

I ask that Mr. Harris' letter be printed in the RECORD.

The letter follows:

U.S. SENATE,
Washington, D.C., February 10, 1981.

Senator JIM SASSER,
U.S. Senate,
Committee on Appropriations,
Washington, D.C.

DEAR JIM: I was so pleased when I received your letter dated December 29, 1980 pretaining to the problems of drug store robberies. I have been a registered pharmacist over 33 years and this is something dear to me. And I cannot understand why it hasn't been discussed before now. I opened a new store on February 23, 1973 and the store burned completely (Arson according to Mr. Creed Wooten, State Fire Marshall) but no one was ever found. The store was completely stocked to open on Monday, February 27th, but it burned on Sunday morning early, total loss.

I moved a trailer in on the lot below the store, had it reworked inside for a drug department, and opened a week later. I worked out of the trailer for 3 months. I had two robberies (taking all scheduled drugs, and all bottles that were unopened, of everythings in 500's and 1,000's). I had two of these same types robberies in one week, and it cost me about $7,000.00, because I could not get insurance on the trailer. I called the DEA office in New Orleans and they just said "make out a list of what I could remember that was stolen and send to them." No one called on me to verify what I had written them. No one was every caught.

I moved into my new store (refinished from the burned out) on March 1st, 1974, and two week later a boy whom I had known all his life broke into the store. The police both county and city were here in 2 to 3 minutes. He was caught, he had just turned eighteen and was on probation from the detention home in Pikeville at the time. He threw a block through a large plate glass window, and in the process of coming through the hole, he cut his hand. The windows were secured by infrared rays. His parents were drug users and he was out trying to steal at 4:30 a.m. I was told at the Bradley County Courthouse and the Sheriff's office that I would be notified of his case. They did call me at the drug store and said he was to be tried on Friday at 9 a.m. I went to the court room and could not find anyone, I finally went into another room where a jury was, and they told me that his case had been tried on Wednesday and Judge Witt turned him loose because it was his first offense.

This boy has been in trouble ever since, and it cost me $277.00 to have the window replaced. I was robbed again in 1974, and by this time I had bugged every door and ramp in the Rx department, and I thought sure we could catch anyone who tried to get in. But, this time they cut the top off of the air-conditioning unit on the roof. They cut the large nuts, bolting the rods to the top of the air-conditioner. They slid the rods out and took out the filters and slid down the outtake of the unit, which involves about 15' to 20', kicked out the plastic cover in the ceiling and came on down on a rope, they noticed all the doors were closed. knew that I had an alarm system thru the city and county police, from previous robberies, so they went back up the unit and got on the duct work of the air-conditioner (which is suspended from the steel beams by a wire, around the duct-work to hold it in place), but they crawled along the duct work, came down into my office, got all the narcotics and climbed back up over the door into the prescription department, and stole every bottle of Valium, Mellaril, Thorazine, Librium, and all 1,000's in these and every other drug in 1,000's and 500's. They climbed back up into the overhead and came down in the main part of the store and stole all the watches, billfolds, rings (all jewelry, and everything they thought they could sell, over $6,000 wholesale).

I made up my mind to do everything I could to prevent this from happening again. I had a silent alarm system put on the roof attached to the TV antenna. It will break any beam on the roof from walking, or on the side of the building or roof. I webbed chicken wire between the ceiling and the roof, attached to the alarm system. The police told me that I was the only pharmacist that had enough equipment to give them a chance to catch the thief.

I wasn't bothered until June, 1980. This time someone broke out the large plate glass window again, but did not come in. Just testing the police response to the call. The police were here in their fire unit in 45 seconds, and the third unit in 1½ minutes. The next week (Sunday night) the top of the air-conditioning unit was removed again. The alarm went off while the burglar was on the roof, and when I got here in about 3 minutes, there were 3 city cars, and 3 county cars parked in a half circle, all lights shining directly into the store. I eased up to the door and the Sergeant said he was trying to get away, but he was still coming down thru the air-conditioner. I opened the door very easily and 6 policemen and one policewoman eased in and down the side and front and just as he dropped to the floor he had two guns on him and another policeman walked down the center aisle and put the hand-cuffs on him. He was put in jail, but later bailed by a professional bondsman. The next Sunday they left me alone, but the next Sunday, they drove the lock out of the front door jammed them open and set off the alarm. No one was caught, but we figured all three were the same person.

Jim, if you check statistics you will find that more registered pharmacists were killed in the City of New York the past three years than policemen. Your policemen are taught protection under all conditions, but a pharmacist is prime picking for drug addicts and those who steal and kill for a living.

In the four weekends in November, I had three breakins, one entry by force that we caught. But each of these breaking cost me $300.00. No insurance company will insure 100 percent loss. I had a $100.00 deductible, the window breaking cost me $100.00. It cost me $300.00 for someone to break into my store.

Now I have the bars on top of the air-conditioner welded and a solid steel plate welded on the top at each end. It would take a crane to remove the top of the air-conditioner so someone could get in.

They were to have the Blankenship man's trial at 9:00 a.m. on a Tuesday morning in January, I was asked by the police and the D.A. to be there to identify him. I was there at 8:45 a.m., but Blankenship had skipped the night before with a girl to Florida. I left my store without a pharmacist hoping to be here by 9:45 a.m. The assistant D.A. informed me about 9:30 that there would be no trial. They wanted to make sure I was there, but no one checked on the Blankenship man to see if he would be there. Here it is, February 10, 1981, and they still have not found him. You very seldom hear of a drug store being robbed for money alone, it is always drug related.

Jim, I wish you sincere luck in this and hope that you will have your bill passed by 100 percent.

Thanks for listening,

Yours truly,

KENNETH E. HARRIS, RPh.,
University of Tennessee—'48.●

AMERICA'S FORGOTTEN MEN

● Mr. SASSER. Mr. President, the March 9, 1981, issue of Newsweek contains an article worthy of the Senate's attention. Written by Suzanne Lowe Wilke, of Memphis, Tenn., the article details the disappointments, problems, and barriers facing the veterans of the Vietnam era. I commend Ms. Lowe on her highly readable message to America.

These are times which are rapidly producing voices of concern, Mr. President. The new administration has called for $800 million in budget cuts from the Veterans' Administration, cuts which will affect the way in which America's vets are served by the one agency expressly created to assist them.

In the past, the Senate has regularly supported measures to improve benefits and programs for the veteran, his dependents, and survivors. I urge my colleagues to read Ms. Lowe's article, and reflect upon it.

And to our Vietnam veterans, may I say, "We have not forgotten you."

Mr. President, I ask that "America's forgotten men" be printed in the RECORD.

The article follows:

America's Forgotten Men

With the return of the American hostages, our country has come alive with a renewed self-respect and sense of unity. For 444 days we made these hostages symbols of American honor, and their conduct and strength has made us proud.

During the last few weeks we have also witnessed an outpouring of distress from many veterans of the Vietnam War who have compared the recent festivities with their own homecoming and subsequent treatment.

As the wife of a Vietnam veteran, I have long been concerned and disappointed by the lack of caring and gratitude shown these men. Our country had never before experienced such a war, so maybe it really wasn't so surprising that we didn't know how to deal with the men who fought it.

Perhaps in our haste to rid ourselves of the unresolved feelings of that debacle, we chose to forget not only the war, but also the men who served in it. And this may be the greatest tragedy of those years.

Support: Early on, these servicemen were treated differently from others our country had sent to war. In World Wars I and II, men were usually assigned to a unit and stayed together through training and overseas duty. This fostered a sense of camaraderie, and friendship that was as sustaining to them as the knowledge that their country was vitally interested in and supportive of their efforts.

In contrast, men sent to Vietnam were usually assigned to units after their arrival there and were frequently moved from unit to unit. Their different departure dates made it hard for them to develop a cohesiveness and sense of mutual support. The soldiers' psychological isolation was aggravated by their awareness of the indifference and even contempt of the country they were serving.

My husband's return in 1970 was probably typical of many homecomings. Within a week, he had made the enormous leap from fighting in a war zone to resuming his studies on a college campus.

For him there was no decompression period provided, no organized opportunity to share experiences. There was no effort to help those who had killed other human beings deal with this fact in their lives.

In most communities, veterans returned to virtually no recognition, often meeting with hostility and ridicule. It is no wonder that some of these men endure mental anguish to this day. Although many of the psychological wounds are directly related to war experiences, there is no doubt that much of the anger and depression these veterans feel is a result of the shabby treatment they received from their country.

I am glad to see more veterans speaking up on their own behalf. However, it is a sad sign of the nation's continuing indifference that these men have to demand attention from the country they have served.

Honor

My husband's consolation (and mine) is that he survived the war with no physical or psychological wounds. We can only imagine how different it must be for those who were not so lucky. As for the families of the men who died—where do they look for consolation?

By denying public honor to the survivors of the war, we have shamefully denied this honor to those who sacrificed their lives.

We owe the living more than mere acknowledgment. Many veterans remain unemployed, and many have found that government benefits for this generation of servicemen are not as generous as in the past. Our government has been slow to remedy these problems properly. Disabled veterans have suffered a harsher blow, finding an even smaller job market and fewer opportunities to be part of the mainstream. These men have found they must publicly demonstrate or be ignored. They should not have to beg for equity.

The time has come when we, as a people, must stop running from the facts of this situation. We must turn and face these men and ourselves. This won't be easy, for we, as a people, are not easily introspective. And yet I am optimistic. I have seen our country pull together these past weeks, with an outpouring of thanks to our fellow countrymen who have been the rallying point for a revival of patriotism. This has not been an orchestrated effort from our government. It has been a grass-roots movement, sincere and heartfelt.

In the same spirit, we can't wait for a national effort to coordinate our feelings toward the men who served in Vietnam. Each community need only look within itself. The men are there and they deserve to receive individual attention and praise. Churches and civic organizations should recognize the service of these veterans. Local newspapers could feature these men and their stories. They would be an inspiration to high-school students if they were invited to assembly programs or rap sessions.

Heroes

The key is to break through the anonymity and to recognize these men as individuals. They are not asking for sympathy. They are asking this country finally to acknowledge their sacrifice and service. Our nation owes them respect and gratitude. As the former hostages discovered, we Americans know better than anyone how to express these emotions. The heroes of Vietnam live in every community across our land. Must we make them wait any longer? ●

79-059 O - 1984 - 15 - (Vol. 127 Pt.4)

HOUSE OF REPRESENTATIVES—*Friday, March 13, 1981*

The House met at 11 a.m. and was called to order by the Speaker pro tempore (Mr. PRICE).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
March 11, 1981.

I hereby designate the Honorable MELVIN PRICE to act as Speaker pro tempore on Friday, March 13, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We come before You, O Lord, with the earnest petitions of our hearts, asking that You strengthen our desire to be faithful to the calling You have given us. Encourage us that we would use our talents and abilities to serve people in need and thus fulfill the law of love. We remember particularly all those with special need this day, those who are anxious about their lives or feel abandoned without hope. May the full measure of Your grace fill our souls that we may go forth with the knowledge that You are with us always. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

A MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 31. An act to amend the Truth in Lending Act to encourage cash discounts, and for other purposes.

The message also announced that the Senate agreed to the following resolutions:

S. RES. 89

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (A) of section 225(f) of such act (2 U.S.C. 356(A)), relating to Members of Congress.

S. RES. 90

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (B) of section 225(f) of such act (2 U.S.C. 356(B)), relating to certain positions in the legislative branch.

S. RES. 91

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (C) of section 225(f) of such act (2 U.S.C. 356(C)), relating to certain positions in the judicial branch.

S. RES. 92

Resolved, That, with respect to the recommendations of the President which were transmitted to the Congress with the President's budget for fiscal year 1982 pursuant to section 225(h) of the Federal Salary Act of 1967 (2 U.S.C. 358), the Senate disapproves the recommendations for increases in rates of pay for positions described in subparagraph (D) of section 225(f) of such act (2 U.S.C. 356(D)), relating to certain positions under the Executive Schedule.

The message also announced that the Vice President and upon the recommendation of the minority leader, pursuant to section 276 of title 22 of the United States Code, as amended by Public Law 95-45, appointed Mr. BURDICK (vice chairman), Mr. WILLIAMS, and Mr. CANNON to attend, on the part of the Senate, the Interparliamentary Union Conference, to be held in Manila, Philippines, April 20 to 25, 1981.

NOT THE ONLY SHOW IN TOWN, AN ALTERNATIVE

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. PEASE. Mr. Speaker, I take this opportunity to let my colleagues know that yesterday afternoon I unveiled an alternative Federal budget for fiscal year 1982, solely the work of myself and my own staff, but a budget which I think is more fair, more realistic, and more fiscally responsible than the budget submitted to us a month ago by President Reagan.

It is a budget which is not $45 billion in deficit, as President Reagan's budget is, but rather which has a $10.8 billion surplus.

I invite the attention of my colleagues to this alternate budget. I would be happy to provide copies to them and I insert in the RECORD here some information which will give a general description of that effort.

Mr. Speaker, I add the following:

STATEMENT BY CONGRESSMAN DONALD J. PEASE, MARCH 12, 1981

President Ronald Reagan has captured the imagination of the American public with his bold economic recovery plan.

He has proposed deep cuts in federal spending at a time when most Americans believe that that is exactly what's needed, when Americans believe that government has grown too big and burdensome.

To those who have criticized specific parts of his program, the President has said "Mine is the only game in town. Some criticize my plan, but they don't offer any alternative".

To date, that has been true. Criticism of specific cuts is common, but no overall alternative budget strategy has been offered.

It seems to me that any alternate budget strategy—especially if it is offered by Democrats in the face of President Reagan's enormous popularity—can't be just another plan. It must be based on a set of criteria the public will buy.

It must make the deep cuts in government spending the American people want.

The cuts cannot spare the programs like food stamps and AFDC whose eligibility standards can certainly be tightened up without hurting the truly needy.

The alternative program must include many of the Stockman-Reagan cuts, the ones commonsense dictates should have been made long ago.

But other criteria must be met as well by any alternative plan.

It must lay claim to being more fair than the President's plan.

It must spread its cuts more evenly across the whole range of governmental expenditures.

It must not roll back the social progress made in this nation over several decades.

It must assert that, if the poor and the middle class are to suffer, tax loopholes for corporations and wealthy Americans should also be closed.

It must stress government savings—making government more efficient—as a way of cutting the budget.

It must be more realistic than the President's budget.

Finally, it must be more fiscally responsible than the President's budget.

Today, I offer an alternative federal budget for fiscal year 1982 which I believe meets all of those criteria.

It is not the Democratic alternative. It is a Democratic alternative in the sense that it is an alternative and I am a Democrat.

Essentially it is my personal alternate budget developed solely by myself and my staff over the past three weeks. It is my personal response to President Reagan's challenge for Congress to devise a better plan than his if it can.

Frankly I believe my plan is a better plan—fairer, more even-handed, more realistic, more fiscally responsible. And I intend to seek the support of my colleagues in the Congress. I have sent copies of my budget not only to the President but also to the House leadership and to Chairman James Jones of the House Budget Committee.

Now to the plan itself. Here are the highlights:

It incorporates many of the spending cuts proposed by President Reagan, especially those designed to improve governmental efficiency.

It rejects some Reagan cuts (such as elimination of the Legal Services Corporation) as being too harsh on low-income Americans.

It spreads the spending cuts more evenly across all activities of the federal government and picks up additional savings by further efforts to curb waste and mismanagement.

It envisions federal revenue of $732.4 billion, federal spending of $696 billion, and a budget surplus of $10.8 billion for fiscal year 1982.

It identifies $39.9 billion in spending cuts, $11.8 billion in user fees (such as President Reagan's proposal for Coast Guard services to lake and ocean ships) and $14.1 billion in tax loopholes that Congress should close as a way of balancing the federal budget and bringing it into surplus.

It makes provisions for $20 billion in business and individual tax cuts.

It envisions reform of depreciation schedules for business firms to encourage greater investment in productive machinery and equipment.

It allows for an increase in defense spending of $23.8 billion over fiscal year 1981 for a real growth rate of 3 percent.

It identifies $14.7 billion in waste and mismanagement in the Department of Defense which, if eliminated, would permit an additional 7.7 percent real growth in defense spending.

NEWS FROM CONGRESSMAN DON J. PEASE

WASHINGTON, D.C., March 12, 1981.—President Ronald Reagan has repeatedly called his budget proposals "the only show in town" and has challenged Members of Congress to come up with alternatives if they disagree with his budget proposals.

U.S. Congressman Don J. Pease, D-Ohio, today responded by unveiling a proposed federal budget for fiscal year 1982 with a surplus of $10.8 billion.

The Pease surplus budget contrasts with a $28 billion deficit proposed by President Carter and a $45 billion deficit proposed by President Reagan.

Pease called his budget proposal more even-handed and more realistic than the Reagan budget forwarded to Congress on Tuesday.

"Without doubt," Pease said, "severe spending cuts must be made this year, but those cuts should be made with a scalpel, not a cleaver."

While incorporating many of President Reagan's spending cuts into his own budget, Pease said the $40 billion in spending cuts he is proposing are more evenly distributed across the spectrum of federal government activities than the $40 billion in cuts proposed by President Reagan.

Additionally, Pease's budget proposes the closing of $14 billion in tax loopholes "so that ordinary people who suffer from spending cuts will know that sacrifice is also expected of corporations and high-income individuals."

The only spending area to be increased under Pease's budget is national defense. It shows an increase of $23.8 billion, or 3 percent in constant dollars, so that "we can maintain commitments to our NATO allies," Pease said.

The Pease budget identifies savings opportunities in the Department of Defense which, if accomplished, would boost effective defense spending by another 7.7 percent.

"My budget is more realistic than the President's in that it does not promise to pay for a tax cut with borrowed money," Pease said. "Clearly, the President plans to put his budget $45 billion into the red so he can provide a $44 billion tax cut for individuals.

"To put it plainly, that is inflationary," Pease said.

Pease's budget makes provision for $20 billion in unspecified tax cuts, which he said should be divided evenly between individual tax relief and depreciation reform for business.

Pease acknowledged that the $10 billion he has in mind for individuals falls short of Reagan's proposals.

"But national opinion polls consistently show," said Pease, "that Americans are more concerned about inflation than tax reductions."

"A major slow-down in inflation is the best bonus any American could receive in 1981 or 1982," Pease said. "My balanced budget and $10.8 billion surplus will signal that at long last the federal government is serious about combating inflation. President Reagan's $45 billion deficit will send exactly the opposite signal."

"In fact," Pease said, "I will recommend that the $10.8 billion surplus be applied to paying off the national debt."

Pease, a member of the House Ways and Means Committee, cited testimony of numerous economists that the Reagan 10 percent across-the-board tax cut would actually feed inflation, not combat it.

The Ohio Democrat said he has sent copies of his proposed budget to President Reagan; to David Stockman, director of the Office of Management and Budget; to House and Senate leaders of both parties; and to House and Senate Budget Committee chairmen.

James Jones, chairman of the House Budget Committee, said, "I commend Congressman Pease for his excellent work in preparing an alternative budget strategy for FY1982. The House Budget Committee is committed to completion of a fair and fiscally responsible budget, and we will take Congressman Pease's plan fully into account. He has done us a great service by devoting so much time to his own ideas for budget cutting."

Pease said that his alternative budget is solely the work of himself and his staff.

"Now that my proposal is complete," he said, "I will actively seek support for my ideas among my colleagues in Congress."

In identifying possible spending cuts, Pease said, he relied heavily on reports of the General Accounting Office, the Congressional Budget Office, and the National Tax Limitation Committee as well as the budget documents of Carter and Reagan.

"In fact," said Pease, "I want to pay tribute once again to budget director Stockman for ferreting out many budget cuts that can and should be made. I was glad to include some $15 billion of the Stockman-Reagan cuts in my own budget proposal."

NEWS FROM CONGRESSMAN DON J. PEASE

WASHINGTON, D.C., March 12, 1981.—Congressman Don J. Pease, D-Oberlin, who today unveiled his own Fiscal Year 1982 federal budget as an alternative to that of President Reagan, said that the key features of his budget are:

It incorporates many of the spending cuts proposed by President Reagan, especially those designed to improve governmental efficiency.

It rejects some Reagan cuts (such as elimination of the Legal Services Corporation) as being too harsh on low-income Americans.

It spreads the spending cuts more evenly across all activities of the federal government and picks up additional savings by further efforts to curb waste and mismanagement.

It envisions federal revenue of $732.4 billion, federal spending of $696 billion, and a budget surplus of $10.8 billion for FY82.

It identifies $39.9 billion in spending cuts, $11.8 billion in user fees (such as President Reagan's proposal for Coast Guard services to lake and ocean ships) and $14.1 billion in tax loopholes that Congress should close as a way of balancing the federal budget and bringing it into surplus.

It makes provision for $20 billion in business and individual tax cuts.

It envisions reform of depreciation schedules for business firms to encourage greater investment in productive machinery and equipment.

It allows for an increase in defense spending of $23.8 billion over FY1981 for a real growth rate of 3 percent.

It identifies $14.7 billion in waste and mismanagement in the Department of Defense which, if eliminated, would permit an additional 7.7 percent real growth in defense spending.

NEWS FROM CONGRESSMAN DON J. PEASE

WASHINGTON, D.C., March 12, 1981.—Americans spend millions of dollars each year subsidizing insurance for the furs and jewels of wealthy New York residents.

Congressman Don J. Pease (D-Oberlin) found out about it while compiling an alternate budget to the one presented to Congress by President Ronald Reagan.

Pease identified $40 billion in spending cuts, many of them clear abuses of the taxpayers' dollars.

The insurance subsidy is part of a crime insurance program adopted by Congress in 1968 in response to a need in urban areas where insurance was either too expensive or unavailable.

Now, Pease says, 85,000 individuals and business firms take advantage of the program at a cost to the federal government of $30 million per year. Of the 85,000 policies, 54,000 are in New York City.

Pease proposed elimination of the entire program.

OIL INDUSTRY PROFITS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, yesterday I was told by a member of the administration that it was just fine that 40 percent of U.S. manufacturing sector profits are now going to the large oil companies because it promoted new investment in oil resources in this country.

This morning I see in the Washington Post that the Standard Oil Co. of Ohio is paying $1.8 billion to acquire Kennecott Copper Co.

I stand here as one consumer to say that I am tired of spending money at the gas pumps to see the oil companies use that money to buy grocery stores, department stores, and now copper companies.

I am not antioil. There is a need to explore for more oil resources in this country. Many of our independent producers are doing a good job. But I think that there are far too many small businesses going bankrupt, partly because of high energy prices, while the oil companies, instead of going bankrupt, are going to the banks.

U.S. consumers are driving to the gas pumps to pay OPEC oil prices, making the oil companies so rich that they can use much of those profits to purchase things outside of the oil industry, things that have nothing to do with the energy needs of this country.

I think it is time for the Congress to wake up on this issue.

GUAM VETERANS' CEMETERY LONG OVERDUE

(Mr. WON PAT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WON PAT. Mr. Speaker, for decades young men and women from Guam have served this Nation with pride and dignity. The Guamanian tradition of unquestioned service to this country is second to none. Yet, I regret to say that the Federal Government has not given the veterans of Guam the tribute they deserve.

The U.S. Veterans' Administration informs me that Guam has an estimated 10,000 veterans. This, out of a population of only 105,000 by the most recent census count. These are additionally over 5,000 residents of Guam on active duty with the U.S. Armed Forces. Despite this most impressive turnout by our young people, the Veterans' Administration has yet to put a full time VA office on the island or to establish a Federal national cemetery there.

The legislation I introduce today will, if passed into law, create a national cemetery on Guam. I believe that the establishment of a veterans cemetery is long overdue for Guam. It is a fitting memorial to the thousands who have given their lives or health to fight for America.

There is ample federally owned land on Guam which could be used to site the cemetery. From my discussions with VA officials, it is clear that the cost to the Federal Government for this legislation would be very low largely because the land would be free and the proposed project is not large by mainland standards.

The important question facing the future of this measure is not cost, however. It is whether America is ready to honor the veterans of Guam. I hope this Congress will show that Guam's loyal veterans are not America's forgotten veterans. Thank you.

SIXTY-FIVE DAYS—THREE BILLS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, it was bad enough this week when this House considered just one piece of legislation all week.

But I have just been handed the schedule for next week and, Mr. Speaker, there is not one single piece of legislative business scheduled.

In fact, Mr. Speaker, this 97th Congress has been convened for 65 days—and during those 65 days we have acted on just three bills.

So here it is the third week in March—a time when the American people are desperate for action to salvage the American economy—and we sit here on the House floor twiddling our thumbs.

Mr. Speaker, if the only order of business around here is going to be no business, then I suggest we shut off the lights and the heat, turn off the television cameras, and stop the presses on the CONGRESSIONAL RECORD—and save the taxpayers some money. At the rate we have been going, no one will notice the difference.

Mr. Speaker, let us get moving.

SOIL CONSERVATION TAX INCENTIVES ACT

(Mr. EVANS of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Iowa. Mr. Speaker, I am today introducing the Soil and Water Conservation Incentives Act of 1981, a bill to allow an investment tax credit for soil and water conservation expenses. This legislation is identical to S. 569, introduced in the Senate on February 26, 1981, by the senior Senator from Iowa, the Honorable ROGER JEPSEN. I am pleased to join him, as a fellow Iowan, in this effort to promote sound soil and water conservation policies and practices, particularly at a time like this when economic burdens limit the ability of the individual farmer and landowner to commit his own financial resources toward conservation investments.

The rich agricultural lands of this Nation represent one of our most valuable assets but, like other natural resources, require careful management and conservation on our part if the quality and quantity of that resource is to be maintained. The State of Iowa, I am proud to say, leads the Nation in funds and services committed to conservation districts. As a Member of the House from Iowa, as well as a member of the Subcommittee on Conservation, Credit, and Rural Development of the House Agriculture Committee, I believe we must provide sufficient incentives at the national level which will encourage farmers and landowners to take seriously their stewardship of this Nation's soil and water resources. The legislation I am introducing today seeks to offer that kind of incentive. It provides a choice to those who incur conservation expenses by permitting them to either take a full deduction the year the outlays actually occur or, if they prefer, to take a 10-percent investment tax credit the year of the initial investment, with deductions that year and following years according to the standard depreciation schedule. I might add that the Internal Revenue Code already allows for deductions for certain land management and conservation expenditures listed therein.

The problem we face with respect to the deterioration of our land and water resources is more than a passing one. It has tremendous long-term implications for continued record crop harvests and, thus, for the ability of the agricultural sector to contribute to a favorable balance of trade for the United States.

Through service as a commissioner on my home county's soil conservation district, and as someone who operates 1,400 acres of Iowa farmland, I have seen firsthand the very urgent need for farmer incentives to make the needed changes to conserve our soil. The bill I introduce today could well be the vehicle to begin this badly needed process, and I would encourage my colleagues to consider this bill as a measure in the interests of all regions of the country, and as a bill which protects the interests of producers and consumers alike. I would welcome your support.

WHAT IS THE STORY?

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, those of us of a certain age can remember that great swing classic "Is You Is or Is You Ain't My Baby?" one of the great tunes to come out of the swing era. That title come back to me today when I saw two newspaper items, one on the front page of the New York Times, the other in the Christian Science Monitor.

The Times story was headlined: "Critical Approach to Reagan's Budget Is Urged by Wright." The story told of the distinguished majority leader's plea to his Democratic colleagues to take a critical, hardline approach to President Reagan's economic package of tax and budget cuts. The Times referred to Mr. WRIGHT's comments as "the latest example of a growing Democratic counterattack."

But in the Christian Science Monitor, our distinguished Speaker was quoted as saying President Reagan will get "more cooperation than ever offered before" between parties on any issue.

Mr. Speaker, will the real spokesman for the Democratic Party in the House please stand up? In the immortal words of that great song, is the Democrats or ain't the Democrats backing the mandate the American people gave President Reagan?

The articles follow:

[From the New York Times]

CRITICAL APPROACH TO REAGAN'S BUDGET IS URGED BY WRIGHT—HE BIDS HOUSE MEMBERS ACT—MAJORITY LEADER DISPATCHES LETTER TO HIS PARTY COLLEAGUES WITH SUGGESTIONS FOR ATTACKS

(By Steven V. Roberts)

WASHINGTON, March 12.—Representative Jim Wright of Texas, the majority leader, is urging his Democratic colleagues in the House to take a critical, hard-line approach to President Reagan's economic package of tax and budget cuts.

In a nine-page analysis of the Reagan program, which he sent to each of the 242 House Democrats, Mr. Wright asserted that the package "imposes a grossly unfair burden on those least able to carry that burden, those Mr. Reagan describes as the 'truly needy.'" In an accompanying letter, the majority leader suggested that members might use his analysis in preparing public comments about the Reagan proposals.

The letter is the latest example of a growing Democratic counterattack against the President's program. Party leaders maintain that they support the goals of the program and that it will receive expeditious consideration, and, saying that they recognized the need to hold spending down, the Democrats voted with the rest of Congress against a pay increase for Federal employees.

DEMOCRATIC ANGER GROWING

But Democratic anger at many of the proposed budget reductions and tax changes appears to be mounting daily.

For instance, Senator Howard M. Metzenbaum, Democrat of Ohio, punctuated a Senate Budget Committee hearing today by telling David A. Stockman, director of the Office of Management and Budget: "I think you've been brilliant. But I also think you've been cruel, inhumane and unfair. You're causing a perversion of justice for the poor, the middle class, the Northeast and the Middle West."

The United States Conference of Mayors agreed, attacking the President's budget proposals today in a 76-page analysis that contended that state and local governments were being asked to bear the brunt of the cuts.

KEY POINTS OF MEMORANDUM

Among the points covered in the Wright memorandum were these:

President Carter's rating in the first months of 1977 was actually higher than Mr. Reagan's in comparable opinion polls. "The lesson," Representative Wright adds, "is that newly elected Presidents tend to rank high in the polls, but it is a mistake to interpret these ratings as evidence of some specific, detailed 'mandate' for a particular set of Presidential proposals."

The American economy is not in "the worst mess since the Great Depression," as Mr. Reagan alleges. "By almost any yardstick," the memorandum contends, "the average American is better off today than ever before." As a result, Mr. Wright adds, there is "no justification" for accepting the Reagan argument that "Government is your problem."

Government spending and Federal deficits are not the "main causes" of inflation. Energy costs and interest rates contribute far more to rising prices.

The Reagan Administration is following a policy of "total silence" on energy issues, except to speed decontrol of oil prices, a decision that has increased petroleum prices by as much as 15 cents a gallon in some places.

Most economists have said that adoption of the President's "entire program" would not substantially reduce inflation. "What the President is asking," the memorandum asserts, "is that Congress and the nation risk everything on one roll of the dice, a mystic combination of tax cuts and spending cuts that are supposed to rout inflation, low productivity, etc., as the morning sun dissipates the evil vapors of the night."

Mr. Wright's memorandum is clearly designed to encourage and to help Democrats to ignite that "fire" of criticism in their public appearances. In strong language, he acknowledges that Mr. Reagan should receive "maximum cooperation" from Congress but then adds, "This does not mean that it is the duty of Congress to rubberstamp whatever the President proposes."

"The people want Congress to be cooperative," Mr. Wright wrote. "They do not want it to be supine."

In general, the Wright memorandum hit hardest on the allegation that while rich families would reap enormous tax breaks under Mr. Reagan's proposals, poor families would suffer from cuts in such programs as food stamps, child nutrition, unemployment compensation and public service jobs.

SPECIAL TAX BREAKS ASSAILED

Senator Metzenbaum chided Mr. Stockman for not proposing significant changes in "tax expenditures," provisions in the tax code that give breaks to special interests. "If you had done that," the Senator said, "you wouldn't have taken that much out of the mouths of hungry people."

Mr. Stockman replied that Mr. Reagan's margin of victory last November was a "mandate for cutting spending, not raising taxes." But the budget director added that his proposals were not "carved in stone," and that he would be open to "superior ideas."

Many Democrats seemed in shock after the November elections, and until recently have been reluctant to challenge a President who was riding high in the public opinion polls. But now that Mr. Reagan's specific proposals have been forwarded to Congress the Democrats have decided to get tougher.

As Representative Bill Alexander, Democrat of Arkansas, the chief deputy whip, put it today, "The plot thickens."

The problem facing Democrats, however, is agreeing on themes and positions that they can use to criticize the President. Accordingly, meetings have been held all over Capitol Hill in recent days, as Democrats struggled to decide what united, rather than what divided, their party.

Party leaders met this morning with Peter Hart, a political pollster, who told them that their current message was "confusing" and that they had to speak publicly with more "force and clarity," according to one participant in the meeting.

[From the Christian Science Monitor, Mar. 13, 1981]

INSIDE REPORT

House Speaker Tip O'Neill says he's having no trouble reading "the will of the people" on President Reagan's budget and tax cuts.

O'Neill has received 30,000 pieces of mail from constitutents telling him to support President Reagan's budget and tax cuts.

He says Reagan will get "more cooperation than ever offered" between parties on any issue.

O'Neill says he has been warned that only three members of the House Ways and Means Committee would vote for the Reagan package in its original form. But he sees "no division" between the parties as far as the need for tax cuts is concerned.

"There will be cuts," O'Neill promises, adding that "we'll meet the original [requested] cuts of $51 billion pretty close."

LOOKING FOR OIL ON WALL STREET?

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, this morning's newspapers report that Standard Oil of Ohio, a subsidiary of the British Petroleum Co., is offering to pay $1.8 billion to buy the Kennecott Corp., the largest copper producing company in the United States. The second largest copper company, Anaconda, already is owned by Arco, another major oil company.

Last week, Standard Oil of California, known to consumers as Chevron, proposed the largest merger in history, offering $4 billion to purchase AMAX, Inc., the third largest coal mining company in the United States.

In both cases, the price per share that is being offered by the oil companies is more than double the price the stocks were trading at when the mergers were announced. In other words, they are offering more than a 100-percent premium to buy these companies.

According to a recent study, the oil companies accounted for 40 percent of all profits reported in 1980 by publicly traded manufacturing companies. The administration's recent decontrol of petroleum prices is predicted to mean an extra cost to consumers of about $8 billion this year. Administration spokesmen say this is necessary in order to give the oil companies the money they need to search for more oil and other energy sources.

It looks to me as though they are using their huge cash flow to go prospecting on Wall Street. All this revenue that is supposed to be going to exploration for new energy resources seems instead to be going to the acquisition of whole industries.

Mr. Speaker, I intend to bring further information about this situation to the attention of my colleagues and the public in the coming weeks.

THE STRATEGIC IMPORTANCE OF AGRICULTURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 5 minutes.

● Mr. JEFFORDS. Mr. Speaker, today I am joining with nearly 80 of my colleagues in introducing a concurrent resolution on agricultural land resources.

It expresses the sense of Congress that the United States should assist local and State governments and agricultural producers in their efforts to promote the continued use of agricultural lands for production of food and fiber, as well as to encourage and assist individuals to enhance the productive condition of agricultural land.

It was just over 4 years ago that I introduced the first Agricultural Land Act in Congress. Since that time there have been a national agricultural lands study project, policy statements on the issue by two Federal agencies, platform policies by both the Republican and Democratic Parties, and an increase in awareness and programs at the local and State levels.

Still, however, only 20 million acres of existing or potential cropland are protected under State or local and county programs, and this country is projected to lose 20 million acres by the turn of the century. Our role as the breadbasket of the world is being threatened.

I have often compared the agricultural land resource issue of today with the energy issue as it was known a few decades ago. Most of us did not recognize the energy crisis—even though it was many years in the making and could have been predicted. The crisis is here, though, and the period of cheap foreign oil is past.

We do not have an agricultural land crisis today. What we do have are symptoms that we may have a crisis—a crisis which will, unless prevented, lead to substantially higher food costs for the consumer and lead to regional or national shortages of some products.

The symptoms of such a crisis are manifold:

A SHRINKING CROPLAND BASE

In one short generation we have built more homes, roads, schools, and public facilities than in the previous three centuries of our history. These facilities often are built on some of the best available agricultural land.

DECREASING PRODUCTIVITY

Unlike the decades of the 1960's and 1970's, which often are associated with scientific agriculture, the future probably will be more dependent on a crop resource base. As prime productive land is lost, marginal land must be brought into production, usually at a much higher cost of production.

INCREASED WORLDWIDE FOOD DEMANDS

The Global 2000 report indicates that significant increases in trade, exported by a few major surplus producers including the United States, Canada, Australia, and several emerging exporters such as Thailand and Brazil, will be needed to balance excess demand in food-deficit Western Europe, Japan, the centrally planned countries, and parts of developing Africa and Asia. U.S. agricultural exports have increased an average of 10 percent per year during the 1970's.

These are only some of the symptoms. We have seen an alarming change in the rural environment in the last half century. Of the 3.3 million residents in the rural work force in 1978, 44 percent were not employed in agriculture, and for every 10 persons in the farm population in 1920, there are now only 2 employed. This has changed our agricultural environment. We have serious challenges ahead if the United States is to continue to be an exporter of agricultural crops.

We have serious challenges ahead if we are to avoid substantially higher food costs and regional or national shortages. Conservative estimates show that with current trends in land loss, export demand, and food production, we can expect real food prices to increase by 80 percent by the turn of the century. These increases will not affect all consumers equally—people in lower income brackets, already disadvantaged in many other ways, also spend a much higher percentage of their incomes for food. Thus they would be affected the most by price increases in the supermarket.

Therefore agricultural land supply and productivity represent an important strategic and economic resource. The President's revised budget package for 1982 recognizes that increasing agricultural productivity must be an important part of our national agricultural policy, and includes increases for research and extension to help achieve the goal.

There are other important elements, of course, which must be provided if we are to achieve and sustain the highest productivity.

The concurrent resolution is a beginning. It is an expression of congressional concern and the base for an overall policy within which the question of agricultural land retention can be addressed. I am optimistic that there will be language in the 1981 farm bill which will help bring about such an overall policy and which will seek to bring about improved interagency coordination as well as strengthening information flow to local and State governments.

I am considering further legislation, along with other Members, that might address such other elements as economic research, tax, and other incentives to farm on good land and build on other land, and other possible shifts in programs and assistance,

I hope that, as an important beginning, more Members will strongly support this concurrent resolution and bring about its quick passage.●

A LEGISLATIVE PROGRAM FOR PUERTO RICO AND ITS CITIZENS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Puerto Rico (Mr. CORRADA) is recognized for 15 minutes.

Mr. CORRADA. Mr. Speaker, I am today asking for this special order to set forth a total legislative agenda for the current session of Congress to help promote the economic development and well-being of Puerto Rico and its citizens.

As the Resident Commissioner from Puerto Rico, I am concerned about the possible devastating effect of proposed cutbacks to the economy of our island.

President Reagan has submitted to Congress his economic proposals and these measures will be debated in the coming months here in the Congress of the United States.

In a public statement last week to the people of Puerto Rico, I commended the efforts of the Reagan administration in achieving spending restraint, fair tax adjustments, regulatory reform, and a strengthened national security.

Such broad goals are to be lauded; we in Puerto Rico share in these goals.

The Congress and the Democratic Party have also made a general commitment to the Reagan administration to support these measures; we do so with a sense of national purpose and unity.

As elected officials and public servants, we also have a concomitant responsibility: that of representing our constituents and articulating their

hopes, desires, and needs to the Congress of the United States and the administration.

That specific task has compelled me to address myself to the subject of the development of Puerto Rico and to advance, at the start of Congress, a broad-ranging program to meet those needs.

The fundamental responsibility of Government in a democratic society is to develop public policies that will help guide the Nation toward a path of justice, progress, and peace.

These are the basic elements leading to a social environment where the right to the pursuit of happiness is not a mere rhetorical illusion, but a distinct and real possibility for the people of this Nation including the more than 3.2 million fellow U.S. citizens residing on the island of Puerto Rico.

As Resident Commissioner from Puerto Rico, I share the concern of many that the decision to cut over $48 billion from the Federal budget in fiscal year 1982 will result in suffering and deprivation to the poor in our Nation.

This decision will have a deeper and more profound impact in Puerto Rico.

Linked firmly to the U.S. economy, there is an axiom in our island that when Uncle Sam sneezes, Puerto Rico gets pneumonia. In the present situation, the looming chill of Federal aid cuts in many areas has caught the attention of the island. Cuts in such areas as elementary and secondary education, college students financial assistance, food stamps, child nutrition, health services for the poor, housing subsidies for low-income families, and economic development programs have all been a subject of intense debate and consideration in the past several weeks since announcement of the Reagan administration plans.

For that reason, the proposals I intend to outline today may be considered optimistic given the present budgetary and economic realities, but I judge them necessary.

I believe it important, as the only elected representative of the people of Puerto Rico in the U.S. Congress, to set forth our own realities, to describe some of the motives behind my legislative agenda, and to vigorously set forth our situation to my mainland colleagues.

This compilation of the specific bills I have introduced, along with a brief description of the unique problems they address, will hopefully be helpful to increase understanding of our distinct needs in Puerto Rico.

Our agenda for Puerto Rico is a combined effort of many people including our Gov. Carlos Romero Barceló. Both the Governor and I were reelected in the November 4, 1980, general elections in Puerto Rico for a 4-year term. This is the first time in 20 years that the people of Puerto Rico have reelected its Governor and its Resident Commissioner.

Since the cabinet officials are appointed by the Governor in Puerto Rico, we have, in place, an administration that is ready to support this legislative agenda, and to provide advice and counsel through my office in Washington, in the coming months, to Members of Congress who may be interested or supportive of the specific steps which I outline today.

The first major bill I would like to mention is one I will be introducing shortly as a combined effort to alleviate unemployment and promote economic development in all of the offshore territories of the United States as well as Puerto Rico.

Within a few days, I will have a final draft of my proposal entitled, "United States Offshore Territories Economic Development Act of 1981."

This bill would authorize the Secretary of the Interior to undertake an economic development plan for Puerto Rico and the other U.S. territories and, if enacted, would authorize an economic stimulus package to cope with the special and unique problems of these jurisdictions. The plan would be developed jointly with efforts of the governments in these territories and heavily involves the private sector.

As presently contemplated, title I of the bill proposes a program for accelerated local public works to provide economic development and jobs and technical assistance for the next 3 fiscal years.

The authorization for each fiscal year under title I would be $100 million for all of the combined geographical jurisdictions.

Title II of the bill would authorize $11 million for loans and an additional $22 million for loan guarantees, the loans to be available for all fields of economic development including industry, trade, and agriculture.

Title III would provide specific and targeted funds for manpower development and training, to help the private sector match its employment needs and to help alleviate severe unemployment in Puerto Rico and the other territories.

All of the territories are confronted by the fact that the Federal tax cuts proposed by the Reagan administration expected to stimulate investments in the U.S. mainland, will not produce the same salutory effect in the territories and Puerto Rico simply because they do not pay Federal taxes.

Despite great strides in economic development, Puerto Rico still suffers gravely from the lingering and ever-present specter of high unemployment and the presence of many poor in our midst. In Puerto Rico, we have a much lower per capita income than the poorest of the States. The stimulative effect of tax cuts proposed by President Reagan will not benefit the Puerto Rican economy and that of the other territories. We are terribly affected by the proposed cuts in different Federal programs but do not share in the economic benefits of the tax cuts. Consequently, a special program for economic stimulus is required for Puerto Rico and the territories.

I have asked the Reagan administration to analyze the impact of the proposed cuts to Puerto Rico and the other U.S. territories. I would like to have them propose a special program for all of us to insure that progress will be made in closing the economic and social development gap between the U.S. mainland economy and those of Puerto Rico and the territories. I hope my bill will serve as a catalyst to bring about proposals from the Reagan administration focusing on our problems.

There are other important measures in the package I am proposing.

Taken as a whole, these measures would immeasurably advance the goals of equal rights and opportunities for all Puerto Ricans and residents of the other territories as citizens of the United States.

One of the measures I am calling for is an amendment to extend the benefits of the general revenue sharing program to Puerto Rico and its 78 municipalities, as well as the other U.S. territories.

H.R. 1577 would provide a 1-percent allocation of total Federal general revenue sharing funds and, for the first time since the program was authorized in 1972, extend the program to Puerto Rico and the territories.

The drive to balance the budget will curtail many Federal assistance programs in Puerto Rico. Our inclusion in the general revenue sharing program at a level of 1-percent goal I advocate, could help us manage the burden of providing increasingly costly social, health, and other services to our populations. In the 96th Congress the Senate supported my position. I call for a renewed effort in the present session by the House Government Operations Committee and Senate Finance Committee to consider and adopt this legislation.

There are other glaring exclusions of Puerto Rico and the U.S. territories from equal participation in Federal aid programs and I have already introduced legislation to remedy these discriminations.

H.R. 1365 would provide fair treatment to Puerto Rico under the medicaid program. It would increase the present obsolete ceiling of $30 million not readjusted since 1972 to a reasonable $145 million. This total would amount to 83 percent of what the island currently spends in health care

for the indigent. I certainly believe the Federal Government can match the efforts of Puerto Rico in this critical health area.

This legislation has been a long-standing proposal of mine and is crucial to help us maintain a minimal level of health and medical care for our citizens.

H.R. 908 renews our goal to include American citizens who live in Puerto Rico and the other U.S. territories under the benefits of the supplemental security income program of the Social Security Act. While Puerto Rico is covered by the Social Security Act and our employers and employees pay social security taxes, the elderly, disabled, and blind there are unfairly excluded from this program.

H.R. 1368 constitutes legislation to provide State-like treatment to Puerto Rico under the aid to families with dependent children (AFDC) legislation and title XX of the Social Security Act. We are presently limited to $72 million under the AFDC program and $15 million under title XX.

H.R. 1639 would authorize the Army Corps of Engineers to clean up the Martín Peña Canal located in the growing and dense San Juan area. The legislation is integral to the promotion and development of the New San Juan Center, located nearby, and to the enhancement of the waterways in the metropolitan area of the city of San Juan. Provisions are being made by the Puerto Rican Government for adequate housing and displacement of families located along the waterway.

H.R. 1366 provides for the use of the Spanish language, under certain circumstances, in proceedings in the U.S. District Court for the District of Puerto Rico. This bill passed the House in the 96th Congress and was supported in the Senate Judiciary Committee but could not be considered by the other body before adjournment.

No matter is more important than the rights and dignity of our citizens. For that reason, I have embarked in an effort to develop a resolution to amend the U.S. Constitution to extend to U.S. citizens residing in Puerto Rico and the territories the right to vote for the President of the Nation. This bill has received the joint support of the various delegates of the U.S. territories and I will have more to say on this issue very shortly.

H.R. 1489 would permit the transportation of passengers between Puerto Rico and other U.S. ports on foreign-flag vessels when U.S.-flag service for such transportation is not available.

On the subject of conceivable food stamp cutbacks, I will be working with the House and Senate Agriculture Committees to oppose any cutbacks for the truly needy in the food stamp program. The reauthorization of the food stamp legislation is one which will be before us soon. Puerto Rico has a high percentage of our population participating in this vital nutritional program. We have such a high rate due to the fact that our percentage of poor is higher than any other State, and because our exclusion from some major Federal welfare programs increases the number of eligible participants. On a parallel issue, any cutback in the Federal Comprehensive Employment and Training Act, or CETA funds, will seriously impair our island's overall economic development program and aggravate unemployment.

It seems fiscally prudent not to add to food stamp rolls and, for that reason, I will be closely monitoring, as a member of the House Education and Labor Committee, any abrupt changes in the CETA programs. Until other alternatives come up to hire unemployed for constructive work, CETA is a valuable program for Puerto Rico and those in need of wages to provide for an adequate living for their families.

Mr. Speaker, I am concerned about the status of the Surface Transportation Act of 1980, legislation which must be reauthorized this year and with the final formula that may be proposed.

I also trust we will soon move to reshape the airport development and aid program (ADAP), low-energy assistance programs, various reauthorizations of education legislation such as vocational education programs and the continuance of the Community Services Administration.

I am proposing separate bills to provide for pensions of World War I veterans with an income less than $10,000. This measure is H.R. 1367.

Bound together by history and by the forces that relate Puerto Rico to the United States, confronted as we are by the imminence of massive cutbacks in Federal programs, we are seeking alternative solutions to our present situation.

As Resident Commissioner from Puerto Rico, I am anticipating the close cooperation of my colleagues in achieving the objectives described above and look forward to working with all in these and other efforts.

□ 1130

MEDICAL CARE FACILITIES PROTECTION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 5 minutes.

● Mr. STOKES. Mr. Speaker, I have been concerned about the financial instability of inner-city hospitals and their ability to provide quality health care to medicare and medicaid beneficiaries and the medically indigent. As you know, on August 30, 1980, the Department of Health and Human Services (HHS) announced a strategy for assisting financially troubled hospitals. This strategy required the Health Care Financing Administration (HCFA) to solicit demonstration and waiver proposals from State medicaid agencies to provide financial assistance to individual hospitals and the community health centers treating large numbers of medicare and medicaid beneficiaries and individuals without health insurance protection. Some 18 medicaid State agencies submitted 50 proposals involving over 150 hospitals and community health centers during the 30-day grant solicitation period. Moreover, many more State medicaid agencies and health facilities would have been willing to participate in this program if more time were available for them to submit their grant application.

Upon careful review of these proposals, HCFA decided to negotiate with only nine facilities. Currently, HCFA has decided to award the grants to only three health facilities. Consequently, some 150 hospitals and community health centers that were interested in participating in this limited program still have not found a method to reduce their burden of uncompensated care and bad debts. The Department of Health and Human Services, has clearly demonstrated that a more meaningful approach to deal with the problems of financially troubled hospitals is needed rather than a limited research and demonstration program or a case-by-case approach.

The health facilities participating in the grant solicitation process cited a number of factors contributing to financial instability, and near bankruptcy in the case of Jamaica Hospital in New York, including replaced by a new facility, low occupancy rate, outdated facilities, inadequate supply of primary care physicians, inadequate billing and collection system, inflation, and escalating costs for goods and services. Yet the single concern lodged most often by the hospitals, particularly those in large urban areas, is the provision of high level and the high volume of uncompensated care to the poor, medically indigent, and undocumented aliens. Los Angeles County, for example, has a huge uncompensated case problem estimated at $200 million.

In the 21st District of Ohio which I serve, five hospitals are battling for survival. Metropolitan General, University Hospital, Mount Sinai Hospital, St. Luke's Hospital, and St. Vincent Hospital, combined, render 90 percent of the medical care to Cuyahoga County residents who do not have the ability to pay for those services, with Metropolitan General absorbing 45 percent of the losses from

bills that go unpaid. Losses recorded by the inner-city hospitals, including some of the small institutions came to approximately $23 million in 1979, up $5 million from 1978. It is estimated that the total lost in 1980 was $26 million.

In an attempt to contain escalating health costs, Federal and State cost-control efforts reduce hospitals' revenues and have a substantial effect on hospitals which serve large numbers of medicare and medicaid beneficiaries. In Louisiana, medicaid coverage is limited for inpatient days and limitations are imposed on the number of allowable outpatient visits each year which automatically creates bad debts for the institutions. In Shelby County, Tenn., 43 percent of the population live in households below the poverty level, yet less than 20 percent are recipients of medicaid. Therefore, thousands of poor people in need of primary health care go uncovered and most likely untreated. To further dramatize the problem in Tennessee, the medicaid program only permits 16 inpatient hospital days per year; and, only 6 annual outpatient visits to a primary health clinic, mental health center, or physicians will be reimbursed under medicaid. Additionally, medicaid costs have escalated whereby States lack the fiscal resources to fund the program. Alabama, District of Columbia, Maryland, Michigan, Minnesota, Mississippi, New Jersey, New York, Ohio, Wisconsin, and Virginia, just to name a few, have considered reducing the amount and scope of coverage under the medicaid program. Changes under consideration are reduction of inpatient hospital stays, reduction of skilled nursing facility services and physician services, and limited numbers of surgical procedures to be performed and covered on an outpatient basis. Once implemented the changes are expected to save millions in tax revenues. In Maryland's case, expected savings amount to $17.6 million.

Medicaid has further exacerbated the fiscal crises at public health facilities through the inadequate reimbursement of outpatient and emergency room services. In some States including New York, the State medicaid program imposes reimbursement caps on certain services like long-term care and ambulatory services. Such caps operate to limit the amounts which the medicaid program pays for the direct cost of care to program beneficiaries.

The medicaid reimbursement employs a formula which results in a rate that may be substantially below the hospital's actual costs associated with the provision of services. This wide differential between costs and rates has caused staggering losses, particularly in States where the rates for reimbursement have been the same for over a 5-year period. In 1978, New York City voluntary hospitals' losses were estimated at $124 million with $93 million of that from emergency room and outpatient services.

Compounding the health facility's continued ability to furnish care is seriously jeopardized by the failure of third-party insurance programs to bear their fair share of the financial burden. Sharing in this burden is just a part of doing business.

In an attempt to prevent any more closures and to provide financial assistance to medical care facilities, I am reintroducing a bill, the Medical Care Facilities Protection Act of 1981. The bill provides for grants to protect against costs of uncompensated care for hospitals and comprehensive community health centers in medically underserved and health manpower shortage areas. The grants would provide for payment of accrued debt and for the development of managerial practices and proven strategies to assure financial solvency. In addition, it provides support for managerial technical assistance to improve the delivery of health services particularly in the areas of ambulatory and emergency care.

The legislation builds upon the health planning efforts for effective and efficient utilization of health facilities, services, and beds. The States would administer the grants program. The States cannot provide a grant to a hospital until the hospital has complied with recommendations made by the local health systems agency and conditions established by the Secretary of the Department of Health and Human Services, to make appropriate changes in its financial, managerial, and service delivery structures.

The bill provides for the establishment within the Department of Health and Human Services a Medical Care Facilities Protection Board composed of representatives of consumers, labor, hospitals, government, and experts in the delivery and financing of health services. This board would monitor the effectiveness of the program, recommend administrative or legislative changes, and develop long-range strategies for financially distressed medical care facilities.

Mr. Speaker, this bill will insure that many individuals who are not currently covered under the 53 separate medicaid plans will not be without emergency health coverage. The financial viability of existing health facilities serving the medically underserved populations must not be closed due to inflation and proposed hospital cost containment policies. Moreover, any attempt to assist medical care facilities in the inner-city and rural areas must work in cooperation without existing health planning structure.

The bill being reintroduced today concerns the financial viability of non-Federal public and nonprofit private hospitals and comprehensive community health centers needed to improve our existing health care delivery crisis. I trust my colleagues will see the urgency of this issue and give their support to the efforts being made in this plan.

The bill follows:

H.R. 2513

A bill to amend title XIX of the Social Security Act to require State medicaid programs to provide grant to certain financially distressed hospitals and community health centers which provide uncompensated care and which would otherwise be closed, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Medical Care Facilities Protection Act of 1981".

FINDINGS AND PURPOSES

SEC. 2. (a) Congress finds and declares that—

(1) the current health care system in the United States is insensitive and does not provide a uniform or comprehensive program of uncompensated medical care for uninsured Americans and undocumented aliens;

(2) many medical care facilities in medically underserved areas (including both inner-city and rural areas) are closing due to the provision of medical care to millions of Americans and undocumented aliens lacking adequate health insurance coverage for basic primary health care and acute medical services;

(3) each State has not provided, under its medicaid program under title XIX of the Social Security Act, coverage of medically needy individuals by allowing individuals to spend down to qualify for assistance under the program;

(4) the state of medical care for the poor in the inner-city and rural areas is seriously and adversely affected by the closing of major medical care institutions and by present medicaid eligibility criteria;

(5) to protect the national health and reduce illness and disease, it is necessary to assure that adequate financing is available to assure that medical care facilities and medicaid eligibility coverage is available to the poor who reside in medically underserved areas; and

(6) a program to provide grants to non-Federal public and nonprofit private medical care facilities located in designated medically underserved and health manpower shortage areas is needed to maintain the availability of a sufficient degree of health resources to guarantee access to quality health services in inner-city and rural areas in the United States.

(b) The purposes of this Act are—

(1) to establish a national program of protection against the cost of uncompensated care for medical care facilities in medically underserved and health manpower shortage areas;

(2) to establish a program which builds on the foundation of the Nation's health planning and project review efforts;

(3) to assure that all Americans and undocumented aliens in need of quality emergency medical services will receive them;

(4) to reduce bad debts for medical care facilities that provide uncompensated care to uninsured health consumers; and

(5) to provide for a system of reforms, to assure that vital health institutions will be maintained in designated medically underserved areas.

AMENDMENTS TO SOCIAL SECURITY ACT

SEC. 3. (a) Section 1902(a) of the Social Security Act (42 U.S.C. 1396a(a)) is amended—

(1) by striking out "and" at the end of paragraph (42);

(2) by striking out the period at the end of paragraph (43) and inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (43) the following new paragraph:

"(44) provide for a program of grants to certain financially distressed medical care facilities in accordance with section 1915.".

(b)(1) Section 1905(a) of such Act (42 U.S.C. 1396d(a)) is amended by redesignating paragraph (7) as paragraph (8) and by inserting after paragraph (6) the following new paragraph:

"(7) subject to subsection (b)(4), an amount equal to 75 per centum of the sums expended during such quarter which are attributable to grants provided in accordance with section 1915; plus".

(2) Section 1905(b) of such Act is amended by adding at the end the following new paragraph:

"(4) The amount of funds which the Secretary is otherwise obligated to pay a State during a fiscal year under subsection (a)(7) may not exceed the amount allocated to the State for the fiscal year under section 1915(c).".

(3) Section 1905(i) of such Act is amended by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or", and by adding after such paragraph the following new paragraph:

"(5) with respect to any amount expended for a grant described in section 1915 for a facility (A) for a period of more than three years with respect to that facility, or (B) to the extent that the amount of the grants exceeds 75 per centum of the total costs estimated to be required for the necessary improvements and delivery of services by the facility under the proposal for the grant.".

(c) Title XIX of such Act is amended by adding at the end the following new section:

"PROGRAM OF GRANTS FOR CERTAIN FINANCIALLY DISTRESSED MEDICAL CARE FACILITIES

"SEC. 1915. (a) Each State shall provide for a program of grants to financially distressed medical care facilities (hereinafter in this section referred to as the 'program') in accordance with this section.

"(b)(1) Each State shall provide for medical care facilities (as defined in subsection (e)(1)) to submit grant applications to the State for assistance under the program.

"(2) No State may provide for approval of such a grant for a facility unless—

"(A) the facility is located in a medically underserved area designated under section 1302(7) of the Public Health Service Act or is, is in, or primarily serves a health manpower shortage area designated under section 332 of such act;

"(B) the health systems agency for the health service area in which the facility is located has reviewed the application for such grant and has determined that—

"(i) maintenance of the operations of the facility is necessary for the health of individuals residing in the health service area, and

"(ii) without a grant under the program the facility would have to terminate operations in the area; and

"(C) the facility has agreed, as a condition of the receipt of such a grant, to—

"(i) conform to any plan developed by the health systems agency for the health service area in which the facility is located for the elimination or conversion of any excess supply of inpatient hospital services it has been providing,

"(ii) identify administrative procedures to collect payment from third party payors (including any payments which may otherwise be due the facility under the State plan under this title or under title XVIII of this Act) and establish sliding schedules of fees related to income for poor individuals not eligible for medical assistance under the State's plan under this title, in order to reduce the size of financial operating deficits,

"(iii) develop an affirmative action plan to provide for minority employment opportunities in the management and medical professional staff levels,

"(iv) submit periodic reports, certified by the authorized governing board of the facility, to the State concerning services provided through multi-institutional arrangements with other health facilities (including any such arrangement with a hospital affiliated primary care center described in section 328 of the Public Health Service Act), and

"(v) apply amounts received under such a grant only to accrued debt of the facility, to expenses necessary to modify or restructure health services delivery in conforming with the local health systems plan, to the provision of other appropriate managerial technical assistance, to the cost of retraining personnel affected by any discontinuance of services, or to development or operation of a computerized bill payment and collection system.

"(3) Grants shall be made under this section upon such terms and conditions as the State may determine, in accordance with criteria established by the Secretary and determined by the Secretary to be appropriate for State administration of such grants.

"(4) Subject to subsection (c), the amount of any grant under this section shall be determined by the State, but in no case may the amount paid with respect to any service provided exceed the amount which could otherwise be paid to the medical care facility for the provision of such service to an individual eligible for benefits under the State's plan under this title.

"(c)(1) Each State shall submit to the Secretary, at such time and in such form as the Secretary may require, an application for an allocation of funds under this section.

"(2)(A) In his discretion and after taking into consideration the needs of financially distressed medical care facilities demonstrated in the applications of the States, the Secretary shall allocate to each State which has submitted such an application an equitable proportion of the fiscal year allocation limitation for that fiscal year established under paragraph (3).

"(B) The amount of an allocation to a State for a fiscal year shall be reduced by the amount (if any) by which the expenditures by the State (and local governments therein), other than under this section, for the fiscal year for assistance of financially distressed medical care facilities is less than the amount of such assistance provided in fiscal year 1981.

"(3) For purposes of paragraph (2), the fiscal year allocation limitation for fiscal year 1982 is $250,000,000, and the fiscal year limitation for each of fiscal years 1983 and 1984 is $300,000,000, and the fiscal year allocation limitation for subsequent fiscal years is zero.

"(d)(1)(A) There is hereby established within the Department of Health and Human Services a Medical Care Facilities Protection Board (hereinafter in this subsection referred to as the 'Board'), to be composed of six members to be appointed by the Secretary. Two members of the Board shall be representatives of the health services industry (public and nonprofit private) who are experts in the delivery and financing of health services. Two members of the Board shall be consumer representatives who are not providers of health care. One member of the Board shall be a Federal, State, or local governmental employee who shall serve as a governmental representative. One member of the Board shall be a member of a union which represents hospital employees.

"(B) Each member of the Board shall hold office for a term of three years. Any member appointed to fill a vacancy occurring prior to expiration of the term for which his predecessor was appointed shall serve only for the remainder of such term. The Secretary shall appoint one member of the Board to serve as the Chairman of the Board.

"(2) The Board shall—

"(A) provide advice to the Secretary and in general furnish recommendations with respect to the administration of the programs under this section (including recommendations regarding the appropriate level of grant funding of States);

"(B) continually monitor, study, and review this section and its administration with a view to (i) determining the extent to which it is effectively, efficiently, and economically achieving its purposes, (ii) identifying and recommending to the Secretary and Congress changes in this section and its administration needed to achieve its purpose, and (iii) developing and recommending management and proven strategies for financially distressed medical care facilities; and

"(C) annually submit to the Congress a report on the administration of this section and include any recommendations for legislative changes in or affecting this section.

"(3)(A) The Secretary shall furnish the Board with such staff and information (including data and cost reports) pertaining to the functions of the Board as may be necessary to carry out its duties, and shall appoint (with the approval of the Board) an executive director for the Board.

"(e) For purposes of this section:

"(1) The term 'medical care facility' means—

"(A) a non-Federal, public, or private nonprofit hospital, or

"(B) a public or private nonprofit community health center (as defined in section 330(a) of the Public Health Service Act).

"(2) The term 'uncompensated care' means, with respect to a facility, the provision of health services to an individual who is not eligible for benefits or assistance under title XVIII of this Act or the State's plan under this title and who has no health insurance which provides coverage with respect to the provision of such services by the facility.

"(3) The term 'health services' means emergency medical care services, nonelective inpatient services, prenatal and obstetrical care, pediatric care, and other health-

related services as determined by the Secretary.

"(4) The term 'undocumented alien' means an alien who is in the United States in violation of the Immigration and Nationality Act.".

(d)(1) Subject to paragraph (2), the amendment made by subsection (a) shall apply to medical assistance provided in calendar quarters beginning on or after October 1, 1981, and before September 30, 1984.

(2) In case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirement imposed by the amendment made by subsection (a), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet this additional requirement before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

INCLUSION OF BAD DEBTS IN MEDICARE REIMBURSEMENT

SEC. 4. (a) Section 1861(v)(1) of the Social Security Act (42 U.S.C. 1395x(v)(1)) is amended—

(1) by inserting "(except as provided in subparagraph (J))" in subparagraph (A)(i) after "will not be borne by individuals not so covered, and", and

(2) by inserting after subparagraph (I) the following new subparagraph:

"(J) In the case of a hospital, the reasonable cost of services provided shall include a share of bad debts incurred in the efficient operation of the hospital proportional to the proportion of the services of the hospital which are paid for under the insurance programs under this title.".

(b) The amendment made by subsection (a) shall apply to cost accounting periods beginning on or after October 1, 1981.●

THE B-1 IS A BUMMER

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WEAVER. Mr. Speaker, I believe that many of our military budget funds are not spent on the best things to further the defense of our country. So I was most interested today to read in the Washington Post a column by Admiral Turner, former Director of the CIA. These remarks by Admiral Turner reflect my thinking, and out of which the reasons I voted as I do on military budgets. I incorporate them in the RECORD at this point:

THE B1 IS A BUMMER

(By Stansfield Turner)

If the military received the green light and all the money it needed for the B1 and another giant aircraft carrier today, it would be five to six years before we saw the B1 and seven to 10 years before the carrier could respond to an operational order. We are making these budget decisions not for today, but for 10, 20, even 40 years from today. We can't let ourselves be emotionally tied to the past or lack the vision for what we will need militarily from 1985 through 2020—the useful life of these systems. We must have the courage to be bold and act on the hard evidence of where military weaponry is tending. If we are to remain strong and build the kind of military we will need in the coming years, we must begin to modify the kind of aircraft and aircraft carriers we build today in rather dramatic ways.

The manned bomber, be it a B1 or a carrier-based aircraft, is designed to penetrate the enemy's defenses and deliver a weapon close to a target. However, this tactic is being made obsolete today by technology that enables the enemy to better defend against bombers. Satellite sensors can pick up data, which in turn can be rapidly processed and then sent around the world instantaneously by digital data transmission. The result will be near-assured detection of the bomber as it penetrates enemy defenses, the immediate calculation of how to intercept it and the dispatch of smart guided missiles to pursue it relentlessly to destruction.

The technologies we are counting on to help us defend our bombers are lagging way behind. The newly disclosed Stealth technology may extend the aircraft's ability to penetrate. It is too early to judge just what operational applications Stealth will have. But this uncertainty raises the question of whether we would want to use manned penetrating aircraft even if their vulnerability were reduced.

Technical sensors can also be used to detect the targets we want to attack, whether they are fixed or moving. The same processing and data relay can provide that data to a command center far from the battlefield, where it can be evaluated more accurately and more dispassionately than it can by pilots whose missions and skins are on the line. The data flow from the command center can then direct a weapon to be launched from well outside the battle zone and can control that weapon precisely to its target.

It is a long and proud tradition to place a man in an aircraft over the target. But it is a dying tradition, and pride should not stand in the way of doing the job better and more safely. The risks to the pilot are unreasonable, and the probability of hitting the target less than with a remotely controlled system.

We will still need bombers. But without the requirement for large, complex aircraft that can penetrate sophisticated defenses, a standoff variety can be built smaller and more simply, and we will be able to afford more of them.

The giant aircraft carrier, not only its penetrating bomber, is also a dying breed. At $3.5 billion for one ship—no aircraft—it is too expensive. At 100,000 tons and 1,000 feet in length, it's a sitting duck. With the fleet limited to a total of 12 or 13, they must be carefully rationed, so often they are not where we would like them to be. Like the manned bomber, the trends of technology are all making the giant aircraft carrier obsolete.

The extant cruise missile will permit carrier planes to also stand off and fire at a distant target. The V/STOL, now being used extensively by the Marines and the Soviets, is also a reality. Between the cruise missile, V/STOL and the technology that helps each do its job, the aircraft carrier too can shrink in size and cost, and many more ships can become carriers of at least a few aircraft.

If we proceed with the giant aircraft carrier and the B1 over the years ahead, when the trends of technology are strongly against them, we will find ourselves poorer both in treasure and in defense. We will have neither the funds nor the motivation to pursue the coming alternative systems as vigorously as we must. We will feel safe because, if the chips are ever down, military commanders will withhold carriers from zones of high threat and curtail use of B1s near the big, important, well-defended targets. The dollar cost, the blow to the nation's prestige and the loss to our total military inventory would be just too great to risk losing even one carrier or a few B1s.

Above all, we must avoid becoming embroiled in all the detailed arguments about the qualilties of these two systems. Their qualities, as exceptional as they may be, are not bargains if they exceed our needs—if we can do the same job better for less. Our focus must be on the end product. Can they do what needs to be done better than other systems?

The evidence clearly says no. Technologies to defeat the B1 and the supercarrier are outdistancing technologies that can be used to defend them. And new technology offers far better alternatives.

In 1868, the USS Wampanoag was a steam-driven warship that could go twice as fast as any sailing warship afloat, and, because it was propelled by a steam engine, it was not subject to the vagaries of the wind. It surely was a naval tactician's dream. Unfortunately, naval officers did not see it that way. Instinctively, they rejected it as something too revolutionary, decrying its profound differences from ships in use at the time, not its performance. It was averred that if sailors did not have to climb the rigging in wind and storm, they would grow soft and would pale in the face of battle! In 1869, the Navy dropped Wampanoag from the fleet. Another ship of its equal was not commissioned for almost 30 years.

It took a long time for the country to recognize that Wampanoag was the wave of the future and that the beloved and battle-tested sailing ship was an anachronism. We cannot today afford to remain sentimentally attached to manned, penetrating bombers and to large ships of any description for their own sake. Both are just too vulnerable, and growing more so by the day.

There is an understandable national concern that we are not keeping up with the Soviets in military competition. We will certainly have to spend more on defense to correct that. But, more important, we must spend it with all the leverage our advanced technological base and our inherent ingenuity will give us.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. SOLOMON) to revise and extend his remarks and include extraneous material:)

Mr. JEFFORDS, for 5 minutes, today.

(The following Members (at the request of Mr. CORRADA) to revise and extend their remarks and include extraneous material:)

Mr. CORRADA, for 15 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.
Mr. STOKES, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. SOLOMON) and to include extraneous matter:)

Mr. LEE.
Mr. MCCLOSKEY.
Mr. MICHEL, in two instances.

(The following Members (at the request of Mr. CORRADA) and to include extraneous matter:)

Mr. GEJDENSON.
Mr. VENTO.
Mr. HAMILTON.
Mr. RODINO in two instances.
Mr. DIXON.
Mr. FASCELL in four instances.
Mr. CONYERS.
Mr. MCDONALD.
Mr. EDWARDS of California.

BILL PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on this day, present to the President, for his approval, a bill of the House of the following title:

H.R. 2166. An act to amend the Energy Policy and Conservation Act to extend certain authorities relating to the international energy program.

ADJOURNMENT

Mr. CORRADA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 31 minutes p.m.), under its previous order, the House adjourned until Tuesday, March 17, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

794. A letter from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes; to the Committee on Armed Services.

795. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf-stocking and custodial services function at Seymour-Johnson Air Force Base, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

796. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction exceeding $100 million with the Government of Israel pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

797. A letter from the Acting Secretary of the Treasury, transmitting the annual report of the Office of Revenue Sharing for fiscal year 1980, pursuant to sections 1059(a)(2) and 121(f) of the State and Local Fiscal Assistance Act of 1972, as amended; to the Committee on Government Operations.

798. A letter from the Acting Administrator of General Services, transmitting a followup report on the recommendations contained in the reports of the Board of Visitors, U.S. Naval Academy on its meetings of September 27, 1978, and September 26, 1979, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

799. A letter from the Secretary, Postal Rate Commission, transmitting a report on the Commission's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

800. A letter from the Acting Administrator of Veterans' Affairs, transmitting a report on health care for veterans in Puerto Rico and the Virgin Islands, pursuant to section 8(a) of Public Law 95-520, as amended (94 Stat. 1053); to the Committee on Veterans' Affairs.

801. A letter from the Chairman, National Commission on Social Security, transmitting the final report of the Commission, pursuant to section 361 of Public Law 95-216; to the Committee on Ways and Means.

802. A letter from the Comptroller General of the United States, transmitting a report reviewing the Federal workers' compensation cases on the Department of Labor's long-term disability rolls (HRD-81-19, March 9, 1981); jointly, to the Committees on Government Operations, Education and Labor, Ways and Means, and Post Office and Civil Service.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. EVANS of Iowa:

H.R. 2515. A bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures; to the Committee on Ways and Means.

By Mr. FRANK:

H.R. 2516. A bill to extend for 2 years the existing suspension of duty on wood excelsior; to the Committee on Ways and Means.

By Mr. WON PAT:

H.R. 2517. A bill to recognize the cultural tradition of the Pacific territories and possessions of the United States by allowing the possession of betel nut for personal use by residents of such territories and possessions; to the Committee on Energy and Commerce.

H.R. 2518. A bill to amend the Organic Act of Guam to provide for removal by recall of certain elected officials, and to authorize initiatives and referendums; to the Committee on Interior and Insular Affairs.

H.R. 2519. A bill to provide for the establishment of a national cemetery in Guam; to the Committee on Veterans' Affairs.

By Mr. JEFFORDS (for himself, Mr. AKAKA, Mr. ALEXANDER, MR. ANDREWS, Mr. ANTHONY, Mr. AUCOIN, Mr. BEARD, Mr. BEDELL, Mr. BEILENSON, Mr. BEREUTER, Mr. BEVILL, Mr. BONIOR of Michigan, Mr. BOWEN, Mr. BROWN of Ohio, Mr. BROWN of California, Mr. CHAPPELL, Mr. CHAPPIE, Mr. COELHO, Mr. CONYERS, Mr. CORCORAN, Mr. JAMES K. COYNE, Mr. DASCHLE, Mr. DAUB, Mr. DONNELLY, Mr. DORGAN of North Dakota, Mr. EDGAR, Mr. EDWARDS of California, Mr. ENGLISH, Mr. ERDAHL, Mr. EVANS of Georgia, Mr. EVANS of Iowa, Mr. FAZIO, Mrs. FENWICK, Mr. FINDLEY, Mr. FOLEY, MR. FORSYTHE, Mr. GINGRICH, MR. GINN, Mr. GOODLING, Mr. GUNDERSON, Mr. GUYER, Mr. HAGEDORN, Mr. HANSEN of Idaho, Mr. HARKIN, Mr. HATCHER, Mr. HUGHES, Mr. JONES of Tennessee, Mr. KASTENMEIER, Mr. KILDEE, Mr. KOGOVSEK, Mr. MARLENEE, Mr. MCCLORY, Ms. MIKULSKI, Mr. MINETA, Mr. MOAKLEY, Mr. MOTTL, Mr. MURPHY, Mr. NEAL, Mr. PANETTA, Mr. PEASE, Mr. PEPPER, Mr. RAILSBACK, Mr. RATCHFORD, Mr. RICHMOND, Mr. RINALDO, Mr. ROTH, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. SHUMWAY, Mr. STUMP, Mr. TAUKE, Mr. VENTO, Mr. VOLKMER, Mr. WEAVER, Mr. WILSON, Mr. WIRTH, and Mr. YATRON):

H. Con. Res. 92. Concurrent resolution expressing the sense of Congress concerning the continuing permanent conversion of productive agricultural lands to nonagricultural uses; to the Committee on Agriculture.

By Ms. MIKULSKI:

H. Con. Res. 93. Concurrent resolution to express the sense of the Congress that the U.S. Postal Service should issue a postage stamp to honor Dr. Marie Zakrzewska; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII,

21. The SPEAKER presented a memorial of the House of Representatives of the State of Arizona, relative to restrictive emigration policies of the Soviet Union; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. EVANS of Iowa:

H.R. 2520. A bill for the relief of Emanuel F. Lenkersdorf; to the Committee on the Judiciary.

By Mr. MCCURDY:

H.R. 2521. A bill to remove certain lands from the Wichita Mountains Wildlife Refuge, Okla.; to the Committee on the Merchant Marine and Fisheries.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 146: Mr. RAILSBACK.

H.R. 747: Mr. ADDABBO, Mr. BINGHAM, Mr. BENNETT, Mr. BONIOR of Michigan, Mr. BONER of Tennessee, Mr. BRODHEAD, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. CARMAN, Mrs. CHISHOLM, Mr. CLAY, Mr. COELHO, Mr. CORCORAN, Mr. CORRADA, Mr. CROCKETT, Mr. DANIELSON, Mr. DASCHLE, Mr. DELLUMS, Mr. DORGAN of North Dakota, Mr. DOWNEY, Mr. EDGAR, Mr. ERTEL, Mr. FARY, Mr. FROST, Mr. FORD of Tennessee, Mr. GLICKMAN, Mr. GUARINI, Mr. GUYER, Mr. HAWKINS, Mr. HOLLENBECK, Mr. HUGHES, Mr. IRELAND, Mr. LAFALCE, Mr. LOWRY of Washington, Mr. MATSUI, Mr. MCCLOSKEY, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MURPHY, Mr. OBERSTAR, Mr. OTTINGER, Mr. PANETTA, Mr. PEPPER, Mr. PERKINS, Mr. RAHALL, Mr. REUSS, Mr. RICHMOND, Mr. RODINO, Mr. SABO, Mr. SCHEUER, Mrs. SCHROEDER, Mr. SMITH of Iowa, Mr. ST GERMAIN, Mr. STARK, Mr. STOKES, Mr. STUDDS, Mr. SUNIA, Mr. SYNAR, Mr. WEISS, Mr. WHITEHURST, Mr. WON PAT, Mr. YOUNG of Florida, Mr. LONG of Maryland, and Mr. BIAGGI.

H.R. 748: Mr. ALBOSTA, Mr. BINGHAM, Mr. BOWEN, Mr. BRODHEAD, Mr. PHILLIP BURTON, Mr. CONYERS, Mr. CROCKETT, Mr. DANIELSON, Mr. DELLUMS, Mr. DONNELLY, Mr. DOWNEY, Mr. EDGAR, Mr. FAZIO, Mr. FRANK, Mr. GUARINI, Mr. HUGHES, Mr. JEFFORDS, Mr. KOGOVSEK, Mr. KILDEE, Mr. LAGOMARSINO, Mr. LEHMAN, Mr. LEVITAS, Mr. LONG of Maryland, Mr. LUNDINE, Mr. MILLER of California, Mr. MOFFETT, Mr. MOTTL, Mr. MURPHY, Mr. OBERSTAR, Mr. OTTINGER, Mr. PEPPER, Mr. ROSENTHAL, Mr. SCHEUER, Mrs. SCHROEDER, Mr. STARK, Mr. STOKES, Mr. SYNAR, Mr. VENTO, Mr. WEAVER, and Mr. WEISS.

H.R. 1005: Mr. ROUSSELOT.

H.R. 1529: Mr. MATSUI.

H.R. 2262: Mr. BEILENSON, Mr. DUNCAN, Mr. FORD of Tennessee, Mr. HUGHES, and Mr. NEAL.

H.R. 2385: Mr. KEMP.

H. Con. Res. 73: Mr. DUNCAN, Mr. COURTER, Mr. WYDEN, Mr. STANGELAND, Mr. NEAL, Mr. WAMPLER, Mr. BEDELL, Mr. BEARD, Mr. GINGRICH, Mr. ROBERT W. DANIEL, JR., Mr. DAUB, Mr. HUGHES, Mr. MCEWEN, Mr. RALPH M. HALL, Mrs. SNOWE, Mr. DORNAN of California, and Mr. IRELAND.

H. Res. 101: Mr. KILDEE, Mr. ROSENTHAL, Mr. WEAVER, Mr. FAUNTROY, Mr. DORGAN of North Dakota, Mr. SCHEUER, Mr. FARY, Mr. STOKES, Mr. LELAND, Mr. MCHUGH, Mr. YATRON, Mr. RANGEL, Ms. MIKULSKI, Mr. SEIBERLING, Mr. KOGOVSEK, Mr. MCCLOSKEY, Mr. OTTINGER, and Mr. FRANK.

EXTENSIONS OF REMARKS

THE CONGRESSIONAL MEDAL OF HONOR

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. McDONALD. Mr. Speaker, I have been getting quite a bit of flak lately because of my stand opposing the assignment of women to the military academies. Quite recently, the significance of that stand was brought home to me when a Special Forces Green Beret Sgt. Brian O'Connor, stopped by my office for a visit. Brian is now medically retired from the Green Berets in the Fiji Islands. It is thanks to him that Sgt. Roy Benavides recently became President Reagan's first recipient of the Nation's highest award for valor—The Congressional Medal of Honor.

Probably the extent of Brian O'Connor's own story will never be told. However, it does not take much to note the pain and suffering this man endures carrying shrapnel in his knees for the rest of his life. I wonder how many parents today would want their daughters to suffer so.

This is only part of the story. There were Green Beret camps that for up to 7 months of the year were underwater in the delta region of South Vietnam. Rats and other vermin ran over the bodies of these men in the middle of the night. But these men, known by the immortal designation as America's best, did not falter. Out they came from such desolate outposts to interdict the terrorist Vietcong, so innocent villagers, women and children, would not become the innocent slaughtered.

To suffer such privations; to be engaged in mortal combat; to be wounded eight times as Sergeant Benavidez was in one battle; this is not the job of an American or any other woman.

As a former Navy doctor and physician, I know the abilities and limitations of women better than the average person. And yet the flak does not cease, simply because I do now want, and have introduced legislation, that women do not belong at our service academies. The purpose of the academies is to train individuals for combat. Whether air, ground, or sea, that is the job of a man.

This does not in any way degrade the role of women in the military. We know those brave girls in indian white who gave their lives as nurses for the wounded, when the enemy chose to make the red cross of mercy the target of their mortars or artillery. God bless those angels of mercy who gave their lives.

But they were behind the lines. They were not, as they were when we mobilized soldiers in Korea, after the tree cutting incident, next to the combat soldier in the frontlines. It was there that things went very poorly due to the fact that combat soldiers were so busy protecting lady soldiers, that their mission became impaired.

And so it was back on February 24 of this year, that Sgt. Roy Benavidez was rewarded for his gallantry. It was a mixture of faith in God and love of fellow man that prompted his action, and the less heralded self-sacrifice of Brian O'Connor. They were the center of heroism and gallantry on that day, as others were, who also served. They were there as men, so their female counterparts, as has always been the case down through the ages, the center of love back home * * * while brave men served, and died.

The story of Roy P. Benavidez and Brian O'Connor, by Mary Barrineau of the Dallas Times Herald, as carried in the February 22, 1981, edition of the Honolulu Star-Bulletin and Advertiser follows:

TEXAN TO RECEIVE MEDAL—13 YEARS LATE

DALLAS.—When some Army veterans contacted Brian O'Connor, last year at his home in the Fiji Islands to ask about the man who had saved his life 13 years ago in Vietnam, O'Connor couldn't believe the man was alive.

"Last time I saw him, he was floating in his own blood," said O'Connor.

O'Connor didn't want to talk about that horrible day, May 2, 1968, when he and 11 other reconnaissance-team members were trapped by heavy enemy fire in a dense jungle near Loc Ninh.

The veterans gave him an El Campo, Tex., phone number.

O'Connor called the number and found himself speaking to retired Army Master Sgt. Roy P. Benavidez, who saved the lives of O'Connor and at least seven other men that day.

Benavidez had thought that O'Connor was dead and O'Connor had thought that Benavidez was dead.

"We spent $100 or $150 on the phone call before we were even able to say anything," said Benavidez as he recalled his conversation with O'Connor. "It was just a little bitty squeak coming out of our throats."

O'Connor's testimony resulted in the awarding of the Medal of Honor, the nation's highest military decoration, to Benavidez for "extremely valorous actions in the face of overwhelming odds."

Benavidez, now 45, was awarded the military's second highest honor, the Distinguished Service Cross, in 1968. He had been rejected for the Medal of Honor by the Joint Chiefs of Staff because of insufficient evidence to make a decision. But with O'Connor's testimony, the Joint Chiefs approved the award last summer.

President Reagan will present the medal to Benavidez on Tuesday in a ceremony at the Pentagon. He will leave El Campo, about 60 miles southwest of Houston, today for Washington with his wife and three children. Benavidez, who was retired in 1976 as a result of combat-related injuries, will be the first to be awarded the Medal of Honor during the Reagan administration.

Some old Army friends of Benavidez had persisted in trying to get him the award. They finally found O'Connor living in a remote part of the Fiji Islands.

According to the citation accompanying the award, on the morning of May 2, 1968, a 12-man Special Forces reconnaissance team was ferried by helicopters into an area that was routinely patroled by North Vietnamese soldiers to gather intelligence about enemy activity. Soon after they landed, the team came under heavy enemy fire.

Three helicopters were called in to rescue the team but were unable to land due to enemy small-arms and antiaircraft fire. Benavidez, then a staff sergeant, was at an operations base in Loc Ninh monitoring the operation when the helicopters returned.

He voluntarily boarded a returning helicopter to aid in still another rescue attempt. Realizing that all of the team members were either dead or wounded and unable to move to a new pickup zone, Benavidez jumped from the hovering aircraft and ran about 50 yards under small-arms fire to the team.

"I just made the sign of the cross and jumped into the helicopter and then made the sign of the cross and jumped out," Benavidez said last week. "I guess it was just a gut feeling. I guess the good Lord just said today is your day." Despite being wounded in the leg, face and head, he took charge and directed the rescue effort, throwing smoke canisters to direct the helicopter to the team's position. He then provided protective fire by running alongside the aircraft as it moved to pick up the remaining team members.

As enemy fire increased, Benavidez hurried, to recover the dead team leader's body and his classified documents. When he reached the body, Benavidez was wounded severely in the abdomen by small-arms fire and in the back by grenade fragments.

At nearly the same moment, the helicopter pilot was mortally wounded and his craft crashed.

Although by now in extremely serious condition, Benavidez made his way back to the wreckage, helped the wounded out and gathered them into a defensive perimeter.

With enemy automatic weapons and grenade fire increasing, he moved around the perimeter distributing water and ammunition to the weary men and urging them to fight. Benavidez then began calling in tactical air strikes and directing the fire of surrounding gunships.

While administering first aid to a wounded team member, he was wounded again in the thigh just as another rescue helicopter landed. Benavidez continued to aid in the rescue, carrying the wounded men to the aircraft.

On his second trip with the wounded, he was clubbed from behind by an enemy sol-

dier. In the ensuing hand-to-hand combat, he suffered more wounds on his head and arms before killing his adversary.

Upon reaching the aircraft, Benavidez spotted and killed two enemy soldiers who were rushing the helicopter from an angle that prevented the door gunner from firing at them.

With little strength remaining, he made one last trip to the perimeter to ensure that all classified material had been collected and destroyed and to bring in the last of the wounded Americans. Only then, in extremely serious condition from many wounds and loss of blood, did he allow himself to be pulled into the rescue helicopter.

"Sgt. Benavidez' gallant choice to join voluntarily his comrades who were in critical straits, to expose himself constantly to withering enemy fire, and his refusal to be stopped despite numerous severe wounds, saved the lives of at least eight men," the citation reads. "His fearless personal leadership, tenacious devotion to duty and extremely valorous actions in the face of overwhelming odds were in keeping with the highest traditions of the military service, and reflect the utmost credit on him and the United States Army."

Benavidez said he was not bitter about the delay in receiving the award. "I'm sorry it's taken this long, but I know the military had a very tough decision to make. . . . They should be given a lot of credit."●

LOWENSTEIN TESTIMONIAL DINNER

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. McCLOSKEY. Mr. Speaker, this Saturday will stir the conscience of many of us when we remember that 1 year ago our friend and former colleague, Allard Lowenstein, was shot and killed by an insane man with a handgun in his own office. In honor of Al, I would like to share with you the following testimonial from a dinner in 1973, by the renowned author and journalist, David Halberstam. The tragic irony is that David Halberstam's own brother, the well-known Washington doctor, Michael Halberstam, was also shot and killed this year, by a robber with a handgun in his own home. To twist the irony further, 1 week before his murder, Michael Halberstam made a public statement on public radio condemning the murder of Al Lowenstein and urging the passage of responsible handgun controls. Handgun murders have become an epidemic in our society. Our best and brightest are not exempt from senseless tragedy. Each Member of Congress who opposes responsible handgun controls should consider the vulnerability of their own friends, families, and themselves. I urge them to join their colleagues who oppose senseless murder and who support responsible handgun control.

REMARKS BY DAVID HALBERSTAM

First, this is absolutely the most extraordinary political meeting that I've ever been to, because Allard Lowenstein is here on time.

I, like many others, take pleasure from the diversity of us here tonight—a sense of the resurgence, the resilience of the kinds of things we believe in—as exemplified by the fact that Andy Young is here and is going to be a congressman who will take some of the torches that Allard passed on.

I think we are drawn to Allard in many ways, among others—and perhaps in my case principally—because he has that most unique quality for a politician or for anybody, and that is the quality to evoke in other people and in the people who touch his life the capacity and the desire to be better, to act on a higher ethical plane, and to make more of themselves and of their lives. I think he did this, and he touched many of our lives.

I know he did in my life. I think, in the late sixties, that my reporting on Vietnam and what it meant became better because Al in a way challenged us—challenged us to act upon what we believed. I think we are better, and I think that all of us here are beholden to the degree that when the history of this decade is written, fifty years from now, and people will say, "Did you stand on the sidelines?" and "What did you do?"—to the degree that we did act, to the degree that we were not good Germans, to the degree that we can now, as the war comes to an end, live with ourselves, and live with our participation in the processes—for this in particular, I think, we owe a very, very special debt of gratitude to Al Lowenstein. And I know that this is why we are here tonight, because we feel an obligation to him, that he made us better, and he made us able to live with ourselves, a very important thing.

And I think a hundred years from now, when they write again the history of this time, they will have long forgotten the people who gerrymandered him out of his first district, and I don't think the name Rooney will be remembered. But I think that what Al did and what he stood for, in a democratic society, in leading an honorable democratic rebellion against a cruel and unprincipled and barbaric war, will stand, and that they will trace the peace that is beginning now to the rebellion that he led in late nineteen-sixty-seven, when everybody else was willing to stand on the sidelines.

So I am here, really, like the rest of you, to say thank you, God bless you, for making us able to live with ourselves. Thank you very much.●

UNITED STATE-WESTERN EUROPEAN RELATIONS: DILEMMAS AND CHALLENGES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues a paper on United States-Western European relations, prepared by Stanley R. Sloan, Specialist, United States-Alliance Relations with the Congressional Research Service of the Library of Congress.

This paper was presented at a joint public hearing of the committees for foreign affairs and for defense of the Second Chamber (Lower House) of the Dutch Parliament on March 6, 1981. Although the views expressed were his own, Mr. Sloan presented an American perspective on the problems confronting the alliance in the coming months and years.

Appearing with Mr. Sloan were several notable European observers of United States-Western European relations: Theo Sommer, editor of the well-known West German daily Die Zeit; Thierry de Montbrial, director of the French Institute of International Relations; G. J. B. Hilterman, a respected Dutch television commentator; and H. de Lange, from the Groningen Polemological Institute (the Netherlands).

I welcome the efforts on the part of our colleagues in the Dutch Parliament to examine critical issues confronting the alliance and believe that such efforts help increase mutual understanding among all NATO allies.

A slightly shortened version of Mr. Sloan's statement follows:

THE ATLANTIC ALLIANCE IN 1981: CONTINUITY AND CHANGE

Over the last 25 years, it has become commonplace to say the U.S.-European relations are in a state of crisis. Time and time again, prophets of doom have forecast the demise of the alliance. Time and time again, they have been proven wrong.

In fact, as we look at this year's crisis, it is worthwhile asking why—if the alliance has been through so many crises—it remains alive, if not totally well, today.

My answer is that first, there has been and remains a large reservoir of common interests among NATO members. We still share vitally important values and objectives: faith in pluralistic Western-style democracy; support for equitable and compassionate social structures; respect for individual liberty; and defense of human rights. Furthermore, our economic futures are virtually inseparable. We may, from time to time, rank the relative importance of these ties somewhat differently. But by and large, these ties continue to bind us together.

Franklin D. Roosevelt, during the great depression, told the American people that they had "nothing to fear but fear itself." Today, as then, we all know that there is more to fear than fear itself. But our differing approaches to what we should fear most continually tend to divide us.

And this brings me to the second clue to the survival of the Alliance. When, in the past, our differing fears have pulled us apart, we have managed to accommodate those differences. We have managed to find ways to keep the alliance intact even when we have not been able to reconcile completely our differing threat perceptions.

Finally, it is a fact that no alternative formula has yet promised a more credible guarantee for the security of the West. I think that the burden of proof remains on those who believe that new formulas could make as substantial a contribution to Western security, East-West peace and internal Western stability as does the Atlantic alliance.

Against this background, I would like to suggest that today's major alliance issues can be seen in terms of three dilemmas.

THE FIRST DILEMMA

NATO's political viability for over a decade has rested on the premise that the Alliance should be an instrument not only of defense, but also of detente. Many in the United States judge that detente is dead, and believe that NATO's detente role is no longer valid. But the dominant European view is that the West must still seek resolution, or at least moderation, of East-West tensions, in addition to providing a credible defense against the Warsaw Pact.

Most Americans are currently skeptical as to whether U.S. interests have been served by the era of detente. We have witnessed steady Soviet advances relative to the United States in strategic nuclear weaponry, theater nuclear delivery systems, naval power, tactical air power, and in conventional ground force capabilities. The Soviets have increased their influence in Africa and in Latin America, particularly through Cuban influence and involvement. Meanwhile, Moscow has not loosened its control over its East European buffer zone. Now, the Soviet Union is in the process of creating a new satellite state in Afghanistan. According to this American perception, the benefits of detente were short-lived and illusory.

The most common European perception is somewhat different. Even Europeans who acknowledge the negative consequences of the last decade which I have just listed, believe that there is more on the positive side of the ledger. It is clear that a wide range of observers in Europe—across the political spectrum—hope that the Reagan Administration will soon resume dialogue with the Soviet Union on strategic arms limitations, without which progress in other arms control efforts will be severely limited and to which many other East-West relationships are virtually held hostage.

Until the Reagan Administration implements a comprehensive policy toward East-West relations, the formula which has been the lifeblood of the alliance for over a decade will remain in question.

THE SECOND DILEMMA

The second dilemma is created by the fact that the security of all the NATO members depends now more than ever on factors outside the agreed "area" of the Alliance. And yet, today, as well as throughout NATO's history, there is far from complete agreement on how to deal with these problems.

As you know, when the North Atlantic Treaty was negotiated, many European countries wanted their colonial possessions included in the alliance commitments. The United States favored narrower boundaries. It is clear, of course, that things have changed. There are many in the United States who now wonder why Europeans object to the idea of enlarging NATO's area.

Meanwhile, European perspectives have changed. For over two decades, Europe retrenched from global roles and responsibilities. Now only France, and, on a more limited scale, Great Britain, have major military commitments or capabilities outside the NATO area. But, it may be that a new European global approach is emerging. The process of consultation and coordination among European Community countries has begun to produce European positions, however imperfect, on issues beyond European borders.

This new European role, however, has tended to highlight a divergence between the United States and Europe concerning which policy instruments most effectively guarantee Western security. This leads me to the third dilemma.

THE THIRD DILEMMA

Perhaps the most profound cause of tension within the relationship is the divergence between European and American concepts of security. NATO is, first of all, a military alliance. The history of the alliance is nonetheless filled with acknowledgments of the contributions made to the well-being of the alliance beyond military spending.

As we begin the decade of the 1980s, many Americans see a pervasive set of threats to the alliance; they define the required response largely in military terms. The European allies, on the other hand, see the threat as less imminent and more often believe that security can be most effectively enhanced through diplomatic or economic policy tools.

Recent discussions between European leaders and Reagan Administration officials undoubtedly have helped narrow the area of potential differences. But challenges clearly lie ahead. For example, recent U.S. statements have suggested that American policy toward the Middle East will be framed primarily in response to the Soviet threat in the region. If this approach is translated into policy, the United States presumably would depend more heavily than in the past on military assistance and obtaining access to base facilities, de-emphasizing American efforts to find solutions to indigenous Middle Eastern problems. Such an approach could run head-long into the continuing European preoccupation with the Palestinian question as the main source of instability in the region. It is a question, therefore, of whether collision is inevitable or whether complementary U.S. and European approaches can be developed.

A POLITICAL AGENDA

It would be pure folly for the United States and its allies to allow these differences to go unattended. Ultimately, the Alliance cannot survive unless the United States, Canada, and the European nations continue to believe that the costs of alliance are worth the benefits. The task, therefore, is to rebuild a political consensus which reflects the interests and perceptions of Europeans and Americans.

An agenda for a new NATO consensus could include three fundamental aspects.

First, concerning problems outside the NATO area. During the so-called "Year of Europe" in 1974, the United States undertook a major initiative to obtain NATO recognition of the importance of threats outside the NATO area. In June of that year, the NATO heads of government signed a "Declaration on Atlantic Relations" which acknowledged that "the contributions made by members of the Alliance to the preservation of international security and world peace are recognized to be of great importance."

The 1974 declaration was a notable but relatively weak statement. In a major political act in 1980 the NATO Defense Planning Committee went well beyond the 1974 declaration. On May 14, NATO defense and foreign ministers agreed "that the stability of regions outside NATO boundaries, particularly in the South West Asia area, and the secure supply of essential commodities from this area are of crucial importance."

The communique went on to acknowledge the differing relationships of NATO allies to countries in this region and encouraged those allies "that are in a position to do so" to "use their best efforts to help achieve peace and stability in South West Asia taking into consideration the interests of the regional countries. . . ." The communique also noted that, in particular, U.S. commitments in South West Asia would place additional responsibilities on other allies for defense improvements in the NATO area.

This mandate should be sufficient for the new American administration. It therefore seems unlikely that the United States will push for any formal enlargement of the NATO area. Indeed, I presume that they will conclude, if they haven't already, that such an attempt would be counterproductive.

It might nonetheless be politically significant if the general sense of the DPC communique could be supported at a higher political level—perhaps in an allied summit and in a way that would persuade France to participate. It might also be a useful institutional innovation to appoint a special committee of the NATO political advisors to facilitate consultations on events outside the NATO area which could affect the individual or collective security of the allies.

A recent report by the U.S. Council on Foreign Relations and its counterparts in Germany, France and Great Britain suggest that ad hoc big-power Western working groups (the French would say "directorate") be established to coordinate approaches to global security problems. I am sympathetic to the idea of occasional summit meetings among major Western powers, including Japan. I also think that broadening the scope of such meetings to include political and security as well as economic issues might be wise.

The idea of more formally structuring such cooperation, however, has several risks. Most importantly, such formalization could undermine current NATO consultative procedures, further weakening the commitment of smaller countries, such as the Netherlands, to the alliance. Perhaps a better model for out-of-area military collaboration is provided by the informal naval cooperation between the United States, France, Great Britain, and Australia that has been underway in the Indian Ocean since last fall.

Second, the issue of defense improvements and expenditures. A question of priorities is at the heart of this agenda item. It has been only natural for observers in the United States to ask why the United States should carry the burden of defending oil supplies and sea lanes when Europe is a direct beneficiary. Most Americans are now aware that both Britain and France have been making a direct contribution to security of sea lanes in and out of the Persian Gulf region. It would appear most efficient, however, if the bulk of future additional European military efforts were devoted to correcting deficiencies within the NATO region.

For the past few years, the famous 3 percent commitment has served as the primary measure of allied defense efforts. Many observers now believe, however, that while increased defense expenditures are required, the best measures of such efforts are those that more effectively match missions against threats, that are projected over many years, and that can take into account the great varieties of economic capabilities and structures of defense efforts within the alliance.

The United States will be looking for clear and unequivocal support from allies regard-

ing increased defense efforts European nations, for their part, might well ask in return that any new formulas take into account both American and European nonmilitary contributions to Western security.

Another key element in a reconstituted alliance consensus is the question of deployment of new long range theater nuclear weapons. I am aware that this is a question of vital importance to your country. I share your strong desire to avoid nuclear war. I think that I can say without hesitation that the American people share this desire.

But even if one regards Soviet deployment of the SS-20 system as more-or-less a "modernization" of its capabilities, similar moderization of western systems seems necessary.

The political ability of the Alliance to maintain a stable theater nuclear balance with the Warsaw Pact, however, will depend on whether it can re-establish the credibility of its offer to negotiate limits on such systems with the Soviet Union.

If the Alliance is to continue to enjoy a broad base of support among European political parties and governments, the third agenda item—a renewed NATO commitment to seek meaningful arms control measures—will be essential.

It is clear that in the last decade we have come to expect too much of arms control; arms control can neither ensure our defense nor resolve basic East-West differences and should not be expected to do so. It is equally clear, however, that governments would not be fulfilling their responsibilities to their citizens if they failed to attempt to use arms control to help diminish the dangers of the East-West confrontation.

It is in this area that the United States bears a special responsibility. If the new Reagan Administration wishes to defuse the mounting anti-nuclear sentiment in Europe, it must demonstrate that the United States is capable of managing the strategic equation on behalf of the Western alliance.

This means that the new administration needs to develop a coherent concept of what it intends to seek in the way of changes to the SALT II treaty and how it intends to do so. At the same time, the administration will have to develop in parallel a credible approach to the negotiations on limiting theater nuclear weapons.

Furthermore, the United States—through its words and deeds—must reassure Europeans that the deployment of new long-range theater nuclear systems would enhance the link to U.S. strategic capabilities, and therefore would strengthen deterrence and decrease the chances of war at any level of hostilities.

Until there is a better understanding between the United States and Europe on this point, discussion of further new improvements in NATO's nuclear posture is likely to be counter-productive for the alliance. And, given the level of public concern about the neutron weapon, perhaps European governments should consider devoting special attention to financing development of non-nuclear responses to the Warsaw Pact's large tank advantage over NATO.

An American poet, Robert Frost, suggested that "Good fences make good neighbors." Frost's advice was accompanied by some additional wisdom:

> Before I built a wall I'd ask to know
> What I was walling in or walling out,
> And to whom I was like to give offense . . .

In these words, Frost captured what may be an important reality for our time. Walls and fences may well be required, and a free and democratic nation ignores that requirement only at its peril.

The maintenance of credible defenses does not mean that neighborly relations are impossible; in fact, the defenses, to the extent that they increase national security, may make neighborly relations more comfortable.

But, as Frost cautions, when we build a wall, we must ask to what extent it also walls us in and whether it increases our security or decreases it as a result of "giving offense" to others.

The NATO countries must provide defenses that deter Soviet aggression and deny Moscow special political advantage, but that at the same time permit good neighborly relations. It remains an open question whether the United States and its allies can agree on how high or thick the protective wall needs to be and where the gate for arms control should be constructed.●

MICHIGAN'S BOTTLE LAW WORKS

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. SAWYER. Mr. Speaker, I am pleased to join with my colleagues today in introducing the Beverage Container Reuse and Recycling Act of 1981, which will help to promote recycling and conservation of raw materials on a national level.

My home State of Michigan is one of the States that has discovered this is a sound approach to reducing litter and conserving important national energy and material resources. Voters in Michigan opted for a bottle bill in a statewide initiative in 1976.

Now in effect for over 2 years, the proposal seems to be fulfulling the promises which attracted voters. Surveys conducted by the State highways and transportation department show that beverage container litter along highways has been significantly reduced. During its first year of operation, 69 percent of the beverage containers found along roads in surveys were from other States or were left over from the predeposit days.

The Michigan experience has not been without some problems, and the law is still being reviewed to determine what changes may be desired. But there is no question that the bottle law is working and has received very strong public support.

More than ever, we must be concerned with improving our environment and conserving energy and our natural resources. I urge the appropriate congressional committees to initiate hearings on the bill which we are introducing today in hopes that we might at least begin a national debate on this important issue.●

RETURN OF PROFESSIONAL FOOTBALL TO LOS ANGELES: SOME FACTS WORTH REMEMBERING

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. DIXON. Mr. Speaker, one of the local issues which has most concerned me during my term in Congress has been the search for a replacement professional football team for the Los Angeles Coliseum. Host to both the 1932 and 1984 Olympic games, the economic viability of the coliseum and the surrounding area which I represent has been threatened since the departure of the Anaheim Rams last season.

As many sports fans know, the future of professional football in the coliseum will to a great extent be determined by the outcome of an antitrust suit brought by the coliseum commission against the National Football League. In the pretrial war of words, the NFL has predicted dire consequences should the league's various anticompetitive devices, including the use of exclusive territorial restrictions, be found illegal. While not wishing to interject myself into the present court case, it seems to me that this is a game the NFL has played before, and that its claims of impending anarchy in pro football are greatly exaggerated. Rebuttal of these claims is particularly timely in light of the reintroduction of the Sports Antitrust Reform Act by my colleague from Ohio, JOHN SEIBERLING. This legislation would greatly restrict exclusive territorial restrictions, by which a team's owner can unilaterally veto the entry of another franchise into the team's home territory, and serve notice that professional sports will have to follow the same rules as those governing other industries.

Recently, the Los Angeles Times reprinted an article by sports columnist Leonard Koppett, which originally appeared in the Sporting News. In it, Mr. Koppett states the issues, I believe, fairly and succintly. Entitled "Some Facts Worth Remembering," I commend it to those interested in the issues surrounding the case:

[From the Los Angeles Times, Mar. 11, 1981]

SOME FACTS WORTH REMEMBERING

PALO ALTO, CALIF.—Amid all the accusations, exaggerations, personal insults, legal complications and bitter passions surrounding the Raiders-to-Los Angeles case, a few undisputed facts, if kept in mind, can help a dispassionate observer keep things in perspective.

Fact No. 1—Talk of "anarchy" or the threat to orderly existence if the courts rule against the National Football League is nonsense. There is one, and only one, fairly re-

stricted issue to be tried; does the NFL rule concerning the move of a franchise conform to the requirements of the federal antitrust laws, and, if it does, is it being applied in a reasonable way to this specific move?

Rule 4.3 says a team can't move without the approval of three-quarters of the league members. It used to say "unanimous," but the league's own lawyers saw that would be found unreasonable, and had it changed as soon as the Los Angeles Memorial Coliseum Commission threatened an antitrust suit in 1978, when it lost the Rams to Anaheim.

If the rule as it is now written, and as applied to the Raiders, is permissible under federal law, then the NFL is right and the Raiders can't move without approval.

If the rule is not permissible, then it cannot be used against the Raiders and they can go.

But no other aspect of NFL regulations—not even a future proposal for someone else to move—will be directly affected by such a verdict.

The league would simply have to adopt a new rule, more compatible with the antitrust laws, for future cases.

This has already happened with respect to the college draft and the Rozelle Rule (about compensation for a free agent who changes teams). The old rules the NFL had on these points were found to be illegal under the antitrust laws, several years ago, in several lawsuits.

The league had to create more suitable rules, which the court then approved.

At the time, we heard the same cries from the NFL commissioner, its lawyers and most club owners that "the game as we know it" would be hopelessly wrecked if the old, restrictive draft and reserve rules were weakened. But the last time I looked, the draft was still in existence, the NFL was boasting about setting attendance records in 1980, television income was at an all-time high and most players were reporting for work at the right time and actually following the instructions of their coaches.

So a Raiders move to Los Angeles, if permitted by the courts, will be serious enough to those involved, but hardly the signal for bloody revolution on the pro football front.

As for setting an example—"what if someone decides to pull out of the joint television deal, or to sign Herschel Walker after his freshman year, or to move a franchise every year"—there simply is no issue. If the television deal or the draft or franchise location can be attacked by new lawsuits, the attack is neither more nor less possible regardless of how the Raider case comes out.

If the Raiders and the Los Angeles Coliseum win this case, no other NFL rule will be affected in any way whatsoever.

If the NFL wins the case, no other NFL rule will be strengthened in any way. If some club wanted to challenge the draft or the television arrangements, it would do so tomorrow, or a year from now, without any relation to this case.

Fact No. 2—The Raiders claim that remaining in Oakland, under any deal proposed to them there, will put them at a "competitive disadvantage" with respect to the teams that are voting to keep them in Oakland. This claim is clearly true.

Since all NFL teams share equally in the national television package, there are only three areas of gross income where large-scale difference can occur: sale of tickets, which depends on seating capacity; luxury boxes, which bring enormous rentals and entail substantial tax advantages when built under certain arrangements; and local radio-television rights (including pre-season) which depend on population.

FIVE TEAMS ADDED SEATS

When the Raiders entered the NFL with the other American Football League teams in 1970, their seating capacity (54,000) was the third highest in the 10-team AFL, and higher than seven of the 16 NFL teams. Now (or when the new building in Minneapolis opens) they will rank 24th among the 28 teams instead of 12th among 26.

Since 1969, five of the old AFL teams that came with them have added 23,000 to 35,000 seats (Buffalo, Cincinnati, Denver, Kansas City, and New England). The rough formula is $1 million annual income from each additional 10,000 seats.

The luxury box concept had not yet been developed in 1969. Today it exists in some form for about half the teams in the league, with more planned. The income varies, but the net advantage again is measured on the scale of hundreds of thousands of dollars a year, and in some cases millions.

The rights for radio and pre-season television (entirely apart from whatever future cable arrangements may arise) are clearly more valuable in Los Angeles than in Oakland.

The Raiders argue, therefore, that over the next 10 years, they will be taking in $3 million to $5 million a year less than teams like the Rams, Giants and others, even if they sell out all their games in Oakland. This, they say, will weaken their ability to compete aggressively for top-flight performers.

The last point, of course, may be argued either way. But what is beyond dispute is that the Raiders, during the years 1965-75 when they built their success, did have economic equality with most of their competitors, and that in the 1980-1990 decade they can't possibly have it in Oakland under any of the arrangements proposed to them by Oakland authorities.●

CONGRATULATIONS TO EDWARD J. DILLON

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. APPLEGATE. Mr. Speaker, I would like to take this opportunity to congratulate a constituent of mine, Mr. Edward J. Dillon, on his retirement from 36 years of outstanding service to the Boy Scouts of America in Columbiana County, Ohio.

The success and growth of the Columbiana County Boy Scouts is in great measure due to the efforts and leadership of Mr. Dillon. In the 36 years he has served the Boy Scouts, he instituted a number of programs for the benefit of Columbiana County. He increased the membership from 36 units serving 901 boys to 76 units serving 1,809 boys. He increased the fundraising levels from $7,800 to $26,000 annually. He had a direct part in the acquiring and development of six Boy Scout camps.

As a member of a number of civic organizations, Mr. Dillon brought considerable expertise to his work. His dedication and ideals have helped enrich the lives of all those young men who participated in the Boy Scout programs.

We owe a great deal to Mr. Dillon. We are proud of his achievements. We are proud of him. We will miss him and most of all, we thank him.●

REMEMBERING ALLARD LOWENSTEIN

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. RODINO. Mr. Speaker, this Saturday marks the first anniversary of the tragic killing of Allard Lowenstein. Our former colleague helped to improve the lives of millions of Americans through his efforts to advance civil rights and world peace.

His was a life committed to preserving the rights and freedoms of the individual, and the many stories of Al's courage and determination serve as lessons for all of us on what it takes to guard the liberties we hold so dear.

I commend to my colleagues the following article which appeared in Commonweal magazine last year. It is one man's account of the struggle and the triumphs of the civil rights and social activist movements during the 1960's and 1970's, and Al Lowenstein's essential role in those times of change.

A CHANCE ENCOUNTER

(By Thomas Powers)

The last time I saw Allard Lowenstein was in the changing room at the Yale Club. He was winedark with exertion and gleaming with sweat. The obituaries say he was 51 years old but he carried the years well. His body was short, chunky, heavy with muscle. I don't know what he did at the club; I never saw him on the squash courts. But he had obviously been doing something which required great effort—weight lifting, chinups, something strenuous and monotonous. I often saw him there in the last seven or eight years, always in the middle of the afternoon. A friend and I passed him once not long after he'd been defeated for the second or third time in a congressional race. "If he didn't spend so much time here," my friend said, "maybe he'd get elected." It was just a remark; we had no idea why he'd been beaten.

The first time I saw Lowenstein was in Jackson, Mississippi, in November, 1963. It was about 10 o'clock at night. A couple of friends and I had driven straight through from Yale. This was Lowenstein's doing but we didn't know it. I'm not sure what we thought we were doing there, but we had come anyway. On the outskirts of Jackson we'd filled up with gas and asked directions to Lynch Street. "What you wanta go there for?" asked the man at the pump. "Do you know what part of town that is?"

Lowenstein was wearing a white T-shirt. He looked about the way he looked when he died, perhaps not quite so chunky. Hair cut short, thinning wisps rising high on his crown, horn-rimmed glasses, lips pursed

around prominent front teeth. His face had been designed for caricature. I heard him called the world's oldest living student leader; I didn't know any of the history behind the remark. Lowenstein made some phone calls, found us a place to stay, gave us directions. He had a brisk, liquid way of speaking; spittle caught the light. He gave an impression of force and directness; he stood erect, a bit squarish in shape, and looked right at you, eyes bulging behind his glasses. With him that night was a slight, soft-spoken black man named Robert Moses. Lowenstein and Moses seemed to be running the show.

Mississippi was having an election campaign for governor that fall. I've forgotten who was running, but the candidates certainly weren't courting the black community, which was almost totally disenfranchised through phony reading tests and sheer intimidation. The Student Non-Violent Coordinating Committee (SNCC, pronounced snick) had been running a voter-registration program with limited success. Someone came up with an idea for a mock election campaign in the black community to dramatize how many people would vote if they could vote. Lowenstein suggested bringing in a crew of white student volunteers to help with canvassing and attract the attention of the national press. Large contingents came from Yale, where Lowenstein had gone to law school, and Stanford, where he had been an administrator for a time.

Mississippi was another country in 1963. There is no fear like the fear of men. Someone told me Lowenstein never slept more than a night or two in the same house, but I didn't understand why until I'd been there a couple of days. The second night, on our way up to the Delta, we were stopped by the local police. One of them grabbed me by the arm, swung me around, and pointed his pistol at me. In Cleveland we stayed with a young black organizer named Charlie McLaurin. He turned out his house lights before opening his front door at night so he wouldn't make a convenient silhouette for a sniper. The windshield on the car of a friend of his had been blown out with a shotgun blast. Shots had been fired through living room windows in Sunflower County, churches had been burned, people had been beaten. McLaurin told me he was about to give up on voting rights. What they needed was revolution, a guerrilla war in the countryside.

Later, in Natchez with two black organizers early one morning, we got a phone call telling us to leave town immediately; another volunteer from Yale had been shot at the day before. When we left two or three rednecks in a pickup chased us for a while. We could see rifles hanging on a rack in the cab. I remember the pitching and bucking of the car as we tore down the long straight road, slowly pulling away from the pickup until it was lost in the distance behind us. I was plain terrifed for a week straight. In Mississippi the very air was chemically one part fear.

One day in a small shack town on the edge of a big plantation a black man answered my knock. He was about my age, four inches taller, eighty pounds heavier. I was alone. "Have you heard that Aaron Henry is running for governor?" I asked.

"No suh, I don't have nothin to do with that."

"But he's trying to win the vote for Negroes in Mississippi."

"Yessuh."

"Have you voted in the election yet?"

"No suh, I don't do no votin."

"But this is important, he needs your support."

"Yessuh. What you want me to do?"

"I want you to vote for Aaron Henry."

"Yessuh, how I do it?"

I showed him where to sign his name.

He was trembling, and his voice shook with fear.

I soon found I could get more votes if I cut the palaver and just told people what to do. They were quick to oblige. A black organizer joined me at one point while I was talking to a bent old man named John something. "Now, John," I said, thinking to be friendly, "it's important for you to help Aaron Henry by signing this card here." He did as he was told. When he had gone back inside the black organizer said, "Look, I'm going to tell you something. You call these people mister. White people have called them by their first names all their lives you call them mister." He was furious, and I was hurt, angry and ashamed in return. We'd spend a decade together in thirty-six hours.

The night before the regular election a rally was held in Jackson for Aaron Henry and his running mate, the Rev. Ed King. A meeting hall on Lynch Street was about a third full at the appointed hour. The hall was quiet but for the creaking of chairs. Two or three hundred black people in their Sunday best shifted nervously in their seats. Outside, Jackson city police slowly passed back and forth. Aaron Henry was late; one of the SNCC people said he was on "C.P.T."— colored peoples' time. An organizer went to the podium and said, Don't go away folks, Mister Henry is on his way. A long silence followed. Two or three couples got up and walked quietly to the rear, out the door. Others followed. Lowenstein appeared wearing a suit and tie. He told someone to find Henry and get him there and he went on stage to speak.

I can't remember his precise words, but I do remember his drift and tone. He talked about the Constitution and the Rights of Man. He recounted the history of Aaron Henry, the druggist from Clarksdale who had worked long and hard for the rights of Negro Americans. He talked about the thousands of voters who had cast their first ballots in the last week, he said the whole nation was watching, the day was fast coming when the vote would be theirs as a natural right. Then Lowenstein started to talk about the whites in Mississippi, the scared folks who crept around at night in white bed sheets and ganged up twenty to one before they dared beat up a Negro boy. They were quaking in their beds at night, all those plantation-owners, just plain terrified of the day when Negroes in Mississippi marched head-high to the polls. I wish I could remember how he did it, but Lowenstein got the audience to laugh, and then he got them to cheer, and then he got them laughing and cheering and whistling and he kept it up, never breaking stride, for the better part of an hour until Aaron Henry finally arrived, swept up onto the stage by a wave of cheers and yells and hallellujahs. Then Lowenstein disappeared and that was the last I saw of him in Mississippi.

Things moved quickly in those years. In 1965 Robert Moses dropped out of sight, saying he didn't think the Movement ought to have leaders. SNCC broke with Lowenstein on political grounds. Of course there had been a hundred sources of friction, but what SNCC said was that Lowenstein didn't belong, Lowenstein was a New Deal liberal recruiting black votes for the Democratic power structure. What this country needed was revolution. You had to understand that black people wanted no part of white imperialist capitalist America, fighting a racist war in Vietnam and murdering black people here at home. The white man was a beast. The Movement wasn't out there courting broken heads for the right to sit at a lunch counter, the struggle was for something else, something basic, something revolutionary. This wasn't no protest movement; this was a revloutionary movement. Lowenstein believed in the system, which made Lowenstein part of the system, which meant Lowenstein was the enemy—Whitey with a velvet glove.

The bitterness of the break is hard to exaggerate. Later, when Lowenstein won a measure of broader public fame for organizing the "dump Johnson" movement in 1968, he had two distinct reputations—as a kind of radical insurgent on the furthermost edges of mainstream American politics, and as a Red-baiting reactionary desperately trying to stem the leftward surge of the American student community. By that time the Movement—that is, the organizations like SNCC and SDS at the heart of the broader activist ferment—had firmly declared itself Marxist-Leninist, and had redefined its goal as revolution in the United States. By revolution they did not mean a kind of revitalization of American democratic ideals in the pursuit of populist reforms; they meant replacement of the government by a dictatorship of the proletariat. This sounds like a bad joke now. But the Movement was riding high in 1968; within a year or two it simply evaporated, paralyzed by a commitment to revolution, lightly given, which it could not make good. Lowenstein had opposed the leftist romance from the beginning; he feared nothing more than a rerun of the 1930s, when every legitimate grievance or aspiration was turned into an organizing tool of "the revolution." Naturally he was much resented by those who had exactly that in mind, but the real hate came from those who were the most innocent in their commitment, the "kids" who were not so much trying to change things, as to identify with the poor and oppressed. For them "their revolution" was a kind of spiritual earnest money. It meant they were serious, and worthy of trust by suspicious blacks, who gibed that the white kids hadn't put their lives on the line, and could always run back home to Mommy and Daddy and a station wagon in the suburbs.

But this is all ancient history. The Movement is as dead as the Popular Front. The passions are only cinders. The people who claimed Lowenstein was an agent of the CIA have forgotten all the details. "The revolution" seems like a dream. The burnt-out cases are raising organic vegetables or teaching crafts in community colleges or working on PhD. theses on Eugene V. Debs. Who can really say what went wrong? But the Movement was not without its effect.

In 1971 I went back to Mississippi to see how things had turned out. Charles Evers, the black mayor of the tiny town of Fayette, was running for governor. When his motorcade raced from one rally to another up through the Delta, State Police cars led the way with sirens screaming. I saw Charlie McLaurin at a rally in Sunflower County. He was running for the state legislature, had gained weight, gave a practiced, sensible speech supporting the Mayor.

The night of the election there was a party at the meeting hall on Lynch Street in Jackson where Lowenstein had spoken

eight years earlier. The place was packed. City police directed traffic out front. Reporters were milling about. A local television crew was waiting to get the Mayor's concession speech. Evers was a good speaker too, a master of the Southern black antiphonal style who could build the "Yes, Lord!"s into a roar from the audience. He spoke of the new day coming, white and black working together for a better life in Mississippi. Of course the Mayor was going home to Fayette, but they had had those old white politicians running scared there for awhile ("Oh yeah!") and there was no turning back now ("Yes Lord!"). Evers admitted they had whipped us, he would bite no bones about that, but what he said sounded like a victory speech all the same.

For some reason I never spoke to Lowenstein. I could not find the words to begin, as we passed to and from the shower. What was I to say? Sorry you lost another race for Congress, better luck next time? I would like to have said: Allard, you made a deeper impression on me than any other chance encounter of my life. But that is just not the sort of thing one can say to a stranger, out of the blue.●

FASCELL CONGRATULATES DRUG ENFORCEMENT ADMINISTRATION ON OPERATION GROUPER

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. FASCELL. Mr. Speaker, I wish to bring to the attention of our colleagues the outstanding success of a recent Drug Enforcement Administration operation and to congratulate DEA on bringing it to a conclusion.

Yesterday, the Agency revealed the arrest of 155 individuals believed to be involved in 14 separate narcotics trafficking organizations, culminating a 2-year investigation called Operation Grouper.

DEA received cooperation and assistance from 21 other Federal, State, and local agencies and the Government of the Bahamas in what I understand to be one of the largest efforts of its kind. It is estimated that this one operation will result in the immediate halt of one-third of the marihuana traffic in the entire country.

The task force was established and run out of the DEA's Miami District Office and focused on putting a major dent in the enormous drug trafficking which exists in the south Florida area. The traffic originates primarily from Central and South America and has been a major cause of an alarming increase in violent crime in the community which I represent.

Therefore, it is with a deep sense of gratitude that I thank and congratulate the DEA, the U.S. Coast Guard, and all the other agencies and their personnel who participated in this effort. Particular thanks should go to the four brave undercover agents who risked their lives in order to help stop these insidious activities.●

STATEMENT ON MX MISSILE

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. GEJDENSON. Mr. Speaker, I had the opportunity to attend a briefing this week given by the Office of Technology Assessment for the House Subcommittee on Public Lands and National Parks on the pros and cons of the different mobile basing possibilities for the MX missile. The study was requested last year by Congressman UDALL and Senator STEVENS.

My doubts as to the feasibility of the MX system due to difficulties involved in its basing were confirmed when Dr. Peter Sharfman, program manager of the international security and commerce program, stated that "at this point we are skeptical about the possibility of any survivable basing within the current decade."

The current plan to base the MX on land located in Utah and Nevada was found to have a great many problems. It would cause major environmental and economic damage in the area, including reduced access to 8 of 19 strategic minerals crucial to our Nation's industry and defense.

The land-based model calls for 200 missiles to be shuttled between 4,600 shelters. This scheme was created under the assumption that SALT II, which limits the number of warheads per missile, would be ratified. This, of course, is not the case at present. Therefore, in order to assure the effectiveness of the system, OTA estimates that we would need 544 missiles and 12,500 shelters by 1995. The cost of the initial 200-missile program is estimated at between $35 billion and $70 billion. It is easy to see that the cost of the program under these circumstances could reach well over $100 billion by 1995.

In the category of survivability, which for the purposes of this study was defined as the ability to withstand a nuclear attack with 100 missiles intact, the land-based model was found to be inferior to missiles mounted on small submarines.

The vulnerability of the land-based model was also questioned. The OTA suggested that it would involve "the equivalent of a new technology" to successfully hide the exact location of the missiles from sophisticated detectors.

On the basis of this information I believe that the proposed land-based MX missile system should be totally reevaluated. To continue to pour money into the land-based MX program in light of its severe problems would be an irresponsible waste of taxpayers' money. Serious consideration should be given to scrapping the land-based option because of its excessive cost, its ineffectiveness, and the environmental damage it would cause.●

LOPSIDED PRIORITIES AT IRS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. CONYERS. Mr. Speaker, the adminstration believes Federal spending is out of control and that substantial economic recovery depends on a far tighter budget and major tax cuts. The economic analysis underlying this argument is open to serious question, yet already it is clear that low- and moderate-income households will bear the greatest burden and receive the least benefits, while well-off groups and the largest corporations will reap the biggest gains.

One of the softest parts of the administration's budget package is its failure to present far-reaching reform of the tax system. Every year IRS fails to collect revenues from special groups because of the billions of dollars in tax loopholes that exist. Billions more in new tax breaks will be doled out to the highest-income households and corporations, while ordinary citizens and small businesses will wind up without any benefit.

A recent article on IRS, written by Ernest Volkman and John Cummings, appearing in the April 1981, issue of Penthouse, documents the lopsided priorities that IRS employs in its pursuit of taxes. Simply put, it goes after the easiest targets while abandoning the richest sources of Federal revenue. IRS's ability to collect taxes from these major sources, including organized crime, will be further impaired if the adminstration succeeds in cutting its staff and technical capabilities. I urge my colleagues to read the excerpts of the IRS article, that follow:

THE NEW AMERICAN GESTAPO

On August 2, 1979, the mighty power of the United States government, in all its resplendent majesty, stood outside the battered 1970 Volkswagen of Mr. and Mrs. Stephen Oliver of Fairbanks, Alaska.

The government's might stood in the form of a half-dozen agents of the Internal Revenue Service, its most feared agency. They demanded that the Olivers remove themselves from the vehicle so that the IRS could seize it in partial satisfaction of a tax lien of $3,300. The Olivers refused, insisting that the IRS (or any other government agency) had no right to seize anyone's property without a court order.

The Olivers were wrong—the law specifically gives the IRS "power of distraint and seizure by any means" without regard to such things a court orders. So, balked in their attempt to get the Olivers out of their car, the IRS agents then smashed in the

car's windows with nightsticks and bodily dragged out the automobile's former owners.

The case of the Olivers is only one of a growing number that have occurred all over this country during the past few years. What neither the Olivers nor the other targets in hundreds of similar cases do not know is that they are the victims of an official IRS policy to abandon its pursuit of big-time tax cheats in favor of a war against the ordinary taxpayers of this country.

As the sight of six IRS agents smashing out the windowss of a car as part of a $3,300 tax case shows, the unleashing of the awesome power of the IRS against what amounts to penny-ante tax collections is a gross misuse of agency power. Worse, while the IRS agents are harassing small-time taxpayers, the people they're supposed to be pursuing are getting away with murder. Here are a few examples:

In Los Angeles police stopped a suspicious armored car and used specially trained dogs to sniff the inside of the truck for narcotics. The dogs detected traces of heroin, but in the course of the search, police struck paydirt more than $4 million in cash, apparently on its way to the bank after a lucrative narcotics deal. Police notified the IRS, but the agency evinced no interest whatsoever in the case.

In San Francisco a major Drug Enforcement Administration investigation drew up a list of major drug dealers who were subject to IRS prosecution for failing to pay taxes on millions of dollars in profits on illegal drug sales. The list was turned over to the IRS, but when DEA agents tried to get it back, they were told that the list was now a "confidential tax matter" and could not be returned.

In New York a major drug trafficker named Nicky Barnes was finally convicted on narcotics charges after a long investigation by federal prosecutors. It was not until after his trial that they discovered that Barnes had brazenly listed $250,000 from narcotics sales on his income tax return. IRS agents never bothered to inform other federal agencies of that critical fact and showed no interest in prosecuting Barnes, called by drug agents one of the biggest narcotics dealers in the United States.

In Miami, crossroads for most of the estimated $40 billion annual narcotics business in this country, federal agents have had a difficult time trying to nail crooked bankers, lawyers, and accountants who have been hiding most of that money without paying taxes. But the IRS has given only minimal cooperation, despite mounting evidence of hundreds of millions of dollars in untaxed money lying around in Florida banks (the drug pushers have become so open that they arrive at banks with large cardboard boxes stuffed with cash for deposit). At the moment there is an incredible $5 billion cash surplus in the Federal Reserve System in Florida, most of it narcotics money.

Such examples are now nearly endless. They all amount to one thing: the narcotics kingpins, organized-crime leaders, and major white-collar criminals who once feared the IRS and its considerable powers—beginning with Al Capone, the IRS was for decades the scourge of major criminals, white-collar and otherwise—now have little to fear. The IRS is currently after very different targets. What kind? The most defenseless targets in America, the small taxpayers. Consider a few recent targets:

A major campaign against casino and restaurant workers in Las Vegas, apparently part of an attempt to "make an example," as one IRS official put it, of such workers in order to intimidate the rest. There are in this country an estimated 2 million hotel and restaurant workers whose income is divided between salary and tips they are supposed to declare. The IRS suspects widespread cheating on declaration of tips by such employees, hence the campaign. But even assuming for a moment that all such workers cheat a little—and there is not evidence that they do—such a massive campaign hardly seems worth the potential return.

Another major campaign to crack down on independent contractors, especially fishermen, independent truckers, small farmers, and other similar entrepreneurs. As part of the drive, justified by what the IRS claims is significant underreporting of income by such workers (a claim disputed by the federal Office of Management and Budget), the agency wants to subject all self-employed persons to withholding. The IRS attempt is nearly insane: the cost of doing business will increase significantly for such workers without any corresponding increase of tax monies to the Treasury.

Strong efforts to harass middle-class taxpayers, especially those the IRS considers gross violators. Special targets seem to be mom-and-pop operations, certain doctors and dentists, and small businesses. The harassment has sometimes taken gestapo connotations: unitl finally stopped, IRS agents in Idaho were putting chains and padlocks on businesses that didn't pay their taxes on time and, in other instances, chained cars of recalcitrant taxpayers to utility poles.

As a means of forestalling a growing tax protest movement, IRS agents have begun a major drive to infiltrate and otherwise harass a number of taxpayer protest groups. All those attending such meetings can expect tax trouble.

All things considered, it's no wonder that, according to an FBI report last year, 74 percent of all threats and 41 percent of all assaults on federal workers were directed at IRS employees.

"The high-handed bureaucratic excesses of the IRS are a national disgrace," says Sen. Paul Laxalt of Nevada. "Evidence reveals that the IRS singles out areas of the country for special enforcement. It will go completely against congressional intent and thirty years of past policy by changing its rules to squeeze out more revenue. We apear to be witnessing an agency totally out of control, running roughshod over taxpayers and making a joke out of our rule of laws. The cases of abuse are easy to document and too numerous to count."

Laxalt was especially exercised about the obsessive IRS campaign against workers in Las Vegas. Last year he and Sen. Harrison Schmitt of New Mexico convened special hearings of the Appropriations Subcommittee on the Treasury to review a lengthening list of taxpayer complaints about the IRS. Among other things, Laxalt was shocked to learn that the IRS had assigned 170 full-time employees to its Las Vegas office, including 26 special agents (Los Angeles has 11 special agents to oversee a taxpayer population ten times as large). As Laxalt discovered, all that IRS manpower wasn't in Las Vegas to look into the millions earned by casinos or to investigate possible organized-crime connections with the gaming industry or even the activities of rich gamblers. No, all that manpower has been used to investigate busboys, waitresses, casino dealers, and hotel chambermaids, whose combined salaries wouldn't even put a dent in the money raked up by one big casino in just one night of heavy action.

IRS agents themselves admit privately that Laxalt and other critics are right: they have been ordered to withdraw from the war against big-time criminals and spend their time tracking down what they call "the penny cases," those involving small claims against mostly middle-class taxpayers, who lack the resources to tackle the IRS. In almost all cases those taxpayers quietly pay what the IRS tells them they owe Uncle Sam.

There is an increasing amount of congressional criticism over IRS operations, and that, coupled with increasing taxpayer resistance, could eventually lead to an overhauling of the present system. But the new Reagan administration seems not to be headed in that direction: despite the clout of so bitter an IRS critic as Laxalt in the new administration, its plan seems to center on keeping the system as presently constituted but sharply reducing tax rates to defuse taxpayer opposition. In the view of most of Reagan's economists, such reductions will also end the so-called underground economy, the proliferating system under which many taxpayers simply overlook paying taxes on their income as a means of quiet protest against the system. That economy, now estimated at somewhere between $40 billion and $70 billion a year (not including criminal profits that escape that tax collector), will be reduced, the economists argue, by merely reducing the tax rates that force middle-income taxpayers into such a sub-rosa system.

Perhaps, but the fact is that for the taxpayers of this country, none of whom like to pay taxes, after all, the IRS represents an autocratic, jerry-built agency that appears to be in a constant state of fury against the people from whom it is voluntarily collecting taxes. No amount of tinkering with tax rates will obscure the fact that the taxpayers are fed up with a system that is at once confiscatory, impossible to fathom, and arbitrary. Soaring tax rates are only part of the reason why so many taxpayers are defecting from the system and working in a vast, tax-free underground economy.

Taxpayer confidence in the system is hardly enhanced by the sight of the IRS spending its time moving against small fry while the big fish remain undisturbed. Where are the IRS drives against the organized crime leaders, the big white-collar criminals, the crooked big businessmen, and the major drug dealers?

They hardly exist, which is why federal law enforcement officials and former and present IRS agents nearly unanimously say that the agency is in danger of losing what credibility it has left because of its refusal to take on major tax violators.

Officials of federal anticrime strike forces throughout the country complain privately that lack of IRS involvement in their major cases means, in many instances, these are not major cases. Traditionally, cases against major crime figures or big-time white-collar criminals are difficult to prosecute, mainly because big-time crooks are careful to cover their tracks. But everybody who earns money has to fill out a tax return, and that fact has become an Achilles heel to a long list of big fish that were ultimately nailed on tax charges, ranging from Al Capone to Spiro Agnew. Why isn't the Internal Revenue Service pursuing such cases today?

"Two reasons." says an IRS Special agent, one of the men who are supposed to prepare

major tax-evasion cases. "First, major tax cases are very difficult to make; they take a long while and are extremely difficult to prosecute. Figure that to prosecute a major tax-evasion case will cost about fifty thousand dollars. The second reason is that most of your major tax violators are politically well connected. You take a look at some of the really big tax-evasion operations: they can't work without the connivance and help of lawyers and tax accountants, and well-paid ones, too. The IRS doesn't want to touch politically sensitive cases; so that's why it likes to move against middle-class targets; these people aren't so well connected, and you can squeeze them pretty good. On the other hand, a big tax-evasion operation will have layers of legal protection, and the kind of money they have buys a lot of political influence. The big thing today is drugs. I've seen big, legitimate businesses which were actually founded by money earned from cocaine smuggling—millions of dollars. That's hard to fight, especially when all that money is spread around in political contributions. Let's face it: these days money spent in the right circles will buy you immunity from tax prosecutions; there's no doubt about it."

Ironically the IRS is uniquely equipped to handle such major cases—in fact, some civil libertarians have argued for years, too well equipped. Most American taxpayers, if they have any face-to-face dealings with the IRS, almost always deal with its Audit Division. The mere notice of an audit to the average taxpayer is enough to make his or her brow break out in a sweat, because as anyone who has undergone and auditing experience knows, the IRS is usually holding all the aces in the deck. It is the IRS which decides what interpretation of the increasingly complicated tax laws is correct, precisely where you erred; and how much it will cost you to get back in the federal government's good graces.

Unless you're prepared to fight the IRS interpretation up to the Tax Court—that is to say, willing to lay out the required legal fees to do so—you'll probably pay what the IRS says, arbitrarily, you owe it. Much more rarely, the IRS will say that you're an outright tax evader. In other words, you didn't mistakenly forget to include extra income when filling out your tax return or overstate your deductions—you deliberately set out to deprive the IRS of its rightful due.

In that event, you will become involved with the tender mercies of a much less known division of the IRS—its Criminal Investigation Division. At one time the division was one of the most powerful, awe-inspiring agencies in the federal government, an agency whose powers still dwarf any of the powers held by such agencies as the FBI and the CIA.

Consider: to begin with, the IRS has an unparalleled source of intelligence information, namely, your tax return. A tax return will tell anybody everything there is to know about you—how much money you have, how you spent it, the size of your family, your religion, what illnesses your family had, where you worked, where you live, whether you sought psychiatric help, what your political affiliation is. Each year the people of the United States voluntarily—or perhaps not so voluntarily—reveal to the IRS the most private and personal aspects of their lives.

That being the case, why isn't this vast power being used against major violators? The answer is complicated, composed of equal parts of high-level politics, a list of 309 names, a man who wrote in green ink, another man known as TW-24, and a conservative midwestern tax lawyer who became a noted civil libertarian.

To understand how all these pieces fit together, it is necessary to go back to 1951. In that year, following the highly publicized Kefauver hearings on organized crime, the federal law enforcement establishment realized that the hearings had revealed a major flaw in the government's drive against such crime: there was no real, concerted federal action against the major criminals. Most important, there was little effort to use the broad powers of the IRS against leaders of organized crime, the classic case being the one built against Al Capone years before.

The realization led to the creation of the Intelligence Division in the IRS, a unit designed to coordinate tax cases against major criminals who had escaped prosecution on other charges. The new agency, known as IRSID, set to work with a vengeance, in the process making a series of bad mistakes that were later to form the seeds of disaster. Basically, since IRSID was involved in an officially sanctioned "crusade" where no holds were barred, the agency began to walk roughshod over the Constitution. Under high-level pressure to collect evidence that Mafia criminals were evading taxes, IRSID went too far, using warrantless wiretaps, illegal searches and seizures, and tainted testimony from informants, many of whom were criminals themselves (in one case, the agency had a New York informant who ran extortion rackets himself; in another case, in Alabama, it had an informant who ran gambling rackets).

But since IRSID was embarked on a crusade, nobody questioned whether its actions were as criminal as those of the criminals it was trying to destroy. And that failure to oversee its actions led to a second and even greater mistake: IRSID became involved in politics.

The culprit this time was President Kennedy, who in 1961 got the IRS to apply what he called "tax pressure" against a number of right-wing groups he considered to be growing dangerously in influence. IRSID, given the job, created something called the Ideological Organizations Project, a euphemism for what amounted to a secret-police force. The tactics used by this project later became standard fare during the paranoia of the Johnson and Nixon administrations; auditing harassment against "enemies" of the White House, infiltration of informants into groups of political dissidents, and revocation of tax-exempt status for those groups whose policies the incumbent administration didn't happen to like.

Clearly, this was an outrageous abuse of IRS powers, and it reached a pinnacle of sorts with Nixon's famous "enemies list," a compilation of perceived "enemies" of Nixon's policies who were to be crushed by the one power few Americans are in a position to resist: the power to tax. During this period IRSID's approach to constitutional rights was very nearly cavalier; with official sanction, IRSID felt it had nearly unlimited power to do just about anything it wanted. But it was only a matter of time before the worm turned. And when it did, the whole structure came tumbling down, ironically destroying IRSID's one impressive achievement.

That achievement was IRSID's growing success with uncovering the assorted and increasingly sophisticated schemes tax evaders were using to hide their money from Uncle Sam. Among such schemes was the complicated Mafia money-laundering operation, under which organized crime moved the proceeds of prostitution, gambling, and other activities through an incredibly complicated series of money-transfer operations and pumped them into legitimate businesses. The businesses paid their taxes on time and filled out tax returns with meticulous care. The idea was to defeat IRSID's ability to trace illegal money through complicated networks.

The other major target of IRSID was the so-called overseas tax havens, such as Swiss bank accounts and an even more sophisticated hiding place: offshore tax havens in the Caribbean. These havens became a particular target of IRSID in the early 1970s because of a growing realization that there were literally hundreds of millions of dollars being squirreled away from tax collectors. One such haven in particular drew IRSID's attention, an interesting little bank called Castle Bank and Trust, Ltd., located in the Bahamas.

Here's how the Castle Bank scheme—the model for all such schemes in the Caribbean—worked: Castle Bank had no tellers and no cash; indeed, it looked like a simple business office. But that simple little office was a gold mine. Rich clients of the bank, using American connections, "transferred" their funds from the United States to Castle, thereby domiciling them in Nassau, outside the reach of the IRS. In most cases, however, the money never left the United States but was used as tax-free income to be invested in this country (Castle took a hefty fee on such transactions). Simple, but very effective, especially since places like Castle Bank guaranteed client confidentiality, thus making IRS prosecution virtually impossible: without access to bank records, how could a case be prosecuted?

To IRSID, the situation was challenging but not insurmountable, considering the fact that the agency's impressive list of scalps included such convictions as those of Frank Costello, Bobby Baker, ex-Illinois Gov. Otto Kerner, and former Vice-President Spiro Agnew, all of them involving complicated tax-evasion cases. IRSID decided to mount a major operation to uncover the secrets of the offshore tax havens and enlisted an undercover operative known in its files as TW-24—actually, a man named Norman Casper.

Casper, a former private investigator and security adviser for a major airline, had helped out IRSID from time to time in its tracking of organized-crime leaders. Considered one of the best-connected investigators in the Southeast United States, Casper was enlisted for IRSID as a paid undercover operative in 1971 as part of the attack on the offshore tax havens.

Called Operation Tradewinds (and, later, Operation Haven), the IRSID attack centered on obtaining information: how many well-heeled Americans were using the havens? How much money were they hiding there? How did they do it? Who were they?

As things turned out, IRSID badly underestimated how much was involved in the offshore havens. Working under various disguises, including that of narcotics investigator for Interpol, Casper gradually uncovered the secrets of the havens. What he turned up was astounding: hundreds of prominent Americans, including famous politicians, entertainers, and businessmen, were involved in the scam. The money ran into the hundreds of millions. Moreover, organized crime was using the havens, and there was a whole series of subsidiary connections involving

gambling casinos and prominent figures who were using the havens to launder campaign contributions.

But what IRSID did not know was that another operation, this one taking place in Florida, was about to halt everything.

That operation was known as Operation Leprechaun. Briefly, it was designed to uncover tax-evasion aspects in a series of political corruption cases emerging in Florida during the early 1970s. The prospect seemed promising, but then IRSID made a number of bad mistakes. Mostly, they centered on one key agent who ran the program and urged his network of informants to collect not only any possible tax information on 30 Florida public officials but also any dirt they could on the sexual and drinking habits of the targets. The informants did just that, in the process collecting such useless trivia as a photograph of a prominent Florida judge performing fellatio on another man. None of this, of course, had anything to do with tax violations, but it was duly collected anyway and entered in dossiers with green handwriting (hence, the name Operation Leprechaun). Such snooping made any prosecution impossible because of constitutional violations.

Enter the key character in this course of events, Donald Alexander, a conservative tax lawyer appointed as the new commissioner of internal revenue in May, 1973. He wasn't in office a week when he set off an earthquake: he ordered Leprechaun ended, Tradewinds/Haven closed down, and a full-scale in-house investigation of those and other similar operations. He then transferred or forced to retire dozens of agents and wrote a new set of regulations strictly limiting IRSID's investigatory role; this entailed the removal of IRSID agents from various federal organized-crime strike forces, the innovative and highly successful coordinated attack by federal law enforcement agencies against major organized-crime figures.

Feelings among IRS agents still run so deep about the Haven episode that some agents hint that among the tax cheats uncovered in Casper's investigation was the name of Alexander's old Cincinnati law firm. (There is no evidence to support this assertion.) Alexander himself, who left office in 1977 when Carter came to power, has called such talk "scurrilous dung." Some congressional investigators say that Alexander probably was telling the truth when he told investigating committees of his concern over "abuses" by his intelligence agency, although they concede that there has been a long-standing unwillingness on the part of Congress to delve too deeply into IRS investigative matters, since a number of members of Congress themselves have tax skeletons to hide.

In any event, when all the dust settled, the IRS found itself, in effect, with an emasculated intelligence agency. True, it still had its considerable powers, but they had been curbed, especially with regard to its major targets: organized crime, major criminals, and the rich and powerful tax evaders.

It is also seconded by many federal prosecutors and IRS agents themselves, who concede that congressional committees made a bad mistake in not including the IRS in the proposed charters for such agencies as the FBI and the CIA.

Without such guidelines, the Criminal Investigation Division is a mess. IRS agents at the moment are barred from taking part in federal strike-force raids, are not supposed to make any arrests, cannot release information of IRS activities to other federal agencies, and cannot use any form of electronic surveillance. These restrictions make prosecution of major cases impossible, agents argue, noting that among the victims of the 1975 purge were investigations involving Nixon financial backer C. Arnholt Smith and a major probe of the Central States Teamsters Pension Fund. That amounts to a disgrace, but without a major push from either Congress or the White House, there does not seem to be too much hope that the IRS will get straightened out. As a number of Federal Prosecutors admit, the situation is critically overdue for change.

"There's no question," says one former prominent U.S. attorney in a major eastern city who prosecuted a number of tax cases during his tenure, "that the major emphasis now [by the IRS] is on the doctor who cheats fifteen hundred dollars one year, two thousands dollars the next. And twenty thousand dollars over four or five years in a big case, the IRS feels. I recall IRS agents as totally demoralized. They were being sent back on the street to work the doctor and dentist cases. These guys had been working the big people, the big connections. Once you've gotten close to the big people, the big violators, you are really doing something. But to be stonewalled, especially by your own agency—you just give up."●

ANATOLY SHCHARANSKY

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. LEE. Mr. Speaker, colleagues, I use this opportunity to bring to your attention that this Sunday, March 15, 1981, will mark the fourth year of imprisonment for a man whose only crime was to seek freedom from political and religious oppression, Anatoly Shcharansky. He is destined to be locked behind bars until March 1990 on his conviction by Soviet courts for acts of treason and anti-Soviet agitation and propaganda. In his cell, deep within the Soviet Union, we sincerely hope that the message reaches him that he is not a forgotten man.

It was a mere matter of weeks ago when this Nation pulled together with truckloads of yellow ribbons to welcome home our countrymen and women freed from the oppressive grip of Iran's leadership. I submit today that—in his efforts to leave the Soviet Union to join his family in Israel—Anatoly Shcharansky has violated no more human principals than did our American citizens in Iran who sought to leave that country.

While I recognize that our new administration wishes to direct the international humanitarian efforts of the United States toward halting the wantonly destructive terrorism which has plagued this Earth, I also recognize that the American drive to restore the most common, decent human rights must also be continued. I call upon each of my colleagues in this Chamber to help me, and help representatives of Soviet Jewry, maintain the vigil for Shcharansky and the thousands of his fellows still held in captivity in the Soviet Union. We must not forget that such objectionable policies still exist on this planet. We must not allow the pressure to subside as long as there is an America which serves as the beacon of world freedoms or as long as this man and others like him cannot be free.

Anatoly Shcharansky should not be imprisoned. But while he is, it is up to those of us who are free to continue to spread his message of freedom. I urge each of you to join me in this effort.●

THE TRULY NEEDY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. RODINO. Mr. Speaker, a recent edition of the New Yorker magazine, in its weekly feature "The Talk of the Town," had the following comment on "The Truly Needy." I commend it to my colleagues.

We should be ever alert to trim waste, but also be alert to see that government does what it can do best, care for those in our society who are in need.

[From the New Yorker]

NOTES AND COMMENT

With the arrival of the Reagan Administration in Washington, a new social class has appeared on the political scene. It is the class of the "truly needy." As recently as a few months ago, the truly needy were overlooked by almost everyone, but now politicians and journalists alike speak of them with an easy familiarity, and have even calculated their needs down to the last thousandth of a billion federal dollars. Not to be confused with their predecessors, the needy pure and simple—a much larger and more demanding group—the truly needy happily require no more federal assistance than turns out to be available to them after President Reagan's "supply side" economists have taken from the budget what they think they need in order to boost investment. For example, the needy were going to need twelve billion seven hundred and twenty-two million dollars for food stamps in fiscal year 1982 (by President Carter's calculations), whereas the truly needy are going to need only ten billion six hundred fifty-one million (by President Reagan's), for a saving of two billion seventy-one million. The Reagan Administration has discovered, among other supposedly excessive benefits in the program, that some children whose families receive food stamps are at the same time getting free lunches at school from the federal government. The needy needed that lunch, but the truly needy apparently do not; under the Reagan Administration's budget proposals to Congress, if children are found "double-dipping"—that is, loading up on free lunch at school and eating off food stamps at home—the family's food stamps will be reduced. The Administration thus plans not only to

thin down the ranks of the needy to the truly needy but to reduce the benefits to the truly needy as well. At least one official of the food stamp program is worried that the federal government may not be able to catch the children in the act of eating their free lunch, and thus will not know when to reduce the family's food stamps—"We would have to keep track of every time a child was sick and missed a meal," he said—but most of the Reagan people apparently feel confident that the necessary policing can be handled adequately. The Administration proposes, in addition, to cut back the lunch program itself, by making fewer children eligible. Not long ago, cuts of this nature would have aroused considerable protest among the political supporters of the needy, but now that the truly needy have taken their place the supporters are quiet. This one phrase, it seems, has put them all to rout.

Just recently, the columnist George Will brought to light another new class in our society—one that is a perfect counterpart to the truly needy. He has discovered the people who are "in a sense rich." The in-a-sense-rich are rich only in a sense because they have spent their money—on a house or a college education, say—and so are only "statistically rich." Will rises to a spirited defense of the statistically rich. He fears that the "punitive" distinction between earned and unearned income in the federal tax code keeps them from getting rich enough, and asks rhetorically, "What is 'unearned' about income from money skillfully put at risk in investments?" He believes that our economy depends on the "endless inculcation of envy," and worries that if the rich were no longer there to inspire envy the economy would "slow dangerously." Noting that Christ said, "The poor always ye have with you," he goes on to make the addition (somehow overlooked by Christ) "We had better always have the rich." In an era of supply-side economics, Will seems to have hit upon a supply-side morality to go with it. According to this new, evenhanded reading of Scripture, society would balance its compassion for the poor with solicitude for the rich. In that arrangement, even the truly needy might be hard put to it to hold their own.●

ANATOLY SHCHARANSKY

HON. WALTER E. FAUNTROY

OF DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. FAUNTROY. Mr. Speaker, I want to commend my distinguished college from New York for riveting this body's attention on the plight of Anatoly Shcharansky, who, on March 15 will have spent 4 years in prison for advocating the cause of human rights and desiring to emigrate to Israel.

We cannot forget the Anatoly Shcharanskys of our world, who, continually demonstrate the strength of the human spirit against the juggernaut of state terror. Anatoly Shcharansky is a man, who, speaks with relevancy to all of the world's oppressed, whether they be in the Soviet Union, El Salvador, South Africa, Haiti, Argentina, or Kampuchea.

His struggle for human rights is still another reminder to us that the cause of human rights must not and cannot be demoted if we are to be true to ourselves and the principles we so often espouse but so often fail to live up to.

I thank my distinguished colleague from New York for reminding us to remember.●

SAMA SPEAKER SPOTLIGHTS LEGISLATIVE AGENDA

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, March 13, 1981

● Mr. AuCOIN. Mr. Speaker, as chairman of the House Task Force on Industrial Innovation, I had the pleasure of hosting, on February 23, a meeting of member companies from the Scientific Apparatus Manufacturers Association (SAMA) here on Capitol Hill. The purpose of the meeting was to bring together representatives from these companies and Members of Congress to discuss important legislation needed to keep America in the forefront of technological innovation and improve industrial productivity.

One of the speakers on that occasion was Mr. Gerald H. Gleason, vice president, the Foxboro Co., who chairs the international affairs committee on SAMA. Mr. Gleason discussed a number of issues relating to the importance of international markets to the health of our economy and to the health of scientific apparatus manufacturers. He makes the point that, when it comes to high technology industries, we cannot afford to be complacent about our competitive performance. We face a serious challenge from other countries that are aggressively pursuing high technology exports, and unless we act any advantage we might have will be lost.

A second speaker—Pat Wild, director of public affairs for Sybron Corp. and chairperson of SAMA's government affairs committee—discussed a number of issues relating to Federal procurement policies. She notes that some well-intentioned regulations have hurt competitive performance.

Finally, Paul Cherecwich, corporate tax manager of the Foxboro Co. and chairman of SAMA's tax committee spoke to a number of issues relating to Federal tax policy. He makes the point that, if these firms are to remain competitive, changes are needed in our tax laws, beginning with the way we recover capital expenditures.

As Congress prepares to take up a number of issues vital to our competitiveness at home and abroad, I commend these remarks to the attention of my colleagues.

REMARKS OF PAT WILD, DIRECTOR OF PUBLIC AFFAIRS, SYBRON CORP., AND CHAIRPERSON, GOVERNMENT AFFAIRS COMMITTEE, SAMA

My name is Pat Wild, and I am Chairperson of SAMA's Government Affairs Committee. In my spare time, I also work for Sybron Corporation in Rochester, New York, where I serve as Director of Public Affairs—we are members of SAMA because of our Laboratory, Instrument and Process Equipment products.

I am delighted that you could join us this afternoon. Our purpose today is to get better acquainted with those of you who do so much of the staff work for Senators, Members of the House, and Committees in both the House and the Senate which have both constituent and/or jurisdictional interests, in areas of interest to SAMA companies. (We) look forward to working with you as staff persons.

As you saw from the audio/visual presentation, the interests of this association, and the companies who rely on it for Washington representation, lie in the areas of increased productivity, expanded export markets, and innovation.

My special theme for the next few moments is the relationship between SAMA members companies and the government in the sense of sales and customers. To summarize my theme the message is this—to the extent the Congress permits over-regulation to occur in the area of procurement (as well as any other over-regulation) it forces business to divert important resources—lessening our opportunity to remain competitive in domestic and world markets.

To explain—last year, SAMA companies manufactured and sold approximately $12 billion worth of goods and services worldwide. Of that $12 billion, approximately $1.5 billion or about 12 percent went to the U.S. government. Although Sybron may be larger than most SAMA companies in this regard, I believe we are fairly typical. Last year, between 10–15 percent of Sybron's $800 million sales went to the U.S. government—where we supplied laboratory equipment and sensitive instrumentation.

The U.S. government as a whole is an important customer for our industries and one that we expect to continue to do business with in the years ahead. Our industries' unique contributions will continue to work with the government as we together attempt to solve pressing social and economic issues.

Now, in addition to the government we have other very important customers. Twelve percent of our industries' sales can be accounted for by sales to various U.S. government users; there is approximately 40 percent or about $4.8 billion due to export sales; the remaining $4.7 billion, or almost 50 percent of our industries' sales are accounted for in the U.S. commercial market.

To belabor the point: Our industries are essentially commercially oriented. We are not totally dependent upon the government for our sales, employment and profits. Rather, our companies depend on their initiative, ingenuity and marketing capabilities to sell their products in the non-captive commercial market environment.

And in this commercial market environment—which represents the lion's share of our business, the general orientation of our industries is to supply off-the-shelf equipment to commercial customers. Our members are becoming increasingly concerned over the tendency of the government to dis-

rupt what we believe to be a healthy and competitive environment within which we currently operate.

Let me illustrate my point by two examples.

In 1965, the Congress passed the Service Contract Act. The legislation was well intended. In brief, it grew out of the concern over "wage busting" by government contractors who were totally dependent upon the government for business, who were labor intensive, and who employed a work force that was pretty much immobile. This action in 1965 on the part of the Congress was commendable.

However, in 1977, the Department of Labor took it upon itself to apply the provisions of the Service Contract Act to our industries. Now, we are not totally dependent upon government contracts. Our service employees are highly mobile, and well paid. The fact of the matter is that according to a recent Department of Commerce study, our industries are one of the few who have compensated our employees at a rate greater than the rate of inflation. Finally, because of the nature of our business, that is to say operating essentially in the commercial marketplace, there has been no wage busting in our industries, nor do we believe it possible that there will be.

However, by applying the Act to our companies, the Department of Labor has presented us with a dilemma. We can continue to do business with the government, but to do so we will have to abandon our merit pay system, segregate our work force and increase our overhead costs. That is one choice, the other is simply not to cause this sort of disruption in our normal commercial practices, and simply forego our government business.

I sincerely don't believe that either government or the industry feels this last proposal is a solution. You need us—and we, of course, count on your business as part of our total package and this means jobs. We also assure you that as the supply of highly qualified technologically oriented people diminishes as demand increases—competition in the market place creates its own wage demands.

Thus, we have a well intentioned piece of legislation which, over the years has been interpreted by the bureaucracy to the point the problem it was originally intended to solve has become obscured by what we believe to be unnecessary controversy.

A second example of what we believe to be Federal excess comes as a result of the General Services Administration's decision to attempt to deal with manufacturers and eliminate distributors from the Federal procurement process.

Most SAMA companies use distributors to supply their commercial customers at home and abroad, and they will continue to follow this pattern. Distributors provide commercial customers with numerous valid services such as sales promotion, large inventories, rapid delivery, efficient service and training. If you were a manufacturer who was using a distributor to supply 85 percent of your customers, would you be willing to create your own separate distribution system to supply the remaining 15 percent? I think not. It just does not make good business sense. Furthermore, say you are a small businessman or woman who cannot afford to set up a major, nationwide distribution system. You can't afford to have a large advertising budget, you do not have a large sales and service staff, and you can't provide on-site training to all of those who might want to purchase your products. Where would you turn? Like many in our industry, you would turn to a distributor. But if your distributor is not permitted to sell your products to the Federal government, you may be losing a significant opportunity to have your company grow.

There are other issues that we just touch upon—the demand by the General Services Administration for the best possible discount even though a contract with GSA guarantees no business whatsoever; proposals to establish profit limitations on commercial companies doing business with the government; increased pre-contract and post-contract audit reviews by government agencies, and separate cost accounting standards for companies doing business with the government. I could go on, but I think you get my drift.

The more government intrudes on the management practices of its commercial suppliers, the less attractive government business becomes to these companies. And the greater the cost to us of doing business with the government, the less money we have to spend in such vital areas as research and development and expansion.

Ours is a growth segment of the U.S. industrial base, and we expect it will continue to be that way. We do not want to come to the Hill to ask for subsidies to keep us in this position. We are not opposed to regulation where the need for regulation can be demonstrably shown. We are opposed to unnecessary over-regulation which ultimately will hurt both our companies, our employees and the U.S. government.

REMARKS OF PAUL CHERECWICH, CORPORATE TAX MANAGER, FOXBORO CO., AND CHAIRMAN, TAX COMMITTEE, SAMA

My name is Paul Cherecwich and I am the Corporate Tax Manager of the Foxboro Company, in Foxboro, Massachusetts. I also act as Chairman of SAMA's Tax Committee, and it is in this context that I would like to spend the next few minutes describing the Association's tax objectives for the coming year.

SAMA supports the free enterprise system, and derives its tax policy from that position. SAMA will support tax legislation that encourages private, as opposed to public decision making. Alternatively, SAMA will oppose tax legislation which has the effect of substituting government judgement for private judgement. Recognizing the valid needs of the government for adequate revenues as well as a pressing need for a major overhaul of the tax system to more realistically consider the capital investment needs of this nation, SAMA will study and support fiscal measures to encourage a balanced economy.

Consistent with the foregoing policy statement, SAMA and its member companies support a retreat from the useful life concept of recovering capital expenditures, and substituting a capital cost recovery system. Most major industrialized countries have long ago adopted such a policy. In particular, SAMA continues to support the concepts found in the Capital Cost Recovery Act, introduced in the last session of Congress by Representative Jones and Representative Conable and reintroduced in this session. These concepts are similar to those proposed by the Administration in its Accelerated Cost Recovery System. SAMA supports these concepts in part because they retreat from the useful life concept of providing capital cost recovery, and in part because they significantly improve the investment tax credit. We believe that the shorter depreciable lives that would in many cases result from passage of the Capital Cost Recovery Act, when combined with the significant improvement in the investment tax credit that is inherent in that bill, will result in a significant improvement in the investment climate of this nation. Therefore, although the Capital Cost Recovery Act will not have an immediate impact on our own income tax returns to the same extent as it will for capital intensive industries, we believe that nonetheless such tax measures are for the good of the country.

SAMA also supports selective tax incentive measures, when those measures are designed to reinforce private decision making. As the spokesman for a large number of high technology industries, SAMA has been concerned with the lack of an incentive for research and development spending in the U.S. SAMA believes that increased R & D expenditures in the U.S. will help the U.S. maintain its technological lead (or perhaps we should say recapture that lead) as well as help improve our productivity.

SAMA specifically supports the Research Revitalization Act of 1981 (introduced this year by Representative Shannon). This act would provide a tax credit of $.25 for each dollar spent by a corporation on university research. The bill is structured so that it would provide 86% more research per dollar spent by a corporation under the bill than without the bill.

SAMA also supports the corporate R & D tax credit proposals introduced this year by Representatives Vander Jagt and Pickle. This bill would allow a tax credit of 25% of the excess of R & D expenditures incurred over a three-year average. SAMA believes both approaches would reinforce private decision making and are a better way to expend this nation's government funded research dollars than by outright grants.

SAMA is also concerned with a very serious disincentive to domestic R & D expenditures. Due to an extremely complicated income tax regulation dealing with the proper accounting treatment of certain domestic expenditures, any increase in domestic R & D expenditures will have the result for many SAMA member companies of causing a loss of foreign tax credits that would otherwise be due. This is popularly known as the 861-8 problem, wherein domestic R & D expenditures must be charged against foreign source income. This disincentive looms so large that many U.S. corporations are beginning to seriously consider transferring R & D abroad, rather than perform the R & D within the U.S. Unless this disincentive is eliminated or otherwise removed, the R & D incentives referred earlier will not be effective.

In summary, SAMA's 1981 legislative tax priorities include:

1. Changes in the capital cost recovery system (including improvement in the investment tax credit) in order to stimulate domestic investment.

2. The creation of R & D incentives, in the form of tax credits, designed to encourage corporations to fund university research and to increase their own research and development activities.

3. Elimination of the disincentive for domestic research and development expenditures presently found in IRS regulations.

REMARKS OF GERALD H. GLEASON, VICE PRESIDENT, THE FOXBORO CO., AND CHAIRMAN, INTERNATIONAL AFFAIRS COMMITTEE, SAMA

Good afternoon. I am Jerry Gleason, chairman of SAMA's International Affairs Committee. I'd like to take just a few minutes to tell you a bit about our interests and concerns in the area of international trade. As you have just heard, our industry is very much involved in international trade and commercial activities. It is because of our successes and our heavy commitment to our international markets that we have become increasingly concerned about our ability to maintain our lead, competitively and technologically.

To a large extent, our future is in the hands of governments—ours and our customers. What they do or don't do can have a profound impact on our success or failure in the area of international trade. One area in which the role of government is crucial is in the formation and implementation of trade policy. At present, the United States government, unlike the governments of most of the advanced and developing industrial countries of the world, does not have a positive, well-coordinated and comprehensive program to promote and encourage exports, let alone a full fledged trade policy, as a matter of fact, the Nation's export business has been used as a vehicle for achieving other national purposes, some of them mutually exclusive. The result has been that trade has suffered while other purposes were apparently addressed to varying degrees of satisfaction or lack thereof. Now, hopefully, we are back to promoting trade but certain impediments standing in the way must be removed. As a result of a lack of a coordinated economic and trade promotion program, some disturbing trends emerge when one looks at the export performance of the U.S. as a whole.

We simply cannot afford to be complacent about the historically competitive performance of U.S. high technology industries. Even those in industries on the leading edge of technology are today facing serious competition from countries which have developed strategies involving aggressive export supports including loan guarantees, sheltered home markets, and subsidized R&D. These countries also support their exporting industries by aggressively promoting capital formation, plant investment and job formation through their tax policies. Using these strategies, for example, the Japanese have assumed a 42 percent share of the U.S. market for the 16k ram semiconductors, a business which was exclusively U.S. just a short while ago. given the situation, it seems obvious to us that in formulating an overall U.S. export policy, particular and early attention should be given to the needs of those segments of the U.S. industrial base which are now performing well, but which will do less so unless their particular problems are addressed.

EXPORT DISINCENTIVES AND CONTROLS

Let me now turn my attention to the problem of export disincentives which are particularly troublesome to SAMA companies and other high technology exporters. Export controls, especially those contained in the Export Administration Act, although necessary for our national security and as an expression of our foreign policy—often discourage U.S. business and certainly place them at a disadvantage with respect to our overseas competitors.

Under the authority of the Export Administration Act, the U.S. Government controls the export of numerous high technology products to destinations throughout the world. In the case of Communist countries, the controls are imposed in the form of individual export license applications which must be processed by various Federal agencies. In the case of free world countries, these products may be exported under a distribution license, a procedure which speeds up the licensing of exports and reduces the paperwork involved in the processing of export licenses, historically, the U.S. has controlled more high technology items than have our allies, thus placing U.S. high technology companies at a disadvantage in competing for international sales.

The 1979 amendments to the Export Administration Act were intended to focus on the problems associated with delays in the licensing process. The Department of Commerce has recently published rules and regulations to implement several of the changes mandated by you and others in the Congress to reduce the amount of time to process export license applications which must be submitted by high technology companies to the department in order to export their product to "controlled destinations".

Other important features mandated by the law have, however, not yet been implemented. Most notably, the establishment of an office on foreign availability. There still remains substantial delays in processing applications, even under the time limits established by law. Quite frankly, it concerns us that the obligations imposed on commerce by the law are not taken as seriously as those imposed on industry. This is due, in many instances to inadequate staffing, well over half of the estimated 80,000 export license applications received by the Department of Commerce last year were for transactions with our NATO partners and Australia and New Zealand. These transactions are almost invariably approved in a short period of time. This being the case, U.S. businessmen question the need for licensing shipments to these friendly countries. If SAMA's recommendations concerning removal from licensing requirements of the products shipped to friendly countries or those which are clearly not militarily significant, the freed-up resources of the Department might just be adequate to do the whole job mandated by Congress. SAMA addresses its attention to these as well as numerous other export disincentives since we believe that they are in conflict not only with our business objectives but also with the national interest.

MULTILATERAL TRADE AGREEMENTS

The membership of SAMA is committed to free and open trade among nations. We believe that the solutions to many of this country's most pressing problems—unemployment, inflation, disequilibrium in our trade balance—lie in how well we as a nation are able to activate and realize our total international economic potential. Without improved access to markets in the industrial countries of the world, it will not be possible to compete fairly. For this reason, SAMA worked long and hard through the industry advisory process in supporting the MTN. The product of the negotiations, enacted into law in 1979, especially the series of agreements reducing and eliminating nontariff barriers in a number of critical areas such as customs valuation, government procurement and standards offer real hope for the future.

It is imperative that the U.S. clearly enforce the codes of conduct in this country and look out for the rights of its exporters' interests in the signatory countries. The need for clearly understood procedures to safeguard the rights of exporters to the markets and from the arbitrary practices outlawed by the agreements is a must. The Government must actively oversee compliance, and press for the expansion of these agreements to the developing nations.

The successful conclusion of the Tokyo Round was really the beginning of a new era in international cooperation. It will take a lot of goodwill and hard work to make them work. Unless they do, however, with all of the protectionist pressure being evidenced around the world we stand to lose much more than our export markets. We stand to lose our vital and dynamic industries.

In conclusion, let me say that SAMA and its member companies believe that there can be an effective partnership between business and government in the U.S.—we believe that the beneficial results of this partnership can be federal legislation and regulations which help rather than hinder the reestablishment of strong and productive industries, balanced international trade and increased domestic employment opportunities.●

HOUSE OF REPRESENTATIVES—*Tuesday, March 17, 1981*

The House met at 12 o'clock noon.

The Reverend Robert M. Kearns, Holy Comforter-St. Cyprian Church, Washington, D.C., offered the following prayer:

AN IRISH BLESSING

May the blessing of light be with you and our country—light outside and light within.

May sunlight shine upon you and warm your heart 'til it glows like a great fire, so that the stranger may come and warm himself by it.

May a blessed light shine out of this house like a candle in a window bidding the wanderer and the poor to come out of the storm.

May you ever give a kindly greeting to those whom you pass, as you go along the roads.

May the blessings of the Earth be with you and shared with others.

May the earth be soft under you when you rest upon it, tired at the end of the day.

May earth rest easy over you when at the last you lie under it.

May earth rest so lightly over you that your spirit may be out from under it quickly, and up, and off, and on its way to God. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

THE REVEREND FATHER ROBERT M. KEARNS

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, I am honored to have the opportunity today to welcome as our guest chaplain the Reverend Robert Michael Kearns, S.S.J.

I think it is particularly fitting that Father Kearns opened our session on this feast of St. Patrick, the patron saint of Ireland. Father Kearns was raised in our hometown of South Boston, which many of us consider the sister county of Galway, a community which has been shaped culturally by generations of Irish immigration.

Father Kearns was baptized at Gate of Heaven Church and was confirmed and attended school at St. Brigid's which, in a community where people list the address by street and parish, is our version of ecumenism.

After graduating from parochial schools, Father Kearns began intensive preparation for the priesthood and was ordained as a priest of the Society of St. Joseph in 1963.

In addition to his seminary training, Father Kearns has attended the University of Minnesota and holds a master's in urban studies from Loyola University of Chicago.

Father Kearns has published numerous articles and a book on urban issues including an important study of race relations published by the U.S. Catholic Conference.

Father Kearns now serves as pastor of Holy Comforter-St. Cyprian Church in Washington, D.C., and, in addition to his pastoral duties, has been active in bringing a religious perspective to many community efforts, particularly those to benefit youth.

On behalf of my colleagues, I thank Father Kearns for a moving and instructive invocation.

WILL AGRICULTURE AND AVIATION BEAR THE BRUNT OF JAPANESE AUTO IMPORT QUOTAS?

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, we are faced with a serious economic problem. The American automobile industry is in trouble. Hundreds of thousands have been laid off indefinitely. Companies are struggling to survive. We must, of course, do what we can to resolve the plight of the industry.

The resolution is not, however, for the President to impose mandatory import quotas. To do so denies the cause of the problem. The cause is not Japan. The cause is that the American auto industry has failed to produce the fuel-efficient, inexpensive cars that American consumers want to buy. The solution is not to curtail imports. The solution is to push for research and development so that our American ingenuity can help us produce a better automobile.

The solution that the administration proposes would not only fail to resolve this economic problem, it would cause new ones. Japan is the single largest purchaser of U.S. agricultural products. Japan is also a market we should be pursuing for aircraft. I would remind you that those two American industries—agriculture and aviation—have no rivals in the world. America is No. 1 in both. If we cut trade with Japan, cut their exports of automobiles, they may very likely impose barriers against our exports. Then we have three industries in trouble, instead of one. We will have robbed Peter to pay Paul.

The President must consider the total economic picture before he moves on the import quota issue. We cannot afford to damage our superior status in agriculture and aviation with the false hope that such a move can save the automobile companies.

CONCERN FOR PROPOSED CUTS IN STUDENT AID PROGRAM

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PEYSER. Mr. Speaker, yesterday, Congressmen BIAGGI, WEISS, and myself listened to representatives of 13 different universities in New York, students explaining the problems that they would be confronted with in the proposed changes in the student aid program taking place.

There is an awakening happening finally in the country, Mr. Speaker, among students and their families as to the impact of the proposed changes.

Today, I am introducing into the RECORD a letter of communication from the City University of New York in Mr. SOLARZ' district; from the California State University and Colleges in Congressman PANETTA's district; from the North Central Technical Institute in Congressman OBEY's district; from Guilford College in Congressman JOHNSTON's district. These are representing New York, California, Wisconsin, and North Carolina.

It is just an indication of the breadth of the interest and concern being expressed today by the educational community.

[Mailgram]

CITY UNIVERSITY OF NEW YORK,
New York, N.Y., March 12, 1981.

Representative PETER PEYSER,
Cannon Building,
Washington, D.C.:

After carefully reviewing the Reagan administration's proposed budget cuts affecting student aid, the City University of New York strongly opposes their enactment.

The proposed cuts violate one of the Reagan's administration's stated long range objectives, that is, increased productivity through greater investment in the Nation's Capital Stock. From an economic viewpoint, human resources (labor) constitutes one of the three essential "factors of production". Expenditures in student aid are an invest-

ment in a more highly skilled labor force. These expenditures are necessary for improved technology and efficiency and ultimately increased productivity. One of the corresponding financial commitments to the nonbusiness sector is continued and increased support of higher education.

CUNY has a total enrollment of 170,000 students, over ⅔ or 120,000, rely upon some form of city, State, Federal, or institutional financial assistance to meet their college costs. Approximately 84,000 receive $85.5 million in BEOG; 80,000 receive $43 million in State tuition aid; 20,000 receive $29 million in GSL; and 17,000 receive $18.5 million in SEOG, CWS, and NDSL and nursing program assistance. In addition 40 percent of our student body report zero taxable family income on their New York State tax return, 68 percent have taxable family income of under $6,000 and 85 percent have taxable family income of under $10,000 per year. Clearly, for most of our students a continued high level of financial support is essential to their continued attendance. These are the most needy students.

On behalf of CUNY's over 190,000 students, faculty, and staff I urge you to strongly oppose the higher education budget reductions recommended by the Reagan administration.

ROBERT J. KIBBEE,
Chancellor.

[Mailgram]
CALIFORNIA STATE UNIVERSITY & COLLEGES,
Long Beach, Calif., March 12, 1981.

Representative PETER PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE PEYSER: The Pell Grant (formerly Basic Education Opportunity Grant) program has been an effective means of providing access to higher education for hundreds of thousands of low- and middle-income students; 47,152 of these grant recipients are currently enrolled on the 19 campuses of the California State University and Colleges.

I am concerned about the delays our students are experiencing in the processing of grant applications for the 1981-82 academic year. As a result of recent withdrawal of certain Federal regulations, the earliest students will learn the outcome of their applications will be in June—four months later than last year's announcement date. Such delays may force thousands of students to suspend or terminate their education.

The Department of Education should be urged to determine Pell Grant eligibility by using the 1981-82 family contribution schedules published in the January 19, 1981 addition of the Federal Register. I understand the budget saving of up to $500 million could be achieved by using cost of attendance allowances in effect during 1980-81.

I am also concerned about the lack of adequate funding for truly needy Pell Grant applicants in 1981-82. It is my understanding that a supplemental appropriation amounting to at least $911 million would be required in order to maintain maximum grants at the current year level—well below the limit established by the Congress last fall.

On behalf of students enrolled in the CSUC, I wish to express appreciation for your continuing support for higher education.

GLEN S. DUMKE,
Chancellor.

NORTH CENTRAL TECHNICAL INSTITUTE,
Warsaw, Wis., March 6, 1981.

Hon. PETER A. PEYSER,
House of Representatives,
Cannon House Office Building,
Washington, D.C.

DEAR MR. PEYSER: Thank you for your recent letter concerning the Administration's budget proposals on Student Financial Aids. We are very concerned and appreciate your interest and support.

A reasonable and efficient Student Financial Aids delivery system is very important to our students. Sixty-nine percent of our full-time students count on state or federal Student Financial Aids to help finance their education. A high percentage of our students are from low or middle income families. Unemployment throughout our district is currently running between 11 and 12%. Our own budget for next year is very constrained and gives no flexibility to deal with major declines in Student Financial Aids to our students. Obviously, the proposed administrative cutbacks are of a direct and vital concern to us.

We have identified three major problem areas in the proposed cutbacks that will have a most negative effect on the education of our students. First, we are very concerned about the time delays this is causing. It now appears that Congress hopes to respond to the cutbacks by May 1. That target date is probably optimistic unless something is done promptly to speed the process through Congress and the Department of Education. We are fearful that as our students hope to start school this August, they still will not know what aid, if any, they will be eligible to receive. Many students will be unable to start school without a commitment of aid!

Secondly, we are concerned that our students will not have access to the Guaranteed Student Loan next fall. The proposed changes will drive many of the lenders from the program. We feel the program can be tightened up somewhat and targeted to students with demonstrated need. But it must remain accessible to those who need it!

Thirdly, the proposed Basic Grant reductions will eliminate many of the middle income students from the program, reversing the impact of the Middle Income Student Assistance Act. Combined with the restrictions in the Guaranteed Student Loan, the middle income families will increase pressure to develop a tuition tax credit program which, in the long run, will be substantially more costly than maintaining middle income eligibility in the Guaranteed Student Loan program.

We are willing to play a very active role in whatever way we can to restore the proposed cuts to a reasonable level. Action must be taken quickly, or students will not be served next fall! We are in the process of sending information to all our Student Financial Aid applicants, advising them of the processing delays and proposed reductions.

Sincerely,

DWIGHT DAVIS,
District Director.

GUILFORD COLLEGE,
Greensboro, N.C., March 3, 1981.

PETER A. PEYSER,
House of Representatives,
Cannon House Office Building,
Washington, D.C.

DEAR PETER PEYSER: I agree with you 300 percent about the importance of sustaining student assistance programs both in the Basic Opportunities Grants, the Work Study Program and the Loan Program.

I have already been in touch both personally and by letter with our Senators and Representatives.

Attached is a copy of one such letter.

We are also doing a great deal to encourage students and parents to write to members of Congress in support of these programs.

It is very heartening to know that you are on the side supporting these very critical programs. Keep up the good work.

Most sincerely,

WILLIAM R. ROGERS,
President.

Enclosure.

GUILFORD COLLEGE,
Greensboro, N.C., February 10, 1981.

Senator JESSE HELMS,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR JESSE HELMS: I am sorry that I could not get to see you on my recent trip to Washington last week. I had wanted to talk with you about the importance of your concern and support for church-related higher education. I have recently been to Chowan College and admired the visible reminder of your concerns in this area, symbolized through the dedication of the new Field House complex there in your honor. I know too that your work as a Baptist layman has been deeply committed to costering conservative and moral policies within the educational community of North Carolina.

Primarily I am writing to encourage you as strongly as I can to support Federal legislation and allocations to enable access by students of modest means to the opportunities provided in independent colleges and universities such as Guilford. The financial aid help that has been available both through grants, work study, and loans has been enormously important in making it possible for these students to attend schools like Guilford. Both these students and the financial condition of the College would be seriously jeopardized by cut-backs such as those discussed by Mr. Bell.

I believe that you are as committed as I am to ensuring in the maintenance of the independent sector in higher education—particularly those colleges like Guilford that represent a high level of sensitivity to value issues and are maintained in the traditions of Christian higher education. What these colleges provide in the way of intelligent and morally dedicated social leadership is absolutely critical to our country. In one recent study of the nation's top 2,931 corporate executives it was found that over 60 percent of these had gone to private liberal arts colleges (a figure particularly striking when we remember that only some 22 per-

cent of all people who go to college go to private liberal arts colleges).

In North Carolina 35 percent of our students from the State go to private liberal arts colleges, a figure somewhat higher than the national percentage. Any serious reduction or financial failures among the liberal arts colleges would lead to an enormously increased financial burden on the State. To be very specific if many of the 26,000 students from North Carolina currently enrolled in private liberal arts colleges in the State have to go instead to the State supported university system, the financial burdens to the taxpayers would be staggering. (At present the difference in average financial support from State and Federal sources for students in North Carolina in private colleges versus public baccalaureate granting institutions is $683 versus $3,147. To put it differently, financial help to students in a private college like Guilford is only 21 percent of what that support would have to be if the same students were to have to go to publicly supported institutions.)

To maintain the viability of student assistance programs and tax program benefits which would make it possible for us to continue to do our job adequately, I urge you to support the following legislative priorities.

I believe we should maintain our primary concentration in the realm of federal budget allocations and appropriations on the continuing effort to assure financial accessibility for all Americans to all of America's wide diversity of higher educational opportunities, through: (a) balanced expansion of basic and supplemental grant benefits (Pell Grants and SEOG/SSIG funding) to address the 75-percent policy goal established in federal law by the 1980 Amendments of the Higher Education Act, and (b) balanced expansion of self-help programs (CW and NDSL/GSL/Parent Loan funding) to meet the 25-percent self-help expectation and to assist parents and independent students in meeting their expected contributions.

In the event the 97th Congress decides to consider further changes in the authorizations of student loan programs, such legislation would consolidate the gains already registered in the reauthorizing legislation: (a) to assure, as a matter of federal policy, the availability of loan capital to meet all legitimate student expenses unfunded by grants and work, (b) to expand the authorization for loan capital to be obtained through the federal financing bank, to supplement capital supplied by private lenders, federal appropriations, and institutions, in meeting the need for student loans, (c) to simplify the system of student loan deliveries, (d) to expand opportunities and incentives for students to consolidate loans taken under different terms into a single repayment plan, with an extended repayment period and options for repayment on a graduated or income-sensitive schedule, and (e) to expand opportunities and incentives for a higher educational institution to utilize a central agency to administer and collect all federal or state-guaranteed loans made to students for purposes of attending that institution, while assuring the institution's right of first refusal to serve as the collection agent for its National Direct Student Loans.

Though it is of secondary importance, I believe we should continue actively to explore possibilities for enactment of legislation designed to supplement and complement federal student assistance benefits with: (a) a program of college tuition tax credits which is sensitive to both unmet student need and the varying costs of attending higher educational institutions, and a program which provides tax incentives to encourage family savings to meet their future higher educational expenses.

I know that realistically some cuts do need to be made in the budget and that that is a high priority both for you and for President Reagan. I also expect that we will have to cut back some, particularly in the Federal guaranteed student loan aspects of the financial help to higher education. And that we can accommodate to by trying to find other sources of loan funds either commercially or through gifts to the college. But it is the burden of my plea to you that we try to maintain some balance among grants, study support and loans, augmented if possible by some tuition tax credit help. Such programs are essential, I believe, not only to the maintenance of a strong independent college sector but also to the moral obligation to help people of lower means have access to the highest quality education which we can provide.

Thank you very much for your support.

Most sincerely,

WILLIAM R. ROGERS,
President.

A SECOND LOOK AT PRESIDENT REAGAN'S MATH

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, yesterday the budget analysts of the Congressional Budget Office delivered disturbing, but not surprising, news on the Reagan budget: His spending estimates and thus his deficit estimates for the next fiscal year are too low—on the order of $20 to $25 billion too low.

The news is disturbing because it makes it that much more difficult for Congress to begin the work of cutting the budget. The news is not surprising, however, since economists and budget experts spent all last week telling congressional panels that the President's budget was based on unrealistic assumptions that would undermine his figures and his promise of a balanced budget by 1984.

In fact the administration has been through this once before already when it discovered 2 weeks ago that it had underestimated spending by $6 to $7 billion.

The CBO reestimates call into question the nature of President Reagan's cuts. Is he actually cutting Federal spending by $48.6 billion? The staff of the Senate Budget Committee, now with a Republican majority, says "no"; the real figure is probably around $42.9 billion, because the President's budget assumes lower interest rates and inflation than can realistically be expected.

So that one bit of optimism on the President's part just increased the deficit by almost $6 billion. It now appears that the whole range of overly optimistic economic assumptions woven into this budget only work to hide budget deficits, not reduce them.

THE "OOPS" FACTOR IN BUDGETING

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PANETTA. Mr. Speaker, a few weeks ago, I raised concerns with what I call the "oops" factor in budgeting. It is obvious that this pervasive factor that impacts on all budgets has struck again.

First, it was to the tune of $10 billion to $12 billion in reestimates. Today, it is another $25 billion.

We have a total of less than 40 days in which $37 billion must be reestimated into this budget. The crucial factor is that the deficit in 1982 is no longer the projected $27 billion that was estimated by President Carter or the $45 billion that was estimated by President Reagan. Instead, we are now dealing with a $60 billion to $70 billion deficit for 1982. And at the rate that deficits have increased in the past, we are looking at a potential $100 billion deficit in 1982.

The point is that something is going very wrong with what I thought was the basic goal, to achieve a balanced budget. Whether it is a poor assumption, whether it is an overemphasis on supply-side economics, I am not sure. But what I do know is that a budget that has a deficit of anywhere from $70 billion to $100 billion is going to send the wrong signals to the Federal Reserve, to the money markets, and to the economy, and the American people will not take "oops" for an excuse.

AN ALTERNATIVE BUDGET FOR 1982

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, I take the well briefly now just to advise my colleagues that I am taking a special order today which should begin in half an hour or so to discuss an alternative budget for 1982 which my staff and I devised over the last 3 weeks and which I unveiled last Thursday.

This budget, in striking contrast to the President's, contains not a $45 billion deficit but a $10.8 billion surplus. I think that is the kind of message that our constituents would like us to be giving them. I will be discussing the details in a few minutes. I just advise you now to stay tuned in.

Thank you.

A $100 BILLION DEFICIT?

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, last week in a speech to the House, "Huey P. Long in Reverse," I listed five criticisms of the Reagan administration economic program.

One of the criticisms was that the administration's budget was laced with economic forecasts and estimates that ring about as probable as the annual National Enquirer predictions.

This morning I noticed that the Senate Budget Committee and the Congressional Budget Office are saying much the same thing.

The Senate Budget Committee, a Republican-controlled body I might add, has determined that the Reagan administration has underestimated their interest rate forecasts by $5.7 billion. As a result, the committee believes Reagan's budget cuts will save only $42.9 billion, as opposed to the previously announced $48.6 billion.

The Congressional Budget Office finds much the same problem with the Reagan administration economic forecasts—they are not too optimistic. As a result, the Budget Office figures the administration's 1982 budget will more likely be $715 to $720 billion, rather than $695 billion—a $20 to $25 billion difference.

A couple of weeks ago an investment analyst told me that the administration's economic program was so unrealistic it would result in a $100 billion deficit. We are approaching that figure.

□ 1215

MANY AMERICANS BELOW POVERTY LINE RECEIVE NO BENEFITS

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, millions of Americans have actually been led to believe that the President's economic game plan provides what he calls a safety net for the very poor. Mr. Meese has given us the term "the deserving poor." Other administration spokesmen have given us the term "the truly needy." Let us remind ourselves that the officially poor people in the country come under the following categories: $4,275 for an individual, $5,600 for a couple, and $8,400 for a family of four. But 23 percent of the 25 million Americans below the poverty line receive absolutely no benefits, zero benefits, from the seven so-called safety-net programs. And 60 percent get either nothing or just a free meal for their children at school from the seven safety-net programs.

Mr. Speaker, the Chicago Center for the Study of Welfare Policy has found that a typical poor working mother—that is a working mother, a working mother—in New York City with two school-age children will have her benefits, her disposable monthly income cut 15 percent or $100 per month under the Reagan economic game plan.

Mr. Speaker, for these people there is truly no safety net.

SHOULD GERALD FORD REGISTER AS A LOBBYIST OR FOREIGN AGENT?

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. GONZALEZ. Mr. Speaker, the current U.S. News & World Report tells us that former President Ford is off on a trip to represent the interests of the Charter Oil Co., which incidentally is the same firm that employed Billy Carter. During this business trip, Mr. Ford is also meeting, as the President's representative, with, "leaders in Ireland, France, West Germany, China, and Japan." Throughout this official-cum-private business trip, Mr. Ford will travel on a Charter Co. aircraft.

Now it is obvious that Mr. Reagan has purposely given Mr. Ford a certain status; he is not only a former President, but he carries messages in behalf of Mr. Reagan. It is also obvious that Mr. Ford is up to something more than a private vacation. He is being paid to represent Charter, not the United States. But this distinction might escape the notice of the potentates he visits. It is clear that the Charter Co., hopes to trade on his name and status as a former President, just as it hoped to trade on the name of Billy Carter.

Mr. Ford is an affable and honorable man. But if he is doing the same thing Billy Carter did, and it appears he is, should not he be registered as a foreign agent? Is he?

[From U.S. News & World Report, Mar. 16, 1981]

GERALD FORD'S DOUBLE-PURPOSE JOURNEY

Gerald Ford played a controversial double role—ambassador for Ronald Reagan and spokesman for a private company—as he traveled across Europe and Asia.

In a March 3 meeting at the White House before Ford's 27-day journey, Reagan authorized the former President to meet on his behalf with leaders in Ireland, France, West Germany, China and Japan.

Also on Ford's 11-nation trip were stops in such countries as Oman, the United Arab Emirates and Indonesia—as a "consultant on international relations" for the Charter Company, a Jacksonville, Fla., firm involved in oil, insurance and communications.

Asked what he will do for Charter between stops in its company jet, Ford said: "That's a private matter."

Representative Andrew Jacobs (D-Ind.) noted that a Charter subsidiary once sought help from President Jimmy Carter's brother Billy in an effort to get more oil from Libya. Said Jacobs sarcastically: "Maybe Billy Carter could give Jerry Ford some pointers on how to handle this type of business."

Ford, 67, gets an annual pension of around $100,000 for his 28 years in Congress and the White House. He collects nearly $10,000 apiece for public speeches and has received an estimated 2 million dollars for his memoirs and for television work.

A close associate defended Ford's trip and his "unquestioned integrity." But another friend said of the Charter arrangement: "It bothers me, the appearance of it. But his feeling is that he's an honest person and wouldn't do anything wrong. And he believes his business is private now."

OFFICE OF SPECIAL INVESTIGATIONS WINS NAZI WAR CRIMINAL CASE

(Mr. LEHMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN. Mr. Speaker, I was just informed by Allan Ryan, who heads the Justice Department's Office of Special Investigations, that a favorable decision was handed down today by the U.S. District Court of Eastern Pennsylvania, in the denaturalization case of Wolodymir Osidach.

Osidach misrepresented his wartime service as commandant in the Ukrainian police in Rawa-Ruska in the Ukraine. He also hid the fact of his involvement in the persecution and murder of unarmed Jewish civilians. He participated directly in the round-up and transport to extermination sites of Jewish civilians residing in Rawa-Ruska. Osidach entered the United States in 1949 and has lived as a free man both before and after his naturalization in 1963 when he enjoyed the rights of citizenship.

I want to commend Allan Ryan and his compact staff in the Office of Special Investigations. This is the first case opened and completed under Ryan's tenure as Director and was accomplished in less than 2 years. This is a great accomplishment, for most of these cases take many years to be investigated, filed, and brought to any conclusion.

I urge my colleagues to take note of the very small support the OSI requires to accomplish this important task—its annual budget of $2.6 million is well spent during these few more years when Nazi war criminals living in the United States can be prosecuted, denaturalized and deported.

This is an example of the worthiness of the OSI's work. The unit deserves our continued support for a task of such universal importance.

THE WASHINGTON COMMEMORATIVE HALF DOLLAR

(Mr. BARNARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARNARD. Mr. Speaker, today I am introducing legislation to authorize the striking of a silver commemorative half dollar to honor the 250th anniversary of the birth of George Washington, in 1982.

My bill calls for the striking of a minimum of 10 million 90-percent silver half dollars that will be sold at a premium through as wide a distribution system as possible to the American people. They will be legal tender, and will be the same size and weight as the silver half dollars that were produced in this country until 1965. The premium will cover the costs of producing the coin, including the cost of the metal, but will be kept as low as possible to insure wide distribution.

This is a fitting way to commemorate the 250th birthday of the Father of our Country, and in addition there are sound historical and budgetary reasons to approve this legislation.

In 1932, on Washington's 200th birthday, a special commemorative quarter dollar was produced to honor the occasion, and it proved to be so popular that it is still produced today as the design of the currently circulating quarter. It is just as appropriate to honor his 250th birthday with a special commemorative coin.

In addition, this country has a long and honored tradition of striking commemorative half dollars for special events. From 1892 until 1954, 48 different events ranging from the 150th anniversary of the battles of Lexington and Concord to the birth of Booker T. Washington were honored on a series of coins that reflect both the art and the heritage of our country. My legislation will reestablish this tradition.

On a practical note, it will provide Americans with an inexpensive way to own silver, and will help reduce both the budget deficit and the trade deficit. While the premium will be kept low, there will be some profit from the sale of these coins that will go to the Treasury, much as there is now profit that comes to it from the collector sets now minted annually.

In addition, millions of similar coins from other countries are imported into this country every year for sale to collectors and those who wish to hold silver. Until now, there has been no American coin to give them competition, and the money spent for them has increased the trade deficit. An American silver coin will help reduce this outflow.

Let me repeat that this is a 1-year coin to commemorate a great American. It will be minted in addition to our regular coinage, and will not affect the design or the production of either the Kennedy half or the current Washington quarter.

George Washington's administration established our system of coinage, which is so practical that it has been copied by most of the nations of this Earth to some extent. It is only fitting that his 250th birthday be commemorated on a special coin.

THE BUCK STOPS HERE

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, the other day I was participating in one of my committee hearings where one of the administration departmental people was testifying, and a Democrat complained about a billion dollar cut in this particular department. The man testifying before us said he did not know what a billion dollars was.

Mr. Speaker, I told the gentleman that the best way to define a billion dollars was that a billion dollars is a mere 1 percent of the $100 billion annual debt service that we have to pay off on the trillion dollar debt that this Congress created over the last 7 or 8 years, where they have doubled the Federal budget and doubled the national debt.

I have heard a lot of grandstanding on the Democrat side of the aisle worrying about all of the cuts, and I have heard a few Republicans on our own side telling us that they are worrying about this cut or that cut. I think it is about time we live up to the Harry Truman doctrine which said, "The buck stops here."

Let us work together and enact the Reagan tax cut program that will stop this unconscionable spending spree and get the American economy rolling again.

OUR ONCE PLENTIFUL WATER SUPPLY IS BECOMING INCREASINGLY SCARCE

(Mr. SHUMWAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHUMWAY. Mr. Speaker, the recent drought affecting all parts of our Nation is stark evidence that our once plentiful water supply is becoming increasingly scarce. Moreover, a recent Newsweek cover story entitled, "The Browning of America" observed that the energy crisis and the water shortage are inextricably linked.

Some 85 percent of our annual water consumption is accounted for by irrigated agriculture. More than 50.7 million acres of farmland are now under irrigation. Clearly, enormous volumes of water could be freed for other beneficial uses if farmers were encouraged to employ more efficient irrigation methods. However, the cost of drip irrigation, low pressure sprinkler systems, and other equipment is too prohibitive.

I have introduced H.R. 621—the Irrigation Water Conservation Tax Act of 1981, which provides for an additional 10-percent investment tax credit, as well as for an accelerated 3-year depreciation allowance to farmers who purchase water-saving equipment. If enacted, H.R. 621 will encourage positive energy savings as well. According to CRS, if 10 percent of the demand for irrigation water was reduced, some 26 million barrels of imported crude oil could be saved each year.

I strongly urge my colleagues to join with me in sponsoring this straightforward legislation. Diminishing water supplies will be of paramount importance to our Nation in the next two decades, and my bill is an important first step toward remedying the problem.

THE COMPREHENSIVE SAVINGS INCENTIVE ACT OF 1981

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, 3 years ago, this legislative body took a positive step to encourage savings and investment by reducing the maximum Federal tax rates on long-term capital gains from 49 to 28 percent.

As a result of this farsighted action, there has been a significant increase in both the number of individual investors and in total equity values.

Unfortunately, however, despite these positive developments, current economic conditions demand that we enact additional tax measures to further stimulate capital formation and to end the tax bias against savings and investment.

For this reason, I am today introducing the Comprehensive Savings Incentive Act of 1981. A bill designed to significantly increase both our savings and productivity rate, to expand the number of individual shareholders, and to create millions of dollars of equity capital for our financially starving industries.

In brief, the bill is comprised of three major provisions. The first provision permanently increases the amount of money an individual may exclude from taxation on dividends and interest earned on savings accounts from the current limit of $200/$400 to $1,000/$2,000 for individuals and married couples.

As my colleagues will recall, the $200/$400 provision was incorporated within the so-called windfall profits tax bill and is expected to significantly increase our gross national product, the rate of private investment, produc-

tivity, and employment. I believe that far greater benefits are to be gained by increasing the exclusion amount and by making it a permanent part of our Tax Code.

The second provision of this legislation modifies our tax code as it affects individual retirement accounts. At present, to qualify for an IRA, an individual must be earning an income either as a salaried or self-employed worker, and must not be eligible for an organized pension or retirement plan. IRA's are personal, tax-deferred retirement plans which allow individuals to put 15 percent of their yearly income—up to $1,500—into a special interest-bearing account.

While I believe there is merit in re-evaluating the eligibility requirements for an IRA, my bill simply recognizes that because of recurrent double-digit inflation, we must increase the amount of money people are able to set-aside in an IRA. For this reason, my bill increases the individual limit of $1,500 to $2,500 and correspondingly increases the spousal deduction from $1,750 to $3,000.

The third and final provision of this legislation provides for a further rollback in the effective tax rates on capital gains from 28 to 21 percent for individuals and corporations.

I am convinced that a further reduction in the capital gains rate is overdue and that it can be financed in effect by higher realizations of gains and related tax receipts consisting largely of ordinary income earned by brokers executing sales commissions. In fact, this finding is consistent with the results of the 1978 reduction which has increased capital gains receipts to the Treasury Department by some $900 million.

Additionally, it is significant to note that a reduction in the capital gains tax from 28 to 21 percent received the enthusiastic support of the Senate in its consideration of the Revenue Act of 1978. At that time, the Senate Finance Committee reported that:

> The committee believes that lower capital gains tax will markedly increase sales of appreciated assets, which will offset much of the revenue loss from the tax cut, and potentially lead to an actual increase in revenues. In addition, the improved mobility of capital will stimulate investment, thereby generating more economic activity and more tax revenue.

Mr. Speaker, it is my firm belief that this type of anti-inflationary individual tax cut compliments the President's own tax proposal, which I fully support, and will help produce lasting jobs in the private sector, minimize the risk of a new and worse recession, result in lower interest rates, increased capital investment and productivity, and will strengthen the dollar abroad.

Mr. Speaker, what I am proposing here today is an idea designed to benefit all Americans. For in this time of economic crisis, we must do all that we can to increase the amount of available capital. Capital is the lifeblood of our economy, and without it, we will continue to experience high interest rates, high unemployment, astronomical trade imbalances, and sagging levels of productivity.

I believe that if enacted this legislation will unlock important sources of capital and will allow American industries to expand their facilities, to create thousands of jobs, to more effectively compete abroad and to more efficiently produce those products we depend upon in our daily lives.

I urge my colleagues to join me in this bipartisan effort to restore economic vitality to this great Nation by cosponsoring the Comprehensive Savings Incentive Act of 1981.

UNCONTROLLABLE EXPENDITURES THREATEN SYSTEM'S COLLAPSE

(Mr. JOHNSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSTON. Mr. Speaker, as we increasingly direct our attention to the task of getting the Federal budget back under control, we are all becoming acutely aware of just how difficult a task it will be, in view of the fact that more than three quarters of the budget consists of uncontrollable expenditures. Most of these uncontrollable expenditures consist of payments to individuals under a variety of entitlement programs. And most of these programs tie their benefit rates to the Consumer Price Index or some other economic index. Consequently, as the CPI rises, so do the benefits that are indexed to the CPI, regardless of the fact that the wages and salaries of the workers supporting these programs are not rising as quickly.

While tying benefit increases to the Consumer Price Index shelters recipients from the impact of inflation, such is obviously not the case for those who are working to support these recipients. We have seen the Consumer Price Index outdistance wages and salaries at an alarming rate. Those who are working to support the unemployed are forced to endure rising inflation, while at the same time they must pay out more and more of their wages to support the unemployed.

Not only is this situation unfair to the working members of our economy. And not only does this situation create a disincentive to work and a strong incentive to quit working in order to qualify for benefits instead. In addition to the basic inequity of this system, the fact is that it simply cannot continue indefinitely. The workers of our Nation cannot continue to support the nonworkers at an ever increasing rate without the whole system eventually collapsing.

I am today introducing legislation which addresses this problem, and which will, I am convinced, provide significant relief to the workers across the Nation who are supporting the nonworkers. My bill, the Indexing Reform Act of 1981, affects those Federal benefit programs which are presently indexed to the Consumer Price Index. This legislation provides that adjustments in the benefit rates of such programs shall be limited to the lesser of the rise in the Consumer Price Index or the rise in wages and salaries for the same period, as calculated by the Labor Department's Bureau of Labor Statistics. By insuring that benefits do not rise faster than the wages of those supporting the programs, my bill will make for more equitable adjustments from the viewpoint of the worker. In addition, it will remove the disincentive to work which is currently built into the system. I am hopeful that this legislation will be the focus of congressional attention in the upcoming weeks, as we examine different alternatives for bringing these uncontrollable entitlement programs under control.

THE HOUSE SHOULD TIGHTEN ITS BELT, TOO

(Mr. EVANS of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Iowa. Mr. Speaker, President Reagan has called for cuts of up to $40 billion in the budget and he seems to be supported by the American people. The Senate having clearly heard this message has pared back its committee staff budget by 10 percent.

It is really disturbing that at a time when Congress and the administration are asking all Americans to cut back, that the House of Representatives just cannot seem to tighten its belt. And one of the best places to tighten would be in the area of committee staffing and expense.

Even if there were not a push to cut spending, there would be a need for a serious look at committee staff funding. Most committees in the House have more than doubled their staff in the past 10 years. This is particularly true of the investigatory staff members which are those added over the limits set by law. The number of investigatory staff members in the House of Representatives has grown from 570 in 1973 to 1,221 in 1979.

I do not believe the workload in Congress has increased enough to justify the need for these increases in spending. If the Senate can cut its committee staff funding from $46.3 million to $41.6 million, why can not the House make similar reductions?

RESIGNATION FROM THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore. (Mr. WRIGHT) laid before the House the following resignation from the House of Representatives:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 13, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives,
2231 Rayburn House Office Building,
Washington, D.C.

DEAR MR. SPEAKER: Enclosed is a copy of the letter I have sent this day to The Honorable William Winter, Governor of the State of Mississippi, advising him of my resignation from the United States House of Representatives effective at the close of business on Monday, April 13, 1981.

Sincerely,

JON HINSON,
Member of Congress.

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 13, 1981.

Hon. WILLIAM WINTER,
Governor of Mississippi,
Jackson, Miss.

DEAR GOVERNOR WINTER: This is to advise you that I resign from the United States House of Representatives effective at the close of business on Monday, April 13, 1981.

Sincerely,

JON HINSON,
Member of Congress.

APPOINTMENT AS MEMBERS OF FRANKLIN DELANO ROOSEVELT MEMORIAL COMMISSION

The SPEAKER pro tempore. Pursuant to the provisions of section 1, Public Law 372, 84th Congress, as amended, the Chair, without objection, appoints as members of the Franklin Delano Roosevelt Memorial Commission the following Members on the part of the House: the gentleman from New Jersey, Mr. HOWARD; the gentleman from New York, Mr. ZEFERETTI; the gentleman from New York, Mr. FISH; and the gentleman from New York, Mr. GREEN.

There was no objection.

ELIMINATION OF BINDING ARBITRATION FROM THE METRO INTERSTATE COMPACT

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLF. Mr. Speaker, I have stated on repeated occasions that the Metro Public Transit System provides an essential service to communities in the Washington metropolitan area. I fully support the extension of the system—which has already been authorized by Congress—into more communities.

At the same time, it is vital that Metro remain a financially healthy system for those State and local residents who support it through their tax dollars. Over the last several years, there has been mounting public concern over the high operating costs of the Metro system. These costs have resulted in such a burden to local communities that many governments are considering the replacement of Metro with county-owned or chartered bus services. Such actions would surely mean the end to an efficient, unified public transportation system in the National Capital region.

There is no doubt that the single most important factor leading to Metro's rising operating costs is the spiraling wage rates for Metro's unionized employees. For several years these employees have enjoyed four-times-a-year salary increases equal to increases in the Consumer Price Index. With labor costs accounting for more than 80 percent of Metro's total operating budget, these large quarterly pay hikes have added millions to the local government subsidies required to keep the buses and trains running without pushing fares to counterproductive levels.

Recently, a dispute between Metro and its employees over these substantial cost-of-living increases was resolved through the process of binding arbitration, which, under the interstate compact that governs Metro operations, is to be used when true bargaining has failed. The decision of the three-member arbitration panel resulted in negligible savings for local taxpayers and those who use public transportation. Through 1982, Metro workers will be receiving four-times-a-year increases that match the first 9 percentage points of increase in the Consumer Price Index. For each point over 9 percent, Metro will pay two-thirds of 1 percent.

As a result of this decision, the pay for Metro operators has been pushed to $10.78½ per hour—the fourth highest transit wage in the Nation. On an annual basis, most Metro operators will now take home $24,432 before overtime and extensive benefits are added. Mr. Speaker, no other public employee in the National Capital area—including teachers, firefighters, or police officers—receive such substantial wages as those given to Metro operators.

The recent binding arbitration decision also kept in place many inefficient work rules at Metro. For example, the number of part-time drivers hired by Metro cannot exceed 10 percent of the current number of full-time drivers. In addition, Metro must pay overtime to any employee who works at maintenance and repair shop on a Saturday or Sunday—even if the total number of workdays does not exceed 5 per week. By reducing productivity and efficiency in Metro's operations, these restrictive work rules further add to the system's operating costs.

Mr. Speaker, this new Metro contract raises severe questions about the binding arbitration of disputes between transit workers and Metro. First, the process of binding arbitration has not fulfilled its purpose of preventing transit strikes in the region. There have in fact been several wildcat strikes, including one that tied up the area's traffic for 8 days during a heat wave in 1978. Second, binding arbitration has taken away the traditional right of Metro and local governments to bring up their ability to pay during the collective-bargaining process. Finally, and perhaps most importantly, the binding arbitration process has taken a final decision about major expenditures of local taxpayers' money away from officials whose primary responsibility is the proper allocation of public funds. In effect, a portion of the property tax vote in local jurisdictions is being established by disinterested arbitrators, and therefore by individuals who are not answerable to the taxpayers and the general public.

Because of the many problems associated with binding arbitration, there have been several attempts to reform the process by which transit wage disputes are settled and to give Metro and local governments a more direct voice in determining the cost of public transportation in the Washington metropolitan area. Recently, Metro's board of directors—comprised of two representatives from Virginia, two representatives from Maryland, and two representatives from the District of Columbia—approved a resolution calling for the elimination of compulsory, binding arbitration from the Metro interstate compact and requested that Congress take appropriate action to eliminate this requirement from the compact. The resolution and accompanying letter from Metro follow:

FEBRUARY 26, 1981.

HON. FRANK R. WOLF,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. WOLF: On Thursday, February 12, 1981, the Board of Directors of the Washington Metropolitan Area Transit Authority approved a resolution calling for the elimination of compulsory, binding arbitration from the WMATA Compact. A copy of the Board's resolution is enclosed. As you will note, the resolution requests that the Congress take appropriate action to eliminate this requirement from the Compact.

The basic concern which prompted this action is that the current WMATA contract with its operators calls for increases in wage rates which the local governments feel are excessive. Those increases are significantly higher than similar cost-of-living increases available to other public employees in the region. The Board's general view is that the history of arbitration at WMATA demonstrates that the process does not take into account the ability of the local governments to pay for the increases granted. In effect, the decision as to wages, benefits, and other working conditions is removed from the con-

trol of management under the current requirement for binding arbitration.

The Virginia General Assembly has approved one version of such a compact amendment, a copy of which is enclosed. As approved, this measure would prohibit employees from striking and would prohibit lockouts. It would forbid binding arbitration, except in the case of individual employee grievances. In its place, a two-step process would be established. First, when contract negotiations reached an impasse, labor or management could call in the Federal Mediation and Conciliation Service. The Service would have 15 days in which to try to resolve any dispute, although it would have no authority to order a solution.

If that process fails, a Fact Finding Board would be convened for purposes of investigating the disputed issues and issuing its conclusions as to the facts of the case. Neither labor nor management would be obligated to concur in the Board's findings.

Legislation has been introduced in the Maryland Senate on the matter. Senate hearings are expected on the bill in early March. To date, no legislation has been introduced in the City Council of the District of Columbia.

Thank you for your interest in the Authority and in this matter. If I may be of any assistance, please let me know.

Sincerely,

RICHARD S. PAGE.

RESOLUTION SUPPORTING THE ELIMINATION OF BINDING ARBITRATION FROM THE WMATA CONTRACT

Whereas the rapid growth in transit operating costs is resulting in an increasing burden on the tax resources of local governments supporting WMATA in the metropolitan Washington area; and

Whereas the present transit union contract has resulted in compensation levels, protection from inflation, work rules and guarantees, which are not available to other regional and local government employees; and

Whereas the present compulsory binding arbitration process for resolving disputes relating to the terms of collective bargaining agreements covering transit employees has not afforded equitable consideration to the burdens of local governments as evidenced by continuation of essentially the same provisions in the union contract since public takeover of transit service;

Now, therefore be it resolved that the Board of Directors of the WMATA finds that the present compulsory binding arbitration process has proven unsatisfactory for equitable resolution of disputes relating to the transit union contract; and

Be it further resolved that the Board of Directors requests and urges that appropriate actions be taken by the Virginia and Maryland legislatures, the District of Columbia City Council, and the Congress of the United States to eliminate the requirement for binding arbitration from the Interstate Compact governing the transit authority.

Mr. Speaker, as the resolution indicates, the elimination of binding arbitration from the Metro interstate compact requires consent from the Virginia and Maryland Legislatures, the District of Columbia City Council, and Congress. Already, the Virginia Legislature has passed legislation that would replace the binding arbitration panel with an advisory factfinding panel. Similar legislation has been introduced in the Maryland Legislature.

Today, I am introducing legislation that would provide congressional consent for these efforts to keep Metro a financially healthy, efficient system for the communities that support it. I hope that my colleagues will agree that this is necessary and timely legislation and I invite their cosponsorship. A copy of the bill follows:

H.R. 2564

A bill to grant the consent of Congress for the States of Virginia and Maryland and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact relating to the requirement that labor disputes involving the Washington Metropolitan Area Transit Authority and its employees which are not resolved by collective bargaining be submitted to arbitration

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress hereby consents to the following amendment to section 66 of article XIV of title III of the Washington Metropolitan Area Transit Regulation Compact (D.C. Code, sec. 1-1431 note):

(1) Subsection (b) is amended by adding at the end thereof the following new sentence: "Each such contract entered into after the effective date of this sentence shall prohibit the contracting employees from engaging in any strike or an employer from engaging in any lockout."

(2) Subsection (c) is amended to read as follows:

"(c) In case of any labor dispute involving the Authority and such employees where collective bargaining does not result in agreement, either party may declare that an impasse has been reached between the parties and may, by written notification to the other party and to the Federal Mediation and Conciliation Service, request the Service to appoint a mediator for the purpose of assisting them in reconciling their difference and resolving the controversy on terms which are mutually acceptable. Within five days of the receipt of the request, the Federal Mediation and Conciliation Service shall appoint a mediator in accordance with its rules and procedures for such appointment. The mediator shall meet with the parties forthwith, either jointly or separately, and shall take such steps as he or she deems appropriate to persuade the parties to resolve their differences and effect a mutually acceptable agreement. The mediator shall not, however, make findings of fact or recommend terms of settlement. Each party shall pay one-half of the expenses of such mediator. If the mediator is unable to effect settlement of the controversy within fifteen days after his or her appointment, the Authority shall submit such dispute to factfinding by a board composed of three persons, one appointed by the Authority, one appointed by the labor organization representing the employees, and a third member to be agreed upon by the labor organization and the Authority. The member agreed upon by the labor organization and the Authority shall act as chairman of the board. The determination of the majority of the factfinding board thus established shall be advisory as to all matters in dispute. If after a period of ten days from the date of the appointment of the two persons representing the Authority and the labor organization, the third person has not been selected, then either of the two persons may request the Federal Mediation and Conciliation Service to furnish a list of five persons from which the third person shall be selected: *Provided, however,* That the list shall not include the name of the person who served as mediator unless inclusion of his or her name is mutually agreed to by both parties. The persons appointed by the Authority and the labor organization, promptly after the receipt of such list shall determine by lot the order of elimination, and thereafter each shall in that order alternately eliminate one name until only one name remains. The remaining person on the list shall be the third member of the factfinding board. The term 'labor dispute' shall be broadly construed and shall include any controversy concerning wages, salaries, hours, working conditions, or benefits including health and welfare, sick leave, insurance or pension or retirement provisions but not limited thereto, and including any controversy concerning any differences or questions that may arise between the parties including but not limited to the making or maintaining of collective bargaining agreements, the terms to be included in such agreements, and the interpretation or application of such collective bargaining agreements. Each party shall pay one-half of the expenses of such factfinding. Under no circumstances may the parties resort to binding arbitration after the date of enactment of this sentence or the expiration date of any contract requiring binding arbitration, whichever is later. This prohibition against binding arbitration shall not be interpreted to preclude such arbitration of individual employee grievances.".

WE OUGHT TO ENACT THE REAGAN PROGRAM FOR CUTS

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I am rather amused that during the morning hours here we have had so many comments from the other side of the aisle relative to our new projection of figures that would suggest a larger deficit or increased spending over and above what was originally programed. It is really no secret here at all. I suspect some of these new assumptions are faulty in the sense that they are predicting larger initial outlays for defense than will be the case, and then, too, with no degree of optimism for the future whatsoever but simply looking at the gloom and doom of yesterday. That is the attitude we are trying to change around here.

It is no secret that the gentleman from Ohio (Mr. PEASE) made much of faulty assumptions earlier on and that he has a plan now for a surplus rather than a deficit. That is just the thing that has been happening on the floor of this House all last year with phony assumptions to the American public that the deficit was going to be something in the range of $24 billion or $25 billion, always trying to kid ourselves when in fact we knew the rate of ex-

penditures was such as to get us in deeper and deeper trouble.

We ought to be honest with ourselves and face up to the fact that we are in real trouble, and we ought to enact the Reagan program for cuts as one remedy.

THE TELEPHONE COMPANIES BIG AND LITTLE

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DANIELSON. Mr. Speaker, so much has been said lately about one big telephone company that I think there is a tendency to forget that this Nation is served by many smaller independent telephone companies who supply us with that vital utility service—communications.

I take this time today to salute the 24 member companies of the California Independent Telephone Association who serve nearly 5 million Californians. Starting as small rural companies linking farms to towns, these companies have grown at a phenomenal rate. Some now serve large urban centers as well as suburban and rural residents. In California, these independents serve nearly 50 percent of the geographical area of the entire State and that is a lot of territory.

The contribution that these 24 companies make to the economy of California is an important one. They employ 29,639 people with a gross payroll of $510,729,081. Their gross plant investment is over $4 billion and in fiscal year 1979 they paid gross taxes of $123,056,983.

These 24 non-Bell, independent telephone companies deserve compliments for the fine service that they provide their fellow Californians, and I would like to salute them by entering their names in the RECORD, with the names of the towns and cities in which they have their offices:

Calaveras Telephone Co., Copperopolis.
California-Oregon Telephone Co., Hood River, Oregon.
Capay Valley Telephone System, Inc., Guinda.
Citizens Utilities Co., Redding.
Continental Telephone Co. of Calif., Bakersfield.
CP National, Concord.
Dorris Telephone Co., Dorris.
Ducor Telephone Co., Patterson.
Evans Telephone Co., Patterson.
Foresthill Telephone Co., Foresthill.
General Telephone Co. of Calif., Santa Monica.
Happy Valley Telephone Co., Stockton.
Hornitos Telephone Co., Stockton.
Kerman Telephone Co., Kerman.
Livingston Telephone Co., Livingston.
Mariposa Telephone Co., Oakhurst.
Pinnacles Telephone Co., Paicines.
Ponderosa Telephone Co., O'Neals.
Roseville Telephone Co., Roseville.
Sierra Telephone Co., Oakhurst.
Siskiyou Telephone Co., Fort Jones.
Tuolumne Telephone Co., Tuolumne.
Volcano Telephone Co., Pine Grove.
West Coast Telephone Co. of Calif., Everett, Washington.

Incidentally, General Telephone Co. of California serves 3,993,191 phones while Pinnacles Telephone Co. of Paicines, Calif., serves 212 phones.

□ 1230

A NEW DIRECTION

(Mr. LEWIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS. Mr. Speaker, I cannot help but be amused myself this morning to watch my friends from across the aisle, one by one, strike this week's theme—as astonishment at the projections of ever-increasing deficits at the Federal level.

I was most bemused because of the fact that many of those same Members who, over the years, constantly voted for more and more Government programs, have consistently been committed to the idea that the way to solve all the problems of the world is through bigger and bigger Government.

As a fact of life, with this new expression of concern for conservative politics, I will watch with interest those Members and their pattern this year. The President is taking us down a path to a new beginning, less Government spending. He cannot be successful without the help of those same Members who were expressing their concern earlier.

Remember, we have a new President, we have a new Senate, but the House is controlled by the same old spenders of the past.

I hope their rhetoric will mean a new hope and a new direction in the years ahead.

THE WAYS OF KEYNESIAN ECONOMICS

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, the majority leader in his lengthy "Dear Colleague" released last week appears to be telling his troops that they should not forsake the ways of Keynesian economics. The guru of the Keynesian School, Walter Heller, said "that Keynesian arithmetic is as good as it ever was." That is precisely the point. The old school tried and failed.

But still the Democratic leader exhorts his squad to "dance with who brung ya'." Now this is perfectly good advice if you are going to the senior prom, but not so good if you are invited to a Hell's Angels slumber party, and considering the destruction wreaked by Democratic-backed Keynesian economic policies, their gathering resembles the Hell's Angels soiree more than the prom.

RUSSELL N. SHEWMAKER: 47 YEARS OF EXCELLENCE IN PUBLIC SERVICE

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, in mid-January, one of the most distinguished public servants in Washington announced his retirement. Russell N. Shewmaker, senior adviser to the International Trade Commission, and a public servant of 47 years of service, has been one of the greatest sources of knowledge and insight into international trade issues to serve any government, anywhere, any time.

His retirement is well earned and well deserved. But he will be missed by everyone who deals with the complex and difficult issues of international trade.

Russ began his public service in the early New Deal, as a messenger for the old Bureau of the Customs. His brilliance and dedication resulted in a rapid rise through the ranks of the bureaucracy. He joined the U.S. International Trade Commission in 1951 as an attorney-adviser. He was promoted to Assistant General Counsel in 1956, and in 1964 was appointed General Counsel. Since then, he has been a familiar and welcome figure on Capitol Hill, advising the Congress on the intricacies of the numerous small and miscellaneous tariff bills considered each year by the Congress. His expertise and experience have saved us from many an error and slip.

Russ' most difficult and finest accomplishment was the development of the Tariff Schedules of the United States. This monumental work, which brought order and efficiency to the way in which we classify and assign tariffs and duties to imports, greatly increased the efficiency of the Customs Service and our knowledge of import and export trends. The TSUS—the "bible" of our international trade—is an object of envy and emulation throughout the world. Indeed, the entire world is engaged in an effort to adopt a common, "harmonized" tariff system based on a series of rational categories, such as those devised by Mr. Shewmaker.

While the Congress and Russ may have problems with various aspects of this new world harmonized system, the concept of a "scientific" Customs classification system owes an incredible debt of gratitude to Russell Newton Shewmaker.

On behalf of all the members of the Subcommittee on Trade, I want to

wish Russ and his family many happy years of productive retirement.

DEBT COLLECTION IMPROVEMENT ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 10 minutes.

● Mr. JEFFORDS. Mr. Speaker, today I am introducing the Debt Collection Improvement Act of 1981, a bill which could make a $20 billion difference in the Federal budget deficit within a year's time.

The magnitude of the Federal Government's outstanding debt problem is astounding. Of the $175 billion in debts owed, $25.3 billion is delinquent or in default at agencies and departments across the full breadth of the Government. For example, as of the end of fiscal year 1979, $1.4 billion in receivables was delinquent at the Department of Agriculture, $2.2 billion at the Department of Education, $1.9 billion at the Department of Health and Human Services, $1 billion at HUD, $1.8 billion at SBA, and a whopping $14 billion at Treasury, more than $10 billion of which was uncollected back taxes.

The condition of many department accounting systems is so poor that it is presently impossible to determine if an additional $2.4 billion is current or overdue. According to the General Accounting Office, one $3.7 billion HUD loan program's records were so unorganized that the Department had no idea of how much was in default there. GAO auditors investigated and found the figure stood at $500 million.

In fiscal year 1979 alone, Uncle Sam wrote off $1.5 billion as uncollectible bad debts. The cost to the American taxpayer of carrying this defaulted debt is staggering—roughly $3 billion annually. Unless Congress acts promptly to end Uncle Sam's debt-forgiveness spree, uncollectibles will grow by leaps and bounds with larger Federal budgets.

Perhaps the most critical aspect of this mounting debt problem is Government indifference. Loan program directors are the last of the big-time spenders, almost solely concerned with lobbying for appropriations and disbursing money, and assigning a very low priority to repayment enforcement.

The time is ripe for legislation establishing effective agency debt collection procedures. Programs should be run like sound businesses. Accordingly, my bill will give the Government a new array of collection tools which, it is estimated, will cost the United States $1 for every $30 recovered. All agencies will be allowed to refer the names of defaulted borrowers to credit bureaus. This extremely cost-effective proposal will insure that those who consider reneging on their commitments to the United States know they run the risk of being denied credit cards and other lines of credit. In New Jersey, where the condition of all student loans is made known to credit bureaus, student defaults are relatively few.

The Debt Collection Improvement Act also sets up a specific collection system for defaulted national direct student loan and federally insured student loan accounts at the U.S. Office of Education. These delinquent accounts now total nearly $1.5 billion. My bill calls for a thorough review of the past-due loans under these programs on a quarterly basis. The U.S. Office of Education will have 6 months to pursue its collection efforts on defaulted accounts. If, at the end of this period, a new repayment schedule has not been established and payments have not begun under this schedule, the Office of Education will contract by bidding process with private collection agencies or State guarantee agencies for the collection of any particular account. The agencies will have a year's time to initiate repayment. If this is unsuccessful, the account will be referred to the Department of Justice if it exceeds $600 in amount, and to the Internal Revenue Service if it is equal to or less than $600 in amount.

The act provides for a study by GAO of the feasibility of applying this collection system to other Federal agency loan programs.

The IRS is granted new collection tools as well under my legislation. The Service will be authorized to capture the tax refunds of all persons owing sums to the United States, a concept which has the strong support of the outgoing Comptroller General, Elmer B. Staats. A 1979 GAO report indicates that as much as 36 percent of the total past due debt could be so recouped within 2 years, and more than $4 billion in the first year. This proposal has been well tested in Oregon, where the threat of refund withholding has been an effective discipline for borrowers since 1972.

In order that the IRS will be able to use this new collection method effectively, and go after the more than $10 billion in back Federal tax liabilities, the Jeffords bill provides for adequate additional IRS staffing.

Four additional GAO debt collection recommendations, which the Comptroller General outlined in his November 1980 testimony before the Senate Governmental Affairs Committee, are included in the Debt Collection Improvement Act. Agencies will be allowed to boost the interest rates on defaulted accounts to the Federal borrowing cost; there is no reason why delinquent borrowers should continue to enjoy the often extremely favorable interest rates assigned to Federal loans. Moreover, agencies will have the authority to garnish the wages of Federal employees who are indebted to the Government. The extent of Federal worker participation in the debt problem is perhaps greater than many might imagine. At the Veterans' Administration, for example, 6 percent of the debtors with uncollected overpayments are in the employ of Uncle Sam.

Additionally, this bill recognizes that the 6-year statute of limitations does not bar the offset of debts owed to the Government and removes the restriction on redisclosure of a debtor's address that has been obtained from the IRS.

Finally, the Jeffords bill seeks to beef up Federal involvement in the collection of delinquent child support payments owed by absent fathers. Under current law, the IRS has the authority to collect, as though they were tax amounts, delinquent child support payments referred to it by State authorities. However, some States have been reluctant to resort to this referral because they must bear the cost and because the Service is often not particularly prompt in acting on such requests. Under this legislation, Uncle Sam will foot the referral bill, which runs at about $125 a case, and will not be able to sit on a State request for more than a month before acting on it. The Office of Child Support downtown has estimated that in fiscal year 1982, $2.5 billion in child support payments to aid to families with dependent children families will be in arrears. If the IRS were to institute an aggressive tax refund offset program for delinquent child support payment accounts referred to it by the States, it could take in $27.5 million, representing both the AFDC and non-AFDC caseload, in fiscal year 1982. This would result in a comparable reduction in Federal AFDC, tuition assistance, food stamp, and other benefit payments.

This legislation is not loan-shark legislation, although some may be tempted to regard it as such. All collection tools must be used strictly within the bounds of due process. Defaulted borrowers will be given every opportunity to avail themselves of hearings for the purpose of having Government claims against them reviewed. They will be given full and timely notice of any collection proceeding about to be commenced against them, which will stipulate that they have the right to appeal the initiation of such proceeding. The thrust of this bill is really very simple. It says that when an American citizen owes the Government money, he or she should pay it on time unless there is a good reason not to.

A savings to the United States of $20 billion in fiscal year 1982 cannot be regarded lightly when the administration is proposing to cut back and eliminate programs which address the

pressing needs of the indigent members of society. I feel strongly that it is unfair and unreasonable to move against the Legal Services Corporation and the poor who cannot afford legal representation without its assistance, for example, when such a large sum of money, representing Government waste and negligence, is unattended to. If the President is truly serious about his campaign pledge to banish waste from the corridors and ledgers of the bureaucracy, this is a matter to which he should turn his attention without delay.

Thank you very much, Mr. Speaker.●

COUNTRY JUSTICE AND THE SPECIAL USE VALUATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN), is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, my colleagues, Congressmen BOB MICHEL and ED MADIGAN, and I are introducing legislation today that would correct an injustice being done to owners of family farms in the State of Illinois, as well as in several other States.

Under current law, enacted in 1976, the Internal Revenue Code permits farmers to elect to use the special use valuation method when filing estate tax forms after the death of the owner of a small family farm. This method enables the farm to be valued at its value for farming purposes, rather than at its "prevailing market price," the highest price at which it can be sold for any use. Applying the special use valuation, the family of the deceased can value the estate at its farm value, based on farm income potential. The purpose of this provision is to preserve the family farm, because, with the inflationary effect on land prices, many people were being forced to sell family farms in order to pay estate taxes.

The farm must be a family farm to qualify, as established by its having been farmed by the deceased or family members in 5 out of 8 years preceding the death of the owner. In addition, the farm must continue to be farmed by the heir or other family member for 15 years following the death of the owner. There must be actual material participation in farming to establish that it is still a family farm.

This past summer, the Internal Revenue Service issued final regulations relating to section 2032A of the Internal Revenue Code, dealing with special use valuation. These regulations are the cause of the problem now being faced by many farm families. The IRS regulations require that if the heir to the farm rents to another family member, the heir must be "at risk" in the rental even though the farm is still being farmed by a family member. To be at risk, the income accruing to the heir must vary with the income earned by the family member actually participating in the farming. For example, a mother may rent the farm to her son. If the rent is fixed, the estate loses the right to use the special use valuation. If the rent varies with the income earned, however, the estate retains the right to the special use valuation.

There is considerable debate as to the validity of this interpretation by the IRS, and this question will most assuredly end up in the courts. However, we are not introducing legislation to correct this problem prospectively, although other Members of Congress have done so. Rather, our concern at this point is that the regulations were not issued until almost 3 years after enactment of the law. In the meantime, many people elected the special use valuation and, anticipating a different interpretation, rented their farms to family members. Retroactively, they have lost the right to use this special use valuation election. Many people are now facing exactly what Congress was trying to avoid—dissolution of the family farm—because they failed to read the intentions of the IRS accurately.

The legislation we are introducing today will forgive flat amount cash rentals to family members that occurred between the date of enactment of section 2032A and the date of issuance of the final regulations. It will not answer the question of the prospective status of such rentals, but it will provide a measure of justice to people who failed to correctly anticipate the Internal Revenue Service's decision.

H.R. 2567

A bill relating to the treatment of certain rentals of farm and business real property for purposes of section 2032A of the Internal Revenue Code of 1954

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TREATMENT OF CERTAIN RENTALS UNDER SECTION 2032A OF THE INTERNAL REVENUE CODE OF 1954

(a) GENERAL RULE.—In any case where an election under section 2032A of the Internal Revenue Code of 1954 was made before August 1, 1980, by the executor of a decedent—

(1) for purposes of subsection (c) of such section 2032A, any use of qualified real property by a member of a qualified heir's family pursuant to a rental by such qualified heir shall be treated as use by such qualified heir, and

(2) any revocation of the election under such section 2032A shall not be effective if—

(A) before the date which is one year after the date of the enactment of this Act, the executor makes an election under this paragraph in such manner as the Secretary of the Treasury or his delegate shall prescribe, and

(B) before August 1, 1980, there had been a rental described in paragraph (1).

(b) MEANING OF TERMS.—Terms used in this section shall have the same meaning as when used in section 2032A of the Internal Revenue Code of 1954.●

INVESTING IN OURSELVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYDEN) is recognized for 15 minutes.

Mr. WYDEN. Mr. Speaker, in the very near future Congress will enact an economic plan designed to revive our faltering economy. I believe it is essential that Congress shape this plan so it encourages Americans to work and does not penalize them when they do. Only then will the package be a true investment in the future because it then will be an investment in ourselves.

Work is important to America because it produces wealth that allows us to enjoy a high standard of living. Through jobs, individuals gain a sense of self-worth and dignity. Work gives our young hope for the future, and our seniors security.

In this, my first speech in the Congress, it is not my intention to celebrate the obvious virtues of work. Rather, it is my design to call for changes in Federal policy that discourage work. Here are just a few areas where we must begin to change Federal policy:

REMOVE THE MARRIAGE TAX PENALTY

More than 15 million couples are affected by this tax which generates $23 billion in revenues for the Federal Government. That is a big disincentive for the millions of second wage earners in our families who for one reason or another choose to go to work. Changing this tax will cost the Treasury. My question is, How much will it cost the country in lost productivity if we do not change it?

SOCIAL SECURITY OUTSIDE EARNINGS LIMITATION

This policy presumes that citizens when they reach 65 years of age no longer have any economic value, or if they do, then they do not deserve any social security pension benefits. The result is that we discard a highly skilled and experienced portion of our work force by making it financially impractical for them to keep working—even part time. Birth rates are on the decline. There is a great deal of evidence that in the next 30 to 40 years, employers will desperately need older workers just to keep plants and factories open. Let us at least begin a new effort to make it financially attractive for those older workers who want to stay in the work force to do so.

WELFARE CATCH 22

No area of Federal policy generates as much controversy as welfare. Despite decades of debate and hundreds of piecemeal changes, our welfare

system still is structured so that in too many instances and in too many ways we make it more profitable for our citizens to be on welfare than it is for them to work. There is no easy or cheap way to change this welfare Catch 22. But whatever the cost, it will be worth it for us to devise new incentives to get our able-bodied people to enter the work force, receive earnings, pay taxes, and develop a tradition of holding down a job—a tradition they will pass down to their children who, hopefully, will never have to be on welfare.

PORTABLE PENSIONS

In this highly mobile industrial society of ours where changing jobs during a lifetime is now considered inevitable, if not highly desirable, one problem stands out: pensions too often do not go along with the workers. Time is put in, pension benefits accrue, but then are lost when the worker leaves. We must take steps to make sure some system is developed that allows workers to retain the pension benefits they have worked for and deserve to receive. If we do not, we keep in place yet another disincentive to a lifetime of productive labor.

ELIMINATE PRODUCTIVITY DISINCENTIVES

One of the most distressing aspects of President Carter's voluntary wage and price guidelines was a provision that forbids employees not covered by a union contract from receiving a pay raise based on increased productivity if it exceeded the cost-of-living index. This was blatant discouragement for employees to become more productive. A better approach is to reward employees who increase their productivity by such steps as removing obstacles for employee stock option trusts and other profit-sharing arrangements. The Federal Government can also invest in productivity by permitting small business to write off research and development which results in job-creating new opportunities. The Government also should encourage basic research by giving incentives to businesses which contract with universities for special projects. That not only produces new ideas to capitalize on in the marketplace, but it also produces new highly trained workers in the exact fields needed by industry.

BECOMING A BETTER CUSTOMER

The Federal Government even discourages work by being a disagreeable customer. New regulations being discussed would impose requirements on industries that sell items off the shelf to the Government to eliminate merit pay programs for their employees. That means the Federal Government discourages the most efficient companies in the country from even selling to it—a peculiar way to get the most of a tax dollar and to encourage more efficiency.

Only an unrelenting assault on Federal policy across the board will remove distortions that discourage work and penalize those who do work.

I agree with those who say that we will not rediscover economic prosperity by cutting Federal taxes alone. We must rejuvenate our productive capacity in this Nation, and the place to start is by investing in our most valuable resource—ourselves. That is the only way I know to work our way back into shape.

□ 1240

ALTERNATIVE BUDGET PLAN

The SPEAKER pro tempore (Mr. MURTHA). Under a previous order of the House, the gentleman from Ohio (Mr. PEASE) is recognized for 60 minutes.

Mr. PEASE. Mr. Speaker, in light of the comments made by the distinguished minority leader a few minutes ago, I would like to point out that I do not in any way intend my presentation this afternoon to be a partisan attack on the President's program. Indeed, I think there is very widespread understanding and agreement on both sides of the aisle that when our country does have severe economic difficulties, it is going to take bipartisan cooperation if we are going to solve those difficulties.

What I am going to talk about this afternoon is an alternative proposal on the Federal budget for fiscal year 1982 which I presented in a press conference last Thursday afternoon. I did that solely as my own effort, not as part of any grand Democratic strategy to pull the rug out from under President Reagan in his budget proposals; rather, I was intrigued by President Reagan and his comments shortly after his address to the Congress in this Hall back in February that if anyone opposed parts of his program, that that person would be welcome to come up with alternatives, but that, to the President's knowledge, no one had come up with alternatives. It was at that point that I decided to try to develop my own alternative fiscal year 1982 budget. That is a task which consumed the time and energy of myself and my own congressional staff for a period of about 3 weeks. We have now completed that process.

The alternative budget which I have put together is contained in the 175-page document which I will make available to any of my colleagues who wish to have a copy. I want to discuss a variety of aspects of that program today. As I say, not in a partisan way, but as an effort to put before my colleagues in the Congress another way of looking at the Federal budget, another alternative which I hope might be accepted in some small part by the members of the House Budget Committee as they put together the first concurrent budget resolution. I will be discussing, as I say, several aspects of that plan.

I would like to begin by reading the statement with which I unveiled my alternative budget last Thursday. It goes like this:

> President Ronald Reagan has captured the imagination of the American public with his bold economic recovery plan. He has proposed deep cuts in Federal spending at a time when most Americans believe that that is exactly what is needed, when Americans believe that Government has grown too big and too burdensome. To those who have criticized parts of his program, the President has essentially said, "Mine is the only game in town. Some criticize my plan but they don't offer any alternative."

And, as far as that is concerned, up to last Thursday that was true. Criticism of specific cuts was and is common, but no overall alternative budget strategy had been offered.

It seems to me that any alternate budget strategy, especially if it is offered by Democrats in the face of President Reagan's enormous popularity, cannot be just another plan. It must be based on a set of criteria that will appeal to the American public, and that the public will buy. It must make the deep cuts in Government spending that the American people obviously want. The cuts cannot spare the programs like food stamps and AFDC whose eligibility standards can certainly be tightened up without hurting the truly needy.

The alternative program must include many of the Stockman-Reagan cuts, the ones that commonsense dictates should have been made a long time ago. But other criteria must be met as well by any alternative plan. It must lay claim to being more fair than the President's plan. It must spread its cuts more evenly across the whole range of governmental expenditures. It must not roll back the social progress made in this Nation over several decades. It must assert that if the poor and the middle class are to suffer from budget austerity, that tax subsidies for corporations and wealthy Americans should also be closed. It must stress Government savings, making Government more efficient, as a way of cutting the budget.

It must be more realistic than the President's budget, and finally, it must be more fiscally responsible than the President's budget.

The alternative which I have offered for fiscal year 1982, I believe, meets all of those criteria. Let me emphasize again that it is not the Democratic alternative. It is a Democratic alternative only in the sense that it is surely an alternative, and I am a Democrat.

Essentially, it is my personal alternate budget developed solely by myself and my staff over the past 3 weeks. It is my personal response to President Reagan's challenge for Con-

gress to devise a better plan than his if it can.

Frankly, I believe that my plan is a better plan: Fairer, more evenhanded, more realistic, more fiscally responsible. And I intend to seek the support of my colleagues in the Congress.

Let me go over the highlights of the plan. First, it incorporates many of the spending cuts proposed by President Reagan, especially those designed to improve governmental efficiency. At the same time, it rejects some Reagan cuts, such as elimination of the Legal Services Corporation, as being too harsh on low-income Americans. It spreads the spending cuts more evenly across all activities of the Federal Government and picks up additional savings by further efforts to curb waste and mismanagement. It envisions Federal revenue of $712.4 billion in fiscal year 1982; Federal spending of $696 billion; and a budget surplus—I repeat, a budget surplus—of $10.5 billion for fiscal year 1982. It identifies $39.9 billion in spending cuts, virtually the same amount as the President has recommended to Congress. It identifies $11.8 billion in user fees such as President Reagan's proposal for Coast Guard services to lake and ocean ships. It further identifies $14.1 billion in tax subsidies that Congress should close as a way of balancing the Federal budget and bringing it into surplus.

Additionally, it makes provision for $20 billion in business and individual tax cuts. It envisions reform of depreciation schedules for business firms to encourage greater investment in productive machinery and equipment. It also allows for an increase in defense spending of $23.8 billion over fiscal year 1981 for a real growth rate of 3 percent. At the same time, it identifies $14.7 billion specifically in waste and mismanagement in the Department of Defense which, if eliminated, would permit an additional 7.7 percent real growth in defense spending.

Now, Mr. Speaker, I would like for a few minutes to address my Republican colleagues before I address other remarks to my Democratic colleagues. I know, from having served in the party of President Carter over the last 4 years, that there is a premium on loyalty to your President, and I know that loyalty is a virtue and that my Republican colleagues in the House certainly feel a high degree of loyalty to President Reagan and to his economic recovery program. At the same time, I know that my Republican colleagues have long been devoted to fiscal responsibility and it seems to me that they must be somewhat nervous about the economic recovery program of President Reagan.

Last year and the year before that and the year before that Republican colleagues time and again took the well of the House to talk to Democratic Members of the majority about deficit spending and their strong belief that deficit spending automatically produces inflation. Indeed, many Members on the Republican side told us that deficit spending by the Government is virtually the sole cause of inflation. It seems to me, then, that when we have a proposal before us which has a $45 billion deficit built into fiscal year 1982, that my Republican colleagues need to have some feelings of apprehension about that budget.

Last year, as my colleagues will remember, in June this House passed a first concurrent budget resolution which was in balance, indeed which had a very small surplus. Again, Republican Members of the House took to the well to complain bitterly that that was a phony balanced budget, that it was based on economic assumptions which had become outdated, that unemployment was higher than had been anticipated and, therefore, that Government revenue would be down and Government spending for programs like unemployment compensation, food stamps and welfare would be up. They called it a phony balanced budget and, indeed, they turned out to be right because in September and October, when we passed the second concurrent budget resolution, we did have revised economic assumptions about unemployment and we found to our distress that we had a substantial deficit in the Federal budget for this year.

Well, in that connection, if we were called upon by our Republican colleagues to be realistic last year in looking at the economic assumptions so as not to fool ourselves about any talk about balanced budgets, I think it is only fair and important and necessary that we do the same thing this year, that they maintain their obligation to be realistic about the economic assumptions on which the budget of President Reagan is based. They ought to read the testimony of a dozen economists or more who have appeared before the House Ways and Means Committee and the House Budget Committee over the past 3 weeks. The economists who could be described as basically conservative and who are generally supportive of President Reagan's program say in general that the underlying economic assumptions on which that budget is based, assumptions about the unemployment rate, the inflation rate, the growth rate of the gross national product and interest rates, that those assumptions are at the far end of the range of what could happen in fiscal year 1982.

They say that perhaps the odds are 1 in 4 that the scenario will turn out the way the President hopes that it will, but at least, they say, the projections on which the budget is based are within the range of what could happen.

But the economists who are not so basically friendly toward the Reagan budget, who could be described as more moderate or more liberal, say that the projections, the assumptions on which the budget of President Reagan for fiscal year 1982 are off the top of the range of what could happen, beyond the realm of real possibility. That means, of course, that if they turn out to be right, that we will have higher inflation or higher interest rates or higher unemployment or a lower growth in the gross national product than the President has projected.

□ 1300

If that happens, it will impact on his budget in a way that will only serve to increase the $45 billion deficit beyond his assumptions.

The Congressional Budget Office—and some of my colleagues have said this today in 1-minute speeches—reports on the front page of the Washington Post today that its economists say that already President Reagan's economic assumptions are off the track and that the deficit for fiscal year 1982 will be at least $20 billion to $25 billion higher than the $45 billion which President Reagan has suggested. So that means we could be looking at a deficit in fiscal year 1982 of $65 billion to $70 billion or even higher.

I again remind my Republican colleagues to go back and look at their statements from 1980 during the budget process about the inflationary effects of any budget deficit at all, much less a budget deficit which would be a near record budget deficit in the entire history of the United States. I would also ask my Republican colleagues to look at the nature of the spending cuts that were contained and are contained in President Reagan's program for economic recovery. He has talked about budget cuts of $48 billion, and that is what the newspapers have picked up, but actually what he is talking about is budget cuts from the budget proposed by President Carter in January of this year. Of course, President Carter had proposed some increases in spending. Actual cuts from how the current law would impact on the budget is not $48 billion but rather something like $40 billion. I think it is on page 5 of the budget book that the President distributed to us last week where he does state that the budget cuts from the current services budget of the Federal Government, which is the normal way of looking at it, are $40 billion and not $48 billion.

I would also call the attention of my colleagues on the Republican side to the figures in the President's budget regarding interest costs to the Federal Government for support of debt service on the Federal debt. The President

has said that because he has faith that all of his projections in the economy will come true, interest rates will go way down in the next several months and, as a result, the cost of interest to the Federal Government in fiscal year 1982 will be in the neighborhood of $81 billion.

But President Carter projected that those costs would be over $89 billion, and the Congressional Budget Office makes the same assumptions about next year. So that would mean that the President's figures on budget costs, just one item, would be off in the range of $8 billion for next year.

Then because I know my Republican colleagues are concerned about fiscal responsibility, I would direct their attention to the proposed Kemp-Roth 10-percent across-the-board tax cuts which are contained in the President's recommended program. Because the President is a dedicated supply-side person, he believes that if you cut taxes across the board the people who receive that additional money will put it in the bank and save it and that the banks will have more money to loan, and that industry will borrow that money and will put it into new machinery and equipment and become more efficient, and as a result we will have a more productive economy which ultimately 3 or 4 years down the road will bring in more revenue.

We all hope and wish that that could be the case, but again I would direct the attention of my colleagues to the testimony of any number of economists, conservative, liberal, moderate—all over the spectrum—who have appeared before the House Committee on Ways and Means over the last 3 weeks and have said almost to a person that a tax cut of the Kemp-Roth kind would be an incentive to demand, and, therefore, inflationary rather than anti-inflationary.

So a key part of the President's program, indeed a part which contributes a great deal to the $45 billion deficit which the President has projected, would tend to fuel inflation rather than fight inflation. I think all of us here in Congress have an obligation to be realistic, to do not only what we would like to do and to work on the basis not only of what we would hope might come true but what we actually think will come true and what a whole range of economic experts tell us is the case about the effect of the Kemp-Roth tax cut.

This sounds strange coming from a Democrat, but it seems to me that this is a time for conservation and caution regarding the Federal budget and deficits.

Apropos of that, I want to go back again and mention to my Republican friends the alternative budget which I proposed last Thursday. My approach makes the cuts almost the same dollar amount of cuts which President Reagan's budget makes—$40 billion. I think it is important that that happen. It picks up additional revenue by increasing some user fees of the kind that President Reagan proposed. It also picks up additional revenue by closing some tax subsidies off. It allows for 3-percent real growth in defense spending, which I know is important to my Republican colleagues. It holds the tax cut for the next year for individuals and for business to a more responsible and less inflationary $20 billion.

The end result of all of that is that the budget calls for a budget surplus, not a deficit—a surplus in fiscal year 1982 of $10.8 billion. In think if we are trying to send messages to the American people that Congress at long last is serious about fighting inflation and reducing Government spending, that this is the way to do it, to say we are not going to have a big deficit next year.

Whether it is $45 billion or $65 billion or $70 billion, we need to say that we are going to work to balance the budget for fiscal year 1982 and, of course that would be entirely consistent with what President Reagan told us early last year that he would do if he were elected President.

If I may, I would like to turn my attention to my Democratic colleagues and talk to them for a little while. One reason why the Democratic Party is now a minority party in the U.S. Senate, and one reason why President Reagan rather than Mr. Carter is President today, is, I think, that the Democratic Party over the last 10 years has allowed itself to gain the image with the public of not being fiscally responsible. We have been criticized by our Republican colleagues for our actions over the years. We have allowed that criticism to appear to be valid, and so this year as the Democratic majority in the House of Representatives works its will on the President's budget proposals, the public will fully expect us to scale back the spending cuts.

They will expect us to jump on the tax cut bandwagon, and they will expect us, if anything, to add to the deficit rather than to cut it down. If we change President Reagan's plan in any material way, the President will make the charge that we have sabotaged him, and if the economy does not pick up in the next 1½ or 2 years, it is because the Democrats sabotaged his program.

It could be a no-win situation. If we Democrats are to do what we think is responsible, and if we are to save ourselves politically by putting ourselves in a position that the American public will applaud rather than condemn what we do, it seems to me that our only course of action is to be more fiscally responsible than the President. We must cut the Federal budget and Federal spending by $40 billion, just like President Reagan has proposed to do.

We can use some different priorities than the President, and I think we should use some different priorities, but we must reach the same spending cut figure as the President.

It seems to me that we also must be willing to make changes in social programs. We must be able and willing to cut back on ADC, food stamps, and housing programs in areas where there have not been very tight controls and where there is some spending going on which is really not justifiable.

Another reason for our trouble as a party, as the Democratic Party, now is the image Americans have gained over the past several years that we as Democrats lack the discipline to put in controls and to rein in the spending on social programs that we have instituted. We can no longer afford to maintain that image.

Third, we must give President Reagan and Budget Director Stockman their due. We must give them credit for having done the Nation and the Congress a real service by identifying a number of spending cuts that can and should be made without hurting the truly needy. Then it seems to me we must go beyond the President in finding even more examples of waste and inefficiency as a way of cutting down on Federal spending.

We must prove to the American people that the Republican Party has no monopoly on ability to find fraud and waste and eliminate it in the Federal Government. If we are to be true to ourselves as Democrats, we must close off some of the tax subsidies which benefit primarily corporations and wealthy Americans if at the same time we are going to go along with spending cuts that hurt moderate- and low-income Americans. We must provide for defense, for it seems to me that there is a consensus in the country that we need to bolster our national defense. That does not mean, however, that we have to go the whole way with the President's recommendations.

In my view, then, we as Democrats must be more fiscally responsible than the President. Not only should we not increase the deficit that he proposes, we ought to eliminate the deficit that he proposes, and I think that we can do that. We must show to the American people that we are serious about being responsible in fiscal matters. We must show to the American people that there is a new Democratic Party that is willing to impose discipline on Federal spending at the same time that we maintain our compassion for less fortunate Americans.

We must be able to devise a bumper sticker which says, "Democrats do it better."

Now let me turn to some specific things.

Mr. SEIBERLING. Will my colleague yield?

Mr. PEASE. I would be happy to yield to my distinguished colleague from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding. I want to commend the gentleman from Ohio for what I consider to be a tremendous public service. I certainly agree with him that the American people want to see an end to runaway spending. They want to see us review the tremendous mountain of Federal programs that have been created over the last 30 years, often without regard to the combined effect of them on our economy. They want to see us review those and start to establish some priorities and eliminate the nonessentials from the essentials.

The difficulty I have had with the Reagan budget is that I feel that some of the things in it go beyond merely trying to incorporate a more fiscally responsible stance to our budget nationally and are using the budget process to try to achieve ideological objectives to reverse some of the programs that are embodied in permanent legislation that has been very carefully worked out, that millions of Americans want, that represent a true consensus, and to try to do what I do not believe the President had a mandate to do—to make some radical changes in the nature of the role of the Federal Government in accomplishing the objectives of the Nation.

I think that the gentleman from Ohio has done in his usual scholarly objective way a great service to the Congress and to the people by showing that we can achieve the objective of curbing runaway spending and getting our budget under control without ideological overtones, that we can protect the vital interests of the American people in their public health programs, in their welfare safety net programs, in protecting our natural and our built-in heritage, protecting our environment, and still achieve the kind of changes that are necessary in terms of curbing unnecessary regulation, curbing unnecessary spending, and getting this under control.

I would like to ask the gentleman, though, whether he agrees with me that while this objective must be achieved, that unless we can somehow get the Federal Reserve Board to recognize that the Congress is taking the kind of steps for fiscal restraint that it feels are necessary to fight inflation, that unless we can get the Federal Reserve Board to recognize that, they are going to continue to try to fight inflation in their way, which is basically tight money.

The irony is that that is the thing that is destroying the homebuilding industry, crippling the auto industry, and causing tremendous dislocations in the supply industries like the steel industry, the rubber industry, and others. We must try to get across to the Fed that we expect them to match our fiscal restraint with a little restraint on their part; otherwise our efforts are not going to achieve the results that must be achieved because it is the tremendous activities in the private financial sector such as the money market security sector that are feeding inflation just as much as Government spending, and unless we can somehow get the message across to the Fed that they need to focus on that type of control, and unless we can get some targeting of Federal investment incentives, we are not going to achieve the results, no matter which budget is adopted—the Reagan budget, the Pease budget, or something in between.

□ 1320

I would be happy to have the gentleman's comments, but let me again say what an outstanding job the gentleman has done and I certainly support what my colleague has tried to do and hope that a lot of my other colleagues will do the same.

Mr. PEASE. First of all, let me thank my colleague for his generous comments. I would then say that I could not agree with the gentleman more about the Federal Reserve Board.

Personally, I think that the Federal Reserve Board would be more than happy to cooperate if they received even a modest sign from Congress that we are ready to do our part in fiscal restraint.

The Federal Reserve Board, as you well know, has always tried to be a counterfoil to the fiscal policies of the Congress. When we have adopted fiscal policies which have been expansionary, the Federal Reserve Board has gone for monetary policies which are restrictive.

The Federal Reserve Board is very, very sensitive to the size of the Federal deficit and it seems to me that if we adopt this year pursuant to President Reagan's proposal a Federal deficit of $45 billion, that is a signal to the Federal Reserve Board to keep the tight money controls on and to keep interest rates high, and that will continue to cripple the real estate industry, the building industry, the auto industry, and many, many small businesses who rely on borrowed money to finance their inventory.

If the deficit turns out not to be $45 billion, as the President optimistically hopes, but rather $65 billion or $70 billion or more, as CBO seems to think, then we will see a supertight monetary policy imposed by the Federal Reserve Board and superhigh interest rates, and we will all suffer as a result.

I thank my colleague for his very excellent contribution.

Mr. SEIBERLING. If the gentleman will yield further, the gist of the gentleman's approach is that if we balance the budget as the gentleman's budget does, then we would send a message to the Fed, and deprive them of the rationale under which they have kept interest rates high and the money supply curbed. It seems to me that the gentleman's approach is far more responsible fiscally than the approach that we received from the White House.

Mr. PEASE. I thank the gentleman. That is certainly correct. A balanced budget would send exactly the right signal to the Federal Reserve Board.

Let me talk now for a minute or so about tax cuts.

We have had proposals this year for taxes both on the business side and for individuals. I think there is general agreement in the Congress that there is a need to adopt some tax cuts for business firms this year, particularly in relation to some simplification and reform of depreciation schedules, maybe not the so-called 10-5-3 plan in its pure form, but certainly some variation of that.

It is the job of the Ways and Means Committee over the next couple of months to hear the witnesses, to look at the effects of the proposed 10-5-3 and to make any modifications that appear to be prudent. But we can do that. I think it is important that we do have some change in depreciation schedules so that we can send a message to American business that we want them to take advantage of that and we want them to buy new machinery and make our factories more productive than they are now.

I would point out that the business tax cuts come as close as anything can to fitting the supply-side theory of economics by which the President is going this year. And that is that, obviously, the businessmen do not get the depreciation tax breaks, they do not get the tax credits, unless they do buy machinery which will make their production more efficient.

Now when you look at the individual tax cuts, it is clear that tax cuts for individuals are justified on grounds of equity. We have all experienced a bracket creep in the last couple years, and we know it is costing Americans more money for taxes even though their wages may go up only enough to keep up with the cost of living.

President Reagan has proposed $44 billion in tax cuts through his Kemp-Roth 10-percent across-the-board cut.

I think some questions need to be asked about the wisdom of doing that despite the agreement we all have that some changes, some reductions on the basis of equity, are in order.

President Reagan has proposed to us a $44 billion individual tax cut. He has proposed a $45 billion Federal deficit for next year. It is crystal clear from looking at that budget that the President plans to go out and borrow $45 billion so that he can give a $44 billion tax cut, and that I submit may well be inflationary.

Questions have also been raised about the basic fairness of the Kemp-Roth approach, whether high-income people get a much higher reduction percentagewise effectively than do lower- and moderate-income people. I think the statistics bear that out pretty well.

I do not want to dwell on that, it just seems to me Congress needs to look at that pretty carefully.

But then I really think we need to concentrate on the inflationary aspects of a large individual tax cut which is financed with more borrowed money.

Obviously we are concerned about inflation and if the Kemp-Roth approach is inflationary rather than deflationary, it is a very serious matter. Now, I ask the question, will the public forego a tax cut so the Democrats can avoid cuts in Federal spending for social programs? The answer, it seems to me, is clearly "No". The public is not willing to give up tax cuts just so Democrats can continually spend on social programs for the low-income people of our country.

I ask another question: Will the public forego a tax cut to fight inflation? There, it seems to me, the answer is different. National polls taken over the last couple of months have consistently shown that the American public is more concerned about inflation than about tax cuts.

Naturally, people would like to have tax cuts. But they are smart enough to know that they are better off with lower inflation. They would be willing to forego tax cuts, so say the national polls, if it meant a contribution to fighting inflation.

□ 1330

It seems to me that the key is a balanced budget such as the one that I have proposed so that the public can see that it is getting something for what tax relief it is foregoing. Without the dramatic switch from a big deficit to an actually balanced budget, I think the public will have a hard time understanding what they have gained at the expense of foregoing part of their tax cut.

Now, what about national defense? The public, to my way of thinking and looking at polls, clearly wants more money for defense. They are concerned about the Soviets and the buildup of the Soviet arms establishment. I think there are some mixed feelings about it, but in general that would be the case. But I question whether the public expects to get a big increase in defense spending without paying for it.

Back in the 1967-68 era, President Johnson was embroiled with the Vietnam war. He did not want to ask the American public to pay higher taxes, but he did want to have a big increase in defense spending because of that build up in Vietnam. So, essentially, he financed the Vietnam war with borrowed money rather than having the fortitude to go to the American people and ask them to pay in the form of higher taxes for the increased defense spending. Many, many economists trace the high, underlying inflation rate with which we are inflicted now to that decision by President Johnson back in 1967-68, to try to have his cake and eat it, too.

We do not want to make that mistake again. I think the American public is plenty smart enough to understand that you do not get something for nothing, and that we can not have a big increase in defense spending unless we are willing to pay for it.

Now, I am also very confident that the public does not want to give a blank check to the Defense Department, to say: "Yes; we are so concerned about defense that the Defense Department can spend any amount of money it wants on anything and we will not ask questions." I am sure that the public does not want that. We have to be willing in the Congress to apply the same standards of money savings, of avoiding waste and fraud, in the Defense Department as we do in any other department of Government.

What my budget does is to provide a $23.8 billion increase for defense from fiscal year 1981 to fiscal year 1982. That is a 3-percent growth in real dollars. It is the only function out of 15 in the Federal Government that I do not cut.

What I also do in my budget is to identify $14.7 billion in waste and mismanagement in the Defense Department, to identify those examples which are set forth by the General Accounting Office, the Congressional Budget Office, the National Tax Limitation Committee, and the Republican task force from last year, and essentially to say to the Defense Department: "If you want to grow in your defense strength faster than 3 percent a year, that is fine. You can grow at the rate of 10 percent a year as long as you are willing to root out this waste and mismanagement which we have identified for you." I believe that that is an approach which makes sense and which the American people will buy.

Now, finally, I want to mention tax subsidies. President Reagan's tax cuts, as has been reported in the newspapers, tend to favor business corporations and high-income Americans. I do not quarrel with that too much because it is his theory that those are the people who will make the so-called supply-side economics work, who will save the money, who will make our country more productive. But it is true that the tax cuts tend to favor wealthy Americans and corporations most. It seems to me that if we are going to do that, we have to be willing at the same time to close off some of the tax subsidies which given overwhelming benefits to the wealthy and very, very few benefits to the poor.

Now, I am aware that one person's tax subsidy or loophole is another person's fair and necessary provision. I would point out that the tax subsidies, 200 billion dollars' worth every year, that are in the Federal Tax Code now were all enacted by the Congress at some point in the past for a purpose that Congress thought at that time was a worthy and good purpose. All I am suggesting is that some of those tax subsidies which have been in the Federal tax code for years and years may no longer be necessary, may no longer meet the same test of fairness and equity, and that if we review those tax subsidies, we can find some which we can eliminate as a way of contributing to balancing the Federal budget.

Now, I would like to give just one example, before I finish, of a tax subsidy which I think actually works against what we are trying to do now in our Federal budgetary process.

Interest which consumers pay on consumer loans is a deductible expense for those Americans who are able to deduct their expenses and use the long form on their income tax returns. What that does essentially is to encourage people to borrow money for consumer purposes because they can deduct the interest, especially if they are high-income Americans in the 50-percent to 70-percent tax bracket. That means that even if they have a lot of money in the bank and they need to buy a new car or whatever, there is an incentive for them not to take the money out of the bank but to go and borrow the money because they can deduct 50 to 70 percent of everything they pay in interest from their Federal income taxes.

Now, I did a little checking on that. If we look at the subsidy only for those Americans who deduct more than $1,500 a year in consumer interest—this is not home mortgage interest; this is consumer loan interest—in order to have $1,500 or more than $1,500 in interest every year that you could use as a deduction, you would have to have over $10,000 in consumer loans out for that year. I do not think there are very many average Americans who have more than $10,000 in consumer loans out if you do not take into consideration at all their mortgage interest.

If you put a cap and said nobody can deduct more than $1,500 on consumer

interest, closing that one tax subsidy alone would bring into the Federal Treasury $4.5 billion. So it is apparent that a tiny handful of Americans who are in the very highest tax brackets are using the Federal Tax Code to their advantage at a cost to the rest of us of $4.5 billion, $4.5 billion which we could use to help balance the Federal budget and help to fight inflation.

Now, Mr. Speaker, I know that my time is almost up. I would like to thank you and all of my colleagues for your indulgence. I think, as I said at the beginning, that all of us, Democrats and Republicans alike, have an obligation to try to bring Federal spending under control, to try to show the Federal Reserve Board and the American people that we are serious about fighting inflation at long last.

It seems to me that President Reagan has made some suggestions, many of which are helpful, but that he has no monopoly on budgetary wisdom, that others of us have not only a right but indeed an obligation to make our suggestions as well.

So I have done that. I have put together this alternative budget which does call for a Federal surplus of $10.8 billion instead of a deficit. I offer it not on partisan grounds, not to make the President look bad, not to claim that Democrats have all the wisdom. This is my own plan. But I think it does have some sound features to it and I hope that my colleagues will be interested in getting more information from me about it.

I yield back the balance of my time.

HEARINGS ON EXTENSION OF BENEFIT REIMBURSEMENT PERIOD FOR REFUGEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI), is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Refugees, and International Law of the Committee on the Judiciary will hold 1 day of public hearing on Tuesday, March 24, 1981, to consider H.R. 2142. The hearing will be held in room 2237 of the Rayburn House Office Building and will commence at 9:30 a.m.

This bill would delay from April 1, 1981, until October 1, 1982, the termination of full Federal reimbursement of the costs of providing cash assistance, medical assistance, and child welfare services to refugees who have been in the United States for more than 3 years.

Invitations to testify have been extended to officials from the Department of Health and Human Services, the State of California, and representatives of the National Association of Counties. Members of Congress who wish to testify before the subcommittee on the aforementioned date should address their requests to the subcommittee, room 2137, Rayburn Building (Phone No. 225-5727).●

THE DEMOCRATIC PARTY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK), is recognized for 5 minutes.

● Mr. FRANK. Mr. Speaker, on Thursday, March 12, the Speaker of the House, THOMAS P. O'NEILL, JR., addressed the dinner of the Massachusetts Democratic State Committee. His speech was a thoughtful, eloquent appraisal of the historic mission of the Democratic Party in the context of today's challenges and opportunities.

The reaction to the Speaker's remarks from those at the dinner was extremely enthusiastic, precisely because it so forcefully addressed the question of what the Democratic Party's role ought to be in the coming years.

I think it is important for others in the Congress and in the country to have the benefit of the Speaker's views on this matter and I include his speech at this point in my remarks:

ADDRESS BY MR. O'NEILL

For over 50 years, with brief exceptions, the Democratic Party has been the first choice of the American people to be the principal governing party of this Nation. When in the past we have lost, it was not because our supporters joined the opposition, it was because our supporters believed we had lost touch with their concerns and were not governing well.

The reason that we were the first choice of the American people in national elections for the past 50 years was that F. D. R. made the Federal Government responsible for guaranteeing a decent standard of living for every American. He committed the Federal Government to the proposition that "Liberty requires an opportunity to make a living * * * a living which gives a man not only enough to live by, but something to live for." On the eve of the Depression in 1929, one-half of all Americans lived near or below the poverty level. Today less than 7 percent live below the poverty level.

During the past half century we have dramatically improved the opportunities for educational achievement, homeownership, financial independence, and access to higher income through the collective-bargaining process. America's vast middle class was largely formed during this period. As Democrats we sought not big government, but active government—a government that sought equality of opportunity for all, and basic minimum living standards for the less fortunate among us.

Because of our inability to reduce inflation between 1978 and 1980, as well as the most unfortunate and avoidable increase in unemployment in 1980, we suffered a major defeat at the polls. In fact, it was our worst setback since 1952. Too many Americans, including many members of our own party, felt that inflation was reducing their standard of living and that the economy offered no prospects for improvement in the future.

As a party we paid the price of not heeding Harry Truman's warning that "the Government has a clearcut responsibility to deal with high prices". Consequently, we lost the White House, the Senate, and 33 seats in the House of Representatives.

Two weeks ago I addressed the Democratic National Committee and warned them that unless we rebuild our party machinery and fund our candidates adequately, 1982 could be a realining election for the Republicans—as 1932 was for the Democrats. We cannot expect Democrats to compete when the Republican Campaign Committees outspend Democratic Campaign Committees $109 million to $18 million—as happened in 1980.

But rebuilding our party apparatus, promoting new ideas, and modernizing our fundraising techniques so that we can compete with the Republicans is not the only challenge we face. We must also come to terms with our role in governing this Nation when we control the House of Representatives, but not the White House or the Senate.

The Democrats in the House have pledged not to obstruct or unnecessarily delay consideration of the new President's programs. We recognize that the President is first among equals in our constitutional structure, that the American people look to him to propose programs, and furthermore, that there is considerable sentiment among the American people the Government deficits are too large and that growth in Government spending is responsible to a large degree for inflation.

We do not, however, intend to abandon our responsibility to carefully scrutinize the President's tax and budget proposals. George Will, a conservative columnist and occasional Reagan adviser, observed that 20 percent of Reagan's mandate reflected support for conservatism, and 80 percent for an improved economy.

The fact of the matter is that the Congress of the United States cannot be expected to approve legislation on expectations alone. We must examine the Reagan proposals openly and candidly and with an accepted goal of reducing inflation. But we cannot support his programs at the expense of the poor, the aged, and the handicapped.

Should we be expected to rubberstamp a Reagan tax program that calls for giving a tax cut 23 times greater to a family making $100,000 a year than to a family making $10,000 a year? I do not believe we should.

Should we be expected to rubberstamp Reagan budget cuts that eliminate fuel assistance to the poor, that severely cut child nutrition and school lunch programs while taking a token cut out of tobacco subsidies for JESSE HELMS' constituents? I do not believe we should.

Should we be expected to rubberstamp a defense budget that calls for spending $1.3 trillion on defense over the next 5 years while the Pentagon leases computers in Cleveland for $1 billion a year that they could have purchased for $200,000? I do not believe we should.

Should we be expected to rubberstamp a Reagan budget proposal for a twentyfold increase in military and economic aid to El Salvador in 1982? I do not believe we should.

Should we be expected to rubberstamp an increase in funds for the Federal Tourism Bureau when we are eliminating the National Consumer Cooperative Bank? I do not believe we should.

My colleague in the Senate, HOWARD BAKER, has stated that these massive budget cuts will be approved in the Senate with "breakneck speed." In the House we intend

to proceed swiftly but deliberately, decisively but fairly. We intend to give opponents as well as proponents an opportunity to be heard before our committees.

The American people want Ronald Reagan to succeed and they want a robust, inflation-free economy. For the second time in our Nation's history two decades have passed without a single President completing two terms. The media and Members of Congress are aware of this and do not wish to further weaken the Presidency. Consequently, criticism has been muted from these quarters and the President has got off to a very successful start in office.

However, our real hope for a successful Presidency should not deter us from taking action that protects the poor and needy of this country from unnecessary hardship. We must consider the advisability of a tax plan that, according to Robert Kaiser of the Washington Post, will "redistribute income in this country. The money would go from poor to rich while the middle class would come out about even."

Recalling President Kennedy's words that "the Federal budget can and should be made an instrument for prosperity and stability" we recognize that the budget process is an essential tool in guiding our economy and we have a firm timetable to guide that process.

As we follow this process we as Democrats should not forget the words from the last speech of Hubert Humphrey who said in 1977 that:

"The moral test of government is how it treats those who are in the dawn of life, the children; those who are in the twilight of life, the aged; and those who are in the shadows of life, the sick, the needy and the handicapped."

As we look back at 1980 we ask, what did happen? The legislation was good but there was too much bureaucracy. There was overregulation. There was too much redtape and in many cases there was an inability to manage.

In preparing for 1982 we must get back to the basic issues that have united Democrats over the years; adequate health care, educational opportunity for all, adequate nutrition for the poor, the aged, and providing an economy that offers employment for all.●

FEDERAL FINANCING BANK SHOULD BE "ON BUDGET"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BLANCHARD) is recognized for 5 minutes.

● Mr. BLANCHARD. Mr. Speaker, I am today introducing legislation to place the Federal Financing Bank (FFB) activity of the Federal Government "on budget." This is a very simple bill merely requiring that the receipts and disbursements of the FFB be included in the Federal budget.

The FFB was created in 1973 to assure that Federal borrowing was financed in a manner least disruptive to private financial markets and institutions. In recent years, the FFB, which is heavily involved in Treasury borrowing, has been accused of "crowding out" a significant amount of private borrowing. This condition has arisen as a result of FFB conversion of guaranteed loans into what are in fact direct loans by the Government. In practice, the FFB has been successful in helping reduce the cost of Federal borrowing, but many believe it has not always operated in the manner the Congress expected or intended when the Bank was created.

Mr. Speaker, I do not hold the opinion that the FFB has been less than successful in its mandate to coordinate Federal and federally assisted borrowing programs with the overall economic and fiscal policies of the Government. I believe that allegation must be determined through hard study and assessment of the FFB. For that reason, the House Banking Subcommittee on Economic Stabilization, of which I am chairman, will conduct extensive hearings on the effect of Federal policies on the private credit market.

While we need to closely review the Federal Government's activities in the credit market, we must also realize the Government's role in allocating credit through other means. Our review of Federal credit allocation policy will not be limited to the role of the Federal Financing Bank or activities of the Government in the area of loan guarantees.

We will undertake a more comprehensive review of the Federal Government's credit allocation role in tax policy, spending policy, and Federal Reserve policy. The fact is, off budget credit programs such as those performed by the Federal Financing Bank are only one way that the Federal Government impacts on the credit market. The Government also has an impact through our tax system which is currently being suggested as the mechanism for stimulating greater investment and savings, through direct Federal spending programs which target dollars into particular programs and projects, and finally through the Federal Reserve Board which has tended to allocate credit to the speculative sector of our economy and away from the productive sector, albeit unintentionally as a result of high interest rates.

Only if we undertake a comprehensive review of the Federal Government's role in the credit market will we be in a position to make decisions about where that role is effective or where it should be curtailed.

H.R. 2566

A bill to amend the Federal Financing Bank Act of 1973 to require that the receipts and disbursements of the Federal Financing Bank be included in the Federal budget, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Financing Bank Act Amendments of 1981".

BUDGET TOTALS

SEC. 2. (a) The second sentence of section 11(c) of the Federal Financing Bank Act of 1973 (12 U.S.C. 2290(c)) is amended to read as follows: "The receipts and disbursements of the Bank in the discharge of its functions shall be included in the totals of the budget of the United States Government.".

(b)(1) Section 6(a) of the Federal Financing Bank Act of 1973 (12 U.S.C. 2285(a)) is amended to read as follows:

"(a)(1) Subject to paragraph (3)—

"(A) the Bank is authorized to make commitments to purchase and sell, and to purchase and sell, any obligation which is issued, sold, or guaranteed by a Federal agency; and

"(B) the Bank shall make commitments to purchase, and shall purchase, any obligation offered to it—

"(i) which is guaranteed by a Federal agency;

"(ii) which has not previously been issued or sold to any person or governmental entity; and

"(iii) in any case in which the guarantee with respect to such obligation would cease to be effective, pursuant to subsection (d), if such obligation were held by any person or governmental entity (other than such agency or the Bank).

"(2) Subject to paragraph (3), any Federal agency which is authorized to issue, sell, or guarantee any obligation is authorized to issue or sell such obligation directly to the Bank.

"(3) The Bank may, during any fiscal year, purchase and make commitments to purchase obligations only to such extent as may be provided in advance in appropriations Acts.

"(4) Commitments, purchases, and sales by the Bank pursuant to this subsection shall be on such terms and conditions as the Bank may determine.".

(2) Section 6 of the Federal Financing Bank Act of 1973 (12 U.S.C. 2285) is amended by adding at the end thereof the following new subsection:

"(d)(1) Except as provided in paragraph (2), any guarantee by a Federal agency of an obligation shall be subject to the condition that if such obligation is held by any person or governmental entity, other than such agency or the Bank, such guarantee shall thereafter cease to be effective.

"(2) Paragraph (1) shall not apply in the case of any obligation—

"(A) which the Secretary of the Treasury determines is of a type which is not ordinarily bought and sold in the same markets as investment securities, as defined in the seventh paragraph of section 5136 of the Revised Statutes (12 U.S.C. 24); or

"(B) which is issued or sold by the Bank.

"(3) Before making any determination under paragraph (2)(A), the Secretary of the Treasury shall consult with the Director of the Office of Management and Budget, the Comptroller of the Currency, and the Chairman of the Board of Governors of the Federal Reserve System.".

(3) Section 17 of the Federal Financing Bank Act of 1973 (12 U.S.C. 2295) is amended by striking out "Nothing in this Act shall be construed as impairing" and inserting in lieu thereof "Except as provided in section 6, nothing in this Act shall be construed as affecting".

EFFECTIVE DATE

SEC. 3. The amendments made by section 2 shall take effect on the first day of the first fiscal year which begins after the date of

the enactment of this Act, except that the amendments made by section 2(b) shall apply only in the case of an obligation with respect to which a guarantee is made or renewed by a Federal agency on or after such date.●

THE RETIREMENT INCENTIVE SAVINGS ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, the inadequate level of personal savings in this country is undermining our efforts to restore the basic health and vitality of the economy. Inadequate personal savings rates are contributing to increased inflation, decreasing productivity, and economic stagnation. Lower personal savings exacerbate conditions within the thrift industry and further depress an already decimated housing industry by drying up mortgage funds.

During most of the post-World War II period, the personal savings rate averaged more than 7 percent of disposable income. In the late 1970's, that rate steadily declined; and in 1980, the rate was 5.6 percent for the year as a whole.

From an international viewpoint, those figures are even more distressing. Japan enjoys a savings rate of 20 percent; West Germany and France save at the rate of 14 percent; Belgium saves at the rate of 13 percent; and our neighbor to the north saves at a rate of 12 percent. It is no coincidence that all of those countries have experienced much healthier productivity growth rates than this country. It's also no coincidence that all of those countries have much more meaningful and substantive incentives for personal savings than does this country.

During the 96th Congress, two steps were taken to correct this lamentable and alarming situation. First, as part of the Windfall Profit Tax Act, a $200—$400 in the case of a joint return—annual exclusion from taxation was extended to interest and dividend income. Second, the Depository Institutions Deregulatory Act substantially deregulated the banking industry, allowing it to offer a wider assortment of savings plans to individuals in savings. Although those were positive steps, I believe that much more can and should be done to offer more significant incentives to small savers.

Therefore I am today introducing the Retirement Incentive Savings Act of 1981. This bill would liberalize and expand individual retirement account (IRA) eligibility and benefits, which has been long overdue. The IRA-type approach encourages and rewards regular incremental savings, rather than past accumulations of saving. Each year, the amount eligible for investment in an IRA is tax deductible and earnings are tax deferred. Furthermore, withdrawals are discouraged except under clearly specified circumstances. As a result, this approach tends to stimulate new saving that would not be otherwise undertaken.

But there are severe problems in IRA's under existing law. The existing limits on contributions to these accounts were established in 1974, and the rampant rate of inflation has made a mockery of those limits and qualifications.

The IRA approach is important for two reasons. First, it provides individuals with a means to provide in advance for their retirement years, so that they can be financially independent and have a decent standard of living. Second, deposits in IRA's are long term in nature, thereby supplying financial institutions with a more stable supply of capital. That second feature is particularly crucial for the thrift industry, which has experienced record disintermediation and unprecedented earnings pressure. This would in turn be beneficial for the housing industry which has been wracked by high interest rates and shortages of mortgage moneys. For example, in 1980, IRA-Keogh balances at mutual savings banks increased by an estimated $500 million, contrasting with a net loss of $5.3 billion in other savings and time deposits in the same period.

The Retirement Incentive Savings Act would expand IRA eligibility in three effective ways, all of which will help enhance the attractiveness of these savings instruments.

First, it will increase the maximum allowable deductible contribution to an IRA from $1,500 per year under existing law to $2,000 per year. The $1,500 cap is simply insufficient for an individual to prepare for his or her retirement years, and it should be dramatically increased. A 33-percent increase may appear to be excessive, unless one remembers that the existing cap is 7 years old and that 7-year period has seen inflation increase by 53.5 percent. Hence, the $2,000 does not even keep pace with inflation.

Second, it will permit the use of IRA's by those individuals who actively participate in qualified employer-sponsored pension plans. Under present law, a person who is enrolled in a pension plan cannot open an IRA account. This bill would allow IRA's under such circumstances, but it would place a cap on the IRA contributions at $1,000 per year. This would allow individuals to supplement their pension plan income during their retirement years.

Third, it will permit an IRA enrollee to make an additional voluntary nondeductible contribution to the IRA, and the cap on this additional nondeductible contribution would be $2,000 per year. Thereby, all taxes would be deferred on earnings from all funds contributed to the IRA, which would enhance the attractiveness of savings placed in an IRA. This provision is similar to existing law concerning corporate pension plans.

Mr. Speaker, this bill would provide strong incentives for real savings by individuals, and I shall make every effort to include this bill or similar approaches in the omnibus tax bill expected to pass in 1981.●

TIE MX TO SALT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, I am introducing today a resolution calling for a halt to further development of the MX/MPS basing mode until a binding limit can be placed on Soviet MIRV'ed ICBM's and warheads.

It is well-known that escalating costs and environmental opposition are disrupting current MX plans. In the absence of SALT II, however, the most telling argument against the MX may be its strategic vulnerability. The fundamental mission of the MX is to assure a credible force of survivable American ICBM's. This mission is futile if the Soviets continue to acquire ICBM launchers with greater numbers of independently targeted warheads. Without a limit on MIRV'ed ICBM's, the Soviets can inevitably make the MX vulnerable to a first-strike attack.

The 1979 SALT II Treaty provided such limits. Article IV, paragraph 11 established the maximum number of MIRV'ed ICBM warheads at 10. Article V, paragraph 3 limited the number of MIRV'ed ICBM launchers to 820. The current base system of 200 MX missiles and 4,600 shelters is premised on the Soviet Union not exceeding these limits.

Without SALT II, the Soviets can increase the destructiveness of their largest missile, the huge SS-18, which can carry an overall throwweight of 16,000 pounds. By contrast, our largest missile, the MX, is designed to carry a throwweight of only 7,500 pounds. As a result of this size difference, the Soviets can place up to 30 warheads on the SS-18, while we will be limited to a maximum of 10 warheads per/MX missile. By proceeding with the current MX deployment scheme in the absence of a SALT limitation, we are inviting a futile—and from our side losing—arms race with the Soviets.

Air Force Gen. David C. Jones, Chairman of the Joint Chiefs of Staff, recognized this danger very early in the SALT II hearings. In July 1979, General Jones testified not only that the "fractionation cap" of 10 warheads per launcher was essential to the MX,

but that it was the most important treaty provision for inhibiting Soviet weapons programs.

In his annual Defense Department report for fiscal year 1981, Secretary of Defense Harold Brown further noted:

Although the Soviets have only just begun to deploy a version of the SS-18 IRBM with 10 MIRV's, within a year or two we can expect them to obtain the necessary combination of ICBM numbers, reliability, accuracy, and warhead yield to put most of our Minutemen and Titan silos at risk from an attack with a relatively small proportion of their ICBM forces.

As a result, according to then-Under Secretary of Defense William Perry, a 10,000 MX shelter system could be needed by 1989. The costs of such an expansion are staggering and place the MX/MPS system under a cloud of uncertainty.

I therefore wish to call the attention of my colleagues to the Congressional Budget Office (CBO) study, "Resources for Defense," January 1981; and the General Accounting Office (GAO) report, "The MX Weapon System: Issues and Challenges," February 17, 1981; and the Office of Technology Assessment (OTA) interim report, "MX Missile Basing," submitted to the House Interior and Insular Affairs Subcommittee on Public Lands and National Parks, March 10, 1981. As investigative arms of the Congress, these offices have both furnished us with timely and compelling information on the future development of the MX.

The CBO study analyzes three possible Soviet threat scenarios: First, where the Soviet Union deploys MIRV'ed ICBM's in all of their approximately 1,400 silos, using existing warhead payloads; second, where the Soviet Union stays within the 820 SALT MIRV'ed ICBM limit, but fractionates each of its missiles; and third, where the Soviet Union does both, that is it fractionates all 1,400 missiles. The following CBO chart sets out in detail the possible U.S. responses to each threat scenario; in particular, it notes that the cost of these responses would range from $71 billion to $121 billion:

TABLE 6.—IMPACT OF CHANGES IN THE NUMBER OF SOVIET WARHEADS ON THE LONG-RUN COSTS OF A U.S. MULTIPLE PROTECTIVE STRUCTURE (MPS) BASING SYSTEM WITH MX MISSILES

[In billions of fiscal year 1982 dollars]

Programs to achieve 1,000 surviving warheads	Soviet threat—Number of Soviet warheads	U.S. response		U.S. system cost, shelters and missiles [1]	
		Number of horizontal shelters	Number of U.S. MX missiles	Investment	Total
Base case (820 MIRV'ed ICBM's) [2]	5,928	5,828	275	47	55
Higher-threat cases:					
1,400 MIRV'ed ICBM's, existing payloads [3]	9,100	9,159	350	60	71
820 MIRV'ed ICBM's fractionation [4]	15,000	15,120	400	78	90
1,400 MIRV'ED ICBM'S, fractionation [5]	23,000	23,485	450	106	121

[1] "Investment" includes research and development, procurement, and military construction costs. "Total" costs equal investment plus operating and support cost through fiscal year 1999.
[2] Assumes SALT II limit of 820 MIRV'ed ICBM's and no increase in the number of warheads carried on each missile.
[3] Assumes 1,400 MIRV'ed ICBM's and no increase in the number of warheads carried on each missile.
[4] Assumes SALT II limit of 820 MIRV'ed ICBM's and conversion of all missiles to carry larger numbers of 200-kiloton warheads.
[5] Assumes 1,400 MIRV'ed ICBM's and conversion of all missiles to carry larger numbers of 200-kiloton warheads.

Note.—The table assumes U.S. deployment of a racetrack/horizontal shelter basing system for MX. The currently proposed system would use a linear grid system, but this change probably would not significantly alter cost shown above. All of the Soviet warheads shown in the table would not be used to attack a U.S. MPS basing system. Many would be used to attack fixed-based U.S. Minuteman and Titan missile silos. Moreover, it is assumed that only 85 percent of the Soviet missiles used to attack a U.S. MPS basing complex would be reliable. The number of shelters and MX missiles shown for each case represents the combination that would minimize the cost of an MPS basing system designed to provide 1,000 surviving warheads. The cost estimates were derived from the MX Cost Effectiveness Model developed by the Space and Missile Systems Organization of the U.S Air Force.

The CBO concludes that the combination of possible cost increases and environmental concerns could force changes in the MX system, particularly in its basing mode.

The GAO study is a progress report on the MX system's first year of full scale production. It makes three key points: First, even within the SALT II constraints, the current plan for 200 missiles and 4,600 shelters will be insufficient to insure the required survivability of our ICBM force; second, without an arms limitation treaty, the survivability of the MX will require expansion, a ballistic missile defense, Soviet restraint, or a combination thereof; and third, Congress should understand that it is currently impossible to predict the ultimate size, number, or cost of the MX system.

Finally, the OTA report estimates that the Soviet Union could have 6,000 to 7,000 warheads by 1990; 11,000 to 12,000 warheads by 1995; and 15,000 plus warheads by the turn of the century. The report concludes that, to insure 100 survivable MX missiles, the United States would have to expand the MX/MPS system to 360 missiles per 8,250 shelters by 1990 and 544 missiles per 12,500 shelters by 1995.

In summary, the CBO, GAO, OTA demonstrate that tremendous cost and strategic uncertainties will hobble further development of the MX/MPS basing mode. I urge my colleagues to rethink their MX positions in light of this recent information and join me in cosponsoring the following moratorium resolution:

H. CON. RES. 94

Concurrent resolution expressing the sense of the Congress that development of the multiple protective shelter (MPS) basing mode for the MX missile should be halted until a limitation on both the number of intercontinental ballistic missile launchers and the number of multiple independently targeted warheads the Soviet Union may deploy has been negotiated and is in effect

Whereas the United States has not ratified the SALT II Treaty between the United States and the Soviet Union, signed at Vienna on June 18, 1979;

Whereas that Treaty would limit the Soviet Union to a total of 820 intercontinental ballistic missile launchers, with no more than ten multiple independently targeted warheads per missile;

Whereas without a limitation on the number of intercontinental ballistic missile launchers or warheads it may deploy the Soviet Union could expand its ICBM force to 1,400 missile launchers and a total of 23,000 independently targeted warheads;

Whereas, in the event of such a Soviet ICBM build-up, the multiple protective shelter basing mode currently proposed for the MX missile system, with 200 MX missiles and 4,600 horizontal shelters, would have to be expanded to 450 missiles with 23,485 horizontal shelters in order to ensure the survivability of 1,000 American land-based ICBM warheads; and

Whereas such an expansion would increase the cost of the MX/MPS system from $55,000,000,000 to $121,000,000,000: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that development of the multiple protective shelter (MPS) basing mode for the MX missile should be halted and no further funds should be obligated for development of that basing mode until there is in effect a negotiated limit on both the number of intercontinental ballistic missile launchers and the number of multiple independently targeted warheads the Soviet Union may have deployed at any time.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EVANS of Iowa) to revise and extend their remarks and include extraneous material:)

Mr. JEFFORDS, for 10 minutes, today.
Mr. CORCORAN, for 5 minutes, today.

(The following Members (at the request of Mr. PEASE) to revise and extend their remarks and include extraneous material:)

Mr. WYDEN, for 15 minutes, today.
Mr. PEASE, for 60 minutes, today.
Mr. MAZZOLI, for 5 minutes, today.
Mr. FRANK, for 5 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. BLANCHARD, for 5 minutes, today.
Mr. LAFALCE, for 15 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Mr. SKELTON, for 20 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. EVANS of Iowa) and to include extraneous matter:)

Mr. LEBOUTILLIER.
Mr. NELLIGAN.
Mr. WEBER of Minnesota.
Mr. CONTE in two instances.
Mr. DANNEMEYER.
Mr. DORNAN of California in two instances.
Mr. CARMAN.
Mr. ROUSSELOT.
Mr. FISH.
Mr. MCGRATH.
Mr. BEREUTER in two instances.
Mr. MICHEL in three instances.
Mr. WAMPLER.
Mr. MCCLORY.
Mr. LEACH of Iowa.
Mr. SHUMWAY.
Mr. HOLLENBECK.
Mr. FINDLEY.
Mr. DANIEL B. CRANE.

(The following Members (at the request of Mr. PEASE) and to include extraneous matter:)

Mr. WALGREN.
Mr. EDGAR in two instances.
Mr. EDWARDS of California.
Mr. BENJAMIN.
Mr. FORD of Michigan in two instances.
Mr. BINGHAM in 10 instances.
Mr. RODINO in two instances.
Mr. BRODHEAD.
Mr. STARK in three instances.
Mr. KILDEE.
Mr. ROSTENKOWSKI.
Mr. MURTHA.
Mr. FAUNTROY.
Mr. MCDONALD in five instances.
Mr. MILLER of California.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. ROE in three instances.
Mr. GORE.
Mr. OTTINGER.
Mr. BLANCHARD.
Mr. FASCELL.
Mr. AUCOIN.
Mr. SHELBY.
Mr. DOWNEY.
Mr. BARNES.
Mr. ROYBAL.
Mr. OBERSTAR.
Mr. GIBBONS.
Mr. JONES of North Carolina.

ADJOURNMENT

Mr. PEASE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 40 minutes p.m.), the House adjourned until Wednesday, March 18, 1981, at 3 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

803. A letter from the Deputy Secretary of Agriculture, transmitting a draft of proposed legislation to increase the interest rates for loans made or insured under the Consolidated Farm and Rural Development Act for water and waste disposal, and essential community facilities; to the Committee on Agriculture.

804. A letter from the Deputy Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Rural Electrification Act of 1936 to remove provisions for the special 2 percent interest rate for insured loans; to the Committee on Agriculture.

805. A letter from the Deputy Secretary of Agriculture, transmitting a draft of proposed legislation to amend the United States Grain Standards Act to require that fees charged for official inspection and weighing services cover costs to the Federal Grain Inspection Service including administrative and supervisory costs, and for other purposes; to the Committee on Agriculture.

806. A letter from the Deputy Secretary of Agriculture, transmitting a draft of proposed legislation to recover cost associated with cotton classing and standards, tobacco inspection and standards, and warehouse examination, inspection and licensing, and for other purposes; to the Committee on Agriculture.

807. A letter from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting notice of the proposed conversion to contractor performance of the grounds maintenance function at March Air Force Base, California, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

808. A letter from the Secretary of Housing and Urban Development, transmitting notice of delays in the submission of various reports required by sections 105(b), 215, 317, and 336(e) of the Housing and Community Development Act of 1980, and by the conference report on that act; to the Committee on Banking, Finance and Urban Affairs.

809. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the rate of compensation of the city administrator; to the Committee on the District of Columbia.

810. A letter from the Acting General Counsel, Department of Energy, transmitting notice of a meeting related to the international energy program to be held March 24, 1981, in Paris, France; to the Committee on Energy and Commerce.

811. A letter from the vice president for government affairs, National Railroad Passenger Corp., transmitting a report covering the month of November 1980, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

812. A letter from the vice president for government affairs, National Railroad Passenger Corp., transmitting a report covering the month of December 1980, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308(a)(2) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Energy and Commerce.

813. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of certain defense articles sold commercially to Morocco (Transmittal No. MC-7-81), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

814. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Career Minister-designate O. Rudolph Aggrey and by Ambassador-designate Charles M. Lichenstein, and by members of their families, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

815. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

816. A letter from the Acting Director, Federal Emergency Management Agency, transmitting a report on the Agency's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

817. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting a report on the Corporation's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

818. A letter from the Executive Secretary, Board of Regents of the Uniformed Services University of the Health Sciences, transmitting a report on the Board's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

819. A letter from the Secretary of the Interior, transmitting the third annual report on the status of general management plans for units of the national park system, pursuant to section 12(b) of Public Law 91-383, as amended; to the Committee on Interior and Insular Affairs.

820. A letter from the Secretary of the Interior, transmitting notice of the proposed refund of $27,474.35 in excess gas royalties to Phillips Petroleum Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953, as amended; to the Committee on Interior and Insular Affairs.

821. A letter from the Clerk, U.S. Court of Claims, transmitting a certified copy of the court's judgment order in Docket No. 226, *Caddo Tribe of Oklahoma* v. *The United States;* to the Committee on Interior and Insular Affairs.

822. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes; to the Committee on Merchant Marine and Fisheries.

823. A letter from the Acting Administrator of General Services, transmitting a report in response to a complaint filed with

the Special Counsel of the Merit Systems Protection Board, pursuant to 5 U.S.C. 1206(b)(5); to the Committee on Post Office and Civil Service.

824. A letter from the Acting Director, Office of Personnel Management, transmitting a draft of proposed legislation to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments to civil service annuities, and for other purposes; to the Committee on Post Office and Civil Service.

825. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting a report on the effect of the industrial cost exclusion on the construction grants program, pursuant to section 4 of Public Law 96-483; to the Committee on Public Works and Transportation.

826. A letter from the Acting Administrator of Veterans' Affairs, transmitting a report covering calendar year 1980 on cases in which equitable relief from administrative error was granted, pursuant to 38 U.S.C. 210(c)(3)(B); to the Committee on Veterans' Affairs.

827. A letter from the Chairman, Board of Governors, Federal Reserve System, transmitting the sixth annual report on the Board's activities under section 18(f) of the Federal Trade Commission Act, pursuant to section 18(f)(6) of the act; jointly, to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

828. A letter from the Secretary of Agriculture, transmitting the 1980 report of the National Advisory Council on Maternal, Infant and Fetal Nutrition, pursuant to section 17(k)(4) of the Child Nutrition Act of 1966, as amended (92 Stat. 3611); jointly, to the Committees on Education and Labor and Agriculture.

829. A letter from the Acting Comptroller General of the United States, transmitting a report on U.S. assistance to Egyptian agriculture (ID-81-19, Mar. 16, 1981); jointly, to the Committees on Government Operations and Foreign Affairs.

830. A letter from the Comptroller General of the United States, transmitting a report on Federal charges for irrigation projects (PAD-81-07, Mar. 13, 1981); jointly, to the Committees on Government Operations and Interior and Insular Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALBOSTA:

H.R. 2522. A bill to amend the Agricultural Act of 1949 to increase the levels of loans and purchases for the 1980 and 1981 crops of feed grains, wheat and soybeans, and for other purposes; to the Committee on Agriculture.

By Mr. ALBOSTA (for himself, Mr. ROSE, and Mr. HOLLAND):

H.R. 2523. A bill to establish a national insurance program to protect persons storing grain in a public warehouse against losses which may be caused by the insolvency of such warehouse; to the Committee on Agriculture.

By Mr. BARNARD:

H.R. 2524. A bill to provide for the minting of half dollars with a design emblematic of the 250th anniversary of the birth of George Washington; to the Committee on Banking, Finance and Urban Affairs.

By Mr. HEFTEL (for himself, Mr. FORD of Tennessee, and Mr. FOWLER):

H.R. 2525. A bill to amend the Internal Revenue Code of 1954 to encourage investment and economic growth by providing a simplified first-year capital cost recovery method; to the Committee on Ways and Means.

By Mr. BIAGGI (for himself and Mr. JONES of North Carolina):

H.R. 2526. A bill to authorize appropriations for certain maritime programs of the Department of Commerce for fiscal 1982, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BROWN of Ohio:

H.R. 2527. A bill to amend the Federal Food, Drug, and Cosmetic Act with respect to food additives; to the Committee on Energy and Commerce.

By Mr. BROOKS:

H.R. 2528. A bill to amend the Economy Act to provide that all departments and agencies may obtain materials or services from other agencies by contract, and for other purposes; to the Committee on Government Operations.

By Mr. CARNEY:

H.R. 2529. A bill to modify the navigation project for Moriches and Shinnecock Inlets, New York; to the Committee on Public Works and Transportation.

By Mr. RINALDO (for himself, Mr. COLLINS of Texas, Mr. BROWN of Ohio, Mr. LAFALCE, Mr. ALEXANDER, and Mr. ROUSSELOT):

H.R. 2530. A bill to amend and clarify the Foreign Corrupt Practices Act of 1977; to the Committee on Energy and Commerce.

By Mr. DERWINSKI:

H.R. 2531. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. FASCELL:

H.R. 2532. A bill to provide for the cooperation between the armed services and local, State, and Federal law enforcement officials; to the Committee on Armed Services.

By Mr. FIELDS:

H.R. 2533. A bill to amend the Internal Revenue Code of 1954 to provide incentives for savings by individuals; to the Committee on Ways and Means.

By Mr. FITHIAN:

H.R. 2534. A bill to amend the Water Resources Development Act of 1974 relating to deauthorization of navigation, flood control, and other water projects; to the Committee on Public Works and Transportation.

H.R. 2535. A bill to deauthorize the Lafayette Dam and Reservoir, Wabash River, Ind.; to the Committee on Public Works and Transportation.

H.R. 2536. A bill to deauthorize the Lafayette Dam and Reservoir, Big Pine Dam and Reservoir, Clifty Creek Dam and Reservoir, Big Walnut Dam and Reservoir, and Big Blue Dam and Reservoir in the State of Indiana; to the Committee on Public Works and Transportation.

By Mr. FOLEY:

H.R. 2537. A bill to amend the Saccharin Study and Labeling Act to extend to December 31, 1982, the ban on actions by the Secretary of Health and Human Services respecting saccharin; to the Committee on Energy and Commerce.

H.R. 2538. A bill to amend the Federal Food, Drug, and Cosmetic Act to delete certain requirements applicable to food additives and color additives; to the Committee on Energy and Commerce.

By Mr. FRENZEL (for himself and Mr. HEFTEL):

H.R. 2539. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the deduction allowable for certain moving expenses; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 2540. A bill to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1982, and for other purposes; to the Committee on Ways and Means.

By Mr. SAM B. HALL, JR.:

H.R. 2541. A bill to amend title 38, United States Code, to make certain improvements in the dependency and indemnity compensation program for children of veterans with service-connected disabilities; to the Committee on Veterans' Affairs.

H.R. 2542. A bill to amend title 38, United States Code, to provide that the pension of a veteran who is blind as a result of a nonservice-connected disability and who is being furnished hospital care by the Veterans' Administration in a Veterans' Administration center operated exclusively for the rehabilitation of blinded veterans shall not be reduced because the period of care of such veteran extends more than 3 months; to the Committee on Veterans' Affairs.

By Mr. JEFFORDS (for himself, Mr. DOWNEY, Mr. PEPPER, Mr. LAGOMARSINO, Mr. GORE, Mr. SHUMWAY, Mr. IRELAND, and Mr. BEILENSON):

H.R. 2543. A bill to establish aggressive and effective collection practices with respect to all Federal loan programs, and for other purposes; jointly, to the Committees on the Judiciary, Government Operations, Education and Labor, and Ways and Means.

By Mr. JOHNSTON:

H.R. 2544. A bill to change the method of computing increases in Federal benefit payments to individuals participating in certain Federal programs; to the Committee on Government Operations.

By Mr. HOLLENBECK:

H.R. 2545. A bill to permit the importation of certain scrimshaw articles under the Endangered Species Act of 1973; to the Committee on Merchant Marine and Fisheries.

By Mr. JONES of Tennessee:

H.R. 2546. A bill to direct the Corps of Engineers to study the feasibility of modifying the Mississippi River project at Tiptonville, Tenn.; to the Committee on Public Works and Transportation.

H.R. 2547. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; jointly, to the Committees on Government Operations, and Rules.

By Mr. LAFALCE:

H.R. 2548. A bill to amend the Internal Revenue Code of 1954 to allow taxpayers to contribute $2,000 a year to certain retirement savings plans (in addition to the amount allowed as a deduction) without incurring liability for excess contributions tax, and to provide incentives for retirement savings by increasing the maximum amount of annual deduction allowable for deposits into individual retirement accounts and by permitting active participants in employer plans to establish such accounts; to the Committee on Ways and Means.

By Mr. McDONALD:

H.R. 2549. A bill to amend title 44, United States Code, to require that Federal publications which are distributed to the public free of charge shall bear a statement indicating that the printing and distribution of such publications are financed by U.S. taxpayers; to the Committee on House Administration.

By Mr. MADIGAN (for himself and Mr. BROYHILL):

H.R. 2550. A bill to eliminate Federal funding for and improve the competitive position of health maintenance organizations, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MURTHA:

H.R. 2551. A bill to provide for an alternative amortization period for pollution control facilities; to the Committee on Ways and Means.

H.R. 2552. A bill to impose quotas on the importation of automobiles from Japan during 1981, 1982, and 1983; to the Committee on Ways and Means.

By Mr. PETRI:

H.R. 2553. A bill to amend the Urban Mass Transportation Act of 1964 to provide for establishment of alternative methods of providing mass transportation to meet special needs of the handicapped; to the Committee on Public Works and Transportation.

By Mr. ROUSSELOT:

H.R. 2554. A bill to amend the Internal Revenue Code of 1954 to provide that property may be levied upon for the collection of tax (other than where such collection is in jeopardy) only pursuant to a court order; to the Committee on Ways and Means.

H.R. 2555. A bill to amend the Internal Revenue Code of 1954 to authorize the payment of attorney's fees to taxpayers who prevail in tax litigation; to the Committee on Ways and Means.

By Mr. SHELBY (for himself, Mr. NICHOLS, Mr. DICKINSON, Mr. EDWARDS of Alabama, Mr. BEVILL, Mr. FLIPPO, and Mr. SMITH of Alabama):

H.R. 2556. A bill to amend the Immigration and Nationality Act to authorize the President, in the case of acts of terrorism or other hostile acts committed with the participation or acquiescence of a foreign state, to exclude and deport from the United States nonimmigrant aliens who are nationals of that state; to the Committee on the Judiciary.

By Mr. STARK:

H.R. 2557. A bill to amend the Internal Revenue Code of 1954 to provide that certain moves of sports franchises will be treated as sales; to the Committee on Ways and Means.

H.R. 2558. A bill to amend the Internal Revenue Code of 1954 to provide an exclusion from gross income for certain per diem received by State legislators; to the Committee on Ways and Means.

By Mr. STUDDS (for himself, Mr. JONES of North Carolina, Mr. YOUNG of Alaska, and Mr. SNYDER):

H.R. 2559. A bill to to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. TAUKE:

H.R. 2560. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for certain expenses paid or incurred in connection with the adoption of a child; to the Committee on Ways and Means.

By Mr. WAMPLER (for himself and Mr. BROWN of California):

H.R. 2561. A bill to increase by 5 years the period during which activities may be carried out under the Agricultural Research, Extension, and Teaching Policy Act of 1977, to expand the scope of activities authorized in such act, and for other purposes; to the Committee on Agriculture.

By Mr. WAXMAN:

H.R. 2562. A bill to extend, revise, and consolidate certain programs of the Public Health Service Act; to the Committee on Energy and Commerce.

By Mr. WILSON:

H.R. 2563. A bill relating to the tariff treatment of certain ceramic insulators used in spark plugs; to the Committee on Ways and Means.

By Mr. WOLF (for himself and Mr. PARRIS):

H.R. 2564. A bill to grant the consent of Congress for the States of Virginia and Maryland and the District of Columbia to amend the Washington Metropolitan Area Transit Regulations Compact relating to the requirement that labor disputes involving the Washington Metropolitan Area Transit Authority and its employees which are not resolved by collective bargaining be submitted to arbitration; jointly, to the Committees on the Judiciary and the District of Columbia.

By Mr. ASPIN (for himself, Mr. BENNETT, Mr. BONIOR of Michigan, Mr. CORRADA, Mr. COTTER, Mr. DE LUGO, Mr. DOWNEY, Mr. GRAY, Mr. HARKIN, Mr. HOWARD, Mr. LAFALCE, Mr. MCKINNEY, Mr. MURPHY, Mr. PATTERSON, Mr. SEIBERLING, Mr. SIMON, and Mr. VENTO):

H.R. 2565. A bill to amend the Voting Rights Act of 1965; to the Committee on House Administration.

By Mr. BLANCHARD (for himself, Mr. BETHUNE, Mr. WILLIAM J. COYNE, Mr. D'AMOURS, Mr. FAUNTROY, Mr. GARCIA, Mr. MCKINNEY, Ms. OAKAR, Mr. PARRIS, Mrs. ROUKEMA, Mr. ST GERMAIN, Mr. SHUMWAY, and Mr. VENTO):

H.R. 2566. A bill to amend the Federal Financing Bank Act of 1973 to require that the receipts and disbursements of the Federal Financing Bank be included in the Federal budget, and for other purposes; jointly, to the Committees on Ways and Means, and Banking, Finance and Urban Affairs.

By Mr. CORCORAN (for himself, Mr. MICHEL, and Mr. MADIGAN):

H.R. 2567. A bill relating to the treatment of certain rentals of farm and business real property for purposes of section 2032A of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 2568. A bill to provide that certain administration expenses incurred in carrying out the Social Security Act will be paid from general revenue funds rather than from the trust funds established in title II and part A of title XVIII of the Social Security Act; to the Committee on Ways and Means.

Mr. MURTHA:

H.J. Res. 208. A resolution to provide for the designation of a national "Freedom Flag"; to the Committee on Post Office and Civil Service.

By Mr. BEDELL:

H. Con. Res. 94. A resolution expressing the sense of the Congress that development of the multiple protective shelter (MPS) basing mode for the MX missile should be halted until a limitation on both the number of intercontinental ballistic missile launchers and the number of multiple independently targeted warheads the Soviet Union may deploy has been negotiated and is in effect; to the Committee on Armed Services.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

22. By the SPEAKER: A memorial of the House of Representatives of the State of Hawaii, relative to the burning of higher sulfur content fuel oil at Hawaiian Electric Co.'s, Kahe Powerplant; to the Committee on Energy and Commerce.

23. Also, a memorial of the Senate of the Commonwealth of Massachusetts, relative to assistance to the Government of El Salvador; to the Committee on Foreign Affairs.

24. Also, a memorial of the Assembly of the State of New York, relative to persuading the world community of nations to seek a speedy, just, and equitable solution to the dangerous situation in Northern Ireland; to the Committee on Foreign Affairs.

25. Also, a memorial of the Legislature of the State of North Dakota, relative to block grants; to the Committee on Government Operations.

26. Also, a memorial of the Legislature of the State of Montana, requesting that Congress propose an amendment to the Constitution of the United States to protect unborn children; to the Committee on the Judiciary.

27. Also, a memorial of the Legislature of the State of Wyoming, relative to the Jackson Hole Airport; to the Committees on Interior and Insular Affairs, and Public Works and Transportation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHAPPELL:

H.R. 2569. A bill for the relief of Servillano de Guzman; to the Committee on the Judiciary.

By Mr. McDONALD:

H.R. 2570. A bill for the relief of Joyce G. McFarland; to the Committee on the Judiciary.

By Mr. MATSUI:

H.R. 2571. A bill for the relief of Angelita Carrasca; to the Committee on the Judiciary.

H.R. 2572. A bill for the relief of Guadelupe Ortega-Garza; to the Committee on the Judiciary.

H.R. 2573. A bill for the relief of Moses Bank; to the Committee on the Judiciary.

H.R. 2574. A bill for the relief of Mohan Singh and Ajit Singh; to the Committee on the Judiciary.

By Mr. RAHALL:

H.R. 2575. A bill for the relief of Cesar B. Ibanez II; to the Committee on the Judiciary.

By Mrs. SCHNEIDER:

H.R. 2576. A bill for the relief of William J. Games; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 2577. A bill for the relief of Blanca Nellie Quintana; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 7: Mr. DUNCAN, Mr. HOLLAND, Mr. ARCHER, Mr. JACOBS, Mr. ROUSSELOT, Mr. MARTIN of North Carolina, Mr. MOORE, Mr. BAFALIS, Mr. MCCLOSKEY, Mr. PORTER, Mr. LAGOMARSINO, Mr. COLLINS of Texas, Mr. HYDE, Mr. BARNARD, Mr. MADIGAN, Mr. RAILSBACK, Mr. PRITCHARD, Mr. COLEMAN, Mrs. BOUQUARD, Mr. GREGG, Mr. GOLDWATER, Mr. FORSYTHE, Mr. WHITEHURST, Mr. DAN DANIEL, Mr. MURPHY, Mr. SAWYER, Mr. GREEN, Mr. JOHNSTON, Mr. GINGRICH, Mr. WOLF, Mr. COELHO, Mr. LUJAN, Mr. JAMES K. COYNE, Mr. BEARD, Mr. EVANS of Delaware, Mr. BURGENER, Mr. RALPH M. HALL, Mr. DASCHLE, Mr. EVANS of Georgia, Mr. MORRISON, and Mr. FISH.

H.R. 27: Mr. BAFALIS, Mr. BEILENSON, Mr. BLILEY, Mr. EVANS of Indiana, Mr. FASCELL, Mr. FOGLIETTA, Mr. FOUNTAIN, Mr. GUARINI, Mr. HUTTO, Mr. KEMP, Mr. MYERS, Mr. SUNIA, and Mr. TAYLOR.

H.R. 523: Mr. CARNEY.

H.R. 608: Mr. LEWIS and Mr. MORRISON.

H.R. 609: Mr. LEWIS and Mr. MORRISON.

H.R. 610: Mr. LEWIS, Mr. MORRISON, and Mr. DAUB.

H.R. 614: Mr. LOWERY of California.

H.R. 644: Mr. DELLUMS and Mr. HEFTEL.

H.R. 703: Mr. BARNARD.

H.R. 713: Mr. PORTER.

H.R. 746: Mr. NATCHER, Mr. HUGHES, Mr. KOGOVSEK, Mr. NELSON, Mr. MURPHY, Mr. BENNETT, Mr. GIBBONS, Mr. REUSS, Mr. WHITEHURST, Mr. MOAKLEY, Mr. HANSEN of Idaho, Mr. WHITTEN, Mr. SAM B. HALL, JR., Mr. PRITCHARD, Mr. GARCIA, Mr. BEVILL, Mr. GLICKMAN, Mr. PRICE, Mr. EVANS of Georgia, Mr. DE LA GARZA, Mr. BEDELL, Mr. ZABLOCKI, Mr. COELHO, Mr. STOKES, Mr. IRELAND, Mr. FISH, and Mr. DOUGHERTY.

H.R. 790: Mr. LOEFFLER, Mr. NICHOLS, Mr. COLLINS of Texas, Mr. BAILEY of Missouri, Mr. JOHNSTON, Mr. SMITH of Alabama, Mr. STUMP, Mr. BARNARD, and Mr. ANDREWS.

H.R. 798: Mr. ZEFERETTI, Mr. SIMON, Mrs. BOUQUARD, Mr. WAMPLER, Mr. MARTIN of New York, and Mr. ANDREWS.

H.R. 799: Mr. CORRADA, Mr. ROBINSON, Mr. DE LUGO, Mr. MITCHELL of Maryland, Mr. TAUKE, Mr. SMITH of Alabama, Mr. WAMPLER, Ms. MIKULSKI, Mr. KOGOVSEK, Mr. DUNCAN, Mr. FRANK, Mr. LAFALCE, Mr. ROE, and Mr. ANDREWS.

H.R. 801: Mr. O'BRIEN, Mr. PANETTA, Mr. LOWERY of California, Mr. GREGG, Mrs. SCHNEIDER, Mr. STUMP, Mrs. BOUQUARD, and Mr. WAMPLER.

H.R. 806: Mr. KOGOVSEK, Mr. HOWARD, Mr. ERDAHL, Mr. LEHMAN, Mr. HYDE, and Mr. STOKES.

H.R. 1100: Mr. WILLIAMS of Montana and Mr. DWYER.

H.R. 1206: Mr. DUNCAN and Mr. LONG of Maryland.

H.R. 1207: Mr. DUNCAN and Mr. LONG of Maryland.

H.R. 1294: Mr. CONYERS, Mr. TAUKE, Mr. HORTON, and Mr. MINETA.

H.R. 1316: Mr. PEPPER.

H.R. 1320: Mrs. FENWICK.

H.R. 1353: Mr. BAILEY of Pennsylvania, Mr. DE LA GARZA, Mr. DELLUMS, Mr. ERDAHL, Mr. FARY, Mr. FAUNTROY, Mr. FORD of Michigan, Mr. HEFTEL, Mr. IRELAND, Mr. MOLLOHAN, Mr. OTTINGER, Mr. RICHMOND, Mr. VENTO, Mr. YATRON, and Mr. AKAKA.

H.R. 1509: Mr. RANGEL, Mr. COELHO, Mr. CLAY, Mr. BEDELL, Mr. RUSSO, Mr. MCCLOSKEY, Mr. KOGOVSEK, Mr. DYMALLY, Mr. LONG of Maryland, Mr. DORGAN of North Dakota, and Mr. YATRON.

H.R. 1540: Ms. FERRARO and Mrs. HECKLER.

H.R. 1642: Mr. WILSON, Mr. SKEEN, Mr. MORRISON, Mrs. SNOWE, Mr. IRELAND, Mr. BOWEN, Mr. LAFALCE, Mr. DAUB, Mr. BEREUTER, Mr. CHENEY, and Mr. SPENCE.

H.R. 1649: Mr. HYDE, Mr. LAGOMARSINO, Mr. COLLINS of Texas, Mr. DOUGHERTY, and Mr. LOTT.

H.R. 1650: Mr. LAGOMARSINO, Mr. FORSYTHE, Mr. EVANS of Georgia, and Mr. STANGELAND.

H.R. 1698: Mr. SWIFT, Mrs. CHISHOLM, Mrs. SCHROEDER, Mr. PASHAYAN, Mr. MURPHY, Mr. WEISS, Mr. BARNARD, Mr. LAFALCE, Mr. JEFFORDS, Mr. DE LUGO, Mr. GLICKMAN, Mr. LOWRY of Washington, Mr. GUYER, Mr. HUGHES, Mr. ERDAHL, Mr. BIAGGI, Mr. STOKES, Mr. LUNGREN, Mr. ADDABBO, Mr. MONTGOMERY, Mr. GINGRICH, Mr. EVANS of Georgia, Mr. RALPH M. HALL, Mr. ROE, and Mr. STENHOLM.

H.R. 1713: Mr. SIMON, Ms. FERRARO, Mr. EVANS of Delaware, Mr. PATTERSON, Mr. ANDERSON, Mr. GOLDWATER, Mr. EVANS of Georgia, Mr. HERTEL, Mr. BONKER, Mr. MINETA, Mr. STENHOLM, Mr. BAFALIS, and Mr. BARNARD.

H.R. 1714: Mr. ADDABBO, Mr. MOTTL, Mr. YOUNG of Missouri, Mr. OBERSTAR, Mr. FORSYTHE, Mr. KOGOVSEK, Ms. MIKULSKI, Mr. PASHAYAN, Mr. HORTON, Mr. BARNARD, Mr. MARKS, Mr. FISH, Mr. SKELTON, Mr. OTTINGER, Mr. LOWRY of Washington, Mr. LONG of Maryland, and Mr. STOKES.

H.R. 1778: Mr. ROBERT W. DANIEL, JR.

H.R. 1779: Mr. ROBERT W. DANIEL, JR.

Res. 182: Mr. PANETTA, Mr. GOODLING, Mr. CONYERS, Mr. PURSELL, Mr. WOLPE, Mr. SAWYER, Mr. KILDEE, Mr. TRAXLER, Mr. DAVIS, Mr. BONIOR of Michigan, Mr. HERTEL, Mr. FORD of Michigan, Mr. DINGELL, Mr. BRODHEAD, Mr. BROOMFIELD, Mr. WASHINGTON, Mr. RUSSO, Mr. DERWINSKI, Mr. FARY, Mr. PORTER, Mr. ANNUNZIO, Mr. MCCLORY, Mr. CORCORAN, Mr. FINDLEY, Mr. MADIGAN, Mr. DANIEL B. CRANE, Mr. BENJAMIN, Mr. SHARP, Mr. JACOBS, Mr. TAUKE, Mr. HARKIN, Mr. JEFFRIES, Mr. WINN, Mr. NATCHER, Mr. PERKINS, Mr. TAUZIN, Mr. ROEMER, Mr. ANTHONY, Mr. MCCURDY, Mr. MCHUGH, Mr. EDWARDS of Alabama, Mr. DICKINSON, Mr. YOUNG of Alaska, Mr. MATSUI, Mr. FAZIO, Mr. MILLER of California, Mr. EDWARDS of California, Mr. MCCLOSKEY, Mr. PASHAYAN, Mr. LAGOMARSINO, Mr. GOLDWATER, Ms. FIEDLER, Mr. DORNAN of California, Mr. DIXON, Mr. GRISHAM, Mr. LUNGREN, Mr. LEWIS, Mr. LOWERY of California, Mr. WIRTH, Mr. KOGOVSEK, Mr. GEJDENSON, Mr. MOFFETT, Mr. HUTTO, Mr. FUQUA, Mr. MCCOLLUM, Mr. YOUNG of Florida, Mr. MICA, Mr. SHAW, Mr. PEPPER, Mr. GINN, Mr. AKAKA, Mr. CRAIG, Mr. HANSEN of Idaho, Mr. DYSON, Mr. LONG of Maryland, Ms. MIKULSKI, Mrs. HOLT, Mr. BARNES, Mr. BEVILL, Mr. CONTE, Mr. WYDEN, Mr. EVANS of Georgia, Mr. WEAVER, Mr. COELHO, Mr. FOGLIETTA, Mr. GRAY, Mr. LEDERER, Mr. DOUGHERTY, Mr. YATRON, Mr. EDGAR, Mr. MCDADE, Mr. NELLIGAN, Mr. MURTHA, Mr. WILLIAM J. COYNE, Mr. RITTER, Mr. WALKER, Mr. ERTEL, Mr. WALGREN, Mr. GAYDOS, Mr. BAILEY of Pennsylvania, Mr. MURPHY, Mr. CLINGER, Mr. MARKS, Mr. ST GERMAIN, Mrs. SCHNEIDER, Mr. HARTNETT, Mr. DERRICK, Mr. HOLLAND, Mr. ROBERTS of South Dakota, Mr. DUNCAN, Mrs. BOUQUARD, Mr. GORE, Mr. BONER of Tennessee, Mr. JONES of Tennessee, Mr. FORD of Tennessee, Mr. SAM B. HALL, JR., Mr. MATTOX, Mr. GRAMM, Mr. ARCHER, Mr. FIELDS, Mr. BOLAND, Mr. FRANK, Mr. MAVROULES, Mr. MOAKLEY, Mr. DONNELLY, Mr. UDALL, Mr. ERDAHL, Mr. VENTO, Mr. WEBER of Minnesota, Mr. STANGELAND, Mr. BOWEN, Mr. LOTT, Mr. YOUNG of Missouri, Mr. BAILEY of Missouri, Mr. BEREUTER, Mr. DAUB, Mrs. SMITH of Nebraska, Mr. SANTINI, Mr. D'AMOURS, Mr. GREGG, Mr. FLORIO, Mr. HUGHES, Mr. HOWARD, Mrs. FENWICK, Mr. FORSYTHE, Mr. ROE, Mr. HOLLENBECK, Mr. RODINO, Mr. COURTER, Mr. GUARINI, Mr. DWYER, Mr. LUJAN, Mr. CARNEY, Mr. DOWNEY, Mr. LENT, Mr. MCGRATH, Mr. LEBOUTILLIER, Mr. ADDABBO, Mr. ROSENTHAL, Ms. FERRARO, Mr. SCHEUER, Mrs. CHISHOLM, Mr. SOLARZ, Mr. RICHMOND, Mr. SCHUMER, Mr. MOLINARI, Mr. WEISS, Mr. BINGHAM, Mr. PEYSER, Mr. OTTINGER, Mr. FISH, Mr. GILMAN, Mr. SOLOMON, Mr. MITCHELL of New York, Mr. LEE, Mr. HORTON, Mr. LAFALCE, Mr. KEMP, Mr. LUNDINE, Mr. JONES of North Carolina, Mr. FOUNTAIN, Mr. ANDREWS, Mr. NEAL, Mr. JOHNSTON, Mr. ROSE, Mr. HEFNER, Mr. MARTIN of North Carolina, Mr. BROYHILL, Mr. LUKEN, Mr. GUYER, Mr. BROWN of Ohio, Mr. KINDNESS, Mr. WYLIE, Mr. APPLEGATE, Mr. WILLIAMS of Ohio, Mr. STOKES, Mr. MOTTL, Mr. SYNAR, Mr. ENGLISH, Mr. AUCOIN, Mr. PICKLE, Mr. DE LA GARZA, Mr. STENHOLM, Mr. HANCE, Mr. GONZALEZ, Mr. FROST, Mr. WHITEHURST, Mr. BUTLER, Mr. ROBINSON, Mr. WOLF, Mr. MORRISON, Mr. MOLLOHAN, Mr. RAHALL, Mr. ASPIN, Mr. KASTENMEIER, Mr. GUNDERSON, Mr. SUNIA, Mr. CORRADA, Mr. MCDONALD, Mr. SHELBY, and Mr. DASCHLE.

H. Con. Res. 59: Mr. DASCHLE, Mr. DAUB, Mr. GINGRICH, Mr. BARNES, Mr. CROCKETT, Mr. APPLEGATE, Mr. DYSON, Mr. PASHAYAN, Mr. NELLIGAN, Mr. MINETA, and Mrs. BOUQUARD.

H. Res. 38: Mr. ROBERT W. DANIEL, JR.

PETITIONS, ETC.

Under clause 1 of rule XXII.

37. The SPEAKER presented a petition of the board of directors, East River Electric Power Cooperative, Inc., Madison, S. Dak., relative to rural electric financing, which was referred to the Committee on Agriculture.

SENATE—*Tuesday, March 17, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 12 o'clock meridian, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Reverend Jack D. Kinard, pastor, Bethel Assembly of God Church, Martinsburg, W. Va., offered the following prayer:

Our Heavenly Father, Creator, God omnipotent, hear us as we pray.

We who pause to honor You know that no man is in a position of authority or responsibility purely by his own designs or desires. Daniel spoke for all of us when he said of You that You are the God in whose hand our breath is and whose are all our ways; and that You ruleth in the kingdom of men, and that You, O God, appointeth over it whomsoever that You will.

All the peoples of our land are affected by the laws that are debated and enacted in this House. Fairness and justice for all are not idle words or unreal idealism. But how often is our sincere desire to bring about these blessings frustrated by unseen developments? Therefore, we humbly beg for Heaven's guidance throughout the deliberations that are to proceed within this Chamber.

Let the people of this Nation and all nations be continually blessed with peace, and allow the furtherance of those benefits that You deem to be for our good be received with grateful hearts. Let us not lift up ourselves against the God of heaven, or defile our Nation as Belshazzar of old, for this is a Nation honored of God; now help us that we might also honor You, our Father.

For thine is the kingdom, and the power and the glory for ever, even as Your only begotten son, Jesus, has taught us to pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. ON THURSDAY, MARCH 19, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. on Thursday, March 19, 1981.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CRANSTON

Mr. BAKER. Mr. President, I inquire of the Chair: Are there special orders for the recognition of Senators this morning?

The PRESIDENT pro tempore. There are two special orders.

Mr. BAKER. Mr. President, I ask unanimous consent that there be, in addition, a special order for the recognition of the distinguished Senator from California (Mr. CRANSTON) to follow in sequence after the two special orders previously entered.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that following the recognition of the three Senators under the special orders, there be a period for the transaction of routine morning business, not to extend beyond 1 p.m., and that Senators may be permitted to speak therein for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that after the execution of the three special orders and the close of morning business as just provided for, the Senate, at 1 p.m., stand in recess until 2 p.m. today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF S. 509, ADJUSTMENT OF PRICE SUPPORTS FOR MILK

Mr. BAKER. Mr. President, I ask unanimous consent that, at 2 p.m., the Senate proceed to the consideration of Calendar No. 32, S. 509, a bill to amend section 201 of the Agricultural Act of 1949, as amended.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to proceeding to the consideration of that measure at this time, the 3-day rule having expired.

Mr. BAKER. The minority leader is correct. I believe the 3-day rule has expired. I thank him for his statement that there is no opposition.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it back or yield it to any Senator. I yield it now to the minority leader.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader for his courtesy in yielding the time. I will make use of it.

The PRESIDENT pro tempore. The Senator from West Virginia.

THE REVEREND JACK D. KINARD

Mr. ROBERT C. BYRD. Mr. President, I wish to say a brief word about the invocation delivered today by Dr. Jack Kinard.

The people of West Virginia have a rich spiritual heritage. That heritage is largely the fruit of generations of faithful nurturing by pastors like Dr. Jack Kinard, who has led us in the invocation today.

Dr. Kinard has been the pastor of the Bethel Assembly of God Church in Martinsburg, W. Va., for 3 years. He is a native of Arkansas, where he received his education at Southern Baptist College and the University of Arkansas.

In addition, he received clinical training for pastoral care in Arkansas. Prior to accepting the call to Martinsburg, Dr. Kinard served churches in his home State and in Missouri.

I am sure that my colleagues join me today in welcoming the Reverend Mr. Kinard into our midst.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I yield such time as he may desire to Mr. PROXMIRE.

How much time does the Senator desire?

Mr. PROXMIRE. I understand that the Senator from Missouri wishes some time. If the Senator has time, I would appreciate 2 minutes.

Mr. ROBERT C. BYRD. I yield 2 minutes to Mr. PROXMIRE, and I yield to Mr. EAGLETON such time as he may require, from the time that has been allotted to me under the standing order and the time that was yielded to me by the distinguished majority leader.

Mr. EAGLETON. I thank the distin-

guished Senator from Wisconsin and the distinguished minority leader.

(Mr. ABDNOR assumed the chair.)

APRIL 1, 1981—80-PERCENT PARITY ADJUSTMENT

Mr. PROXMIRE. Mr. President, the issue before the Senate today will be: "Should the Congress change the current law that requires an adjustment in milk price supports on April 1 to bring the supports to the 80 percent of parity level?" My answer is a ringing: "No."

I say that as one who fully supports the President's proposed reductions in our Federal budget. I think we can and should go farther than the President has requested in those reductions. The President deserves great credit for proposing these deep and painful reductions. He is right. But on dairy price supports he is wrong. And in quick summary, here is why:

First, the failure to make this April 1 income support adjustment would have a disastrous effect on the Nation's dairy farmers.

Second. dairy farmers deserve as well as need this adjustment in view of their hard work and long hours, the size of their investment, the risk they take, and their remarkable efficiency.

Third, the program of 80 percent price support works.

Fourth, the cost of the program to the Federal Government is minimal.

Fifth, in the long run consumers will be better off, not worse off.

DISASTROUS EFFECT ON DAIRY FARMERS

Current legislation provides for an increase in milk price supports by the amount farm costs increase between October 1, 1980 and April 1, 1981. The USDA estimates this increase at 6.9 percent, which when multiplied by the October 1, 1980, support price of $12.80 per hundredweight, results in an 88-cent per hundredweight increase. This, when divided by 11.5 gallons per hundredweight, equals 7.7 cents per gallon. Experts at the University of Wisconsin tell us that passage of S. 509, the gutting of dairy price supports, means an annual loss in net income per Wisconsin grade A dairy farmer of $5.850 annually, translating into a devastating one-third drop in his net income.

Nobody else is being asked to take that kind of cut. Talk about equality of sacrifice. If we had that cut applied throughout our economy, every worker would suffer a one-third cut in his cash income next year. Of course, that is not going to be the case for anybody except the dairy farmer.

That net income, incidentally, allows nothing for return on his invested capital and the typical dairy farm requires about a $250,000 investment.

DAIRY FARMERS DESERVE THE ADJUSTMENT

Mr. President, what in the name of heaven does it take to justify a reasonable income in this country? I submit the first criteria is hard work. Does the dairy farmer work hard? He has to milk those cows twice a day. He has to work constantly to keep his equipment shipshape. He has to plant and harvest his feed, and that includes gathering and distributing tons of manure on his land.

Incidentally, that is one of the few tough dairy jobs those of us in the Senate could qualify for. [Laughter.]

He has to keep detailed, meticulous books, including records on every cow, on every piece of equipment. Careful studies by the University of Wisconsin estimate that the typical dairy farmer and his wife and children work from 130 to 150 hours per week.

Imagine that—130 to 150 hours per week.

Those experts compute the implicit wages for this work, allowing nothing for return on invested capital, came in June of 1980 for labor and management to $2.89 per hour. Let me repeat that, Mr. President: The Wisconsin dairy farmer now earns $2.89 per hour. That is 13 percent below the minimum wage. And he makes that for the toughest, most skilled kind of hard work. Compare that to the typical U.S. manufacturing worker who makes $7.18 or far more than twice as much per hour. Compare it to the average U.S. construction worker who makes $9.79, or more than three times as much. Mr. President, neither of those workers risk any invested capital. Their productivity has increased very slowly in recent years. On the other hand, the American dairy farmer's productivity is the envy of the world.

I suppose you might argue that hard work and long hours are not enough. This country is a free enterprise capitalist country. We require an investment to justify really good earnings. All right. Does the dairy farmer bring a big investment to his work? He is one of the very few producers in our society today who does, indeed, bring an investment and a big one, an investment that exceeds $250,000 on a typical dairy farm. If we believe in rewarding capital in this country where is the justice in providing virtually no return on this productive investment and proposing to cut income by a whopping one-third for these producers?

Now some might argue that this system of ours, this American free enterprise system, rewards the willingness to take risk, and it does. But for dairy farmers? The dairy farmer faces continuous risk. Think of all the developments that can torpedo his operations: erratic weather, droughts, flood, hail, windstorms. There is no end to it. A disease that can destroy his herd or the failure of a piece of equipment to maintain the meticulous sanitary standards the dairy farmer must meet. To add to that risk devastating fluctuations in price will literally destroy many efficient, family size dairy farmers who simply lack the capital to continue to face a year or two of serious losses.

In the past 30 years, since this program that we are debating today was instituted, the number of dairy farms has fallen by almost two-thirds. The great majority of dairy farmers have lost, had to quit. This is a very risky business.

And, finally, we say—well, all this is not enough, no one should expect to do well in our economic system no matter how hard he works, how big his investment, how big a risk, unless he is smart, efficient. That is fine. Is the dairy farmer smart and efficient? Mr. President, the American farmer makes far and away the biggest contribution to the remarkable economic strength of this country. Why is this country economically more productive than the Soviet Union? The answer lies very largely with our farmers. Consider: We have less than 4 percent of our people on the farm. The Soviet Union has more than 30 percent of its people as full time farmers. And yet we produce 20 percent more food than they do, and we have a smaller population. That means our farmers are literally 10 times more productive than theirs. In no other area of the economy do we have anything approaching this immense economic advantage. And among the most efficient of our farmers is the dairy farmer.

Mr. President, some will say that this 80 percent price support program has encouraged dairy farmers to overproduce. They argue the price is too high. Cut it and the dairy farmer will reduce his production. How about that?

The answer is that dairy production increased last year because diversified farmers became desperate. A farmer who produced milk but also feed grain and pigs and beef found prices in these latter areas absolutely disastrous. Farm parity in 1980 took the worst nose dive in history. It dropped to the lowest level since 1932. Now consider this, Mr. President: Last year wage income—in nominal terms—not adjusted for inflation—rose about 8.7 percent; dividend income a little more than 11 percent; interest income more than 22 percent. All forms of income, all forms rose in nominal terms with one single exception. Farm income did not rise. It fell and it fell by a stunning 24 percent, and that was a fall in inflated dollars. If we adjust for inflation farm income fell by a sickening one third.

So what did farmers do? If they already had a dairy operation, they expanded it. They stopped or slowed their other production. Dairy did not do very well last year. The blend parity for milk—as you know, only manufactured milk is price supported; fluid milk is not—the blend parity for milk was about 69 percent. That was not just bad—it was terrible. But even that was better than the price of other farm commodities in 1980.

So in 1980 farmers moved in and moved in big in dairy—not because it was a good deal. It was not, but it was better than the disaster that faced them elsewhere.

Now how about the coming year? Every indication is that the coming year will be far better in the price of feed grain and meat. Dairy production will very likely drop whether we continue 80 percent price supports or not.

So there you have it. The dairy farmer works very hard and for long hours. He makes a big investment. He takes serious risks. And he is immensely efficient. And yet his income is less than the minimum wage. And the proposal coming before the Senate later today is to cut

it lower. We have put a higher floor under virtually all wages in this country with the minimum wage. But the floor under the dairy farmers' income, a lower floor for the toughest kind of work, we seem about to yank out from under him.

THE PROGRAM WORKS

Mr. President, there is no reason why Congress should continue any program, dairy price support or any other—no matter what injustice we might plead—that does not work. But this program does work. As I will point out in just a minute the cost to the Government is far less than has been indicated and the consumers have benefited not suffered from this program. But this program has been designed to keep the most efficient dairy production unit in the world, the family dairy farm, in operation, and it has succeeded. The one force that could destroy the dairy farm is big, erratic, fluctuations in dairy income. Less efficient, big farms can continue through these fluctuations. With enough capital they can weather the bad times. The dairy farmer who borrows as much as he can and literally has to live from month to month cannot make it, no matter how efficient he is. Recent studies by the USDA indicate that the farm that grosses between $150,000 and $200,000 per year is the most efficient size and this is exactly the size farm that will be first to go with the abandonment of 80 percent of parity dairy price supports. The program has worked because it has sustained this efficient producer and assured the American consumer a reliable source of nature's perfect food. You may ask: Has it done this at a reasonable cost to the Federal Government—that is the taxpayer—and the consumer?

COST OF THE PROGRAM TO THE FEDERAL GOVERNMENT

Mr. President, the OMB has charged that the cost of this program last year was more than $1.3 billion and that this year it may go to nearly $2 billion. Those figures are flatly wrong. They are like saying that a little food store that grossed $500,000 enjoyed a half-million-dollar profit, ignoring the fact that the average net profit margin of grocery stores is about 1 percent, so the store actually netted $5,000, not half a million.

Sure the gross acquisition cost to the USDA may have exceeded $1.34 billion. But when we consider sell backs and the value of inventory, the cost comes to $315 million, or about one-quarter of the USDA estimate, which is about all the press has been printing, which is the real cost to the Federal Government? On the basis of more than 30 years experience with this program, we know—we do not guess—we know, the stocks that the CCC accumulates will sell back. We know the inventory will have value—not no value but value—perhaps much more value in an inflating society—as time passes.

Mr. President, I have a table here which shows my calculation and how I arrived at the cost of $315 million, to the Federal Government.

I ask unanimous consent to have that table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Report of financial conditions of CCC dairy operations: October 1, 1979–September 30, 1980

Beginning inventory	$570 million
CCC purchases	+1.262 billion
Ending inventory	−1.265 billion
Other deductions	−7 million
Net cost of disposition	559 million
Other recoveries	−2 million
Gross cost	$274 million
Storage & handling costs	+14 million
Transportation costs	+27 million
Net loss on commodity inventory operations	315 million

Mr. PROXMIRE. Mr. President, now let me point out that this $315 million is less than 0.05 percent of the U.S. Government budget, only 1.9 percent of the $16.3 billion cash receipts from sale of farm milk and 28 percent of the $1.127 billion loss to farmers from reducing supports from 80 to 75 percent of parity.

Furthermore, Mr. Chairman, the Government will in my judgment actually be ahead of the game—will be better off fiscally if it continues the 80 percent price supports. And here's why: The $1.127 billion loss to dairy farmers translated into an approximately $3.37 billion loss for the economy. The economists at the University of Wisconsin apply a multiplier factor of 5½ in computing the loss to the economy of a loss to farm income. I would apply a more conservative multiplier of 3. But a loss of $3.37 billion to the economy in income because farmers would buy fewer tractors and silos, barbed wire, and furniture for their houses would result in a revenue loss to the Federal Government of about $560 million. So the dairy price support will cost between $315 million and $500 million in 1981 and 1982 depending on many factors such as the kind of crop year we have and what effect that has on milk production. At any rate the reduction in revenues wil actually be likely to exceed the real cost of the 80 percent price support system and I honestly believe that this program will cost the taxpayers nothing.

COST OF THE PROGRAM TO THE CONSUMER

Mr. President, on any basis the dairy farmer has been providing the American consumer with the most nutritious food at a cost which has been continuously lower in relation to consumer income, in relation to wages, in relation to the cost of living generally and in relation to the cost of other food. Of course, all of this has been done under the present dairy price support program.

For example, since 1967 the cost of food has risen 162 percent, the cost of living has climbed by 154 percent, but the cost of dairy products has gone up only 133 percent.

Since 1950 the percent of disposable income spent on milk has fallen almost precisely in half. Four percent was spent in 1950, 2.1 percent in 1979.

Again since 1950 we have had the following changes in the time it takes an average American worker to buy the following quantities of dairy products. American Cheese—the time workers have to work to be able to buy half a pound has dropped from 11.7 minutes to 9.6 minutes or by 18 percent; milk, the time worked necessary to buy half a gallon has fallen from 15.8 minutes to 8.7 minutes or 44 percent; butter, the time has dropped from 29.6 to 15 minutes to earn enough to buy a pound—a drop of 49 percent, and for a half gallon of ice cream, workers in 1950 had to put in 35.5 minutes of work. Today they can buy their half gallon after only 14.6 minutes—a drop of 59 percent.

The Department of Agriculture is estimating that if the full price decrease from stopping the April 1 price support adjustment is passed along to consumers, milk prices will decline by about 7.5 cents per gallon. It may be several months, however, until the full impact of the President's proposal is felt in the retail market and there are no guarantees that the impact will ever materialize. The Community Nutrition Institute, in fact, predicts that consumer prices for milk will not decline at all, but simply will either hold constant or increase for reasons unrelated to the dairy price support program.

The retail price impact of the President's proposal must be kept in perspective. Although dairy prices are expected to increase in 1981, the estimated overall price rise is still less than the overall price increase for all food. According to the USDA, food prices generally will increase in 1981 by about 12.2 percent; dairy prices will rise for the same period only about 10.7 percent. The price of meat, an alternative source of protein, is, on the other hand, expected to rise 17.9 percent for the year. The price of fats and oils, from which alternatives to butter can be processed, are anticipated to increase 11 percent.

Most important of all, Mr. President, 32 years of this program has given the American consumer an assured, safe, sanitary source of nature's perfect food, a food essential for our children and beneficial for all of us. And, yes, the price support program is, indeed, essential because without it the most efficient of all producers—the family dairy farmer simply could not have survived the big swings in price and therefore—income.

CONCLUSION

Mr. President, I conclude by pleading with the Senate to recognize that this 32-year program which has been with few exceptions at or very near 80 percent of parity during those years has helped save the family dairy farm in this country.

I remind the Senate that the failure to make this April 1 support adjustment would have a disastrous effect on the Nation's dairy farmers. It will slash their net income by a cruel one-third. In my State dairy farmers will lose nearly $200 million in net income. Our Wisconsin economy will conservatively suffer a $600 million loss, much of which will be concentrated in our rural areas that already suffer low income. The same tragic effects will hit Vermont, Minnesota, parts of Illinois and many, many other States. And incidentally, Mr. President, is it fair to spring this on dairy farmers on less than 6 week's notice—a drastic 30-

percent cut in their net income, yanking the floor out from under them?

Second, dairy farmers deserve this adjustment. They have earned it. They probably work longer hours than any significant group in America. Those cows have to be milked twice a day, 7 days a week, 52 weeks a year, and that is just the beginning of the endless time the farmer, his wife, and his children put in.

Third, the program has worked and worked well.

Fourth, the cost of this program—if we consider the sell backs and the inventory and recognize the actual experience of 30 years under this program is less than one-twentieth of 1 percent of the budget. Furthermore, if we compute what the abandonment of this program will do in reducing Federal revenue as farm income drops, the killing of this program will actually increase our Federal deficit.

Fifth, here is a program that benefits consumers in the long run, because it assures them of a supply of milk and dairy products at a cost that has steadily declined in relation to consumer income—the cost of living, the cost of other food or on any other basis.

MAJOR DEFENSE ISSUES UNRESOLVED

Mr. PROXMIRE. Mr. President, the debate over the size of the defense budget has clouded the fundamental defense issues. Instead of focusing on the problems and requirements of our military forces, we have been mesmerized by images of real growth rates, total dollar increases, and force structures for the 1990's.

Missing from this picture are the actual problems of today—problems which cannot automatically be resolved by real growth rates and sophisticated new equipment. I refer to the issues of readiness, maintenance of the equipment we have in stock, and personnel compensation.

While it is glorious to contemplate the vision of several new nuclear aircraft carriers, is it not more important to determine how they will be manned? Should we be transfixed by the apparition of World War II battleships coming out of mothballs or should we be considering the inevitable implications this will have on our shipbuilding plans? Fewer big ships or more numerous smaller ships? More or less mobility? Will a battleship consume more resources than it makes available?

There is a strange anomaly in this budget when every tactical aircraft program is increased in size but there is virtually no discussion of the appalling readiness rates of these same aircraft. What good does it do to produce more aircraft that then sit on the ground, unable to perform the mission for which we dedicate so much of our resources? We have high-performance aircraft that cannot perform 50 percent of the time; tanks with engines of dubious reliability; tactical missiles with significant breakdown rates; equipment too complex for our soldiers to repair on the battlefield. A plane that is not airworthy or a tank with a nonfunctioning engine and no hope of repair is just the same as not having that equipment in the inventory.

And what of the military personnel responsible for keeping this equipment in good operating condition? While we have provided some inflation protection in their pay scales, we have neglected to reimburse them for the half decade of declining real income. Simply to match inflation is not enough. We must compensate these personnel for years of neglect.

Mr. President, many of these points have been highlighted in a recent New York Times editorial. I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BUYING ARMS INSTEAD OF STRENGTH

American defenses are deficient and the nation is not so poor that they cannot be set right. But that proposition does not justify the shape of President Reagan's new military budget.

The Administration is asking Congress to increase 1981 budget authority by 12.4 percent and, inflation aside, wants to go up by 14.6 percent more in 1982. After that, it contends, increases can be moderated to 7 percent a year, for a five-year program costing $1.3 trillion.

Large as it is, Mr. Reagan's budget plan understates the commitments it would make. For in rushing to take advantage of his election mandate, the President has simply raised the limits that Mr. Carter imposed on the standing new-weapons shopping lists of the Army and Air Force and added a massive Navy buildup. The lifetime costs of these weapons and manning and maintaining them, with inflation, are bound to require much greater outlays than are conceded.

The proposed buildup would not only fail to meet current readiness requirements but, without still further expenditures, would leave the built-up forces equally unready in the future. Buying new weapons and larger forces makes no sense when the Pentagon cannot deploy what it already has. Poor maintenance and personnel shortages have left a third of the armed forces poorly prepared for combat. By any definition of defense, these shortfalls should come first.

The Soviet Union keeps twice as many men under arms as the United States. It has also caught up with many American weapons technologically, notably tanks, some tactical aircraft and mobile surface-to-air missiles. But counting Western Europe's forces, China's hostility and Soviet uncertainties in Eastern Europe, and despite readiness gaps, there probably remains an overall military balance, notably in Europe. The wars to be deterred, or fought, are elsewhere.

Thus the Carter Administration wisely planned to devote most additional outlays in 1982 to readiness, especially for wars outside Europe. The Reagan plan, unfortunately, would do little more in this respect. It still defers a critical decision on a new CX transport plane. It would speed up the conversion of fast commercial ships to move a mechanized Army division rapidly to the Persian Gulf. But if yet more money is to be spent, it should be buying another set of such ships and more munitions, tactical missiles and spare parts and paying bonuses to skilled personnel who re-enlist.

By far the most questionable plan is to enlarge the Navy by one-third, from 450 to 600 ships and from 12 to 15 supercarrier task forces. That would require another 100,000 to 150,000 seamen—at a time when ships are languishing in port for lack of 20,000 petty officers. Naval officers, and former Navy men in key Administration positions, naturally think it can be done.

But is it realistic to build vulnerable supercarriers to engage land-based Soviet aircraft around Murmansk? It is land-based air power that should be rated in and out of the Persian Gulf, as long as no bases are available. Until that is done, Indian Ocean requirements probably justify refurbishing an old carrier while building a 13th modern one—provided, again, that the personnel can be recruited. But it is hard to see the value of two more supercarrier task forces, at more than $5 billion each. And refitting two World War II battleships, at $1 billion, to carry 640 cruise missiles into the Indian Ocean is a waste of money.

Congress clearly has a job to do. The public's tolerance for more defense spending has produced a flood of projects whose true cost and utility are far from proven. And the Pentagon's boasts of economy are misleading. Obviously, building new weapons in large volume rather than over time promises some production savings. But it does not promise a balanced and effective force at the earliest possible time.

FEDERAL TRADE COMMISSION FOSTERS COMPETITION, OPPOSES MONOPOLY, AND FIGHTS INFLATION

Mr. PROXMIRE. Mr. President, not all Government regulatory commissions or what they do are bad.

Some are bad. Some are good. Some of them, like the old ICC, promoted monopoly; and others like, OSHA in its early days, were excessively and ridiculously harsh and overbearing.

But others, like the SEC and the FTC, have done a superb job of promoting competition, in making the free market system work, and in fostering free enterprise. They have been efficient, hard working, and enlightened.

Stephen Chapman of the Chicago Tribune's editorial board has written about the FTC. In an article entitled "Capitalism Would Lose an Ally if FTC Were Abolished," he points out how consumers would lose a safeguard against fraud if the FTC were done in. He shows how important that agency is in enforcing competition—making the free enterprise system work. He makes a point about their activities against deceptive advertising and asks, quite properly, what national advertisers on radio, television, and in the press would do if each State had a different set of rules and regulations and differing laws affecting them every time their message crossed a State line.

The proposal to abolish the Federal Trade Commission is a very shortsighted one. Anyone who really believes in the marketplace, free enterprise, and competition should support this agency and the fine work it has done.

I commend Mr. Chapman's article to the Senate. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CAPITALISM WOULD LOSE AN ALLY IF FTC WERE ABOLISHED

(By Stephen Chapman)

David Stockman is apt to grimace at references to any federal department or agency, but mention the Federal Trade Commission

and he positively breathes fire. While he suggests cutting the budgets of other federal bureaucracies by a few million dollars, Stockman talks of abolishing the FTC outright.

The agency, he recently told the Tribune, is nothing more than a "passel of ideologues who are hostile to the business system, to the free enterprise system, and who sit down there and invent theories that justify more meddling and interference in the economy."

Says the budget director: "If you eliminated the FTC, the world would never know the difference."

When Stockman starts frothing like this, he sounds like an overheated flack for the Chamber of Commerce. Stockman has an asset indispensable to a budget director determined to cut the budget dramatically, namely his sweeping suspicion of almost everything the federal government does. Unfortunately this attitude obscures the distinctions one must keep in mind in deciding not only what the federal government should not do, but also what it *should* do.

Mr. Stockman also suffers from a popular misconception—popular at least among businessmen—that the FTC spends all of its time striving to bind the economy in the chains of socialism. In fact its primary responsibilities are perfectly consistent with unfettered capitalism: Combatting deceptive advertising and enforcing anti-trust laws.

Even the most doctrinaire advocates of laissez faire acknowledge that the government is obliged to protect consumers from fraud, and all but the most extreme see a need for laws against collusive trade practices.

One can make a good case that the FTC has used these responsibilities as flimsy pretexts for outlandish consumerist ventures. But the FTC's abuse of its legitimate powers is no more grounds for abolishing it than police brutality is a reason to disband the police department.

If the agency were closed down, its anti-trust duties would be given to the Justice Department, which currently shares the responsibility. But the federal government would be left without an agency to combat deceptive advertising. The question that arises is how states would regulate advertising media, like television, that are national in scope. The result would be a mess. In some cases a broadcaster might find himself compelled to obey contradictory regulations in different states, which probably would be found an unconstitutional obstacle to interstate commerce. Even if state laws don't contradict each other they may differ substantially. Hence a television advertiser might be forced to comply with the strictest of the 50 state regulations simply to ensure that it violates no law in any state. In this case, a single state would be able to assume a national power.

If Mr. Stockman were to consider the FTC's actual deeds, rather than its alleged crimes, he would be pleasantly surprised to learn that the agency spends much of its time and money doing things that would enrapture the most ardent disciple of laissez faire. It has pioneered efforts to eliminate state laws against advertising and price competition by doctors, lawyers, dentists, optometrists, and other professionals. These restrictions severely constrict the operations of the market, the sort of meddling businessmen usually enjoy criticizing. But in these cases, the constraints were all designed to assure the prosperity of the seller not the consumer—a state of affairs which sellers find highly agreeable.

The FTC also has proposed regulations for the funeral industry which were denounced by undertakers as interfering with the market. What the morticians didn't mention was that in most states, funeral homes are protected against the normal hazards of the market by stringent licensing laws and restrictions on advertising. The FTC's regulations were only intended to give consumers the kind of protection they would be provided by open competion.

The agency also produces well-researched studies, most of which reach conclusions that Adam Smith himself would applaud. Right after President Reagan lifted price controls on gasoline and domestic oil (as urged by David Stockman), the FTC released a study arguing that the controls had actually held prices above what they would have been in an uncontrolled market. Anyone less paranoid than Mr. Stockman might take this as evidence that the agency is not purely a tool of fanatics hell-bent on subverting American capitalism.

If truth be told, the FTC has proved more royal than the king on some economic matters. In 1976, for example, it published a thick report demolishing the claims of the U.S. steel industry that illegal dumping by foreign competitiors was at the root of its financial woes. The Carter administration ignored the evidence and imposed a "trigger price" system on imported steel, whose purpose and effect was to keep out low-priced competition. So far, Mr. Reagan has had no trouble reconciling his free-market principles with this particular form of government meddling. Last fall the FTC helped to block import quotas on Japanese cars by [illegible] before the International Trade Commission that the cost would be frightfully [illegible] also have been ignored in the Reagan camp, where Transportation Secretary Drew Lewis has been wailing of the need to reduce imports from Japan.

The dirty little secret about the FTC's unpopularity is that many people in business despise it mostly because it wants to make them compete in open markets. In many of its most controversial battles, the FTC has demanded that the government stop stifling competition and its adversary has defended the intervention.

Mr. Stockman is mistaken. If the FTC were abolished, a lot of people would notice. Consumers would lose a safeguard against fraud; small businesses would lose some protection against anti-competitive practices by large corporations; and assorted business groups would lose an obstacle to their manipulation of government power to enrich themselves. And, what should be most important to Mr. Stockman, capitalism would lose an ally.

THE DREAM OF RAPHAEL LEMKIN

Mr. PROXMIRE. Mr. President, I call your attention to the memory of Dr. Raphael Lemkin, a prominent jurist from prewar Poland who coined the term "genocide" and was responsible for making it part of international law.

He was one of two survivors out of a Polish Jewish family numbering 70 persons that was decimated by the holocaust. Escaping Poland, he made his way to the United States where he was appointed to the U.S. Board of Economic Warfare and later became a special adviser on foreign affairs to the War Department. His major work, "Axis Rule in Occupied Europe," was designed to provide "undeniable and objective evidence regarding the treatment of the subjugated peoples of Europe by the Axis powers." It was in this book that Dr. Lemkin applied the term "genocide," which he had compounded from the Greek genos, meaning race, and the Latin suffix, cide, meaning killing. He was also a major factor in winning the support of the Western Powers for the Genocide Convention and having it ratified by the United Nations General Assembly. This was a remarkable accomplishment by a single individual who did not represent any government, but whose relentless struggle for a great idea has resulted in tremendous progress toward the fulfillment of a noble dream.

When Raphael Lemkin died 21 years ago, over 80 countries had ratified the Convention. That number today stands at 85. Yet, the one country which Dr. Lemkin looked to for moral leadership in the postwar era, the United States of America, continues to balk at ratification.

It would be fitting testimony to an extraordinary man and to our cherished tradition were the United States finally to join the contracting parties and ratify the Genocide Convention.

S. 718—"WORKFARE" BETTER THAN WELFARE

Mr. PROXMIRE. Mr. President, today I am introducing legislation that will require all able-bodied persons of working age—except mothers with small children—to work as a condition of receiving welfare. The only legitimate objection I can imagine to this bill will come from those who will say, "Where are the jobs?" For more than 40 years, Milwaukee County has provided a resounding answer to that objection.

If Milwaukee County, one of the major metropolitan centers of this country, can do it through depressions and recessions, why cannot the whole country do it?

I have personally attended meetings where Milwaukee County officials assigned jobs to welfare recipients. What jobs? Cleaning the streets and parks, assisting policemen, helping clean and maintain public buildings, and many other similar jobs. I have yet to see an American city anywhere which could not use a great deal of this cleaning up, fixing up, and supplementary police work.

These welfare recipients buy their own work clothes, pay for their own transportation to work, and, in Milwaukee, earned less than a minimum wage. But I heard few complaints. They were glad to get a job. And certainly the discipline of reporting to work regularly to "earn" their welfare check provided a discipline and a dignity that did them more good than harm.

My bill requires the States to extend the efforts of the work incentive and similar programs to help employable AFDC recipients to obtain job skills and work experiences so that they may quickly become self-supporting.

PLAN CAN AND WILL WORK

My workfare program would operate in the following way:

First, only those people who are required to participate under the current WIN program would be covered. This exempts children under age 18 and mothers with children under the age of 6.

Second, anyone already working 24 hours a week or more in a regular job or participating in a full-time WIN

training or employment program would also be exempt.

Third, the States and localities would find the jobs and assign people to them; but all the jobs will have to meet Federal safety and health standards.

Fourth, participants would work off their welfare checks at the Federal minimum hourly wage rate.

UP TO 24 HOURS OF ASSIGNED WORK PER WEEK

Fifth, a limit of 24 hours of assigned work per week plus up to 8 hours in required training would be established. However, no welfare recipient would be required to work longer than it takes to "pay off" his or her welfare grant.

Sixth, anyone refusing to work would be excluded from the calculations made to determine the size of the family's welfare grant.

It is clear that my program exempts many AFDC recipients and protects them against being exploited in terms of wages, hours, and conditions of employment.

I have seen the operation of Milwaukee County's general assistance program which includes workfare, aggressive job counseling, and job information supplied by the outstanding Wisconsin Job Service. And I can report in spite of some problems, it worked. Similar approaches involving general assistance and workfare have been basically successful in more than a dozen other States.

SAVE PART OF CURRENT $15 BILLION COST

How much of the $8 billion in Federal Government and the $7 billion of State and local money now budgeted for AFDC payments this coming year will be saved, I cannot say for certain; but I firmly believe that my bill is a good place to start if we are to move in the direction of replacing welfare with workfare.

I am pleased to learn that President Reagan will shortly offer his own ideas on workfare to Congress. I expect that after examining the various proposals on workfare we will enact some form of this important welfare reform this session.

I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 718

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 409(a) of the Social Security Act is amended by striking out all that precedes paragraph (1) and inserting in lieu thereof the following:

"SEC. 409. (a) For the purpose of encouraging, through community work and training programs of a constructive nature, the conservation of work skills and the development of new skills for individuals who have attained the age of 18 and are receiving aid to families with dependent children, under conditions which are designed to assure protection of the health and welfare of such individuals and the dependent children involved, each State plan approved under this part shall require that aid to families with dependent children paid for any month with respect to a dependent child (including payments to meet the needs of any relative or relatives, specified in section 406(a), with whom such child is living) shall be made in the form of payments for work performed in such month by any one or more of the relatives with whom such child is living, except as otherwise provided in this section. Such work shall be performed for the State agency or any other public agency under a program administered by or under the supervision of such State agency. The State plan must provide for State financial participation in such aid, and must include—".

(b) Section 409(a)(1)(B) of such Act is amended to read as follows:

"(B) payments for such work are at rates not less than the minimum wage provided under Federal law for the same type of work;".

(c) Section 409(a)(1)(G) of such Act is amended by inserting before the semicolon at the end thereof the following: ", and if any such relative refuses to perform any such work without good cause, as determined after opportunity for a fair hearing, aid shall be denied in the same manner as aid is denied for a refusal to participate in the work incentive program (as determined under section 402(a)(19)(F))".

(d) Section 409(a)(1) of such Act is amended—

(1) by striking out the word "and" at the end of subparagraph (F); and

(2) by adding at the end thereof the following new subparagraphs:

"(H) any such relative who spends 24 hours or more during a week in employment, or who participates in a full-time work incentive program established under section 432 during a week, shall not be required to participate in such community work and training program during such week;

"(I) any such relative shall not be required to perform such work, or to perform such work and participate in the work incentive program under section 432, for more than a total of 24 hours per week, except that, in the case where at least 8 hours per week are spent in a training program, the limit shall be a total of 32 hours per week;

"(J) any such relative shall not be required to perform such work if such relative is—

"(i) a child who is under age 18 or attending school full time;

"(ii) a person who is ill, incapacitated, or of advanced age;

"(iii) a person whose presence in the home is required because of illness or incapacity of another member of the household;

"(iv) a mother or other relative of a child under the age of 6 who is caring for the child; or

"(v) the mother or other female caretaker of a child, if the father or another adult male relative is in the home and not otherwise exempt from participation in the community work and training program and has not refused without good cause to participate in such program;

"(K) any such relative shall not be required to perform such work at a site which is so remote from his home that his effective participation is precluded; and

"(L) any such relative shall not be required to perform such work if the amount of aid received under the plan by such relative (or the dependent child) is so small that requiring participation in the community work and training program would not be appropriate;".

(e) Section 409(a) of such Act is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by redesignating paragraph (6) as paragraph (7); and

(3) by inserting after paragraph (5) the following new paragraph:

"(6) provision for utilization of, and coordination with, work incentive programs established under part C, and programs established under the Comprehensive Employment and Training Act of 1973, to insure that maximum effort is made to obtain employment for such relatives performing such work; and".

(f) Section 409(b) of such Act is amended by striking out "In the case of any State which makes expenditures in the form described in subsection (a) under its State plan approved under section 402, the" and inserting in lieu thereof "The".

(g) Section 402(a)(8)(A)(ii) of such Act is amended by inserting after "section 432(b)(2) and (3)" the following: ", or section 409".

(h) Section 402(a) of such Act is amended—

(1) by striking out "and" at the end of paragraph (29);

(2) by striking out the period at the end of paragraph (30) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(31) provide that the State shall have in effect a program of community work and training in accordance with section 409.".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by the first section of this Act shall be effective with respect to payments under part A of title IV of the Social Security Act for calendar quarters beginning more than 180 days after the date of the enactment of this Act.

(b) In the case of a State plan approved under part A of title IV of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by the first section of this Act, the State plan shall not be regarded as failing to comply with the requirements of such part solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

SEC. 3. Section 204(c)(2) of the Social Security Amendments of 1967 (Public Law 90-248) is repealed.

SENATE RESOLUTION 97—PROXMIRE GIVES GOLDEN FLEECE OF THE MONTH AWARD FOR MARCH TO ARCHITECT OF THE CAPITOL

Mr. PROXMIRE. Mr. President, I am giving my Golden Fleece of the Month Award for March to the office of the Architect of the Capitol for developing plans to build up to six new House and Senate office buildings that would cost at least $500 million to construct. These plans, not yet made public, are at the Government Printing Office and will be unveiled in May or June.

Unless we stop this proliferation of House and Senate office buildings, we will end up with one office building for every Member of Congress.

Congress has already spent $450,000 to develop these plans, which are the third phase of a three-part "master plan" for Capital expansion. In addition to awarding a Golden Fleece for these extravagant plans, I am introducing a resolution to insure these plans, at least those for the Senate, never make it pass the planning stage.

KILL PLANS NOW

It is vital that these plans be killed now, at the very beginning, before the money has been committed, construction has begun, and it is too late to turn back.

In the past, the taxpayer has been stuck with unnecessary buildings because Congress failed to act in time.

These plans—which include another new Senate office building—actually two buildings, connected by an overpass—at least five new House office buildings, an office building for the Administrative Office of the U.S. Courts, and an underground parking garage with space for 500 cars beneath the East Plaza of the U.S. Capitol—are based on the assumption that congressional staffs will continue to grow. To stem the tide of Senate staff proliferation and future office building construction, I am introducing a resolution that would place a ceiling on the number of full-time Senate employees and prevent the construction of any new Senate office buildings.

Congress shares the blame for this fleece for not reining in the Architect. The authorization and appropriation that led to the development of these plans was the 1976 legislative appropriations bill. That legislation said nothing about plans for new House and Senate office buildings. Its emphasis was on a master plan for the Capitol Grounds. While I voted against that appropriation, I am sure those who voted for it never dreamed it would spawn such a grandiose proposal.

The fact that the Architect of the Capitol has even drawn up a map showing exactly where each of these proposed buildings would be located shows those plans are not so tentative after all. The proposed office buildings would be scattered on sites throughout Capitol Hill from Union Station to the railroad trestle southwest of the Rayburn House Office Building. It is clear the Architect intends to make Capitol Hill a monument to the Congress unwillingness to check the growth of its own bureaucracy.

BASED ON ASSUMPTION OF STAFF GROWTH

The Architect based these plans on the assumption that congressional staffs will continue to grow at a rate of one-half the historical rate of the last 20 years. And that bureaucracy has indeed grown and grown and grown.

My resolution would place a ceiling on full-time Senate employment at 6,550 and a ceiling on those employees of the Architect of the Capitol, working either directly or indirectly on Senate operations, at 822, for a total ceiling of 7,372. The resolution would also prevent the initiation or implementation of plans, drawings, architect engineering, design work, site preparation or acquisition, or actual construction of a new Senate office building after the date of the adoption of the resolution.

This resolution takes into account the 10-percent reduction in committee staffs that the new Republican majority of the Senate made as soon as it came to power. The Republicans are to be commended for that action. We Democrats should have done the same thing a long time ago.

The Architect of the Capitol estimates that up to 5,000,000 additional gross square feet of office space will be needed to accommodate the projected growth in staff. At the current rate of approximately $100 per square foot, the plan would cost taxpayers at least $500 million. We can expect the actual cost of this construction would be three to five times that estimate. Look what happened with the Philip A. Hart Senate Office Building—from an original estimate of $48 million, the cost of that building has mushroomed to more than $137 million.

HOPE OTHER BODY WILL ACT

Due to the comity shown by one House for the other, my resolution does not affect the staff of the House of Representatives or those employed jointly by both Houses. I am preparing a further joint resolution to control the latter and I am sure any number of House Members are prepared to introduce their own resolutions to limit the growth of House staff and prevent the construction of additional House office buildings.

In a time of severe budget restraint—when medicaid and aid to the handicapped are being cut, when the Wisconsin dairy farmer must take a one-third cut in his income—it is disgraceful to even consider the construction of additional Senate and House office buildings. By putting a ceiling on Senate employment and saying "no" to future Senate office building construction, we will be sending a signal to the American taxpayers that the Senate of the United States is not exempting itself from the tough economy measures that must be imposed in order to bring Federal spending under control.

I send to the desk a resolution, on behalf of myself and the Senator from Arizona (Mr. DECONCINI) and ask that it be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution follows:

S. RES. 97

Resolved, That after the date on which this resolution is adopted, the total number of full-time officers and employees of the Senate of the United States and full-time officers and employees in the Office of the Architect of the Capitol who are assigned to the Senate shall not exceed 7,372. The Committee on Rules and Administration shall establish rules and regulations for the equitable allocation among the offices and committees of the Senate and the Office of the Architect of the Capitol of the total number of full-time officers and employees established by the preceding sentence.

SEC. 2. After the date of adoption of this resolution, no office building shall be constructed for the Senate, and no plans, drawings, architectural engineering work, design work, or site preparation or acquisition for such an office building shall be initiated or implemented. The preceding sentence does not apply to the construction and completion of the Philip A. Hart Senate Office Building.

RECOGNITION OF SENATOR EAGLETON

The PRESIDING OFFICER. The Senator from Missouri.

PRESIDENT REAGAN'S GUNBOAT-SHOWBOAT DIPLOMACY IN EL SALVADOR

Mr. EAGLETON. Mr. President, I rise this afternoon to speak to the issue of our growing involvement in the civil war in El Salvador. For several reasons, I am compelled to join the public debate over President Reagan's decision to increase the U.S. presence there.

I wish to address some of the comparisons between the situation in El Salvador and the tragic memories we all share of our early involvement in Vietnam. Unless we learn to read history accurately, it is difficult to learn from it.

I am concerned that the aid we seek to give the fragile government of President Duarte might instead lead to its downfall.

Finally, I rise to take issue with President Reagan's apparent decision not to report fully to the Congress on the matter of El Salvador as required by the provisions of the War Powers Resolution and the Arms Control Act.

Let me state at the outset of my remarks that I am not opposed to the United States taking strong action to protect its vital interests when they are threatened. I do not oppose American support of democratically elected governments which are in danger of collapsing under the weight of Communist-inspired or Communist-supported terrorist activity. I do not rise today to state that we are wrong in our support of the ruling junta in El Salvador and that we should turn our backs on the problems facing that nation.

Rather, I am uncomfortable with the manner in which we are rapidly escalating our involvement and the manner in which the Reagan administration is presenting its proposed initiatives as a fait accompli. I sense, in this unfolding venture, that there are motives that go far beyond any reasonable appraisal of the threat to, or calculation of, our national interest.

Mr. President, there is not a great logistical or geographical similarity between the situation now facing us in El Salvador and that which confronted us in the early 1960's in Vietnam. In my opinion, the dissimilarities are far more striking.

First, let us talk about location. During the early days of our involvement in Southeast Asia, Vietnam seemed to be a small, little-known nation lost in some jungle on the other side of the world. El Salvador, on the other hand, is a Latin American neighbor that is closer to Washington than President Reagan's ranch in California.

Second, there is a difference in public awareness. While the story of Vietnam flickered slowly to life on the evening network news, events in El Salvador are consistently in the headlines here.

Third, there is a difference in Communist access to their objectives. In Vietnam, the Vietcong rebels were in extremely close contact with their Communist sponsors. The country was situated in the immediate sphere of influence of Communist North Vietnam and her allies. El Salvador, however, is right here in our own hemisphere. With the notable exception of Cuba, the leftist guerrillas are isolated from their sponsors.

"Esmeralda"—the code name Salvadoran leftists have given their principal

arms supplier, Cuba—is of key concern to the United States.

It is important to note here that Cuba is not adjacent to El Salvador as North Vietnam was to South Vietnam. The Caribbean Sea and the nations of Guatemala and Honduras block the direct access of Cuba to El Salvador.

Fourth, there is an additional matter of geography. If one were asked to pick one aspect of the Vietnam war that contributed most to its prolonged nature, the ease of Communist resupply efforts would be a good candidate.

The principal Viet Cong resupply path, the dreaded Ho Chi Minh Trail, has no counterpart in Central America. Indeed, if current intelligence estimates are to be believed, the flow of arms through Nicaragua has been all but choked off.

There is one similarity that I do find terribly bothersome. Our experience in Vietnam was one of gradual escalation. Our support to Vietnam began as a trickle, and U.S. involvement literally crept along, until it reached the level of involvement so graphically depicted in film footage which the networks played nightly throughout the late sixties and early seventies. Again, where the Vietnam analogy holds is in the manner in which our Government seems to be making a potentially fateful commitment to be involved militarily with a fragile foreign government.

Mr. President, I would suggest that there is yet another ominous comparison between El Salvador today and an event of our recent past—the Ford administration's handling of the *Mayaguez* crisis.

If you recall, on May 12, 1975, a U.S. merchant vessel was fired upon and boarded by Cambodian naval forces and towed to a Cambodian port. For the next 3½ days, the United States mounted a major military operation against Cambodian forces on the Cambodian mainland and an offshore island territory claimed by the Cambodians. In this attempt to rescue ship and crew, 39 *Mayaguez* crewmen were eventually rescued as the result of the combat operation. Regrettably, 41 American servicemen lost their lives during it.

Notwithstanding the costly nature of the rescue attempt, public reaction to the incident was immediate and favorable. I recall a New York Times headline story calling the incident a "domestic and foreign triumph," noting that resolution of the *Mayaguez* crisis was a sign of U.S. resolve. Whatever the failure of the military effort, the success of President Ford's attempt gave his Presidency a substantial lift. In my opinion, President Ford wanted a foreign policy knockout and an image-enhancing public relations spectacular. He got it. Nevertheless, the price he paid for it was enormous.

I believe that President Reagan would like to score a "knockout" with attendant image enhancement in his first foreign policy initiative. I believe he has seized upon El Salvador as his opportunity. He appears to view El Salvador as an early and important proving ground for his announced get-tough stance against Communist-inspired terrorism.

Just as the *Mayaguez* crisis proved to be an opportunity to President Ford to show his resolve, so does the situation in El Salvador offer President Reagan the opportunity to flex his muscle. Many of the circumstances surrounding the two events are, of course, different. Nonetheless, the opportunity to overreact is disturbingly similar.

Whatever his motives, President Reagan's decision to select El Salvador as his proving ground is a dangerous one. I fear that in his rush to increase aid to the ruling junta, President Reagan will so "Americanize" the war as to possibly erode the fragile support of the Duarte government. A strong revival of "Yankee go home" fever is possible. If the Reagan administration miscalculates, however slightly, in its estimation of the impact of its policy on El Salvador's general populace, the White House then runs the risk of polarizing public sentiment around the causes of the extreme left and the extreme right. If the fragile Duarte government loses a significant element of support to either camp, the reform-minded Christian Democrats might well be swept from power by a rightist coup or leftist takeover.

A strong resurgence of "Yankee go home" fever might be just the catalyst that both the right and the left are looking for to disrupt the delicate political balance in El Salvador.

Members of the Reagan administration have called the Communist intrusion into the civil war in El Salvador a test of the Monroe Doctrine. The doctrine is revered in history as the coming of this Nation's manhood against the colonial powers of Europe. But it also laid the foundation for a long period of "gunboat" diplomacy in this hemisphere which implanted feelings of suspicion and resentment of "American imperialism." I believe this is dangerous. Given the media attention devoted to the Reagan initiatives, we will witness not only a resurgence of "gunboat" diplomacy, but a further isolation of the pro-American governments in the region. We all know that terrorism in Latin America is not confined to El Salvador. Playing the role of the hemispheric policeman, do we want to give guerrilla forces throughout the region the rallying cry of "Yankee imperialism?"

In 1794, President Monroe made the point that the Monroe Doctrine "setting forth the country's interest in Latin America did not alter the constitutional balance in regards to warmaking." In doing so, he acknowledged that his bold new approach to hemispheric policies did not diminish the role of Congress to determine the matter of declaring war. If these were not enough, then Secretary of State John Quincy Adams stated that in the event of an attack by a colonial European power on a nation in Latin America, the Monroe administration's position would be that "the power to determine our resistance is in Congress." If there are those in the new administration who would use the argument that the Monroe Doctrine gives the President the right to take unilateral actions in the matter of El Salvador, I would counsel them to study closely the spirit of the doctrine and the history of its application.

Unilateral intervention by the United States is not an expression of the Monroe Doctrine. It is an expression of the Theo- States is not an expression of the Monroe Doctrine. That corollary instituted U.S. gunboat diplomacy in Latin America. I perceive President Reagan as possibly instituting his own corollary to the corollary. He adds his own showboat diplomacy to Teddy Roosevelt's gunboat diplomacy.

I find it disingenuous in the extreme for the administration, having created a media hyp over the crisis in El Salvador, now to try to urge the press to downplay events in El Salvador. The administration wants, at its own whim and caprice, the right to raise or lower showboat diplomacy in El Salvador.

The administration's strategy of alternately inflaming and defusing the media perhaps, as much as anything else, causes one to question the motives of the administration in the formulation of its gunboat-showboat diplomacy in El Salvador.

If Jose Napoleon Duarte—one of the few political leaders with a legitimate claim to broad support among the people—is to survive politically, he must not be made the very caricature of an American puppet. It is just because Duarte emerged the victor in one of the few fairly honest elections held in El Salvador that the democratically elected heads of state in Costa Rica and Venezuela offer him support. All of Central America is certainly watching to see how President Duarte responds to the announced Reagan initiatives.

Expanded U.S. involvement in El Salvador is indeed a delicate matter. It is clear that the United States should proceed cautiously in this matter and do so only after a collective decision has been reached. The Congress need not be viewed as an impediment to the efficient pursuit of our foreign policy objectives in El Salvador, but rather as a partner in the formation of foreign policy. This leads me to my final point.

Mr. President, I believe that an additional disturbing aspect concerning El Salvador is the conscious White House decision not to consult fully with and report to the Congress on this matter as required by the War Powers Resolution and the Arms Control Act.

The consultation provision of the war powers resolution calls for the President "in every possible instance" to "consult with the Congress before introducing U.S. Armed Forces into situations where imminent involvement in hostilities is clearly indicated by the circumstances * * *." While it might be argued that the frequent State Department briefings of Members of Congress and their staff constitute "consultations." the reporting provisions of the resolution are specific with respect to the form and timing of congressional consultations.

Section 8(c) defines the congressional intent with respect to the term "introduction of U.S. Armed Forces." The definition is purposely broad and intended to include a spectrum of situa-

tions. I speak with some authority on this matter as I was the author of this specific provision. It reads:

For purpose of this joint resolution, the term "introduction of United States Armed Forces" includes the assignment of members of such armed forces to command, coordinate, participate in the movement of, or accompany the regular or irregular military forces of any foreign country or government when such military forces are engaged, or there exists an imminent threat that such forces will become engaged, in hostilities.

The administration has acknowledged the existence of hostilities in El Salvador and has sought to respond forcefully.

Let us not lose sight of reality as we listen to the administration's lawyers explain why the war powers resolution does not apply in the case of El Salvador. These lawyers suggest that our Armed Forces are being introduced as "training teams" and that they will be "garrisoned." Let us not split hairs over the sematical difference between "training" and "advising." And let us not delude ourselves that our soldiers will be safe in a "garrison" in a country which is at war with itself.

Are our Armed Forces advisers? Is there a very real prospect that our present commitment could grow into a deeper military involvement in El Salvador?

Can any of my colleagues honestly answer any of these questions in the negative? Can this proud institution ignore the realities and be snookered by the hair-splitting interpretations of the executive branch? This is not a question of whether or not Senators believe we should be involved militarily in El Salvador. It is a question of fulfilling our constitutional responsibilities to participate in that decision.

As one of the three authors—Javits, STENNIS, and EAGLETON—of the original Senate War Powers Act, I can testify as to the intent of Congress with respect to the provisions which are at issue here. These provisions defining "imminent hostilities" and "advisers" were retained in the final bill, though other provisions were dropped, much to my displeasure. I testified before the Foreign Relations Committee in 1971 on the meaning of these words. There was never any doubt in my mind or that of Senator Javits—who was a member of the committee—as to what our intent was. We described "imminent hostilities" as hostilities which were "reasonably possible."

It was very clear to Senator STENNIS when he stated:

U.S. military personnel should not engage in combat, or serve in significant numbers as advisers to foreign armies engaged in combat, prior to congressional approval. (Congressional Record of May 11, 1971.)

It was clear that an adviser was an adviser if he were sent into a combat zone to advise, coordinate, or participate with troops engaged in or about to engage in combat. To turn around in 1981 and label these men as "trainers" is to utilize clever semantics so as to subvert the meaning of the law.

Mr. President, I ask unanimous consent that a footnote on this subject be printed in the RECORD at the conclusion of my main remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. EAGLETON. Members of Congress should not have to anticipate every clever interpretation of the laws we write. We must assume that our intent will be carried out in good faith by reasonable and responsible officials. I ask my colleagues, is there a reasonable possibility of hostilities in El Salvador at this time? Of course, there is.

Now is the time to consider the consequences of our action. Now is the time for Congress to play its constitutional role in determining whether our Nation will make a commitment which might lead to war. Now is the time for the safeguards built into our constitutional system to begin to work—not after the flag is committed.

Let us assume for a moment that the Salvadoran junta, a coalition of military and Christian Democratic leaders put together with a hope and a prayer, should split apart, with the Christian Democrats and Duarte finally succumbing to rightists in the military. What does the United States do then? We will already have made a substantial investment of money and prestige and manpower in El Salvador. We will have already made this small country a test case for American willpower and determination. Once the flag is committed, would our own public want to see us "turn tail and run"—to use an old Vietnam expression. Or, more likely, would we then feel obliged, in the words of Walter Lippman, "to make the big mistake public opinion insists upon" and engage American forces in a foreign civil war?

I can only hazard a speculation as to why President Reagan is reluctant to live up to the war powers resolution and the Arms Control Act. I can think of two possible motives: First, he does not want to state for the record the present nature of our involvement in El Salvador and its high risk of expansion; and second, he does not want to trigger the substantive requirements of the war powers resolution, for example: section 4(a) and the following sections.

If the White House finds fault with my arguments on the specific provisions of the war powers resolution, I would direct its attention to section 21(c) of the Arms Control Act.

As part of the fiscal year 1981 Foreign Assistance Authorization Act, Congress expanded the provisions of section 21(c) to prohibit the sale of defense services involving training and advising that might engage U.S. personnel in combat situations.

As a complement to the war powers resolution, section 21(c) concentrates on the personal risks to civilian and military personnel in affected areas. Unlike the war powers resolution, section 21(c) is triggered not just when personnel are introduced into a country where hostilities have broken out.

Section 21(c) reads in part:

(c) (1) Personnel performing defense services sold under this Act may not perform any duties of a combatant nature, including any duties related to training and advising that may engage United States personnel in combat activities, outside the United States in connection with the performance of those defense services.

The statute further requires that—

Within 48 hours after the outbreak of significant hostilities involving a country in which the United States personnel are performing defense services . . . the President shall submit to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, . . .

The Reagan administration has purposely downplayed the significance of the number of advisers it intends to supply El Salvador and the missions they will perform. In recent newscasts, commentators have described some of the advisers as being "Green Berets." While some will argue that this is not technically true, what does appear as fact is that there are advisers being dispatched that are skilled in the same counterinsurgency techniques employed by the Green Berets in Vietnam. Call them what you will, these guys are not helicopter mechanics and, in an ever-changing environment, their role in El Salvador may be dramatically altered.

Now that I am on the subject of the ever-changing conditions in El Salvador, I would like to raise another issue—that of the American forces assigned to the OAS peacekeeping force on the Honduras/El Salvador border. While I appreciate that they are in place for quite different reasons—namely as a result of the 1969 border skirmishes between the two countries—I am concerned about their possible involvement in hostilities.

It is my understanding that we have a force of some nine military men and two U.S. helicopters actively patrolling what amounts to a border demilitarized zone. Does not logic dictate that the spreading violence in El Salvador places these troops on the threshold of involvement? Would not the administration find itself in a difficult situation should we lose an American helicopter to hostile fire?

I find it ironic that in his opening remarks before the Senate Foreign Relations Committee confirmation hearings, Secretary of State Alexander Haig called for an "effective partnership" to be restored between the President and Congress. By "partnership" he stated:

I do not mean occasional retrospective reporting. I mean active consultation, exchange of ideas and proposals in a timely manner, in an atmosphere of mutual respect, trust, and confidence, recognizing the special role of the Senate itself.

I find it ironic that being so assured, I stand here today calling for consultation and reporting in full compliance with the provisions of the War Powers Resolution and the Arms Control Act.

At a later point in the confirmation hearings, in response to a question put to him by Senator PERCY, Secretary Haig stated his desire—

To assure this committee that I intend to live by the letter of the law and the spirit of the War Powers Resolution, and I see no difficulty in doing so.

Given this, I am at a loss as to why the administration is reluctant to openly

consult with and report to the Congress on this matter.

If it be truly the intent of the Reagan administration to work closely with Congress in matters of foreign policy, then I suggest, in closing, that President Reagan carefuly review the wisdom of his actions. It would be unfortunate indeed, if, in his haste to make a "tough guy" image for himself and his administration by his handling of the El Salvador "crisis," President Reagan were to rekindle the feud over congressional and executive foreign policy responsibilities.

To some, my concern over the failure of this administration to comply fully with the requirements of the War Powers Resolution may seem like a lawyer's quibble. It is not. It goes to the heart of the matter. The War Powers Resolution was intended to give Congress an effective role in matters that involve commitment of U.S. forces to combat. Only with full reporting and full consultation can Congress act as a check against foreign policy adventurism which, whatever other objectives it may serve, is not in our best national interest. If full reporting does not take place in the early stages of a commitment, but waits until the situation ripens into a fait accompli, then Congress will have been denied its intended voice in the most momentous of all national decisions.

I yield the floor.

EXHIBIT 1

FOOTNOTE: My testimony before the Senate Foreign Relations Committee on what is now Section 8(c) is found at pp. 198–199 of *War Powers Legislation: Hearings Before the Committee on Foreign Relations; United States Senate; on S. 731, S.J. Res. 18 and S.J. Res. 59.*

EAGLETON: Should hostilities be defined? Should the continuance of a secret air war or the deployment of U.S. troops to world hot spots or the assignment of U.S. advisers to foreign combat troops in the field require affirmative congressional authorization? I personally believe so.

And by defining hostilities Senate Joint Resolution 59, unlike S. 731 specifies the areas in which affirmative congressional action is necessary. Obviously hostilities include land, air, or naval actions taken by the Armed Forces of the United States against other armed forces or the civilian population of any other nation. But Senate Joint Resolution 59 is more specific. It includes the deployment of U.S. forces outside the United States under circumstances where an imminent involvement in combat activities is a reasonable possibility. It also includes the assignment of U.S. soldiers to "accompany, command, coordinate, or participate in the movement of regular or irregular armed forces of any foreign country when such foreign armed forces are engaged in any form of combat activity."

There is well-founded precedent for such limitations. In the absence of limiting congressional legislation, Presidential power to move Armed Forces of the United States in international waters and to station them on territory of our allies has generally been accepted, except where such action could reasonably be expected to lead to hostilities. Only once has this principle flagrantly been abused. In 1846, after the annexation of Texas, President James Polk ordered American troops to enter the disputed territory between the Nueces and Rio Grande River. Hostilities immediately broke out and Congress thereafter declared war against Mexico. However, some 18 months later the House of Representatives concluded that the President had unconstitutionally begun the war and, in effect, Polk was justly censured.

Presidential power to move the Armed Forces of the United States is not, and should not, be viewed as extending to place American men in situations where combat is almost inevitable.

And, as Vietnam has illustrated, limited deployments of U.S. military advisers to countries where combat activities are in progress or could be expected to commence shortly have become increasingly more dangerous in an era when brush-fire wars and guerrilla warfare are becoming even more common.

Senate Joint Resolution 59 specifically requires that both Houses of Congress concur in any Presidential decision to deploy U.S. troops or advisers to trouble spots or combat areas where involvement in hostilities is a reasonable possibility.

I would call to the committee's attention the chart, which indicates the circumstances under which the President could act without specifically authorizing congressional action.

Mr. ROBERT C. BYRD. Mr. President, I want to commend the distinguished Senator from Missouri for giving us his views on the issue of U.S. policy toward El Salvador, particularly as it raises questions about the war powers resolution.

The Senator's views in this regard are of the utmost importance because of the major role he played in fashioning the war powers legislation.

For my own part, I strongly believe that the message he has delivered today is both appropriate and essential.

We must understand that when American military personnel are sent into a situation like El Salvador, consultation between the executive and legislative branches should be the name of the game. So far, there has been precious little of it. Rather, we on Capitol Hill have simply been informed of decisions already taken by the President and his executive branch colleagues.

Mr. President, I should hope that Congress and the administration will be able to work together on the issue of El Salvador. We all share the same goal and objective. But to get there, we need consultation and cooperation between the Hill and the White House.

This is the message which the able Senator from Missouri has delivered today and, again, I commend him for it.

The PRESIDING OFFICER (Mr. WEICKER). The Senator from California is recognized.

NUCLEAR PROLIFERATION THREATENS U.S. NATIONAL SECURITY INTERESTS

Mr. CRANSTON. Mr. President, I have a number of very serious concerns regarding the dangers of nuclear proliferation in several key nations of the Middle East and South Asia, including Iraq and Pakistan. We should all be deeply troubled by the prospect of unstable, and in some cases extremely radical regimes in this region producing or coming into possession of nuclear weapons.

Our Nation's leadership in combating the proliferation of nuclear weapons should be a central component of our national security program. We have a vital interest, particularly in the Middle East and South Asia, in averting regional nuclear arms races which could endanger our allies or could lead to a nuclear exchange and draw the superpowers into a direct military confrontation. We also have a critical national interest in limiting the possibility that subnational terrorist organizations—such as the PLO—or nations which routinely employ terrorism to pursue their aims, such as Iraq and Libya, might come into the possession of nuclear weapons.

I have recently received information regarding several new nuclear developments in the Middle East and South Asia which trouble me deeply.

I have also questioned Assistant Secretary of State-designate James Malone, who cited in an open session of the Foreign Relations Committee yesterday, Iraq's highly sensitive "reprocessing facility." I have checked carefully to make certain that none of the facts which I am disclosing today would jeopardize U.S. intelligence sources and I am prepared to share my personal assessments based on information I have received from within the executive branch and from various published reports. This information has been verified to my satisfaction.

First, it is apparent that the Pakistanis—through continued purchases of sensitive hardware and dual-use technology in Europe—have achieved swift progress toward making their new small-scale reprocessing plant operational, and have continued development of larger reprocessing and enrichment plants which could also be used in weapons production. Second, the Iraqi nuclear program is continuing its determined drive toward attainment of the capability to produce nuclear weapons through the use of sensitive French and Italian technology, highly enriched uranium fuel from France, and more than 100 technicians from each of these nations. And third, Indian officials are now publicly threatening that they may soon begin unauthorized reprocessing of United States source nuclear fuel to extract plutonium.

The Government of Pakistan is apparently pressing ahead to a point where it will most likely have the capability and the materials for fabricating a number of nuclear weapons by the end of 1982. It is clear that the Pakistani efforts to divert commercial nuclear technology for military purposes continues to benefit from imports of dual-use technology from West European countries and from extremely sensitive technology gained over the past several years from West Europe, both through commercial purchases and clandestine diversion.

My information also establishes that Iraq, though at the present time party to the Nuclear Nonproliferation Treaty, is embarked on a full-scale program which appears designed to develop the capability to extract plutonium suitable for weapons purposes.

There is no evidence that actual bomb design has been done in Iraq. But Iraq is demonstrating graphically the danger that radical oil powers will use the "oil weapon" to blackmail other nations into

imprudent sales of sensitive nuclear technology and cooperation in its use.

Administration officials have confirmed reports received by me indicating that Iraq has used its position as a major oil exporter to attain large stockpiles of uranium from Portugal, a new agreement with Brazil to exchange nuclear technology, agreements with France to provide extensive technical assistance in key aspects of the nuclear fuel cycle along with sales of French research reactors and weapons-grade nuclear fuel, and sales by Italy of three sensitive "hot cells" suitable for practice of plutonium extraction techniques, and other fuel cycle procedures. Both France and Italy are providing nuclear training to large numbers of Iraqi scientists in Europe, and both nations today have teams of several hundred skilled technicians at work in highly sensitive nuclear research projects in Iraq.

This massive Iraqi nuclear development program is underway despite the fact that Iraq has no parallel program for developing commercial nuclear power. I am sensitive to the legitimate hopes of nations seeking to expand rapidly their industrial base through the use of nuclear energy production facilities. But it is absurd to suggest that the programs of Pakistan and Iraq—which are so clearly dedicated to developing the most sensitive fuel cycle facilities and which have no significant power production programs—deserve such legitimacy. In fact, I have been informed by more than one authoritative executive branch official, that in the absence of any associated power program, a weapons capability is clearly the option the Iraqi's are pursuing. According to the authoritative assessments, the Iraqis are embarked on "a Manhattan Project-type approach"—they are pursuing all avenues which could provide them with a capability to produce nuclear explosives.

While imports of highly enriched uranium from France will give Iraq at least the theoretical possibility of fabricating a single nuclear weapon this year, it will likely be several years before Iraq attains the capability to produce materials suitable for production of more nuclear weapons. But it is clear that its program is at a critical stage. Concerted efforts by suppliers can succeed in preventing the development by Iraq of a significant weapons capability for a good number of years.

The Iraqi program apparently is at a juncture similar to the one passed through by Pakistan some 5 years ago.

It will be several years before Iraq might attain a capability to produce a large number of nuclear weapons. But that time may be shortened by its Manhattan Project-type approach, under which Iraq is acquiring designs and is stockpiling the uranium and other commercially available resources to pursue the most sensitive nuclear fuel cycle activities. My concern over the nuclear program of Iraq is heightened by the fact that Iraq is governed by a radical, militarily aggressive regime which routinely employs terrorism to advance its aims and which is an implacable foe of U.S. allies in the Middle East.

I believe that the threat of a destabilizing regional nuclear arms race posed by the Iraqi and Pakistani programs endangers U.S. security interests and makes it essential for the United States to act. We should press France and Italy to stem the Iraqs' methodical drive toward the attainment of a nuclear weapons capability, and to place more effective limits on the supply of sensitive nuclear technology and hardware to Iraq. We should also seek greater European cooperation in attempting to bring all Pakistani nuclear facilities under international safeguards and to terminate the supply of all nuclear-related technology from Europe to Pakistan unless and until its program is subject to regular International Atomic Energy Agency (IAEA) inspections.

It is important to note in this respect that apparently the government of Pakistan remains obligated under the terms of a 1975 "facility attachment agreement" to accept IAEA inspection of any and all "solvent extraction reprocessing plants" in Pakistan.

We should work with the many governments in Europe who have helped to make possible the rapid development of the Pakistani nuclear program—including France, West Germany, and Switzerland—to gain Pakistan's adherence to this inspection obligation which could prevent the Pakistanis from diverting plutonium for use in nuclear explosives.

We must also continue to pursue forcefully our national interest in slowing the rate of proliferation elsewhere around the globe and in achieving the broadest possible international acceptance of "full-scope safeguards"—inspection of all nonweapons states' nuclear facilities by the International Atomic Energy Agency (IAEA).

The key to each of these efforts remains the full cooperation of our friends in Europe who are capable of providing advanced, weapons-usable technology and hardware to the nuclear programs of developing nations. I am sensitive to European concerns about these issues. We also have many mutual security issues in addition to nonproliferation which we must pursue together in a cooperative spirit. But I believe we must not be reluctant to press our allies vigorously when our mutual security interests are threatened by the dangers of nuclear proliferation.

Two important examples of how U.S. diplomatic initiatives on nonproliferation have advanced our security interests can be found in the 1975 U.S. opposition to the proposed nuclear sales between West Germany and Brazil, and France and Pakistan. United States pressure in these cases—which initially met with vigorous European protests—eventually resulted in the modification of the West German sale to include more safeguards, and the cancellation of the imprudent French contract. These were real gains for our nonproliferation efforts.

The United States is not without important leverage in pursuing nonproliferation issues with European exporters of sensitive technology, who still rely on the United States for significant amounts of nuclear fuel and hardware. Section 129 of the Atomic Energy Act, as amended by the landmark 1978 Nuclear Nonproliferation Act, prohibits U.S. nuclear trade to nations found to have:

> Assisted, encouraged, or induced any non-nuclear weapons state to engage in activities involving source or special nuclear material and having direct significance for the manufacture or acquisition of nuclear explosive devices, and has failed to take steps which, in the President's judgment, represent sufficient progress toward terminating such assistance, encouragement, or inducement: . . .

I believe our national security interests require us to make clear to our nuclear trading partners in Europe that certain types of trade undertaken by them with Iraq or Pakistan could require us to invoke this important statute and to place a moratorium on exports of enriched uranium fuel and nuclear hardware to any European suppliers of the Iraqi and Pakistani programs. Such a trade moratorium would significantly reduce the nuclear fuel supply of these supplier nations.

We must work closely in the months ahead with nuclear supplier nations to devise a cooperative approach to the dangers posed by nuclear proliferation in the Middle East and South Asia. But on the basis of the information I have received in recent weeks, there is a strong argument to be made that the highly sensitive French and Italian assistance to Iraq's nuclear program—a program whose objective is believed by several key U.S. analysts to be the production of nuclear weapons—would oblige the United States to terminate nuclear trade with these nations until they take steps to curb their assistance to Iraq. And there is still reason to question whether past European suppliers of the Pakistani program—especially Switzerland—have done all they can to terminate the flow of sensitive dual-use technology.

I believe we must also seek to achieve an amicable termination of nuclear trade with India through a bilateral agreement which staunchly protects our rights and our interests in maintaining safeguards on our fuel as well as preventing its reprocessing. Our efforts to promote stability in these volatile regions makes such moves necessary. We must not be timid in pursuing these vital security objectives.

Mr. President, I have recently communicated my serious concerns regarding these issues to administration officials, including Secretary Haig. I have also expressed my concerns to key congressional leaders on nonproliferation issues—including Senators GLENN, PELL and PERCY and Representative BINGHAM.

I believe the potential damage to United States and Western security interests posed by the threat of a destabilizing nuclear arms race in the Middle East or nuclear terrorism is of such magnitude that prompt action by our Government is called for. I hope that Congress will initiate investigations into the status of the Pakistani and Iraqi nuclear programs and the nature of West European assistance to these programs.

I believe these inquiries should examine persistent efforts by Libya to secure uranium and sensitive nuclear technology for weapons purposes and the latest developments in the Indian nuclear program, as well.

I urge the Reagan administration to undertake diplomatic initiatives designed to combat the proliferation of sensitive nuclear technology which threatens our interests and which promises to increase instability in the already volatile regions of the Middle East and South Asia, and elsewhere around the world.

Our efforts to slow the spread of nuclear weapons to additional countries are clearly only time-buying measures. It is becoming increasingly difficult to prevent determined nations from attaining nuclear weapons over the long haul. It thus becomes essential for us to deal with the root causes of nuclear proliferation before we face a world with literally dozens of nuclear armed states—which would be a world living each day on the brink of cataclysmic nuclear exchanges.

We must redouble our efforts to deal with regional sources of insecurity which drive nations toward the nuclear weapons option and thereby begin to build nuclear weapons-free zones, as a step toward a nuclear-free world.

As a superpower, it is absolutely essential for the United States to forge ahead without delay to negotiate and ratify equitable and verifiable arms control agreements which reduce our own bloated nuclear arsenal.

We need to think anew about how we can move toward the goal of stopping nuclear proliferation and beginning to liquidate the enormous arsenals the superpowers have accumulated.

I recognize that there are some experts who think there is no solution to this problem, that nuclear war is inevitable, and that the only question is whether this war will be regional or global.

The mind of man faces an unprecedented challenge in the task of devising a remedy for the dangers posed by nuclear proliferation. There are those who have concluded that this task is beyond our capacity. Our Nation—and indeed, the entire human race—face no danger that matches this one in magnitude.

Mr. President, soon after destruction of Hiroshima and Nagasaki by nuclear weapons, when I was a young man in my early thirties, I read a book and an article which made a profound impression upon me. Then we were the only nation possessing nuclear weapons. Surprisingly soon, the Soviet Union developed nuclear weapons.

Now, four or five more nations have joined the club since that time. In 5 years, there could be a half-dozen more. In 10 or 15 years, there could be yet another dozen.

Time is slipping by. Effective counteraction to date has been insignificant. The dangers mount.

I wish to read briefly from the book about the post-Hiroshima world which I read first in late 1945. It is by H. G. Wells, the historian, and is entitled "Mind at the End of Its Tether." The first paragraphs read:

> The writer finds every considerable reason for believing that, within a period to be estimated by weeks and months rather than by aeons, there has been a fundamental change in the conditions under which life, not simply human life but all self-conscious existence, has been going on since its beginning. This is a very startling persuasion to find establishing itself in one's mind, and he puts forward his conclusions in the certainty that they will be entirely inacceptable to the ordinary rational man.
>
> If his thinking has been sound, then this world is at the end of its tether. The end of everything we call life is close at hand . . .

A little later in the same book he wrote:

> We may be spinning more and more swiftly into the vortex of extinction, but we do not apprehend as much.

Still later came this passage:

> Mind near exhaustion still makes its final futile movement towards that "way out or round or through the impasse".

Near the close of the book, H. G. Wells wrote:

> It is possible that hard imaginative thinking has not increased so as to keep pace with the expansion and complication of human societies and organisations. That is the darkest shadow upon the hopes of mankind.

In early 1946, I read another remarkable article, this one by Lewis Mumford, the eminent social historian and planner. It appeared in the "Saturday Review of Literature" on March 2 of that year. I will read only the first few paragraphs from this piece, which is entitled, "Gentleman: You Are Mad." It starts out with these words:

> We in America are living among madmen. Madmen govern our affairs in the name of order and security. The chief madmen claim the titles of general, admiral, senator, scientist, administrator, Secretary of State, even President. And the fatal symptom of their madness is this: they have been carrying through a series of acts which will lead eventually to the destruction of mankind, under the solemn conviction that they are normal responsible people, living sane lives, and working for reasonable ends.
>
> Soberly, day after day, the madmen continue to go through the undeviating motions of madness: motions so stereotyped, so commonplace, that they seem the normal motions of normal men, not the mass compulsions of people bent on total death. Without a public mandate of any kind, the madmen have taken it upon themselves to lead us by gradual stages to that final act of madness which will corrupt the face of the earth and blot out the nations of men, possibly put an end to all life on the planet itself.
>
> These madmen have a comet by the tail, but they think to prove their sanity by treating it as if it were a child's skyrocket. They play with it; they experiment with it; they dream of swifter and brighter comets. Their teachers have handed them down no rules for controlling comets; so they take only the usual precautions of children permitted to set off firecrackers. . . .
>
> Why do we let the madmen go on with their game without raising our voices? Why do we keep our glassy calm in the face of this danger? There is a reason: we are madmen, too. We view the madness or our leaders as if it expressed a traditional wisdom and a common sense: we view them placidly, as a doped policeman might view with a blank, tolerant leer the robbery of a bank or the barehanded killing of a child or the setting of an infernal machine in a railroad station. Our failure to act is the measure of our madness. We look at the madmen and pass by.
>
> Truly, those are infernal machines that our elected and appointed madmen are setting. When the machines go off, the cities will explode, one after another, like a string of firecrackers, burning and blasting every vestige of life to a crisp. We know that the madmen are still making these machines, and we do not even ask them for what reason, still less do we bring their work to a halt. So we, too, are Madmen: madmen living among madmen, unmoved by the horror that moves swiftly toward us. We are thinking only of the next hour, the next day, the next week, and that is further proof that we are mad; for if we go on in this fashion, tomorrow will be more heavy with death than a mortuary.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of morning business.

THE SOVIET BUILDUP OF THEATER NUCLEAR ARMS IN EASTERN EUROPE.

Mr. THURMOND. Mr. President, I rise today to deplore the continuing Soviet buildup of theater nuclear weapons in Eastern Europe, and to urge that we act quickly to rebuild the West's nuclear arsenal in Europe to counter this threat.

The Pentagon has confirmed reports that the Soviet Union nearly doubled the deployment of SS–20 three-MIRV mobile IRBM's last year. Actually, the Soviets added 80 operational SS–20's in 1980 to the "more than 100" estimated a year ago. This includes the addition of 50 SS–20's to the 60 in place a year ago targeted on Western Europe, for a total of 110 now aimed at NATO. The remaining 70 have other targets, such as the People's Republic of China. The 180 SS–20's are in addition to 450 older SS–4 MRBM's and SS–5 IRMB's deployed. It is estimated that the Soviet Union will have deployed over 300 SS–20's by the mid–1980's.

This is hardly surprising, Mr. President, when the Soviets' European theater doctrine is understood. The Soviets have always regarded war as merely an extension of politics. Because the international policy consequences of losing a European war would be disastrous to the Russians, their doctrine calls for winning quickly by any means, including a massive, nuclear surprise attack against NATO Europe.

I endorse the concept of arms limitation talks with the Russians, in which Secretary of State Haig has expressed our official interest. But we must always negotiate for peace from a position of strength. To this end, I urge that we proceed at a rapid pace with the emplacement of Pershing II and ground-launched cruise missiles in NATO Europe. We must impress upon the Soviets that no aggressive action they might take in Europe would be worth the consequences to them.

CONCURRENT RESOLUTION PRAISING SECRETARY OF ENERGY JAMES B. EDWARDS

Mr. THURMOND. Mr. President, I rise today for the purpose of presenting

to the Senate a concurrent resolution passed by the General Assembly of my State of South Carolina, commending former South Carolina Gov. James B. Edwards on his confirmation as U.S. Secretary of Energy, and urging Secretary Edwards and the Congress to support the rapid development of the ethyl alcohol fuel industry, which will play an important role in our Nation's energy future.

As Secretary of Energy, Governor Edwards has shown a firm commitment to promoting the free enterprise system which has served our country so well in its first two centuries. With a man of Governor Edwards' vision and ability managing America's energy programs, I am confident that our country is well on its way to achieving greater energy stability and independence.

I am pleased to share this resolution with my colleagues, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

CONCURRENT RESOLUTION

A concurrent resolution to commend former South Carolina Governor James B. Edwards upon his confirmation as Secretary of the United States Department of Energy and to memorialize Secretary Edwards and the Congress of the United States to take several actions to ensure rapid development of the agriculturally-derived ethyl alcohol fuel industry.

Whereas, the members of the General Assembly were pleased to learn of the confirmation of former South Carolina Governor James B. Edwards as Secretary of the United States Department of Energy; and

Whereas, Secretary Edwards is one of a small number of South Carolinians to be honored by being named to a post on the Cabinet of a United States President; and

Whereas, the General Assembly, cognizant of the outstanding public service which Secretary Edwards has rendered to the State and the Nation in other high offices and positions of influence, is confident that he will continue to render valuable and able leadership in his new position; and

Whereas, recently events have occurred which have made it evident that the exorbitant costs paid for supplies of oil and its byproducts necessitate the rapid development of alternate sources of fuel supplies for the United States and indeed for the entire world; and

Whereas, it is becoming more evident that the United States has agricultural resources which may be used to develop large supplies of ethyl alcohol to be used for fuel or mixed with gasoline to produce gasohol; and

Whereas, the South Carolina Governor's Advisory Council on Alcohol Fuels is continuously assessing and developing policies and plans to promote the development of an efficient and economical alcohol fuel industry in our State; and

Whereas, it is the feeling of the members of the General Assembly that actions which have been taken by the states require support at the federal level in order to succeed in establishing this essential home grown alcohol fuel industry. Now, therefore,

Be it resolved by the Senate, the House of Representatives concurring:

That former South Carolina Governor James B. Edwards is commended upon his confirmation as Secretary of the United States Department of Energy.

Be it further resolved that he and the Congress of the United States are memorialized to take the following actions either by executive order or legislative recommendation:

1. Make available immediate low interest loans to finance alcohol fuel production and provide for rapid amortization of new alcohol fuel production plants.

2. Make permanent the federal excise tax exemption on gasohol, on a par with the present four cents exemption.

3. Require the federal government to implement the use of grain alcohol in its vehicles as soon as possible. Such use was authorized by Congress during 1980.

4. Require the federal government to stockpile ethyl alcohol fuel for defense purposes.

5. Appoint a Presidential Ad-Hoc Advisory Committee of people presently involved in agriculturally-derived ethyl alcohol fuel development to advise the President, the United States Department of Agriculture and the Department of Energy to insure the rapid development of the alcohol fuel industry.

6. Direct the United States Department of Agriculture to develop markets for the high protein byproducts of alcohol grain products.

7. Continue and accelerate the implementation of Alcohol Fuel Development Programs of the Department of Energy, the Department of Agriculture, and the Department of Commerce by making loan guarantees available to qualified applicants on a basis that will assure the development of alcohol fuel production facilities in all regions of the Nation.

8. Provide new incentives for on-farm production and use of alcohol fuels to be developed as a major part of our Nation's alternative and synthetic fuel energy program.

Be it further resolved that a copy of this resolution be forwarded to Secretary of the United States Department of Energy James B. Edwards and to members of Congress of the United States representing South Carolina.

SOVIETS CONSIDER LIQUID FUEL FROM COAL

Mr. FORD. Mr. President, at a time when Congress has been asked to all but end Federal support in speeding development of a national synthetic fuels industry, I find it more than ironic that the Soviet Union is now ready to embark on a program similar to the one we have been asked by the administration to abandon.

I call the attention of Senators to an article in the New York Times of Sunday, March 15, which detailed this development. To quote from the article:

Soviet interest in the development of synthetic fuels, which had not been evident in the past, may reflect a desire in the Kremlin to maintain continued energy independence in the face of tightening domestic oil supplies.

It goes without saying, Mr. President, that this country, too, has had and still has, serious problems relative to energy, and at the heart of these problems is a continued overdependence on imported oil. Yet, rather than continue the intense push mandated by the 96th Congress to make up for lost time in the synfuels arena, we now are considering ending the progress underway, without regard for current or future consequences.

We are concerned—and rightfully so—about the need for a stronger defense and improved national security. Toward that end, we are ready to pour $184 billion additional above what had been recommended into defense spending over the next 5 years.

Somehow, the fact that defense needs and energy needs are very much interlocked has been overlooked.

Obviously, this is a fact that has not escaped the Soviet Union, and thus that country's accelerated effort to develop a domestic-based synthetic fuels industry.

I hope that all my colleagues will take note of this development which is, at the least, very interesting, and I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOVIET, ITS OIL DECLINING, LOOKS TO LIQUID FUEL FROM COAL

(By Theodore Shabad)

The Soviet Union, apparently concerned about a slowdown in the growth of domestic oil production, has announced a synthetic fuels strategy similar to one being advocated in the United States.

News of the Soviet program, designed initially to test the conversion of coal to oil in small pilot plants, comes at a time when the future of some American synthetic fuels projects seems uncertain, in the wake of the Reagan Administration's plan to eliminate direct Government subsidies and let private industry carry a larger burden of development costs.

Soviet interest in the development of synthetic fuels, which had not been evident in the past, may reflect a desire in the Kremlin to maintain continued energy independence in the face of tightening domestic oil supplies.

There has been speculation in the West that future shortages of liquid fuels in the Soviet Union may at some point stimulate expansionist tendencies in the Persian Gulf oil-producing region.

POSSIBLY A LAST-MINUTE DECISION

The Soviet decision to proceed with synthetic fuels development appears to have been a last-minute decision, possibly made in light of prospects for little, if any, growth in domestic oil production in the 1980's. No synthetic fuels program is mentioned in the guidelines for the five-year plan for 1981–85, published in December and approved by the 26th Communist Party Congress in February with only minor modifications.

The program was disclosed Feb. 23 in a keynote speech by Leonid I. Brezhnev, the Soviet leader, at the party congress. The gathering approved the five-year plan and Moscow's domestic and foreign policies for the first half of the 1980's.

"Looking ahead over the long term," Mr. Brezhnev said, "serious consideration must be given to the production of synthetic liquid fuels based on the coals of the Kansk-Achinsk Basin."

The Kansk-Achinsk Basin, in southern Siberia, is a vast repository of a low-grade type of coal known as lignite, similar to huge lignite deposits in the western United States. Although overall reserves are estimated by the Russians at 140 billion tons, the basin contributes less than 1 percent of the nation's coal production.

The lignite disintegrates while being transported; it tends to self-ignite in summer and a high moisture content causes it to freeze in winter. The main options for large-scale use of Kansk-Achinsk lignite are used at mine-site power plants or conversion to synthetic fuels.

Late in the party congress, Prime Minister Nikolai A. Tikhonov, in discussing the new economic development plan, said the synthetic fuels strategy urged by Mr. Brezhnev

would require the combined efforts of the State Planning Committee, the Academy of Sciences, the State Committee for Science and Technology, the Ministry of the Coal Industry and other agencies.

In an interview with Izvestia, the Government newspaper, A. A. Krichko, director of the Institute of Mineral Fuels, said that construction of the first pilot plant had started during the party congress in the Moscow lignite basin, south of the Soviet capital.

The plant, to be built next to the existing Belkovskaya mine near Novomoskovsk, is to be completed in 1983, with a daily capacity to convert 10 tons of lignite into 2.5 tons of liquid fuel, or 18 barrels.

WORK ON PLANT BEGINS THIS YEAR

Dr. Krichko, whose institute was said to have developed the technology to be tested, said that work would begin later this year on a larger pilot plant in the Kansk-Achinsk Basin of southern Siberia.

That facility is to have a daily lignite-processing capacity of 75 tons, yielding 130 barrels of liquid fuel. It is to be built southwest of Achinsk, at the Berezovskoye No. 1 strip mine, one of a series of huge open pits projected for the 1980's along with power plants that would generate electricity for long-distance transmission over extra high voltage lines.

The initial Soviet synthetic fuels projects are both more limited in scope and substantially smaller than the United States effort envisaged last June, when President Carter signed legislation creating the Synthetic Fuels Corporation, a quasi-governmental entity, and set a goal of producing the equivalent of 500,000 barrels of oil a day by 1987.

The American program, unlike that of the Soviet Union provided for a number of alternative sources of synthetic fuels, including not only coal-to-oil processes, but ways of converting coal to gas as well as extracting liquid fuel from oil shale.

SOVIET HAS HUGE GAS RESERVE

The Soviet Union is concentrating its efforts on making liquid fuel from coal. With vast reserves of natural gas in Siberia, it has thus far displayed little interest in commercial coal gasification, although it has done experimental work in that field. Nor do Soviet planners, for the time being, intend to make use of oil-shale reserves, except for an old shale-burning electric power industry in Estonia.

Furthermore, the United States is further advanced in its synthetic fuel program than the Soviet Union. Some American liquid fuels processes have passed the pilot plant stage, in which engineering designs are tested, and are now moving into the demonstration plant phase, intended to demonstrate economic feasibility. Two of the projects authorized by the Carter Administration, and now threatened by budget cuts, are 6,000-ton-a-day demonstration plants, in Morgantown, W. Va., and Newman, Ky.

DONALD EDWARDS, NEW ADJUTANT GENERAL OF VERMONT

Mr. LEAHY. Mr. President, I think the United States should know that Vermont has a new adjutant general. The Vermont Legislature has selected my good friend Donald Edwards as its new commander to replace the distinguished Gen. Reginald Cram who is retiring after long years of admirable service to our State.

Like all Vermonters, I will miss General Cram, but I welcome with pleasure his successor Don Edwards.

I ask unanimous consent that the article from my hometown newspaper, the Burlington Free Press, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEW ADJUTANT GENERAL HAS ATTAINED GOAL

MONTPELIER.—Donald Edwards, sworn in as Vermont adjutant general Wednesday, said he has long hungered for the job.

"It's something I've thought about for the last five or six years," he said.

Edwards, 43, who has been in active military service since being graduated from a military college in 1959, became an Army major general in December.

He is assuming command of Vermont's National Guard, the internal discipline of which has been the subject of controversy.

Although Edwards has declined to criticize the officers over whom he will preside, he hinted he intends to give the hierarchy close scrutiny.

"I think the adjutant general doesn't run the Guard," he said, "Other people provide the detailed leadership.

"My job is to see the best possible leadership is in place. If I say no more that that, some will get the message."

Edwards, who proved his political ability by edging ahead of a wide field of contenders for the adjutant's post, was serving his seventh year in the Vermont House.

In the opinion of some observers, he partly owed his election by the House and Senate to the ties he made as an unassuming lawmaker. He is a Democrat.

He also has a long list of military credentials.

After graduating from Norwich University in Northfield, he served more than 12 years in the Army, including three in Germany, two in Vietnam and two in England with the British Army as an exchange officer.

In Vietnam, he commanded a company and was battalion operations officer and senior adviser. He commanded a battalion for nearly four years.

In reserve service since 1971, he was training and readiness officer for 24 units and 2,200 soldiers and then director of training, operations and readiness for 100 units and 14,000 soldiers in New England.

He was awarded the Bronze Star, a Meritorious Service Medal, three Army Commendation Medals, the Vietnamese Medal of Honor, the Republic of Vietnam Cross of Gallantry, the Vietnam Service Medal and the National Defense Service Medal.

He was born in Bellows Falls and lives in Grafton.

His two young sons, William and Edmund, helped pin the two stars on Edwards' shoulders after Gov. Richard Snelling administered the oath of office.

Edwards takes office at a time when the governor has been agonizing over whether to allow F-4 fighter bombers to be based in South Burlington.

Tests were conducted Tuesday to determine how much noise problem the airplanes might create, which is Snelling's principal concern.

"I frankly don't find it to be that noisy," Edwards said. "If you were standing near the runway, yes, it's loud, but when it's overhead, that's another story.

"I think under some conditions it's less noisy than some commercial airliners are," he said.

He said the financial benefits of having the planes in Vermont outweigh the nuisance considerations.

More than 170 military and civilian jobs would be created with a payroll increase of about $1 million, he said. "I think that's a significant figure.

In addition, construction projects to improve the runways and provide two new hangars would pump "millions of dollars" into the state's economy, he said.

"It will have a significant impact, particularly in Burlington," he said.

SENATOR GOLDWATER RECIPIENT OF JAMES FORRESTAL MEMORIAL AWARD

Mr. BAKER. Mr. President, this past Thursday, March 12, our friend and colleague, the Senator from Arizona (Mr. GOLDWATER), one of the most revered and respected statesmen to ever grace this Chamber, was the recipient of the James Forrestal Memorial Award, given by the National Securities Industrial Association for high honor and service to our Nation.

Named for our first Secretary of Defense, the award is the highest honor the association accords to an American citizen. There could have been no more fitting or more deserving recipient than Senator GOLDWATER. Throughout his tenure in the Senate, indeed, throughout his lifetime, BARRY GOLDWATER has been the very personification of patriotism.

In accepting the award at a dinner here in Washington, Senator GOLDWATER delivered a rather remarkable address, as is his wont, on the state of our national affairs and our national spirit. Having had the opportunity to read that speech this past weekend, I would like to share it with my colleagues as it is a testimony to the fire of the American spirit, a fire which burns deep in the heart and mind of BARRY GOLDWATER.

I would like to express my congratulations to Senator GOLDWATER on this richly deserved honor and also my appreciation to him for his immeasurable contributions to this Senate and this Nation.

And, so that others might share in the wisdom and the fire of my friend from Arizona, I ask unanimous consent that the text of his remarks at that awards dinner be printed in its entirety in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR BARRY GOLDWATER

Mr. Chairman, distinguished guests, ladies and gentlemen, and my fellow Americans: Many things have happened to me during my rather long life that have honored me and flattered me, but never has such an honor been bestowed on me as the one being given tonight. I just wish my old grandfather from Poland were here, because he said every man should pay rent for the space he occupies on Earth, and that is all I've been trying to do.

James Forrestal, our first Secretary of Defense, one of the most patriotic Americans who ever lived in this country, established the National Security Industrial Association for the purpose of providing an access channel through which industry could bring to the military that which they thought needed, and also the road went the other way. And tonight I stand here, not necessarily as an ordinary citizen, because through the fates of luck, I am a United States Senator, and I am also honored to be a retired member of our Air Force Reserve. But I would like to accept James Forrestal's invitation "to use the other road" and speak as an American citizen on some specific problems that bother me and have bothered me for some time, and I suspect also bother many people in this audience, and across America.

Freedom, ladies and gentlemen, is really what this country is all about. Without freedom there would be no need for a United States. Without freedom, who among our

ancestors would have left the rather successful shores of Europe to travel to this country? Not for riches, not necessarily for wisdom, but for the fact that they could be free. And I have a very strong suspicion that everyone in this audience and a great, great majority of Americans have accepted the fact that without freedom as our cause, our driving force, there would never have been a United States, and when we have lost that feeling, and when we have lost the means to protect that freedom, we will have lost the country that we have all loved and so many have fought for.

And yet, our country has just suffered what was probably the worst humiliation in history; worse than Korea, because we didn't have the strength morally, economically, politically, nor militarily, to face up to a small nation which imprisoned 52 of our people. Now Korea and Vietnam were somewhat different, because I suggest to you that those wars were lost right here in Washington. Not by the man in uniform, but by the man in civilian clothes. Did any of you ever believe that we would allow such disrespect to our nation? Did any of you ever believe that in this world, our friends would turn away from us because they looked on us as weaklings and even worse, as cowards?

Now, there is a quotation above the steps of the National Archives here in Washington that states, "What is past is prologue—study the past." So we might do a little of that tonight.

Let me look closely at America's 200 odd years of existence and we realize that we were born in war, we existed and we survived in war; in fact, the President has called the American troops out 200 times in our history, for different reasons. Now, a country that lives like this still doesn't understand the nature of war. War is an instrument of national policy. the final instrument to be used when all others have been tried and failed.

Let's take one of those other instruments, the use of economic power, which in my humble opinion, had we used, starting at the end of World War II, there wouldn't be a Soviet Union worth looking at. In this case I am referring to now, our refusal to ship grain to the Russians, who badly need it. Now, that is an exercise of economic power, and President Carter rightly put it into effect. The Russians are suffering from it, and I suggest to my new President that we should not change that at this time. I would much rather see a relative handful of American farmers hurt than see tens of thousands of young American boys die on the plains of battle in Europe. This use of economic power, political power, and so forth, anything short of war can prevent war. And once we know that and know it as a country, then I think we can begin to look at the mistakes made since World War II and determine to never let them happen again.

Now, when our Founding Fathers stated that the civilian could always be, or should always be, superior to the military man, it was a wise decision and up until recent times, with a possible exception of that one moment that Lincoln thought of taking over the armies, the civilian, the secretaries of the branches of the military, the Commander-in-Chief himself, the President, have always allowed the generals and their men, and now women, to win the wars. That was true, let me remind you, up until Korea, when a Commander-in-Chief dictated the terms of that war and prevented the Americans from crossing the Yalu. Certainly it would have been a risk, but had the risk succeeded, there probably wouldn't be any strength in Red China tonight. Then came that unpopular and wrong excursion into Vietnam. I say wrong because President Kennedy sent men into Vietnam with orders not to shoot back and President Johnson, after falsely telling Americans there would be no further troops sent to Vietnam did just that, and it became the second great war that this country lost; and I might say here that both of these wars could have been won, in my opinion, won quickly and without a terrible loss of manpower or a large expenditure of funds, had we pursued military vision instead of the roll of political dice.

Now, when we allow men in civilian clothes sitting safely at home, or in their offices in Washington, to tell our fighting men on the ground, the sea or the air, in a theatre such as Vietnam, what their targets are to be, what they can and what they can't shoot at, to offer long and lengthy instructions in booklet form as to what targets can be engaged, then I suggest that we should have lost that war. The trouble is that we waited too long to admit that we had lost it. Had the military trained men been allowed to engage in that war the way it should have been engaged, I firmly believe that it would have meant extensive use of airpower, not with atomic weapons, but with conventional weapons, with the historic threats being made to the enemy before the weapons were used; and I think the enemy would have quit. The major tragedy so far that has come out of the civilian control of the war in Vietnam was not only the loss of the war, but it could very well mean our total loss of the Pacific, which for over 100 years has been the central focal point of our foreign interest.

It has been my belief, and I think the beliefs of most military men and people interested in peace and the protection of our freedom, that a country prepared to go to war is a country that will never go to war because of that preparedness. I suggest that we had it under John Foster Dulles and President Eisenhower, and I suggest that under Al Haig we are going to have another experience like that. It doesn't matter whether war comes with a moment's notice or a month's notice or an hour's notice; if we are not ready, we can't do the things our military forces should do.

The question now is, "Are we ready?" And I sit day after day in the Armed Services Committee listening to the men from the different services explain the readiness of their forces; and I don't mind telling you I go home at night and wonder if we have the strength, if we have the manpower. I think we have to recognize and admit that our forces are in an inferior position compared to the possible enemy, the Soviets. Fifty percent of our Navy fighter planes can't fly. The Air Force is just a little bit better. Six of ten Army divisions have fallen short in training and equipment for operations. Our equipment for detecting submerged submarines is inadequate in inventory. We have too few torpedoes in our inventory to fill the tubes, too few air-to-air missiles to permit our F–14's and 15's more than one reload each. And then, the most important and chilling thing that we hear day after day after day is our manpower situation, which has actually reached and passed the danger stage where it is quite obvious now that a volunteer Army is not going to fill the bill.

And while I was probably the first man in national politics to suggest an end to the draft, and dependence on a volunteer Army, I have to change that opinion now, or we are in dire circumstances. Why not try universal military training or universal training, where every young person who reaches 18 is subjected to two years of training for either military purposes or other purposes that will be helpful to our country? Other countries do it, and they seem to do it without the arguments that we hear in this country when it is proposed. Of course, they don't have Jane Fonda running around.

Our Army, Navy, Marine Corps and Air Force are deficient in the higher grade enlisted ranks, not to mention the lower grades. We are short 2,500 pilots in this country, and yet some of our spokesmen, including the former Secretary of Defense, used to have the gall, or I should say the guts, to stand up and tell us that we were the number one military power in the world, when any reasoning on his part could have told him this was not true.

Now, the American people have been terribly misled. They have actually been lied to. And I suggest that it is time now to tell the American people the truth, level with them, ask their help, explain to them what we have to do; and mind you, this is not for the purpose of going to war, this is for the purpose of getting strong enough so that no other power in the world would even think of attacking us. It is for the purpose of peace and the preservation of our freedom.

Now, in another area, there are some things that have to be done by the business communities of this country, and I mean from the very big ones right on down, but particularly the big ones. Naturally we need tax incentives to get them back into research and development, get them back into retooling, get them back into redesigning, improving quality, get them back into doing everything that can be done to get our industries going again. We have to convince the unions that they are not something special, they are Americans, like every man in uniform, like every man and woman who wants to serve his country; and we have to stop catering to their every whim: more money, less time, sloppy work. It is ruining Great Britain. We don't have to put up with it. And I think it is time we started talking turkey to the union leaders of this country. I've discussed this problem openly with Admirals and Generals who have come before our committee; I'm not putting the blame on the man in uniform, I'm putting the blame on 20 long years of Republicans and Democrats alike allowing our country to slip because they think they can get more votes by spending money someplace else.

And what do we see today? We see what was once the greatest industrial nation in the world, one-sixth of the world's population living on one-sixth of the land, owning over 52 percent of all the material things in the world, we find ourselves slipping. I told the President after we stopped building the SST, foolishly, I said the European countries are going to catch us in avionics and aviation; and by golly, they're doing it, and this country has to make some changes. We are buying most of our strategic metals, the most important ones, from other countries. Cobalt is more valuable to us now than gold. Bauxite aluminum is almost unobtainable in this country. We are looking at lead times for little things like the front landing gear of a fighter plane—three years lead to remake it because we are out of the expertise of labor and we are out of the metals.

I say that because one of the great problems we have in this country is the almost stagnant situation existing in those very industries where we need growth to move out ahead of the rest of the world, instead of constantly falling behind. The lead times on weapons and spares are too long.

What I am very concerned about in this whole general area is the steady decline in our country's industrial growth, a growth that since the 1870's had brought this country to the forefront in the economic field. Our productivity growth rate for our total economy has been lower than all three nations, and we are continuing to decline. This is not something that you and I can stand idly by and watch, and expect this country to be able to once again assume its rightful place as a world leader. Because without a strong economy, without a strong military and, yes, I will add, without a strong moral conviction, no country, no country can ever be great.

Our country, which has always prided itself on the quality of its products, must now look, whether we like it or not, at countries

like Japan, which have been producing better products than we have for years, and then look at ourselves, who, fortunately, retain the technological leadership of the world, but no longer the quality of leadership. The ascendancy of the rest of the world is also beginning to cut in on our aviation.

What I am pleading for is that the American government, through very strong tax and other incentives, help the American industrial machine to get moving again to the point that there will be no question that we cannot only deliver needed weaponry, but needed spares, and deliver them on time and cut down the tremendous time lag that we must suffer through now to bring out any part of a new weapons system. We have to get American industry moving now, and I want to make a confession to you that I swore I told myself last night I would not say, but I am unfortunately possessed of a tongue that wags all the time. And as my wife says, "Put the darn thing in the hangar and close it."

I doubt seriously sometimes whether this country has the money or the time to match the Soviet Union. We are so far behind. I think of the Soviets turning out a tactical aircraft every seven hours, and this year we're not buying enough aircraft, including helicopters, to even replace the normal attrition, and that means the ones that burn up, fly into mountains, run into each other and so forth. We don't have the time. Somehow we have to get it. Somehow we are going do it. Somehow, every time America has been confronted with a challenge, Americans have answered that challenge, and we're going to regain our place in the world. We're going to become a nation respected by every group of people in this world; and in doing this we are going to develop power, not to dominate, but to act against those who want no peace in this world.

It makes me a little sick to pick up our papers, and read about leaks in the intelligence agencies. I've often said there are more leaks in Washington than there are in the men's room at Anheuser-Busch. I hate to say that, but it is true. We need the strongest Intelligence Agency in the world. I can tell you we are going to give it to you. I see nothing wrong with surveillance in our own country. I don't buy the idea that every enemy of the United States lives outside the boundaries of our country. When I read some of the junk I have to read, and listen to some of the dribble I have to listen to, I wonder why we are not surveilling this country now. Let's get rid of these people who don't like America. I want to quote something that John Stuart Mill said. Not in its entirety. He said, and I quote him: "War is an ugly thing, but not the ugliest of things. The decayed and degraded state of moral and patriotic feeling which thinks nothing worth a war is worse.

"A man who has nothing which he is willing to fight for, nothing which he cares more about than he does about his personal safety, is a miserable creature, who has no chance of being free, unless made and kept so by the exertion of better men than himself. As long as justice and injustice have not terminated their ever-renewing fight for ascendancy in the affairs of mankind, human beings must be willing, when need is, to do battle for the one against the other."

And let me close by reminding you. Freedom is the only thing we have. You can forget about everything else. You keep America free, and we'll conquer every problem we have. Thank you.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

RECESS UNTIL 2 P.M. TODAY

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 2 p.m. today.

Thereupon, at 1:11 p.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. GORTON).

QUORUM CALL

The PRESIDING OFFICER. The Chair, in his capacity as a Senator from the State of Washington, suggests the absence of a quorum.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, for not more than 10 minutes, in which Senators may speak.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

APPRECIATION AND GRATITUDE OF THE SENATE TO WARREN G. MAGNUSON FOR SERVICE TO HIS COUNTRY—SENATE RESOLUTION 96

Mr. JACKSON. Mr. President, I ask immediate consideration of a resolution sponsored by me and my colleague from the State of Washington, Senator GORTON. The resolution is at the desk.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 96) expressing the appreciation and gratitude of the Senate to Warren G. Magnuson for service to his country.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the immediate consideration of the resolution.

Mr. JACKSON. Mr. President, the resolution commends former Senator Warren G. Magnuson and expresses the Senate's appreciation for the many contributions he made during his 36-year tenure in the Senate.

This resolution coincides with Warren G. Magnuson appreciation day set for March 19 at the direction of Governor John Spellman of Washington State. On that day of recognition and tributes to Maggie, he will address a joint session of the Washington State Legislature meeting in Olympia and will be honored later in the evening at a huge dinner in Tukwila.

Mr. President, the day of recognition planned for Senator Magnuson is on a nonpartisan nature. Senator GORTON and I will both be in Washington State Thursday to participate in the events honoring Maggie.

Much has been said and written about this remarkable individual who was orphaned early in life and went on to become the senior Member of the U.S. Senate.

Recently, I was asked by the Seattle Post-Intelligencer to write about Maggie. I enjoyed a special relationship with him as his colleague in the Senate for 27 years. To share my recollections with other Members, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TRIBUTE TO MAGNUSON

No one worked closer with Warren G. Magnuson for more years than I.

And it went beyond the simple fact we represented Washington State together. No member of either House served longer with Maggie—I was with him 40 of his 44 years in Congress.

The record places me in a rather unique position to remember Maggie, our relationship and his contributions to the nation and our state.

Senator Magnuson did more during those 40 years to better the quality of life for his fellow human beings than any other U.S. Senator. That's a mighty big statement and I do not make it lightly.

Maggie's cause always has been the fulfillment of basic human rights. It was an overriding concern.

Everywhere Maggie touched lives. The effort reached from doctors' offices to automobiles to airplanes to fishing boats to grocery stores and beyond. He demanded consumers get value, quality and safety. He saw to it that dams, bridges, roads and sewers were built to spur economic activity and development throughout the country; but always with one eye to the communities of Washington State. And, at the same time, he had the vision to protect public lands and resources simply for their beauty and for future generations to enjoy.

All Maggie ever wanted to do in the Senate was help people. It did not matter whether they were young or old, healthy or sick, rich or poor, black or white. He sought fairness and opportunity for all.

I always considered it my personal honor and privilege to serve with Maggie and to have him as my colleague from Washington State. Our relationship was special. Few Senators from the same state—for whatever reasons—work well together. Some do not even speak to one another.

Maggie and I were different in that respect. We considered ourselves partners from the State of Washington. And our combined energies enabled us to succeed where others had failed.

There was no magic or mystery about it. Nor was it something we planned or agreed upon when I joined him in the Senate. Ours was a natural relationship, never forced or contrived, and not something that we had to work to maintain.

This does not mean we always agreed on every issue or approach to a problem. But we managed to disagree without being disagreeable. We talked and we listened. When a problem came up, Maggie and I did not write each other letters outlining our differences. Our offices were next door to one another, almost as extensions of each other. He supported me and I supported him. And we were strengthened because of it.

It was a system that worked and benefited both of us as well as the people of Washington State.

I mention these things because it exemplifies how Maggie operated in the Senate and how he succeeded in achieving so many of his goals.

Maggie always knew there would be a tomorrow. I believe it was a guiding principle with him. In the Senate, today's opponent may be tomorrow's ally. It's a simple thought but one that is often lost among today's single-issue media-minded public figures.

Maggie involved his colleagues; consulted and advised them. When he gave his word, it might as well have been signed on a binding contract. And he had a marvelous way of making people feel they'd won even after a loss.

This was Maggie's trademark: always friendship, understanding, trust and a willingness to help when there was seemingly nothing in it for him or his constituents. He knew there would be another day, another vote, another battle to be won or lost. This was the strength of his power in the Senate.

I learned from Warren G. Magnuson and benefited enormously from him. I share the great appreciation and love the people of Washington and the Nation feel for Maggie. It was to them he dedicated his life's work.

As he looks to the future, it is my hope Maggie will continue to give to our State and Nation the benefit of his experience and leadership in the years ahead.

Mr. JACKSON. Mr. President, I yield to my junior colleague, Senator GORTON.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I am pleased today to add my voice to those in praise of a man whose words and presence demanded the attention of this honored forum for 36 years.

Neither the voters nor the officers of the State of Washington confer their honors lightly. That the voters of Washington State conferred upon Warren G. Magnuson six times the title of U.S. Senator is a measure of the exceptional representation he gave our State. That the Governor of the State of Washington, the Honorable John Spellman, has now seen fit to designate March 19 as Warren G. Magnuson Appreciation Day is an indication of the towering esteem in which he is held to this moment.

I share that esteem. For regardless of our political differences, Warren G. Magnuson is, to me, a figure who will stand out in the history of this body in the breadth of his concern for the welfare of his constituents and his country.

Both as a private citizen and as a public official in our State I was in a position to know better than many what Warren Magnuson accomplished for the good of all of us.

Among his many earned titles was "Mr. Consumer Representative." It was in large part due to "Maggie" that numerous measures were passed designed to protect men and women from fraud, and children from dangerous fabrics, and to give us all a fair shake in the marketplace.

Since consumer protection was also one of my most intense interests as attorney general of the State of Washington, Senator Magnuson and I shared a common legislative goal, and a high mutual respect for one another's programs.

His support of the University of Washington and its research programs; his support of many fields of medical and scientific investigation; his support of agencies to develop a greater knowledge and use of the sea; his efforts to protect our fishery resources; his interest in guarding against the destruction of the beauty and wildlife of our home State—all these were illustrative of the broad and basic convictions of Warren Magnuson. And as he accrued power, he used it to those fruitful ends.

The great Senators are few.

Warren Grant Magnuson earned the adjective, as he earned the respect of each of us—political friend and political rival.

I urge my colleagues to join in this resolution of appreciation and gratitude to Warren Magnuson.

Mr. JACKSON. Mr. President, I thank my colleague from Washington.

I yield to the senior Senator from Alaska.

Mr. STEVENS. Mr. President, I join our two southern neighbors in this resolution honoring our former President pro tempore.

Alaskans have known Warren Magnuson as a good neighbor for many years. Prior to our becoming a State, he and the senior Senator from Washington (Mr. JACKSON) assisted us in many ways.

I join in cosponsoring this resolution on a personal basis, also. When I came here as an appointed Senator in 1968, Warren Magnuson did more than any other person to assist me to fulfill the role to which I had been appointed. He had been very close to my predecessor. I had known Warren Magnuson in the days when I was downtown, during the Eisenhower administration. From the time I came here until he left, Warren Magnuson was almost like a father to me.

I am most pleased that the Senate has seen fit to consider this resolution, and I hope it will be agreed to unanimously. I am honored to be able to join my good friend from Washington to travel to Seattle to be part of those who will honor Warren Magnuson on Warren G. Magnuson Appreciation Day, March 19.

I urge the Senate to approve the resolution.

Mr. ROBERT C. BYRD. Mr. President, I rise in support of the pending resolution which commends our former colleague, Warren G. Magnuson, who stands out as one of the giants of this institution in recent years.

Warren G. Magnuson, or "Maggie" as he is affectionately known, served six full terms in the U.S. Senate beginning in 1944.

During his years of service to his State and to the Nation, he compiled a record of accomplishments that is long, impressive, and far reaching. He was a leader in a variety of fields—health, education, consumer protection, the environment, and employment—all of which have significant impact upon the everyday lives of the American people.

Throughout his career, Senator Magnuson—known in many circles as "Mr. Health"—was one of the strongest congressional advocates of medical research and assistance. In his first term in Congress, he cosponsored a bill to create the National Cancer Institute. As a freshman Senator, he introduced a bill to create the National Science Foundation, and the first medicare bill. He also authored legislation which established the National Health Services Corps, which recruits and assigns health professionals to serve in medically underserved areas.

The fact of the matter is, Mr. President, that Senator Magnuson's career in the Senate was filled with any number of legislative achievements, both of national and international importance. Indeed, the Nation owes him a deep debt of gratitude, and in recognition of this, I am sure the pending resolution will be passed overwhelmingly. In short, it was an honor to work with "Maggie".

The PRESIDING OFFICER (Mr. MURKOWSKI). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. JACKSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the resolution.

The resolution was agreed to unanimously.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 96

Whereas Warren Grant Magnuson served in the Congress for 44 years, including 36 years in the United States Senate representing the State of Washington;

Whereas Warren G. Magnuson served honorably, ably and with distinction during each of the 44 years he served;

Whereas Warren G. Magnuson rose to important leadership positions in the United States Senate including President Pro Tempore and Chairman of the Committee on Appropriations;

Whereas Warren G. Magnuson dedicated his entire career to public service;

Whereas Warren G. Magnuson's cause was always the fulfillment of basic human rights and enhancing the quality of life in America and elsewhere in the world;

Whereas Warren G. Magnuson was the author of important and comprehensive legislation shaping life in the United States;

Whereas Warren G. Magnuson sponsored nearly every major initiative related to health care beginning with the National Cancer Institute in 1937;

Whereas Warren G. Magnuson was recognized for his contributions to the medical field in 1973 with the Albert Lasker Public Service in Health Award and the naming in 1980 of the National Institutes of Health Clinical Center for him;

Whereas Warren G. Magnuson has a long and distinguished record in the area of consumer protection legislation and sponsored the Flammable Fabrics Act, the Magnuson-Moss Act and numerous automibile safety initiatives;

Whereas Warren G. Magnuson authored the public accommodations section of the Civil Rights Act;

Whereas Warren G. Magnuson played a major role in much of the trade, commerce, science, transportation and fisheries legisla-

tion enacted by Congress during the past 44 years.

Whereas Warren G. Magnuson worked tirelessly on behalf of the people of Washington State and the Nation;

Whereas the Governor of Washington State, John Spellman, has designated March 19 as Warren G. Magnuson Appreciation Day; Now therefore be it

Resolved, That the Senate of the United States joins the people of Washington State in expressing appreciation and gratitude to Warren G. Magnuson for his devoted and superb service to his country.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE WAYS AND MEANS COMMITTEE CHAIRMAN ON THE PRESIDENT'S TAX CUT

Mr. PERCY. Mr. President, on February 18 the President submitted to Congress his tax cut and budget reduction program. It is a comprehensive economic recovery plan that is as bold as it is dedicated to ending the inflation that has racked the economy for the past decade.

I have given the President my full support for this program. It is the right medicine for the malady of sluggish growth and rapidly growing Government spending. We will never balance the Federal budget until we make significant spending reductions and—this is key—we make tax cuts that will generate more rapid economic growth in the years ahead. It is this faster growing economy that will in itself bring in more revenue and will bring the budget into balance by 1984.

Mr. President, the day before the President submitted his plan to Congress, the new chairman of the House Ways and Means Committee, Representative DAN ROSTENKOWSKI, spoke to the Economic Club of Chicago. His remarks on tax cuts and spending reduction are extremely interesting. Let me just quote from his address:

When I chose this job I knew that the roughest part would be to confront beliefs I was born to, to reexamine concepts that I fought to set into public law, to ask people in my neighborhood to give up what I have led them to believe was rightfully theirs. That's what we are being asked to do.

Unless we are ready to exact real sacrifice right now, we should give up talking about the fight against inflation. That means giving spending cuts precedence over tax cuts.

Chairman ROSTENKOWSKI is one of the key actors as the Congress begins to examine and perhaps modify the President's plan. His Ways and Means Committee has authority not only over tax cuts, but—as DAN mentions in his speech—whole range of spending programs. He will have enough controversial issues to deal with this year that it led him to say of his jurisdiction, "just about all the matches are struck in my shoe."

Mr. President, this is an exceptional speech and I commend it to my colleagues as we begin to move the President's proposals forward this month. I ask unanimous consent that this article, excerpted from Representative ROSTENKOWSKI's February 17 speech and printed in the Chicago Tribune on February 22, be included in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NOT SO FAST, MR. PRESIDENT

(By DAN ROSTENKOWSKI)

The President has talked to the nation about "charting a different course" and "sacrifice," images that Presidents before him have invoked to inspire support. He identified our economic plight with the same sincerity we've heard before. And the nation and the press have responded with the goodwill and faith normally accorded an incoming President.

A President's call for sacrifice stirs us today as it always has in times of stress. We are a nation naturally given to applauding ideals, even if—in some abstract way—we ourselves will actually have to make some harsh adjustments. But threatening sacrifice, and actually carrying out the threats, are two different things.

Someone once told me the only way people will believe that you're as tough as you say, is to go out and break someone's leg.

That's a lesson I learned a long time ago. Platitudes don't make the trains run on time, or give a city a Triple-A bond rating, or give reason to raise a Sears Tower. That comes only when one promise after another is kept.

Wednesday night, President Reagan faced the unenviable task of telling America which leg he intends to break. And overnight, idealism gave way to realism in Washington.

That's where I come in.

Raising all federal revenue and controlling almost half the federal budget falls within the jurisdiction of the Ways and Means Committee. Just about all the matches are stuck in my shoe. That fact, along with having worked 22 years in Congress under seven Presidents, makes DAN ROSTENKOWSKI the hardest realist of them all. And the most apprehensive.

As committee chairman, I want to believe that Congress can rise above special interests. But I only have to walk on to the House floor for confirmation that Congress is a mirror of the nation's diversity. I see that the people who were calling for an end to business-as-usual have just quietly tried to tap another spigot into the federal treasury.

Last year 10,000 bills were introduced in the House. One out of every four came to the Ways and Means Committee. I doubt that demands for austerity will restrain the appeals to my committee in the months to come.

I don't fault members of Congress for defending special interests. I have special interests of my own—like Chicago. That's what representative democracy is all about, a Congress divided by party, region, ideology, culture.

That's the field that President Reagan and I are set to play on. The difference is that he gets to kick off and I get to lead the suicide squad down field.

Where everyone does agree is that the long-term strength of the economy depends on Congress' willingness to cut taxes and to cut spending. The first we can do with ease and speed. The second promises neither ease nor speed. Reality dictates, however, that both be done together.

Let me say, up front, that the Ways and Means Committee will pass a bill to cut taxes for both business and individuals. The outline of a tax-cut package has been gradually emerging in Congress over the last two years. It was my predecessor, Al Ullman, who correctly saw the danger in writing a tax-cut bill during a presidential battle over who would be more generous to the taxpayer. Our reluctance had nothing to do with whether we needed a tax cut—but when. That time has now arrived.

The President has proposed a new formula for simplifying and hastening the tax write-off of new capital investment. I support that end.

The American business community, and an overwhelming majority in Congress, seem completely convinced that more rapid capital cost recovery will bring certain economic growth and productivity. Given the revenue costs of the sparest formula, let's hope that trust is well founded.

The President will also send Congress his campaign pledge to cut individual tax rates by 10 per cent in each of the next three years—followed by indexing the tax rates to allow for inflation.

Here, we can measure the fiscal impact with some accuracy. We know what such a cut means to a family earning $15,000 and what it means to a family earning $75,000. We pretty well know that the so-called Kemp-Roth package would reduce tax collections by $30 billion if it were retroactive to Jan. 1 of this year, and rise to $261 billion in 1986.

These figures are staggering and call into serious question the effect such massive reductions would have on inflation, economic growth, the deficit, interest rates, and the long-range well-being of working Americans.

Those are the basic standards by which we will judge the President's tax package and all fundamental tax changes that will come before the Ways and Means Committee in the future.

Before we consider the details of the package, we will invite a cross-section of labor, business, and other experts to help us examine the state of the economy and the legitimacy of the administration's economic assumptions. We must establish just how such massive tax cuts would change economic behavior and how much productive economic growth we can really expect.

Only then can we determine the proper size of a tax cut and set the balance between business and individuals. Only then can we weigh individual cuts for low- and middle-income earners, so hard hit by inflation, against tax cuts for those in higher brackets who are considered to be the vanguard of economic recovery.

I have no rigid tax or economic philosophy. I have seen too many grand designs fall apart. I don't believe in miracles or the wizards and alchemists who promise them. I doubt that Uncle Sam stands to gain a dollar of feedback revenue for every dollar of new economic activity.

I have a healthy skepticism of long-range economic projections. We all suffered over the last few years as we obediently followed economic models.

I am concerned with the integrity of the tax code. Lawmakers are confronted with much the same choices presented environmentalists. Do we keep everyone out of the forest? Do we let the forest be clearcut in the name of progress? Obviously, reality lies somewhere in between. We must choose carefully the trees we fell, and be sure to replace them to satisfy social and economic demands later.

So it is with the tax code. To my way of thinking, proponents of additions to or deletions from the tax code must carry the highest burden of proof.

My job is to make the tax code perform over the long haul. As a realist, I well know that philosophy is often overtaken by events, many beyond our control, and some genuinely requiring near-term, or emergency, measures.

But as a rule, we must avoid the simplistic, short-term fixes which, while politically popular, do not do us justice over time.

The Nation will judge the 97th Congress

and the new administration by how decisively we contain inflation. Not by how generously we cut taxes, but by how wisely we cut spending. This is where lofty appeals for sacrifice take on sharp definition. This is where the fight moves into the trenches. This is where Democrats and Republicans, liberals and conservatives, are up against the most difficult choices of their political lives. In short, this is where leadership will be tested and political careers put on the line.

When I chose this job, I knew that the roughest part would be to confront beliefs I was born to, to reexamine concepts that I fought to set into public law, to ask people in my neighborhood to give up what I have led them to believe was rightfully theirs. That's what we are being asked to do.

Unless we are ready to exact real sacrifice right now, we should give up talking about the fight against inflation. That means giving spending cuts precedence over tax cuts.

To cut taxes alone will only build upon an already fearsome deficit and kick inflation even higher.

Oddsmakers are laying heavy bets against us. They don't think Congress stands a chance of passing more than cosmetic cutbacks in federal spending—that we will rush to cut taxes and leave the worst to last.

They believe that if the front door is closed on some direct budget funding, that special interests will go through the back door for special tax treatment.

If these cynics are right, if Congress buckles in its responsibility, then we will have missed the message of Nov. 4. And we deserve to face an even tougher electorate next year.

MAYOR McMACKIN AND SALEM, ILL.

Mr. PERCY. Mr. President, I recently had the pleasure of informing a number of Illinois communities they had successfully competed in the preapplication process and were to be invited, by the Department of Housing and Urban Development to submit full applications in the small cities community development block grant program.

Salem, Ill., was one of those communities that received the approval from HUD and will soon be preparing further submissions for that agency's review.

The $1.5 million reservation by HUD indicates that Salem has designed a fundable project for housing rehabilitation, street, sidewalk, water and sewer improvements, as well as property acquisition and clearance.

The value of the block grant concept that is favored by the Reagan administration is evident in this proposal, as Salem officials were allowed to establish priorities for the use of these funds in their community.

The quality of life and the living environment in Salem will no doubt be improved with such a plan. Pending review of these further submissions by HUD, award announcement is expected in June 1981.

The block grant announcement follows by just a very few days the award of another Federal grant to Salem, the urban development action grant, that will help finance the reconstruction of the badly deteriorated 17-mile water line and reservoir serving the city.

The $1.2 million UDAG will be used as a part of a financing package for this reconstruction and will help assure continued expansion of World Color Press, a great corporate citizen of Salem.

The total expansion by World Color Press, when completed, will amount to $19 million and create 800 new permanent jobs for Salem. Some of this expansion has already occurred.

With an improved water supply, the current needs of all citizens and existing industry will be met, and Salem will have the opportunity to attract even more industry to their great community.

Working on projects of such importance to a southern Illinois community is very gratifying, indeed. Salem Mayor Charles McMackin II, who first brought this matter to my attention on behalf of his city council, should be commended for his leadership in this effort.

Mayor McMackin's diligence and resolve to improve the quality of life and generate economic development in Salem clearly reflects his concern for his fellow citizens.

I am pleased to have had the opportunity to work with Salem officials on these projects and congratulate them on their outstanding leadership.

SPEECH BY SENATOR PAUL LAXALT BEFORE THE VETERANS OF FOREIGN WARS ANNUAL DINNER

Mr. THURMOND. Mr. President, on Tuesday, March 3, 1981, our distinguished colleague from Nevada, PAUL LAXALT, was honored by the Veterans of Foreign Wars during their annual dinner which was held at the Sheraton Washington Hotel. The highlight of this event was the presentation of the VFW's Congressional Award by their national commander, Art Fellwock, to our colleague.

Mr. President, PAUL LAXALT is one of the finest and most capable men I know. He is dedicated to his State and country. Our colleague served as an Army corpsman in the South Pacific during World War II and knows firsthand the consequences of war and the need for a strong national defense.

Mr. President, in response to this VFW presentation, our colleague gave a most meaningful and perceptive speech which stressed the need for our Nation to return to those great principles upon which America was founded.

Mr. President, for the benefit of my colleagues, I ask unanimous consent that the speech by our colleague (Mr. LAXALT) before the Veterans of Foreign Wars on March 3, 1981, be placed in the RECORD at the conclusion of my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR LAXALT

This is a very special award and I thank the membership of the V.F.W. for it.

It means a lot to me for a couple of reasons—

First, I'm very much aware of the kind of Congressmen and Senators you have chosen to honor in each of the past 18 years, and proud and truly honored to be included in their company.

They were selected not because of any commitment to war or its machinery or trappings.

On the contrary, no one hates war more than those of us who have been there—

No. They were chosen, instead, because of a commitment—a simple commitment, if you will—to their country.

Not my country, right or wrong: But, rather, my country. Through thick and thin we stand beside her.

And I suspect that, if there is a trait the winners of this award would like to say we all have shared, it is a belief in the basic goodness of our Nation.

A belief in the principles upon which it was founded and a belief in its people.

We believe that this country is rooted in a Constitution meant to safeguard individual rights and to promote self-reliance.

And we believe that our Constitution was almost divinely inspired and that it protects each and every American for all time from the excess of Government.

We believe, also, that the United States of America stands today as a beacon—a benchmark, for the rest of the world—be it free or enslaved.

We believe that this Nation of ours is the best there is. We're number one! There is none better!

The second reason this award means so much to me is because it comes at a time when this Nation of ours has had its self-confidence somewhat battered. Let's face it. We've been kicked around a lot these past few years.

If we were boxing, there have been times when we've had to take a standing eight count.

But, let me tell you this. With the election of Ronald Reagan we're not reeling any more—not by a damn site.

Since his election we've seen more guts, more unity, more pride in our country than we've seen for far too many years.

And our President is just getting warmed up.

People feel genuine hope because they sense in him the courage and ability to truly redirect this country.

So, I accept this award tonight not just for myself, but for the millions of Americans who have stood beside this lady of ours who may have stumbled at times but has never fallen. And never will.

Like those of us here tonight, they have always taken pride in America and what America means—

I recently came back from a visit to my home State of Nevada. In my travels around that State, I can't tell you the number of people who came up to me to say how proud they were of our new President and how confident they are that the future holds better times.

I'm absolutely convinced that all across this Nation we're on the road to a new resurgence—a revival of faith in democracy: faith in capitalism: faith in good old-fashioned Americanism: faith in peace through strength: and, perhaps most important, faith in each other.

Lastly, permit me to say this:

Nearly 40 years ago, I was an Army corpsman in the South Pacific with the Seventh Division, under capture on an island called Leyte.

As did many of you here tonight, I saw young men, some my buddies, suffer horrible deaths and injuries and I saw acts of courage and heroism that I remember vividly even today.

In each war this nation has had to fight—each time an American soldier dies—we ask ourselves: why? What is so important that we must pay such a price?

And, of course, only the man or woman who pays the price can give us a true answer.

To paraphrase Lincoln: It is for us, the living, to dedicate ourselves to the unfinished work for which they fought.

We must resolve, each of us, that their deaths were not in vain; that the country

shall continue to be free; and that this Government of, by and for the people shall not perish.

Thank you and God bless.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ADJUSTMENT OF PRICE SUPPORT FOR MILK

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of S. 509, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 509) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support of price of milk be adjusted semiannually.

The Senate proceeded to consider the bill.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, what is the pending business?

The PRESIDING OFFICER. S. 509.

Mr. HELMS. It has already been laid before the Senate?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. I thank the Chair.

Mr. President, the pending legislation is the first bill to be reported from the Committee on Agriculture, Nutrition, and Foresty in this 97th session of Congress.

Obviously this legislation is leading the way in President Reagan's efforts to reduce Federal expenditures. It provides for a more economical administration of the dairy program and for a reduction in the burden on U.S. taxpayers. The President has committed himself to that goal, and I, along with the vast majority of the other members of the Agriculture Committee, am proud to have had a hand in helping achieve that goal with this bill—the first bill that I have had the pleasure of managing as chairman of the Agriculture Committee.

This bill, S. 509, Mr. President, has the virtue of being very simple and very direct. It deletes the requirement that the support price for milk be adjusted semiannually.

Under the current provisions of law, the Secretary of Agriculture is obliged to increase milk price supports about 90 cents per hundredweight on April 1. This bill, S. 509, will forgo that scheduled increase.

Mr. President, the purpose of the milk price support program, as provided for in the Agricultural Act of 1949, is to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and to assure a farm income level adequate to maintain productive capacity sufficient to meet anticipated future needs.

For the past 3½ years, the farm bill has required that the price of milk be supported between 80 and 90 percent of parity at the beginning of each milk marketing year and that the level be adjusted semiannually on the basis of changes in the "prices paid" index for farmers. This level of price support has given dairy farmers very strong incentives to produce an ever-increasing volume of milk.

As a result, production has increased rapidly, substantially more rapidly than the commercial use of milk and milk products has increased. Surpluses of milk have had to be purchased by the Government, that is to say, the taxpayers. And these surpluses have been purchased at a growing rate, and they are continuing to grow rapidly, even though it is acknowledged that farmers should hold back on such increased production in this or any other period of oversupply.

Let us look at it arithmetically for a moment, Mr. President:

As of February 20, 1981, the Federal Government owned 355 million pounds of butter, 253 million pounds of cheese, and 75 million pounds of nonfat dry milk.

In January 1981 the Government bought 49 percent of all the butter produced in this country. By the end of the marketing year, the Government will own an estimated 562 million pounds of butter, 479 million pounds of cheese, and 970 million pounds of nonfat dry milk if no change is made in existing law.

That is the genesis, Mr. President, of S. 509. That is the reason we are here with this legislation that was reported out of the Agriculture Committee by a vote of 14 to 2.

The fact is that an increase in milk price supports, in a program that is not bound by production controls, simply sends to farmers the wrong economic signal. If this bill, S. 509, is not enacted by Congress, and if the April 1 price increase goes through, we will be telling farmers that they should continue to produce more and more milk, even in the face of these tremendous and unnecessary surpluses that I have just specified. Such a signal will be of benefit to no one, not the producers, not the consumers certainly, and absolutely not the taxpayers.

I have just mentioned that the Agriculture Committee, its formal name being the Committee on Agriculture, Nutrition, and Forestry, reported S. 509 by a vote of 14 to 2. I do not know of any group of Senators, or for that matter any group of any kind, who are more devoted to farmers than the members of this committee.

But the point is this, Mr. President: The committee found it in the national interest and in the interest of American dairy farmers to eliminate the requirement that the Secretary of Agriculture increase the support price of milk on April 1, 1981.

The Agriculture Secretary, Mr. Block, has no option about it. If this bill now pending is not enacted by Congress and signed by the President before April 1, the increase in dairy price supports will occur on April 1.

The committee voted 14 to 2 to report this bill because it was the committee's considered opinion that we owe it to farmers to send them a correct economic signal. That signal obviously is:

You are producing too much milk for the good of the dairy program, for the good of the milk marketing system, and for the good of the country.

So this proposal is a first step in getting the costs of the dairy program under control. It is a first and integral step in President Reagan's overall economic program. If the measure is not adopted, the entire dairy price support program may be threatened by the unnecessarily high costs that will surely result.

That is why I support the bill as chairman of the Committee on Agriculture, Nutrition, and Forestry, and that is why it was reported to this Senate by a margin of 14 to 2 so that there be no misunderstanding of the signal that is being sent to the dairy farmers of this country.

Mr. President, it will also send a correct signal to the American people which will give them reassurance that those of us in this Congress intend to get Federal spending under control. It will convey to the public the message that we heard them on November 4, and that we, as Members of Congress, are willing to make difficult but, nonetheless, necessary decisions to get this country back on the track of economic growth and prosperity.

Mr. President, I received a letter from the Secretary of Agriculture, Jack Block, on this subject, and I ask unanimous consent that it be printed in its entirety at the conclusion of my remarks.

I thank the Chair and I yield the floor.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 13, 1981.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased that the Senate plans to take up S. 509 early next week. This bill would amend Section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price for milk be adjusted semi-annually.

The Administration strongly recommends that the bill be enacted and that action be taken quickly during the very few days remaining before April 1 so that this unnecessary and costly increase in milk price supports can be avoided.

This proposal is an important part of the President's Economic Recovery Program. It will save an estimated $147 million in FY 1981 and $86 million in FY 1982. And, it will send a correct rather than an incorrect economic signal to the nation's milk producers. We now have a huge and growing surplus of milk. The seven percent increase in the price support level for milk scheduled for April 1, 1981 will tell producers to increase production still more at a time when production should be moderated.

This bill proposes a single change in the law—authority to forego the increase in milk

price supports now required by law on April 1, 1981. It would not reduce the current price support level or eliminate or threaten the dairy price support program. It will benefit both consumers and taxpayers. It would amount to less than two percent of milk producers' cash receipts from sales of milk.

I understand that there will be an attempt to amend this bill on the floor of the Senate to require that casein imports be eliminated or severely restricted, and to otherwise change the basis of our limitations on the importation of milk products. Such restrictions would be expected to cause a very significant increase in the cost of a number of food items that are made with casein, a natural milk protein that is not manufactured in this country. In addition, the Administration very strongly opposes such an amendment for three reasons:

1. There is a well-defined administrative procedure under Section 22 of the Agricultural Adjustment Act of 1933 for dealing with situations where imports threaten to interfere with price support programs. That procedure involves much less risk of repercussions for our $47 billion agricultural export trade than does a legislated limitation. If there is concern about casein, it should be pursued under that procedure.

2. It is premature to propose action to limit casein imports. In 1979, the International Trade Commission investigation of casein imports found no damage to the domestic industry. The Department is investigating this matter and will have a report by early June, 1981. Without more specific evidence than is now available, there is not an adequate basis to support action to limit casein imports.

3. The casein import question is not directly related to the problem S. 509 is designed to help. Even if the current market for casein products were entirely supplied by domestic milk products, we would have a surplus of milk and would need authority to forego the April 1, 1981 increase in dairy price supports. There is no justification now for giving milk producers a signal to increase milk production.

I urge you and your colleagues in the Senate to strongly support S. 509 and see that it is enacted quickly without amendment.

The Office of Management and Budget advises that enactment of the proposed legislation would be in accord with the Administration's program.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr. HUDDLESTON. Mr. President, S. 509—the bill now being considered by the Senate—would suspend the April 1 adjustment in dairy price support levels. The Department of Agriculture has informed me that the enactment of the bill would result in estimated cost savings to the Government of approximately $147 million.

S. 509 would, as a technical matter, repeal section 201(d) of the Agricultural Act of 1949. Section 201(d) of the 1949 act requires that the support price of milk be adjusted semiannually and authorizes the Secretary of Agriculture to adjust the support price of milk at the beginning of each remaining quarter of the marketing year.

Under the current provisions of section 201(d), the Secretary of Agriculture must, by law, increase milk price supports about $0.90 per hundredweight on April 1.

S. 509 was introduced by Chairman HELMS at the request of the administration.

Mr. President, I share the concerns of President Reagan that Government costs should be reduced, and those concerns that have been expressed by the distinguished chairman of the Committee on Agriculture. But while I do that I still do not want to see any change made in our farm commodity price support programs that would impair their basic purpose.

In the case of the dairy price support program, that purpose is to assure an adequate supply of milk and assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs.

I think we all recognize what the Senate is confronted with today. It is, as the Senator from North Carolina has indicated, the first direct action by the Senate on the rather extensive budget-cutting program of the Reagan administration. I hope it is not prophetic then that the first ax falls on the farmers of the United States. I think all of us are concerned that the budget cuts be equitable and evenly distributed across all of the functions of Government. It would be tragic if the cuts fell too heavily on any one segment, and particularly the American farmer who already has his back to the wall.

S. 509 does not, of course, reduce the milk price supports that are in effect at the present time. It does deny an increase that would be scheduled under the law effective April 1.

The Committee on Agriculture, Nutrition, and Forestry held detailed hearings on S. 509, and we did a lot of soul searching on this particular issue. We have looked carefully at the dairy price support program. I think that any serious person who is concerned about the dairy farmer comes to the conclusion that the program, that 2 years ago cost $24 million of Federal funds and is estimated to cost $1.7 billion in the current fiscal year, does need some adjustment. Whether this is the right time and the right way to do it is certainly open to question. There are other problems facing the dairy farmer that need to be addressed.

I would like to see what is being planned by the administration for the overall program that will be considered by our committee and the Senate in the weeks ahead before acting on this particular measure.

However, we do not have the luxury of time.

I think the administration could have done a better job in resolving some of those issues facing the dairy farmer or at least giving some indication of the direction they are going before presenting us with this particular piece of legislation.

But we know that action on S. 509 has to be completed before April 1, less than 2 weeks away, in order to suspend the April 1 adjustment in dairy price support levels.

I think some of the Members of the Senate will have questions and suggestions to make as we continue our discussion this afternoon on just how we should approach this particular problem.

Mr. President, the dairy price support program has been effective. It has provided this country with a stable supply of quality products. If some want to make the argument that it has increased the cost to the consumer by a slight amount, then that cost could be justified by the fact that we do have a stable and adequate supply of milk. A program that is working should not be adjusted or lightly thrown aside.

A great deal of thought, it seems to me, must be given to precisely where we are headed with the overall dairy support program. We will not know, of course, until the proposals have been made, until they have been considered by the committee, and until action has been taken by the full Congress.

But at this point we do not yet even have the proposals from the administration. Therefore, I hope that as we debate this afternoon, we keep in mind the fact there is an underlying program that needs to be protected even though there may be some fine tuning and some adjustments necessary during the coming weeks and the coming months.

I thank the Chair.

The PRESIDING OFFICER (Mr. LUGAR). The Senator from North Dakota.

Mr. ANDREWS. Mr. President, I rise in support of the Melcher amendment to S. 509 to limit the imports of casein, a dairy byproduct, to 50 percent of the average amount imported between 1975 and 1980.

When this bill was before the Senate Agriculture Committee, I supported an amendment which would have stopped the imports of casein altogether. This amendment was defeated by a tie vote of 8 to 8, because of the concern expressed over the effect banning all of these imports could have on our trade agreements. It was feared the banning all imports would leave the United States subject to retaliation under the general agreement on tariffs and trade (GATT).

This amendment addresses that concern by using section 22 of the Agricultural Adjustment Act to direct establishment of the limitation. Section 22 is aimed exclusively at assuring the effective operation of domestic price support programs and actions taken under section 22 are exempt under the terms of GATT. I urge all of my colleagues to support this compromise amendment.

The proposal before us to abruptly withhold a scheduled increase in price supports for dairy farmers—an increase that was pledged to our dairymen overwhelmingly by the Congress—overlooks the fact that a major reason for the heavy cost in the price support program last year was the increasing imports of subsidized casein from European countries, including Russia. Historically casein imports were used for industrial products. However, there has been a shift in its use and a 1979 study by the International Trade Commission documented the fact that 81 percent of casein used in the United States was for food and feed products. This has had the effect of knocking out a sizable share of our milk market that otherwise would be supplied by American milk producers.

As I pointed out to the Agriculture Committee and would like to restate

here, the American farmer can compete against farmers anywhere in the world, but they cannot compete against other governments, which they have been forced to do because European governments heavily subsidize their dairymen. Casein then enters this country at below their own cost of production, which takes care of their surpluses.

The American dairyman has always supplied the American consumer with a stable supply of fresh milk and milk products. And, he has done this at a price that is cheaper than any other country in the world. The American housewife pays less for milk than the Canadian housewife, and a great deal less than in many other countries. Our dairy program has been a success. The thing that has been totally overlooked is that these subsidized imports of casein added about $300 million to the cost of running the dairy price support program last year.

The current Government investment in surplus milk products is just over a billion dollars. Passage of this bill without this amendment would mean a savings of around $147 million. We could save an additional $115 million this year if we cut casein imports by 50 percent. I am confident that if we would resolve this matter of imports, we would significantly reduce the amount of money necessary for the milk stabilization program without seriously affecting our own milk producers.

Mr. President, this amendment has the support of our dairy industry, the Farm Bureau and the National Farmers Union and warrants the support of every Member of the Senate.

We will be analyzing one Government program after the other as we consider the new budget. Steps must be taken to make sure that we maximize the programmed spending cuts that are available to us. In the case of this program, it does not make much sense to stop the $147 million increase in dairy price supports, while we allow the $300 million of imports to continue untouched. We have an opportunity today to double the savings proposed by the administration and I urge all of my colleagues to join me in support of this amendment.

The American people have mandated that cuts be made. Reducing our imports of casein will not only help the dairy industry; but will reduce inflation and show the American people that we do mean business.

Mr. President, I have listened to what the distinguished chairman of the committee has said and what the distinguished ranking member of the Committee on Agriculture has said, and I think we ought to point out some things about the dairy program that do not seem to have gotten into the newspapers or on our television sets.

A moment ago the distinguished Senator from Kentucky pointed out that up until 2 years ago there were no great costs associated with this program, and that is true. Yet the program had essentially the same price support as far as a percentage of parity as it has today.

The difference is what we should take a look at as we debate this program. What has happened. What has changed.

Three things have changed, Mr. President: First of all, about a year ago the President of the United States put an export embargo on grain sales to the Soviet Union. That backed up tremendous amounts of feed grain in this country, and it caused a depression in the price of feed grain vis-a-vis parity.

When you have the input into a cow dropping down to 55 percent of what is fair, and the output from the cow staying at 80 percent of what is fair you do not cull your herds. Let me sidetrack momentarily and make this point. The consumer in America is still getting milk at a price that is less than the consumer in Canada or the consumer most any place else in this Western World of ours.

But when you have a juggling of the economic picture because of an outside influence you add horrendous sums to the cost of maintaining the milk at an adequate figure, and that threw the program askew. It was not just the export embargo on grain that threw the program out of balance, it was also because beef prices are inordinately low today. Tell that to the consumer and he will wonder how that can be true.

In fact, the price of a steer on the market today is less than it was 2 or 3 years ago, so the inclination for the dairy farmer to market that cow when the cow is beyond the point of good producing is less and less. So we have retained more older cows in the milking herd than would be normal.

There is no way we can improve beef prices when we consider this bill. There is no way we can urge the President—we have done that—to lift the export embargo on grain to the Soviet Union. But there is a third factor we can address, and that is what we are going to try to address in this bill a little later on when my colleague from Montana offers his amendment.

The third factor is the import of casein, which is a byproduct of milk. Those casein imports, some of them subsidized by Western European countries, have come into this country and displaced milk solids that have then had to be supported by the dairy price support program to the tune of $150 million, $200 million, $250 million, $300 million in the last year.

So what we are saying is that there has been a problem in the dairy price support program, but it has been caused by three factors over which the farmers have no control. We think if you are interested in saving money, if you are interested in casting a vote for economy and, at the same time, treating the dairy farmers in an equitable way, then take a look at the Melcher amendment. The saving of not increasing the price support is about $145 million. If you add to it the casein import amendment, you have added another $150 million plus or doubled the net savings to the taxpayers of this country.

So if you take off your farm price support hat and put on the hat of somebody who is concerned about getting our economy under control, I think the package representing twice the savings helps the taxpayers, keeps faith with the dairy farmers, and gets this system so it will work a little better.

I have heard all the arguments about how we have to study it. We have studied this export embargo to death, and we have studied imports to death. Nobody is hesitating about promoting import controls on Japanese automobiles coming into this market. We have had antidumping legislation following antidumping legislation. But when you talk about the imports of subsidized farm products into this country, everybody seems to turn the other way.

But again let me remind my colleagues that the dairy price support program is a good program that has gone askew because of three things no one envisioned when it was first put into effect: First, the export embargo on grain; second, the imports of casein; and third, the low beef prices today. Let us not throw it more askew by simply adopting a limitation in the increase that is mandated by law. Let us also try to correct one of the three factors by supporting the Melcher amendment.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Are there amendments?

Mr. HUDDLESTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, I know there is at least one amendment by the distinguished Senator from Montana, who just walked off the floor and who should be right back.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, the administration's bill, S. 509, is an unfair proposition for American dairy farmers if enacted without amendment. It says to dairy farmers that the Senate is willing to break a promise that we unanimously made to them, a promise upon which many of them have planned their survival. Enactment of S. 509 without some recompense for the family farmer is really unacceptable. It is certainly unacceptable to me as a Senator and definitely unacceptable to me as a Vermonter. I know that is the feeling of the people of my State.

Fortunately, we do have an opportunity to make S. 509 a fairer deal for the farmer and the taxpayer.

Senator MELCHER, I, and many of our colleagues on both sides of the aisle, are going to offer an amendment to limit casein imports. Unlike S. 509, the

casein amendment would reduce the costs of the dairy price-support program without hurting a single American dairy farmer. In fact, it would allow dairy farmers to recapture a domestic market which has been usurped by subsidized foreign imports.

It makes so much sense that I find it hard to believe that the administration does not appear eagerly lobbying for its passage.

The casein amendment has the potential of reducing Federal outlays by $200 million and recapturing a domestic market capable of supporting more than 3,000 American dairy farms.

In these times of budget austerity, declining numbers of farm families, and a rapid loss of farmland, support of a partial limit on casein imports would be a prudent course to follow.

In recent days much misinformation has circulated regarding the casein amendment. We have hard that there is no domestic casein production to replace the lost imports. On this point, my colleagues should recognize that the amendment limits but does not eliminate all casein imports. Sufficient quantities would remain available to meet all industrial and pharmaceutical needs, and still allow in 35 million pounds of casein imports for other uses.

We should also remember that casein is basically cottage cheese curd that has not been dried and ground. Due to this fortunate fact, the U.S. dairy industry could quickly reestablish and expand domestic casein production.

Mr. President, we have been told that the amendment violates the general agreement on trade and tariffs (GATT). I remind this body that we have never ratified GATT as an international agreement made by the United States. Moreover, Congress has provided that an import limitation like the one proposed, as domestic law must retain its supremacy to this and other international agreements.

Finally, a section 22 quota as established by the amendment is provided a waiver under GATT.

Realizing the weakness of this argument, the opposition next asserts that the casein amendment violates GATT because it is a legislated quota. Should we take this to mean that the section 22 quotas established by Congress in the Trade Agreements Act of 1979 also contravene GATT, or that the section 22 quota set by Congress on cotton imports under the Agricultural Act of 1956 should be ignored?

Mr. President, those opposed to the casein amendment ask the Senate to wait for a Department of Agriculture study before taking action. This is one of the oldest delay tactics this Chamber has witnessed.

I submit that we know more about the negative consequences of casein imports than we do about the effects of going back on our word by removing the semiannual adjustment, or by dropping dairy price supports to 70 percent of parity as the administration's budget figures imply.

Mr. President, we have also heard that casein imports do not really displace American dairy products. I ask, then, what happened to the American casein industry which once provided thousands of jobs but has since dwindled to obscurity while casein imports continue to expand?

Imported casein, which receives a subsidy of up to $1.40 per pound, is displacing other domestic dairy products as well, especially skim and powdered milk.

The dairy farmers in my State ask why it is that they have to try to compete against dairy products imported by this country and heavily subsidized by the countries of origin, subsidized certainly far beyond anything that we would ever consider doing in this country. We have to compete, for example, with imports from the Soviet Union, imports subsidized by that country, competing against our own people.

As a result, the Federal Government buys these dairy products through the price support programs at a cost of 94 cents per pound. That is $2.82 per equivalent pound of casein, or $450 million for last year's subsidized casein imports.

Mr. President, the Agriculture Committees of the House and Senate have held hearings on casein imports in 1979 and 1981. It was only the narrowest of margins which prevented a much broader casein amendment from being reported by the Senate Agriculture Committee just a few days ago.

Mr. President, the casein amendment makes S. 509 a fairer proposition for all dairy farmers. With it, we can turn a sow's ear into a silk purse.

It is a reflection, actually, of a strong attempt to cut the amount of money that our Federal Government has to spend and at the same time protect our dairy farmers.

Dairy farmers and national farm organizations know this and support a limit on casein imports. The amendments has the expected endorsement of the National Milk Producers Federation, Associated Milk Producers Inc., Dairymen Inc., and Mid America Dairymen. More importantly, other major farmers' organizations this year have called for a limit on casein imports including the American Farm Bureau Federation, the National Grange, the National Farmers Union, and the National Farmers Organization.

Mr. President, the Senate should support our amendment to limit casein imports. By adopting it we can reduce the costs of a price support program while increasing farmers' incomes.

Actually, by cutting down the amount of money that the taxpayers have to pay, we at the same time improve the incomes derived from the free enterprise system by our dairy farms.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, it is unfortunate that we have to move this legislation now rather than consider it as part of the overall farm bill. But the current imbalance between the supply and demand for milk requires that some adjustment be made in the price support before surpluses get so burdensome that more drastic changes in the dairy program may be required.

The Government surplus of milk products has been building over the last 1½ years. President Carter proposed legislative changes last year, and his budget request sent to Congress in January contained proposed legislation to eliminate this April adjustment. President Reagan has agreed and is also requesting that the legislation be considered as part of his overall package to reduce Government spending as a part of the economic recovery effort.

By foregoing the April 1 increase, the industry should start to move toward a supply and demand equilibrium without major disruption.

Mr. President, during the hearings held on this bill before the Agriculture Subcommittee on Production, Marketing, and Price Stabilization, of which I serve as chairman, several concerns were raised by the dairy industry which deserve serious consideration. They relate to, first, the import of casein—a product derivative from milk; second, reconstituted milk; third, Commodity Credit Corporation (CCC) resale policy for surplus milk products and; fourth, plant costs used to determine CCC purchase prices.

I would like to briefly comment on each of these since they relate to the question of elimination of the semiannual adjustment in the price support for milk.

CASEIN IMPORTS

Casein is the principal protein component of milk. It has not been produced in this country since the early 1950's because as our price support for milk increased, the domestic industry could not compete with low-cost imports.

Casein is used in foods and feeds (79 percent) and in industrial products (21 percent). Food uses include such things as artificial cheeses, coffee whiteners, luncheon meats as a binder, and special diet foods. It is used industrially in such products as glue and other binders. We import casein primarily from New Zealand, Australia, and Ireland.

I know that Sean Donlon will be pleased to know that since he handed out these sprigs of green for us to wear today. Ireland is one of the major suppliers of casein.

In 1979, we imported a total of 150 million pounds; in 1980, that was reduced to 119.9 million pounds.

Mr. President, I ask unanimous consent that, at this point, a table showing all of our imports in both 1979 and 1980 be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Million pounds	
	1979	1980
New Zealand	92.0	76.7
Australia	21.7	17.9
Ireland	14.8	24.0
U.S.S.R.	4.8	1.2
Other	17.4	32.2
Total	150.7	152.0

Mr. COCHRAN. The dairy industry has petitioned the Secretary on several occasions in the past to prohibit casein imports under section 22 of the Agri-

cultural Adjustments Act, which protects supported domestic industries from foreign competition.

In 1979 the International Trade Commission looked into the casein issue and concluded that—

The data . . . indicate virtually no relationship between imports of casein and purchases of nonfat dry milk under the price support program.

USDA, as well as the industry, was concerned over this finding by the Commission and undertook its own investigation into the facts. This study is scheduled for completion in June.

I understand that an amendment will be offered by the Senator from Montana which would put a quota on casein imports at 50 percent of the average imports for the past 5 years or about 70 million pounds per year.

In my opinion no action should be taken on the casein issue until we have all the facts before us.

When the USDA study becomes available in June, this Senator will be one of the first to suggest that we bring the matter before the Agriculture Committee for hearings to determine whether there needs to be legislation enacted on this issue. But to adopt legislation at this point would be clearly premature.

RECONSTITUTED MILK

A petition is before the Secretary of Agriculture to change the treatment of reconstituted milk. It would allow milk to be reconstituted and sold as fluid milk.

The dairy industry wants to drop this petition because it would result in unequal prices to handlers and would destroy the classification system which is the heart of the milk marketing order program.

This seems to be an appropriate request on the part of the dairy industry and I encourage the Secretary to drop the petition.

COMMODITY CREDIT CORPORATION SELLBACK PRICE

Currently the Commodity Credit Corporation offers products in its inventory back to commercial trade at 105 percent of the purchase price. The dairy producers feel that because of high-storage costs and high-interest rates, some commercial buyers have found it cheaper to allow the Government to carry part of their inventory, thus aggravating the surplus situation.

The request of the industry is that the resale price for Government stocks be put at 110 percent of the purchase price.

If the commercial trade is using the Commodity Credit Corporation for storage and thus inflating the Government stocks, then the resale policy should be changed.

PLANT COSTS USED TO DETERMINE CCC PURCHASE PRICES

The plant costs payment is used by the Department to pay processors to make cheese, butter, and nonfat dry milk out of surplus milk. Because of increases in energy costs, equipment costs, and packaging costs, the current rates are out of line and adjustments need to be made.

If they are out of line, then I agree that they need to be adjusted.

Mr. President, I am hopeful that during the course of this year we can make the necessary adjustments in the dairy program to bring the industry back into balance.

I supported this bill when it was considered by the Committee on Agriculture, Nutrition, and Forestry and intend to do so today. I view it as a gradual step toward bringing the supply of milk in line with the demand that will not disrupt the industry nor cause widespread hardships on our dairy farmers. If I thought it would, then I would vote the other way.

During consideration of the farm bill, there will be other changes in the dairy program proposed. The final outcome of those changes will no doubt be tempered by the success or failure of the legislation before us today.

I encourage my colleagues to vote for this bill, to vote against amendments, and then work with us on the farm bill that will come up later to put into place a dairy program that will insure that dairy farmers can operate at a profit without it being necessary for the Government to purchase large quantities of milk products.

UP AMENDMENT NO. 14

(Purpose: To establish a section 22 quota on the importation of casein products into the United States)

Mr. MELCHER. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER), for himself and others, proposes an unprinted amendment numbered 14.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, after line 5 insert a new section 2 as follows:

"SEC. 2. (a) Congress finds that milk protein products, including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 percent or more of these products, are being imported into the United States in such quantities as to render or tend to render ineffective, or materially interfere with, the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949.

"(b) To ensure that the entry into the United States of milk protein products will not render or tend to render ineffective, or materially interfere with the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949, the President shall by proclamation impose, under the authority of section 22 of the Agricultural Adjustment Act (7 U.S.C. 624), a quota limiting the amount of milk protein products including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 percent or more of these products, that may enter the customs territory of the United States in any calendar year after 1980. The quota so proclaimed by the President shall be in an amount equal to 50 percent of the average of the total imports of such milk protein products into the United States during the five-year period 1976 through 1980. The proclamation shall be considered a proclamation issued by the President under section 22 of the Agricultural Adjustment Act (7 U.S.C. 624) meeting the requirements of that section.".

Mr. MELCHER. Mr. President, I am offering this amendment on behalf of myself and Mr. LEAHY, Mr. PRESSLER, Mr. KASTEN, Mr. ZORINSKY, Mr. BOREN, Mr. PRYOR, Mr. ANDREWS, Mr. PROXMIRE, Mr. BOSCHWITZ, Mr. BAUCUS, Mr. ABDNOR, Mr. FORD, Mr. BURDICK, Mr. HATCH, Mr. HUDDLESTON, and Mr. BENTSEN.

I believe it should be noted that all of us, on both sides of the aisle, want the President's program to succeed. We certainly want to help the President when he is right, and we want to help the President when his program can be improved.

This is the situation right now: This is a case, with this amendment, where we can improve what the President has asked for. The President has asked for repeal of the April 1 increase in adjustment in dairy price supports. We are told that that could save in Federal outlay up to $146 million. It was agreed to in the Agriculture Committee by a vote of 14 to 2.

There is another side to this matter, an entirely different side. Each year $330 million of casein is being imported into the United States. Various countries supply this amount of casein. There is no limit on the amount of casein we can import. It is true that it is a protein from skim milk.

What is out of place here? What is out of place is that we are importing a dairy product that we have in abundance in the United States, and we have a Federal program to support the price of dairy products; and when we have too much offered for sale, we purchase it and put it in storage.

Why aggravate this situation by importing a product from a number of countries? I believe New Zealand has been mentioned, as well as Australia. I believe Ireland was just mentioned. I do not think anybody has brought up Russia as yet. Has anybody brought up Russia, that we are importing casein from Russia?

Of the countries from which we import this product, Russia ranked fourth in 1979; not nearly as much as New Zealand or Australia, but they did rank fourth. They have dropped down somewhat since 1979. They have dropped down from 1978 and from 1977. They have dropped down, but they are still in the top 10 among those countries from which we are importing casein.

It seems rather odd that when we are considering a program that has worked very successfully for consumers in this country and has worked successfully for milk producers in this country, when we take a bite out of the apple for the President's program and say that we will reduce $147 million in Federal outlay, we have opposition from the White House and from the Department of Agriculture to this amendment we have just offered, which would reduce Federal outlays per year about $160 million or more.

What we are doing with the amendment is simply improving the President's program. What we are doing with the amendment is simply increasing the amount of savings on Federal outlays.

That should be welcomed by the President. That should be welcomed by the Department of Agriculture. I believe they will get around to welcoming it.

But let me state who will welcome it immediately—the taxpayers. They are going to welcome it immediately, right now. If we agree to this amendment today, they are going to say, "A job well done for the Senate. It is proper. It makes commonsense. I'm glad you did it."

There is another group that is going to welcome it, and that is the milk producers of this country. They will say, "You are going to take some of this away from us in our increase and price supports. Why don't you do something about imports?"

If we adopt this amendment today, it will be welcomed by the public and by the milk producers. They will consider it fair. I hope we can agree to it.

I will have a lot more to say about this matter in a little while, but I believe others would like to speak about this matter, and I relinquish the floor at this time.

Mr. HUDDLESTON. Mr. President, I commend the Senator from Montana for offering this amendment. I ask unanimous consent that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, in my earlier remarks, I indicated that there were things that could be done by the administration that would not be costly. At the same time, they would be very helpful to the dairy producers in this country and would go a long way toward helping to maintain the production capacity, which is important if we are going to continue to have a stable supply of dairy products at reasonable prices for our customers.

The pending amendment is one item that will help. It is not the only one. There are others we will need to consider as time goes on, and it is hoped that we will have them rolled into a package by October 1.

I recognize the importance of foreign trade, particularly in the field of agriculture. I know that the trade door has to swing both ways, and I know that we have to sell abroad two-thirds of the grain produced in this country in order to satisfy the needs of our grain producers.

I know the tremendous contribution of our agricultural producers to our balance of trade situation. It is bleak enough as it is. Without the great plus we get from agricultural exports, it would be far worse. But we have made provisions in our laws to keep countries from dumping into the United States products that would have serious adverse effects upon the very programs Congress enacts to provide assistance to our producers. This is that kind of case, in my judgment.

The importation of casein, as has been pointed out by the distinguished Senator from Montana, is costing the American taxpayer because it requires that the Government, in the programs that we enacted, take into stock increased amounts of dairy products. Consequently, casein imports have caused part of the surplus we have at the present time. They have caused part of the increased costs incurred by the Government in carrying out the dairy price support program.

So the amendment is in order. It would do much to give confidence to the dairy farmer. As has been suggested, while the action of S. 509 does not actually reduce the support price that the dairy farmer is now receiving, it does eliminate an increase that he anticipated. The dairy farmer could very well have made some plans involving financing and other actions, when he had reason to count on this particular increase.

I am pleased to join the Senator from Montana, and I offer my support to the amendment he has just offered.

Mr. PRYOR. Mr. President, in the Agriculture Committee and again today, I join Senator MELCHER and others in offering this amendment.

I commend Senator MELCHER for his leadership in bringing this issue to the forefront. Imported casein, from various countries, including the Soviet Union, is in direct competition with American dry milk in the production of dairy products.

In 1980, approximately 150 million pounds of casein was imported into this country. This use of casein replaced 450 million pounds of American dry milk, which means that the Commodity Credit Corporation, which pays a support price for nonfat dry milk, could have saved $329 million if U.S. nonfat milk had been used instead of imported casein.

Furthermore, use of casein reduced the number of jobs in U.S. dairy plants, and probably helped diminish the number of family-operated farms.

S. 509 reduces the cost of the dairy program in 1981 by $147 million. By restricting the importation of casein by 50 percent we can save an additional $160 million from the dairy program and for the American taxpayers. Section 22 of the Agricultural Adjustment Act directs that duties or import quotas be imposed when—

> Any article or articles are being imported . . . into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, any program or operation undertaken under this chapter.

This amendment does not attempt to completely stop the importation of casein but rather seeks to reduce the flow of casein into this country so that U.S. dry milk can be used instead of casein.

Mr. President, the American farmer, and more specifically dairy farmers, do not hesitate in shouldering their fair share of these budget reductions. We all realize the importance of reducing Federal spending so that we might bring this crippling inflation under control. This amendment will not cost the U.S. Government one thin dime. On the contrary, it will have the dual effect of saving additional Federal dollars while giving some support to our dairy industry. I urge that this amendment be adopted out of a sense of fair play.

We often hear during these last several weeks in Washington a new administration speaking of equitable treatment for all of our people and all of our citizens, but I think it seems a gross injustice that we are asking our dairy farmers to compete with subsidized imports. It is especially appalling to me that last year we imported some 1.3 million pounds of casein at a cost of $1 million from the Soviet Union.

Mr. President, I urge the adoption of the amendment offered by the Senator from Montana, and once again I am proud to be a cosponsor of the Melcher amendment.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, when this amendment or substantially this amendment was presented in committee, I told the distinguished Senator from Montana that I was sympathetic to his purpose, and I am, and I went further to say to him that if he would submit it in the form of a bill the Agriculture Committee would hold hearings on it immediately and vote on it and undoubtedly report it out on the floor. But it is a little more complicated than that. The bill might actually have to go to the Finance Committee. I ask the distinguished Senator from Kansas if that is not correct.

Mr. DOLE. Yes; that is the understanding of the Senator from Kansas. It is a trade matter and not an agriculture matter.

Mr. HELMS. Exactly.

Mr. DOLE. I hope to discuss that in a minute.

Mr. HELMS. So, I say this with all due respect to my friend from Montana, and he is my friend.

Mr. MELCHER. Mr. President, will the Senator yield on that point?

Mr. HELMS. I yield.

Mr. MELCHER. The last time I think we attempted to do something under section 22, the Senator from Kansas was a proponent of the amendment, and a perfectly legitimate place to provide such an amendment is under section 22 of the Agricultural Act of 1949, and I might say, with the chairman's indulgence, under the jurisdiction of the Agriculture Committee.

Mr. HELMS. It is certainly of great interest to the Agriculture Committee and to the chairman of the committee.

Mr. President, I genuinely appreciate Senator MELCHER's desire to be supportive of the dairy farmers' cause and I understand his efforts to exact from the administration a quid pro quo for doing away with the semiannual adjustment in the dairy price supported schedule for April 1. In my days in the Senate I have exacted a few quid pro quos myself, and I understand what he is doing, and I commend him for the effort. But I hope for reasons that I will try to make clear that he is not successful today.

I say to him, again, that if he will submit this amendment in bill form I wish for him to make me the No. 1 cosponsor with him. Wherever it goes in terms of committee, I will be supportive of it.

Let me, if I may, clear up a few mis-

conceptions or what I perceive to be misconceptions about the effect of this amendment. Senator DOLE will discuss shortly the hazards involved in terms of our trading activities.

I have heard a statement or so that if left unchallenged would leave the impression that had there not been the importation of casein and case.n mixtures into the United States we would not now be faced with the dairy surplus problem and certainly that the surplus would not be of its current magnitude.

It has been implied that there would be increased demand for milk to fill the void created by the restricted availability of foreign casein.

I believe that is demonstrably not so, for several reasons, the first being that casein imports cannot be regarded as displacing what anyone would consider a significant amount of U.S. milk production. Casein imports represent only one-tenth of 1 percent of total milk production in the United States. Imitation cheese, the primary human food use of casein, represents only 2 percent of total domestic cheese production in this country.

Even these figures, I hasten to say, misrepresent to some degree the true impact of casein imports on the domestic dairy industry. The reduced availability of casein imports would not mean a one-to-one increase in demand for milk products. Casein cannot be substituted for in many of the uses to which it is put.

For example, I am told that casein is the key component of special medical nutritionals for which there is no substitute. These high quality protein products are fed to children with genetic defects which can lead to mental retardation. Other casein-containing products are used in hypoallergenic formulas and in treating infants suffering from diarrhea and celiac disease.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HELMS. I am delighted to yield.

Mr. MELCHER. I thank the chairman for yielding.

I do not think he is trying to say that we cannot make casein out of domestic milk products.

Mr. HELMS. No. I am trying to identify the parameters of the problem created by imports.

Mr. MELCHER. I want to make it clear.

Mr. HELMS. I understand, and I agree with the Senator. I already said I will cosponsor legislation that he may introduce independent of this bill. But I am trying to establish the parameters of the impact that the imports do have.

Still other specially formulated medical nutritionals rely on casein to meet the specific needs of institutionalized patients who cannot tolerate lactose, who cannot chew or swallow food, and who are on a sodium-restricted diet. Domestic nonfat dry milk cannot take the place of casein in these products. Thus, in the absence of a domestic casein industry, import quotas on foreign casein would expose certain segments of the population to extreme hardship while bringing no relief to American dairy producers.

I do not know, Mr. President, frankly, what impact the Melcher amendment would have. I do know that this matter is now under study and a report is due on or before June 1. Am I correct about that, I ask Senator DOLE? A report is due on a study of these imports, no later than June 1?

Mr. DOLE. June 1; the Senator is correct.

Mr. HELMS. I thank the Senator.

So we are talking about 2½ months, and the alternative to that is failing to send forth a clean bill, as it is called around here, to the House of Representatives. If this amendment is on it, I am told by the leadership of the House of Representatives that there will be many problems in getting approval of the House of Representatives. I confess that the No. 1 interest of the Senator from North Carolina is to get a clean bill with no amendments so that we can close this matter out and then I will turn and I will help the Senator from Montana in any way I can.

Since 1976, at least four studies on casein imports have been conducted by the U.S. Department of Agriculture and the International Trade Commission (ITC). None of these studies found any merit to the claim that the importation of casein had an adverse effect on the American dairy farmer. The most recent study, issued by the ITC in December of 1979, concluded that:

> The data collected during the course of the Commission's investigation indicate virtually no relationship between imports of casein and mixtures of casein and purchases of nonfat dry milk under the price support program in recent years. Likewise, no clear relationship is apparent between imports and domestic production or consumption of nonfat dry milk. Additionally, no clear relationship is apparent between imports of casein and mixtures of casein and other forms of domestic dairy production.

Mr. President, there is no correlation whatsoever, I am told, between imports of casein and purchases of nonfat dry milk under the Federal dairy price support program. Since 1965 the level of casein imports has been relatively constant, between 60 million pounds and 150 million pounds per year, while Government purchases of nonfat dry milk have gyrated wildly between 40 million pounds and 850 million pounds a year, and that is the problem. It is not the imports of casein.

In some cases Government purchases of nonfat dry milk went up as casein imports went up. In other cases, Government purchases went down as casein imports went up. So there is no steady pattern in that regard.

I say to my good friend from Montana that his proposal to restrict the importation of casein—without hearings, without proper consideration, and prior to the issuance of the report of the study now being conducted, which report is due June 1—simply will not generate any appreciable increase in the demand for nonfat dry milk or any other domestic dairy products.

So what the Senator is doing—and it is well intended, and he is doing it in all sincerity—will be nonproductive in terms of being helpful to the very people whom he wants to help.

The risk he is running is that he may bring real hardship to those whose very lives may depend upon casein, as well as higher prices and inconveniences to the consumers of this Nation.

Furthermore, adoption of the amendment would exacerbate the whey disposal problem that plagues many producers. Whey, which is a byproduct of cheese production, can be used in some specialty products. However, the vast bulk of the whey surplus must be treated in company and municipal waste disposal facilities at great cost to the users.

If the 151 million pounds of casein imported into the United States last year were to be processed domestically, the whey surplus to be disposed of would be increased by 12 percent—an event that would add further cost to the production of dairy products.

Mr. President, my concerns about the proposal of the distinguished Senator from Montana are not confined to the substantive effects I have already laid. I confess that I am also troubled by the procedural problems almost certain to follow as a consequence of the adoption of this amendment.

The distinguished Senator from Kansas (Mr. DOLE), whom we all welcome back, will discuss that in more detail. But I will say preliminarily that the pending amendment would legislate the maximum import quota under section 22 of the Agricultural Adjustment Act of 1933, and it would thereby circumvent the procedures established by Congress for invoking a section 22 import quota, including a public hearing where all interested parties would have at least a chance to make their case for or against import quotas.

The amendment also bypasses the section 22 requirement that the President impose a quota only to the extent necessary to avoid material interference with the price support program. I do not think many Senators, if they will stop to think about it, will want to do that certainly without hearings and without consideratioin of the possible consequences.

Circumvention of procedures would subject the United States to challenges by other governments that the United States has acted outside the parameters of a waiver issued under the auspices of the general agreement on tariffs and trade, known as the GATT, for purposes of permitting the United States to impose quotas on imports of agricultural commodities that materially interfere with domestic price support programs. I do not think that a case can be made at this time that casein imports materially interfere with or threaten to materially interfere with the Federal Government's dairy price support program.

I can imagine the furor that is going to result among our GATT partners if we follow the procedure suggested by this amendment. Again Senator DOLE will address himself to that aspect.

At the very minimum I think you will see a fanning of the flames of protectionism and retaliation by our trading partners.

I am told that New Zealand, Australia, and Ireland have already communicated their concern that the Senate is even considering the amendment proposed by Senator MELCHER. I will say to my friend from Montana insofar as the Soviet Union is concerned I do not give a fig. They can say what they want to. But I do confess concern about our relationship with friends such as New Zealand, Australia, and Ireland, and possibly others.

I guess the bottom line, Mr. President, is that I think we ought to have at least some fair public hearings on this matter. I will guarantee the Senator from Montana that I will help expedite such hearings insofar as my authority goes witn the committee, and I am sure Senator DOLE will give him the same assurance as to the Committee on Finance.

But to approve this amendment, thus forbidding what we call around here a clean bill, is something I do not feel we should do.

I say again to my friend from Montana that if he does choose to go the legislative route instead of the amendment route I will cooperate with him to the fullest extent.

Speaking of the retaliatory actions likely to be taken by trading partners who consider themselves as having been injured, they would include restrictions on a lot of our agricultural exports such as soybeans, soybean extract, feedgrains, hydrogenated vegetable oils, and a whole multitude of industrial items such as transportation equipment, aircraft engines, farm machinery, and the like.

The Senator from North Carolina, Mr. President, just has no stomach for inviting a retaliatory trade war with people and nations with whom we are trying to cooperate and with whom we are trying to be friendly.

Maybe Congress could be excused for legislating an import quota such as is being proposed here if we had in the White House a President of the United States who was thwarting the implementation of section 22 in the face of compelling evidence that demanded the imposition of import quotas. We do not have a President like that. We have a President who has signaled to me personally and to Senators generally that he wants to cooperate and move this thing along on the basis of sound reasoning and careful study.

(Mr. NICKLES assumed the chair.)

Mr. HELMS. As I have indicated earlier, the U.S. Department of Agriculture is currently in the middle of yet another study to determine whether casein imports take markets from domestic milk producers.

I think that is a significant question and I want to know the answer to it. As I have said earlier, that study and the report thereon are due to be completed by the 1st of June.

So I say again that despite my immense respect and friendship for the distinguished Senator from Montana, I believe his amendment will not accomplish what he desires to accomplish, and it may do considerable harm. I say again that I pledged during the consideration by the Committee on Agriculture of S. 509 that I would call hearings just as soon as the USDA study is completed, and I reiterate that pledge to my friend from Montana now.

I know that he does not doubt my word.

One final comment and I will be through, Mr. President.

The basic question is whether we are going to throw a roadblock on the first test of President Reagan's efforts to bring this economy into line. I think that last November the American voters sent all elected officials a message that they wanted no more of this business as usual, they wanted things tightened up and spending reduced and the Federal Government removed from the backs of the American people.

I am inclined to think that the message had its source in a deep-seated frustration with the unwillingness of Congress for so many years to run a tight ship. So, in a very real way, the vote on this amendment and on this bill will be the first indication of the commitment of Members of the Senate in standing with President Reagan and backing him up in his efforts to stabilize the American economy.

It is with deep regret that I must oppose the amendment of the Senator from Montana. And I reiterate my commitment to him to work with him to see this matter through in other legislative ways.

I yield the floor.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I will take just a minute or two. I had not intended to speak on this amendment, but I think it is necessary that several points be made for the record.

I have listened carefully to my friend from Montana and my friend from North Carolina and others who have spoken on the amendment. I understand there is a rather sharp division of opinion.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter I received and certain other Members received from Secretary of Agriculture John R. Block dated March 16, as well as—unless it has been made a part of the RECORD—his letter to the chairman of the committee, dated March 13, 1981. These letters discusses in detail not only this amendment but S. 509.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 16, 1981.

Hon. ROBERT DOLE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DOLE: I am writing to urge your support for S. 509, a bill to suspend the April 1 increase in milk price supports. This measure, scheduled for floor action on Tuesday, deserves passage for several reasons.

It will encourage dairy farmers to control excess production, and it will reduce federal outlays this fiscal year by an estimated $147 million. At the same time it represents the first of the President's spending reduction proposals to be voted upon by the Congress.

Without this action, the government will continue to accumulate and warehouse millions of pounds of dairy products surplus to contemplated needs. Storage costs alone are now running at a half a million dollars a day. The Administration feels enactment of this bill will help relieve pressure on the dairy support program which is set for Congressional reconsideration this year.

On the separate issue of casein imports, the question as to whether they displace domestic dairy products to a significant degree must be addressed by other than legislative means which would cause serious problems under the General Agreement on Tariffs and Trade (GATT). The Department of Agriculture will complete an extensive impact study in June. If import restrictions are called for, the Department willl initiate administrative action under the Section 22 provisions of the Agricultural Adjustment Act of 1933.

For further information on this involved but most necessary bill, I refer you to the enclosed copy of a letter I have sent to the Chairman of the Committee on Agriculture, Nutrition and Forestry. In addition your office has received a separate fact paper, and the Department stands ready to answer any specific questions.

Sincerely,

JOHN R. BLOCK,
Secretary.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 13, 1981.

Hon. JESSE HELMS,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased that the Senate plans to take up S. 509 early next week. This bill would amend Section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price for milk be adjusted semi-annually.

The Administration strongly recommends that the bill be enacted and that action be taken quickly during the very few days remaining before April 1 so that this unnecessary and costly increase in milk price supports can be avoided.

This proposal is an important part of the President's Economic Recovery Program. It will save an estimated $147 million in FY 1981 and $86 million in FY 1982. And, it will send a correct rather than an incorrect economic signal to the nation's milk producers. We now have a huge and growing surplus of milk. The seven percent increase in the price support level for milk scheduled for April 1, 1981 will tell producers to increase production still more at a time when production should be moderated.

This bill proposes a single change in the law—authority to forego the increase in milk price supports now required by law on April 1, 1981. It would not reduce the current price support level or eliminate or threaten the dairy price support program. It will benefit both consumers and taxpayers. It would amount to less than two percent of milk producers' cash receipts from sales of milk.

I understand that there will be an attempt to amend this bill on the floor of the Senate to require that casein imports be eliminated or severely restricted. and to otherwise change the basis of our limitations on the importation of milk products. Such restrictions would be expected to cause a very significant increase in the cost of a number of food items that are made with casein, a natural milk protein that is not manufactured in this country. In addition, the Administration very strongly opposes such an amendment for three reasons:

1. There is a well-defined administrative procedure under Section 22 of the Agricultural Adjustment Act of 1933 for dealing with situations where imports threaten to

interfere with price support programs. That procedure involves much less risk of repercussions for our $47 billion agricultural export trade than does a legislated limitation. If there is concern about casein, it should be pursued under that procedure.

2. It is premature to propose action to limit casein imports. In 1979, the International Trade Commission investigation of casein imports found no damage to the domestic industry. The Department is investigating this matter and will have a report by early June, 1981. Without more specific evidence than is now available, there is not an adequate basis to support action to limit casein imports.

3. The casein import question is not directly related to the problem S. 509 is designed to help. Even if the current market for casein products were entirely supplied by domestic milk products, we would have a surplus of milk and would need authority to forego the April 1, 1981 increase in dairy price supports. There is no justification now for giving milk producers a signal to increase milk production.

I urge you and your colleagues in the Senate to strongly support S. 509 and see that it is enacted quickly without amendment.

The Office of Management and Budget advises that enactment of the proposed legislation would be in accord with the Administration's program.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr. DOLE. Mr. President, I certainly share the views just expressed by the Senator from North Carolina. This is the first test of whether or not we are going to be willing to bite the bullet and try to get a handle on inflation whether it affects dairy farmers or anyone else in this country.

As one who received substantial contributions from dairy interests. And I do not suggest that anyone be motivated by anything like a campaign contribution. I can understand that some of us may be viewed as being ungrateful. But the problem is larger than that.

It seems to this Senator that if we attempt to do by amendment that which we cannot do directly we are going to on the very first important matter signal to the President that we will not follow his leadership, and by amendment prevent the savings of $147 million. I suggest that that is the issue. I have great respect and have generally been on the same side, as the Senator from Montana. But, as the Senator from North Carolina suggested, something happened last November. We had a change in administrations. We had a change in the Senate. We had a change in the House. We had a change in attitude across this country and it affected farmers and businessmen and women and everyone else who in any fashion participates in any Government program.

I just suggest that that is our prime responsibility. And if we are going to be—I do not say misdirected or mislead—but if we attempt to do indirectly what we probably cannot do directly by adopting an amendment, it will go to the House and end up in the Ways and Means Committee. In that case I am not certain what the fate of this legislation would be.

Mr. President, I would like to read the statement by Secretary of Agriculture John Block on the question of casein imports.

I might indicate that we do not manufacture any casein in this country. It is not eligible for price supports and, therefore, it is not profitable. That is why it is imported.

On the issue of casein imports, I quote from the letter of Secretary Block, "as to whether they displace domestic dairy products to a significant degree must be addressed by other than legislative means which would cause serious problems under the general agreement on tariffs and trade (GATT)."

As I indicated, and as Chairman HELMS has indicated, the Department of Agriculture will complete an expensive impact study in June. Secretary Block stated in his letter if import restrictions are called for, the Department will initiate administrative action under section 22 provisions of the Agriculture Adjustment Act of 1933.

So, in addition to the pledge of support from the chairman and others of us on the committee, we have by letter, a pledge by Secretary Block that he will initiate administrative action under section 22.

Now, the Senator from Montana simply proposes that we limit imports of casein and caseinites to one-half of the annual average imports expressed in the 1975–80 period.

The purpose of this amendment is to redress certain perceived injuries due to the rising level of casein imports.

Mr. President, this matter has not been considered by the Committee on Finance, which has substantive responsibilities for oversight and coordination of the entire trade agreements program. I certainly recognize because I have been on the other side—not on this particular issue—that other committees, including the Agriculture Committee, of which I am a member, have a very important interest in this matter. It is important, however, that the proposed import restrictions be referred to the Finance Committee. This would help insure that the ramifications of such proposals on our international trading relationships were clearly understood and balanced against our obligations and needs.

To the extent to which our trading partners will take retaliatory action or demand compensation, it should be fully explored. I want to touch on that subsequently, because we are talking about savings. Those savings are being predicted on the basis that we do not have somebody seeking compensation.

The Senator from Montana also referred to casein imports from Russia. They are about 3 percent out of a total casein import. Some of us, including the Senator from Montana and others on both sides of the aisle, would like to sell grain right now to the Soviets. So I am not so concerned that they are selling us less than 3 percent of the casein imports.

We hope that at the appropriate time the President will lift the grain embargo and then I think we will understand the importance of trade with the Soviet Union.

I suggest that this amendment could cause retaliatory action. The likelihood of similar action against our exports, including agriculture exports, should be carefully studied.

The appropriate process also should be observed. The United States does have recourse through an internationally accepted procedure for correcting injuries to domestic industry and the price stabilization system if certain criteria are satisfied. This procedure was established in 1955 when the United States obtained a waiver of its GATT obligations for import restrictions imposed on agriculture products pursuant to section 22 of the Agriculture Adjustment Act of 1933.

Section 22 requires, however, that the President initiate an investigation by the International Trade Commission to determine whether imports are interfering with domestic price support programs.

I might suggest that that is the very thing that Secretary Block indicates will happen. If, in fact, import restrictions are called for, as he has pledged in his letter dated March 16, then the ITC is required to make a recommendation to the President based on its investigation.

Without an investigation and recommendations by the International Trade Commission to the President, our GATT obligations would be violated and the United States could be forced to compensate those GATT members whose casein exports to these markets have been curtailed.

Mr. President, under the general agreement on tariffs and trade, the United States is expected to be required to compensate the principal suppliers of casein to the United States in the amount of the average value of imports over the past 3 years.

During the 1978, 1979, and 1980 calendar years, casein imports have averaged $120 million. The compensation in this case could be higher because the value of imports has been rising and major supplying countries may cite this as a special factor requiring higher compensation.

So to say that this is a bargain for the administration, that this really doubles the amount that we can save, in my view, based on what I understand GATT to be, in fact would require us, or could require us, to pay higher compensation.

New Zealand, the European Community, and Australia are the major suppliers of casein to the United States. New Zealand supplies about 50 percent of imports, the European Community about a third, and Australia most of the remainder.

The United Kingdom has a small amount, Ireland has a small amount, and two or three other countries have small amounts.

In the case of New Zealand, the United States is the major supplier of tobacco—$5 million—fertilizers—$15 million—data processing machines—$21 million—aircraft—$19 million—and nonelectric power generating equipment—$30 million. In the case of the European Community, we could see duties levied against nongrain feed ingredients. The European Community has been a growing market for these byproducts in recent years.

In December 1979 the ITC made a general investigation of the relationship between casein imports and domestic dairy

production and demand. At that time, the ITC reported that such imports had no clear relationship to domestic dairy production and demand for domestic dairy products.

As has been indicated, the U.S. Department of Agriculture is presently studying this entire matter and will issue a report by June 1. I look forward to the results of this study and will urge the administration to take appropriate action in conformity with requirements of section 22 should it be shown that casein imports are interfering with our domestic price support program.

We are talking about 2½ months, as the chairman indicated. I suggest that that is not a very long time to wait, considering that the budget will be on the floor, the pledge of the Secretary of Agriculture and others, and that we will all be working together if, in fact, it is shown that casein imports are interfering with our domestic price support program.

Until these other steps are taken I cannot support this measure, which may offer some little compensation. I have not heard what this will do for the dairy people, except maybe it will help them. I am not certain how much. I am not certain how much it will help the taxpayers if we have to pay compensation.

We could end up in just about a wash in the cost to the taxpayers.

I am wondering why other amendments should not be considered. If we are going to start amending this bill, we ought to have those people who want to put quotas on auto imports offering amendments, or anything else.

If we want to restrict imports, we should really load this up. If that, in essence, is what we are doing, there is no reason that that amendment would not be in order if, in fact, this is what we have in mind.

I can only say that we are an exporting nation. Our agriculture exports last year were about $41 billion. We are hard competitors. We are doing a better job every year. We made progress under the last administration. We are going to make more progress in exports under this administration. It does not make sense to impair the progress we are making.

The Senate Finance Committee met yesterday and our target was to try to come up with savings of $9.3 billion in our report to the Budget Committee. I must say that Democrats and Republicans alike on that committee were unanimous. There is no doubt in this Senator's mind that the American people want to give President Reagan a chance. The best way to take away that opportunity is through an amendment which will throw a cloud upon whether or not we can pass S. 509 by the April 1 deadline.

I have the greatest respect for those who have a different view, but it seems to me that we lose sight of the real issue. The real issue is whether or not we want to give President Reagan a chance in the first action he has taken to show the American people and demonstrate to the American people, farmers included, that we want to give the President's program a chance. No one suffers more from inflation than the American farmer. No one suffers more from high interest rates than the American farmer, and no one suffers more from lower prices than the American farmer. I cannot think of any group that has a larger stake in doing something about the economy than the American farmer.

I know there are mixed feelings among dairy producers. I know the problems with that. I know that some dairy producers are not as well off as may have been described in certain reports. But I just suggest that they are in the same boat with every other American. They are willing to make a sacrifice.

I have had indications in my mail that they are willing to make a sacrifice. We are going to have other Americans make sacrifices or contributions. It is not a sacrifice, but it is a contribution.

Mr. MELCHER. Will the Senator yield?

Mr. DOLE. I will in a second.

It is a contribution to try to do something about the American economy. If we continue on down the path we have gone, I am not certain that we will have price support programs or any other programs that will be of value to American farmers or anyone else.

I would just suggest that whatever is said on this floor will probably not change one vote.

I think I can speak with some credibility for the American farmer, at least I hope I can speak with some credibility for the American farmer. I would hope that with the clear indication of support that the chairman has offered, and others on the Senate Finance Committee have offered, and the Secretary of Agriculture has offered, the distinguished Senator from Montana would see it in his heart to withdraw this amendment, let us pass S. 509 and send it to the House, and see action taken.

I understand that they would not offer this amendment in the House Agricultural Committee because the House Ways and Means Committee indicated they would claim jurisdiction.

It just seems to this Senator that we are clouding the issue. If we want to go on record against saving money, this is an opportunity. But if we want to go on record as supporting the President and saving money in the proper way, then I certainly believe that this amendment should be defeated.

We are going to be working on farm legislation. The Senator from Montana, the Senator from Kansas, and other Senators on the Senate Agriculture Committee will be working on farm legislation. We will have some differences, all of us, with the administration. I do not suggest that we give this administration a blank check, but we ought to give them a chance, a little daylight, 60 days, or 75 days in this case, before the Department of Agriculture makes its recommendation.

Maybe that can be expedited.

Mr. President, it would seem to this Senator that it is not asking too much to wait and then proceed on a normal basis, rather than trying to bypass procedures and require the President to issue a proclamation, without going through the normal procedures.

CONCLUSION

Until the appropriate legal steps are taken, I cannot support this measure which may offer little compensation to dairymen and could well violate our international obligations. It would be most unwise for the United States to impose quantitative restrictions on casein in violation of these obligations when we have such a major interest in using these GATT commitments to facilitate access to foreign markets for our agricultural exports. Agricultural exports totaled $40.5 billion in 1980. Their contribution to our balance of payments is well known and any measures which could inhibit their continued growth in the future should be undertaken only after close scrutiny and under the most serious conditions.

Having said that, I am happy to yield to the Senator from Montana.

Mr. MELCHER. I thank my friend for yielding.

First of all, I want to welcome him back to the Senate floor. It is great to have him back.

Mr. President, the Senator poses the question, is this going to help the dairy farmers?

They all think so. In that ITC study of 1979 they placed 54 million pounds in group A, which is for these purposes: imitation cheese, coffee whitener, and frozen dessert. Then in group B they placed 30 million pounds of casein in bakery products, breakfast foods, diet foods; and in food products such as milk replacer for animal feeds an additional 15 to 23 million pounds.

The point is these dairy farmers said yes, indeed, this will help them because they think all of this could be replaced by domestically produced products.

I thank my friend for yielding.

Mr. DOLE. Mr. President, I have the study on casein and its impact on the domestic dairy industry, a report requested by the Committee on Ways and Means dated December 1979. On page 4 of that report, its says:

> The data collected during the course of the Commission's investigation indicate virtually no relationship between imports of casein and mixtures of casein and purchases of nonfat dry milk under the price-support program in recent years. Likewise, no clear relationship is apparent between imports and domestic production or consumption of nonfat dry milk. Additionally, no clear...

Assuming that this is not correct, and I do not quarrel with what the Senator from Montana indicated, my point is the way to help the dairy farmers of America, and the way we are going to help others in America, is to show our resolve when it comes to cutting spending. We have that opportunity if we pass S. 509 without crippling amendments.

I do not have any quarrel with those who offer amendments. I have done a little of that in the past myself, though not many succeeded because we were always in the minority.

I did not know how to act yesterday with all those proxies. If you give a man 10 proxies, he can do pretty well in his committee work.

In any event, it would seem to this Senator that we are talking about 60 days or 8 weeks. We can all cooperate

with the Senator from Montana as soon as we have that report from the USDA. I would hope if we defeat the amendment that is not going to change the resolve of the Senator from Montana who has taken the leadership in this matter. It will not change the position of the Senator from North Carolina, I am certain, in that if this amendment is defeated his pledge to the Senator from Montana will be the same. I am certain that is the view of the Secretary of Agriculture.

Mr. President, I yield the floor.

Mr. LEAHY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, before I begin my remarks, I yield briefly, without losing my right to the floor, to the junior Senator from Wisconsin, who has some remarks to make.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, I support this amendment today because it is needed; I am a principal cosponsor of the amendment, I have written to each of you asking your support, and I have spoken to many of you personally pointing out the importance of what we are trying to do with this amendment by limiting the import of casein to 50 percent of the average amount imported during the last 5 years.

The United States, in 1980, imported approximately 150 million pounds of casein and casein mixtures—for the period 1977 through 1980 we imported over 512 million pounds, 13,500,000 of which came from the Soviet Union—virtually all of which are used in the production of human foods and animal feeds. Despite what others may argue, in most instances a domestic milk product could be used instead of the casein.

What does this mean in practical terms?

If domestic milk products had been used in 1980—for instance, nonfat dry milk, instead of the imported casein, the Federal Government could have saved almost one-third of a billion dollars ($329,000,000), since the Commodity Credit Corporation pays a support price of around 94 cents a pound for nonfat milk.

Mr. President, our Nation is in the economic doldrums, and it is time for a change. The dairy farmers of Wisconsin know this; the dairy farmers from other States know this. And, those farmers have told me they are willing to make meaningful sacrifices if other sectors of the agriculture community share in those sacrifices.

Our economic house must be put in order, expenditures lowered and tax relief granted. If we do not, and it is business as usual with continued huge Federal deficits and increased inflation, the results will be worse than the elimination of a price support increase.

However, with a balanced budget everyone will benefit, including our Nation's dairy farmers.

Let me turn for a moment to the dairy price support program itself.

Wisconsin is America's dairyland. We produce more milk than any other State; more butter than any other State—and almost 40 percent of the Nation's cheese. Dairying is a $2.5 billion industry in Wisconsin.

One reason that the dairy industry is what it is today is because of the price support program.

The price support program is an essential program for this country. It provides stability for the dairy industry, and a good wholesome product at a reasonable price for the consumer.

I am not going to argue at this time about the level at which price supports should be set. The important point is that there needs to be a program, set at a level and adjusted as needed, that will allow dairy farmers the ability to produce, improve their herds, and have a decent standard of living. Everyone benefits as a result.

In conclusion, Mr. President, I urge my colleagues once again to support this amendment, bring equity to the Nation's dairy farmers, and encourage the use of domestic milk products.

I thank the Senator from Oklahoma for yielding.

Mr. BOREN. I thank my colleague from Wisconsin.

Mr. President, I should like to yield briefly, if I may, without losing my right to the floor, to the Senator from Delaware and then to the Senator from Vermont.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. I thank the distinguished Senator from Oklahoma.

Mr. President, I oppose the amendment offered by my colleague, Senator MELCHER. This amendment would limit the importation of casein, the principal protein component of milk, to 50 percent of the average annual imports during the 1975–80 period. This would lower our imports to less than 70 million pounds, down 54 percent from 1980's level.

My colleague offers this amendment on the grounds that imports of casein compete directly with domestically manufactured dairy products and therefore interfere with our dairy price support program. According to supporters of this amendment, casein and its derivative, sodium caseinate, displace American milk and milk products in such items as processed foods, frozen desserts, and medical/nutritional/pharmaceutical products.

Mr. President, the case simply has not been made that casein competes directly with dairy products in many foods and feeds. There is no domestic production of casein, the last manufacturer having closed his doors in 1972. Moreover, the capital costs of producing casein in this country—including waste disposal and energy requirements—would be staggering.

Nonfat dry milk and skim milk, which are produced in the United States, do not appear to be perfectly substitutable for casein. Nonfat dry milk, for example, contains milk sugar, which often adversely affects the quality of the finished product. That means lumps in our coffee. Moreover, many Americans can not tolerate milk sugar in their diets. Skim milk, too, has certain limitations. It has a much shorter shelf life than nondairy creamer, and all of you who have that jar of nondairy creamer in your home or office can imagine what life might be like without it.

According to a report done in 1979 by the U.S. International Trade Commission, there is no clear relationship between casein imports and price support purchases of nonfat dry milk. The ITC also found no clear link between casein imports and domestic consumption and production of nonfat dry milk or other dairy products.

In the Trade Commission's study, a large majority of casein users surveyed said they would not use nonfat dry milk were casein unavailable. Almost all of the medical/nutritional/pharmaceutical products would cease to be manufactured, due to the absence of a practical substitute at any price.

In my own State of Delaware, 50 people in Dover could lose their jobs were there insufficient supplies of casein as certain processed foods and desserts such as nondairy whipped topping simply cannot be made with nonfat dry milk or skim milk because of serious quality problems.

Mr. President, there is another difficulty with this amendment. Senator MELCHER is proposing that we approve an import quota as part of a domestic price support bill. However, since his proposal would entail a drastic trade action on the part of the United States, I believe it should be the subject of comprehensive hearings by the Finance Committee.

Finance should have the opportunity to review the import situation, the international implications and the possible repercussions of any import action. Moreover, the U.S. Department of Agriculture is reviewing the ITC study at the request of our milk producers. USDA expects to present its findings in June, and we should certainly wait until we have had the benefit of the Department's report before we reach any conclusions on casein imports.

I strongly oppose Senator MELCHER's amendment and urge my colleagues to do the same.

Mr. LEAHY. Mr. President, I thank the distinguished Senator from Oklahoma for his courtesy in yielding briefly. I will be brief.

I also am delighted to see the distinguished Senator from Kansas back. He has been missed on both sides of the aisle, and I know he is welcomed back by both sides of the aisle.

I realize that we are trying to work toward a vote on this matter in a relatively short time. However, I note briefly, in response to statements by the Senator from Delaware and the Senator from Kansas about delaying this matter for further study, that we do have adequate information to decide the issue now. If we do not have adequate information to decide the issue now, then we also do not have adequate information to vote on S. 509.

S. 509 asks us to eliminate the semiannual adjustment, with less than 3 weeks' notice; Vermont has to be considered probably the most frugal State in the Nation. Certainly it is by far the most

Republican State in the Nation. If any State is going to be supporting President Reagan, it will be the State of Vermont.

I also point out that our dairy farmers, who, as the distinguished Senator from Wisconsin has pointed out, will support significant changes in a dairy price support program, would like a wee bit of advance notice on this. They have had the whole load dumped on them almost overnight, and they are asking for a little amelioration in this, in a way that would not cost the Government anything, which, in fact, would save the Government substantial amounts of money.

If it is required, after all these years of studying casein, after having appeals made to the past four Secretaries of Agriculture on the casein issue, after having discussed it all the time I have been in the Senate, if it is necessary to wait even longer on this, then, by the same token, the same argument can be made as to S. 509.

I thank the distinguished Senator from Oklahoma for giving me this time.

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. BOREN. The Senator from Texas has asked me to yield to him briefly, and I yield.

Mr. BENTSEN. I thank my distinguished friend from Oklahoma for his generosity. We have been infringing on his time, and I will keep my remarks brief.

Mr. President, I support the amendment of my distinguished colleague the Senator from Montana (Mr. MELCHER) to S. 509, the bill to implement the administration's proposal to suspend the scheduled April 1 adjustment of the dairy price support level.

I believe that this amendment is entirely in keeping with the spirit and intent of this bill, which is to reduce Federal outlays by holding down the support price for milk and to reduce the rate at which Commodity Credit Corporation stocks of milk are increasing. This amendment recognizes that casein, which is produced from milk, is a substitute for milk in many uses. Casein imports, which amounted to over 152 million pounds in 1980, are thus arguably increasing the cost of the U.S. dairy price support program and increasing the amount of surplus milk that must be purchased by the CCC. To the extent that this is occurring, it is only appropriate that the United States restrict these imports in order to further reduce the cost to the Treasury of the dairy program.

The amendment now before the Senate is a reasonable one. Recognizing that there are some uses for which casein is uniquely suited, and that casein is no longer produced in this country, this amendment would restrict casein imports to about 50 percent of the previous 5-year average rather than banning casein imports entirely. This would allow for casein use in those products where it is a necessity, but would encourage the use of domestic milk product whenever possible.

Mr. President, all Americans are being called on to make sacrifices in order to reduce Federal spending. I have been a strong proponent of major spending cuts, and I will vote for many unpopular cuts this year, including this one. I believe that a strong economic program of spending cuts, regulatory cuts, and a balanced tax cut package is vitally important. We must turn a major portion of our national resources back to the private sector if we are to return to economic prosperity.

Because many Americans, including dairy farmers, are being called on to make sacrifices in this effort, I cannot fail to support this amendment, which would provide that a small part of this burden would be shared by our trading partners instead of being paid entirely by American farmers and taxpayers. It is only fair that those countries who have been dumping their milk surpluses, in the form of cheap casein, into this country should share in these cuts. I cannot justify telling an American dairy farmer that he must forgo this scheduled adjustment in order to reduce Federal spending but that we must not reduce Federal spending in a way which would impact foreign dairy farmers.

In addition, Mr. President, I would point out that a glaring inequity in our casein import program allows Russia to ship casein to this country. Last year Russia earned almost a million dollars in precious hard currency by exporting 1.3 million pounds of casein to the United States. This money could have been used to buy grain from Argentina—grain that replaced American grain that was embargoed.

Mr. President, if we are to enact the massive spending cuts that I believe are necessary this year the burden must be shared by everyone. This country is well within its rights to reduce Federal spending at the expense of all dairy farmers, foreign and domestic. It is an injustice to the American dairy farmer to do otherwise.

I urge my colleagues to join me in voting for further reductions in Federal spending by supporting the Melcher amendment.

Mr. BOREN. I thank the Senator from Texas.

Mr. ANDREWS. Mr. President, will the Senator yield for a moment?

Mr. BOREN. I yield.

Mr. ANDREWS. Mr. President, the Senator from Vermont (Mr. LEAHY) pointed out that his is a very conservative State, interested in saving money. The President's request saves about $145 million and the request of the Senator from Montana would save more than $200 million, so we would get better than twice the savings.

In addition, those dollars that are used to purchase goods from overseas have a greater impact on inflation because they contribute to the imbalance of payments.

So anyone who wants to save money and wants to help our President get this inflation under control should support the amendment of the Senator from Montana, by all means.

Mr. BOREN. I thank the Senator from North Dakota. I strongly endorse the statement he has just made.

Those of us supporting the Melcher amendment and joining him in consponsoring this amendment certainly do not mean to be indicating any lack of support for the proposals of the President. I have voted consistently to cut Government spending. Just this week, in the Finance Committee, I supported the President's requests in every area.

I join the others in expressing pleasure at the return of the Senator from Kansas to the Senate. I agree with the comments he made, that there is no greater problem facing us than bringing inflation under control. I recognize that the only way we can begin to truly bring it under control is by reducing runaway spending by the Federal Government.

At the same time, as the Senator from North Dakota has just pointed out, the amendment of the Senator from Montana would in no way diminish the savings to the Federal Treasury which would be achieved. In fact, the amendment would enhance the savings.

It has been pointed out that we have had adequate study of this issue in the past. There is strong reason for believing and strong evidence to establish that foreign imports of casein do serve to displace and to substitute for skim milk. When we consider that in 1980, the United States imported more than 152 million pounds of casein, displacing upward of 4 billion pounds of domestically produced skim milk, it is easy to understand why the savings, under the amendment of the Senator from Montana, will be even greater to the Federal Treasury.

If domestic supplies had been used instead of foreign casein, the Government cost of the dairy program could have been reduced by $329 million.

The U.S. trade balance would have been improved by over $140 million.

So with all due respect to those who have urged us to oppose this amendment, I think we are acting responsibly. I understand how in many ways this is considered a symbolic vote and that there are those who wish to see this bill passed without any amendment.

I do not think we detract in any way from the symbolic value of this vote by improving the piece of legislation and by changing it into a piece of legislation that will save the taxpayers even more money in the long run.

I, for one, Mr. President, wish to make it clear that whether or not this amendment is adopted I still intend to support the final passage of S. 509 and to support the President in his efforts to save Federal funds and to bring the budget into balance within a reasonable period of time.

There are other symbols that are also very important. During the discussion of this piece of legislation I was shocked to learn that we continue to import casein from the Soviet Union. I recognize that the amount of money involved is very small in terms of the overall budget of this country. In terms of the overall balance of trade, it is a very small amount. But again, when we talk about symbols I think it is absolutely unconscionable that the United States while maintaining an embargo on grain produced by our own farmers in sales to the Soviet Union should allow any agricultural imports from the Soviet Union

to come to this country. It is not only just casein that we are importing. We are importing furs. We are importing, and I am sure this is of interest to the chairman of the Agriculture Committee, tobacco produced in the Soviet Union. We are importing that into the United States. We are importing several other products.

It is a small amount of total dollars but it is important. I do not think there is any way that we can support continuing to allow agricultural imports into this country from the Soviet Union when we do not allow our own farmers to sell agricultural products, grain in particular, to that country.

Mr. President, while considering this matter I think it is important that we do not forget that we are here asking the farmers to make a sacrifice for the sake of bringing Federal spending under control.

All of us are going to have to make a sacrifice. Every sector of the economy is going to have to make a sacrifice. I think those of us who are from agricultural States are going to have to be willing to do our share. But at the same time I think, as we make these cuts, we should not lose sight of the overall situation that exists economically for American agriculture.

I wish to submit for the RECORD an analysis of the cost and returns of milk production, prepared by Dr. Clifford Burton, extension dairy specialist, and Dr. Raleigh A. Jobes, associate professor of agriculture economics at Oklahoma State University.

Mr. President, I ask unanimous consent that that study be printed in the RECORD at the conclusion of the remarks which I am just about to make.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. BOREN. Mr. President, as the data shows, one of the biggest problems facing dairy farmers is rising production costs. This is the same problem which is causing a financial strain on other sectors of agriculture.

As a result of farm income not keeping pace with production cost, net farm income has declined rapidly.

I might point out, Mr. President, because we are going to be considering the overall budget for agricultural programs later on, that across the board in American agriculture, according to the Department's own statistics this last year farm prices, prices received by the farmers for the products and income to the farmer, increased only 2 percent while the cost of those items which the farmer has to buy increased 13 percent, just in the last year alone. Talk about a cost-price squeeze. There it is plain for all to see. It is not as if agriculture were in a good position when the year began. Already net farm incomes in real terms were lagging back in the area of the amount of income farmers received some 35 years ago in this country.

They have been left out of the economic progress of their country more than any other segment of our society. The tremendous impact of price inflation on farmer purchasing power is obviously shown in the charts in the study to which I referred. Net farm income after inventory adjustment has declined markedly in constant dollars since the early 1970's and is presently lower than at any time since 1945.

I wholeheartedly support Secretary of Agriculture Block's decision to make agriculture profitable once again. The challenge before Congress this year is to adopt farm programs and policies that will keep our farmers in business. We cannot have another decade like the last decade in which in my home State, for example, we lose 40 percent of the family farmers who simply had to go out of business. We must address these problems if we are to insure the future economic well-being of the dairy farmer, as well as other farmers.

The figures in the far right column of this study confirm what dairy farmers have been saying for several months—that costs continue to climb much faster than income. Regardless of how efficient one gets his dairy operation, his expenses turn out to be greater than his income.

The figures for 1980 show the greatest loss in years. The figure is $191 net loss per cow. Comparing 1980 with 1979, the increase in income is only 2 percent. This slight increase was held down at least partially by lower animal income. Milk income per cow was up $114 but animal income dropped $74 per cow offsetting some of the increased milk income.

At the same time the increase in costs, which included every item in the column, rose a solid 20 percent. That is a net difference of 18 percent more increase in cost than in income. There is no way a newer dairyman with a large debt load can survive this kind of economic situation for long.

The drought in the Southwest caused feed prices to be abnormally high. Feed made up 51 percent of expenses at $1,060 of a total of $2,057 in expenses.

In 1980 the figures show that feed was up $171 for an increase of 19 percent, hauling was up $6 for a 10-percent rise, and operating expenses climbed $33 for a 17-percent gain. The biggest increases however were capital up $79 for a 27-percent jump, machinery ownership up $25 for a 30-percent boost, and labor climbed $40 for a 20-percent gain.

Going back to 1976 compared with 1980 shows 44-percent increase in income, which sounds pretty good until it is compared with a 67-percent rise in costs. One wonders how long this cost-income relationship can remain.

This data is figured on actual costs and income reported by dairy farmers in the States of Arkansas, Kansas, New Mexico, Oklahoma, and Texas. It is calculated on a herd of 80 cows with average production of 12,000 pounds per cow.

So, Mr. President, I am prepared to take whatever painful steps are necessary to balance the Federal budget. I am prepared for agriculture to do its share and as I talk to my constituents who are in that great agricultural sector, they are among the most patriotic of all our citizens and most willing to make sacrifices, but we must make sure that the sacrifice which they are making is equitable. We cannot continue as we have done with the grain embargo, for example, to ask the agricultural sector to make more than its fair share of sacrifice.

I realize that the agricultural community with only 4 percent of the population of this country and therefore only 4 percent of the votes in any national election is a very easy target.

But just as I support the cuts which are being made today I ask my colleagues to keep in mind the equities as they consider the agricultural budget down the line, and I again urge favorable action on the amendment of my colleague from Montana, because it injects into the situation a matter of trade equity, some protection for our domestic producers, protection for the American taxpayers, against the open-ended cost of this program and, as my colleague from North Dakota has indicated, will not only be of assistance to the President in holding down the cost of direct Federal spending, but will be of even greater assistance because we can in the long run, by taking this action, reduce the cost of our dairy support program even more than at the present.

I thank the Chair.

EXHIBIT 1

SUMMARY: COST AND RETURNS OF MILK PRODUCTION, JANUARY 1980-DECEMBER 1980—OKLAHOMA STATE UNIVERSITY

	12,000 lbs							
	Illinois, 60 cows	Indiana, 60 cows	Iowa, 60 cows	Minnesota, 50 cows	Nebraska, 60 cows	South Dakota, 50 cows	Wisconsin, 50 cows	Southwest region, 80 cows
Livestock investment:								
Dairy cow	$1,200.00	$1,500.00	$1,350.00	$1,150.00	$1,295.00	$1,250.00	$1,300.00	$1,400.00
Dairy yearling heifer	224.00	310.00	368.55	300.00	464.10	253.00	240.00	330.00

Mr. HELMS. Mr. President, I yield to the distinguished Senator from Pennsylvania without losing my right to the floor.

Mr. SPECTER. I thank Senator HELMS very much.

Mr. President, I rise to lend my voice of concern for the agricultural industry of the United States in terms of the matters which are being considered here today. I am persuaded that the problem of casein is a very substantial one and that the original concept for casein to be used for industrial purposes has now been altered so that a great quantity is being used for agricultural purposes.

There are many factors involved which suggest the validity of the amendment which has been offered to S. 509.

Notwithstanding those factors, I am going to vote in opposition to the amendment for two reasons:

I am persuaded that S. 509 will not be passed if it has this encumbering amendment, so I am persuaded to join the request of President Reagan to send to the House of Representatives, if a majority of this body concurs, S. 509 without the encumbrance of the amendment.

I am also persuaded by the statements made by the distinguished Senator from Kansas, Senator DOLE, that the Finance Committee should have an opportunity to consider the casein issue in the light of the report which is due on or about June 1.

In proceedings this morning before the Agriculture Subcommittee of the Appropriations Committee, the Secretary of Agriculture testified that the report on casein would soon be finished and that it was a possibility that there would be an effort by the Department of Agriculture to have voluntary limitations on the importation of casein similar to that which is now being urged on automobile imports from Japan.

So in voting against this amendment I want my position to be clear that I think there is enormous merit on the part of the agricultural community in this country in opposing the current situation with respect to casein, and I would expect to be supporting that position when the matter is ripe for decision after it has been considered by the Committee on Finance and after S. 509 has been acted upon.

As to S. 509 itself, I would add just a word, although it is somewhat out of turn, but having the microphone in hand it will abbreviate the proceedings if I make a brief statement. I intend to support S. 509, but in so doing I again voice concern that the farming community is being asked to make its sacrifice in advance of the overall budget cuts.

I am persuaded by what the Secretary of Agriculture said this morning that it is important that this measure be adopted so that the increase in prices effective April 1 will not be put into effect, to send a signal to the farming community about the need to curtail production, and in so doing I do believe that there is a consensus in this country generally about the need for budget cuts, and having discussed this matter extensively with many farmers, including milk farmers from Pennsylvania, where my State is the fifth largest milk-producing State in the Nation, producing almost 8 million pounds in 1979, and that all Americans are prepared to make their fair share of sacrifice, I think the farming community has shown its patriotism in being willing to go along with these cuts and supporting the bill which has been reported from the committee by Senator HELMS as chairman of the Committee on Agriculture. I think it is a model to be emulated by the rest of the Nation as we consider the remainder of the budget cuts which are so necessary to restore the vitality of our economy and to reduce inflation.

I thank Senator HELMS very much, and I thank the Chair.

● Mr. DOMENICI. Mr. President, I would like to commend the Agriculture Committee and its chairman for moving expeditiously by reporting this legislation to eliminate the April semiannual inflation adjustment for dairy price supports.

S. 509 is an important first step in implementing the President's economic recovery program. Outlays for the dairy price-support program have increased from $0.2 billion in fiscal year 1978 to an estimated $1.8 billion in fiscal year 1981. This legislation would reduce budget outlays by almost $250 million over the next 2 years.

I realize that consideration of this bill apart from the remainder of the President's program may appear to single out one group for unfair treatment, but the time is short. This legislation must be enacted before April 1 to achieve the potential savings. The Budget Committee is already meeting to consider the other proposals in the President's package and will have recommendations for the Senate to consider shortly.

I will assure the farmers of this country that they will not bear a disproportionate share of the budget reductions necessary to get our economy back on its feet. Dairy farmers, in particular, have much to gain from lower inflation and stronger economic growth. A sound economy is essential for the growth of consumer demand for dairy products, which has remained static or declined on a per capita basis.

Again, I would like to commend the Agricultural Committee, and I urge the adoption of the bill as reported.●

The PRESIDING OFFICER (Mr. DANFORTH). The Senator from Iowa.

Mr. GRASSLEY. Mr. President, it is with some reservation that I rise in support of the amendment offered by the Senator from Montana. But regardless of its passage, I will still support the bill as reported from the committee because I, too, see this as a symbolic measure of whether or not we are going to be able to get the President's economy program on the road.

Under normal circumstances it would have been preferable to consider the issue of the impact of casein imports on the use of domestic milk supplies in conjunction with our reevaluation of the milk price support program during our work on the 1981 farm bill. Unfortunately, we are not facing normal circumstances. Since it is imperative that we begin controlling Federal spending, and since the scheduled April 1, 1981, semiannual adjustment of the support price for milk will result in increased spending, the adjustment must be reviewed now, but should not be reviewed in a vacuum. The discussion should include the level of support as well as the casein issue.

There is little question that this action will place a burden upon the dairy farmer. And it comes at a time when dairy farmers are facing escalating production costs. Nevertheless, dairy farmers have indicated a willingness to share the burden of cutbacks in Government spending, and they realize that there may be a need to revise the overall milk price support program.

However, it seems ironic to me that on one hand we are forcing our dairy farmers to cut back, while at the same time, we continue to allow the import of casein, that to some extent, clearly competes with our domestic milk products. Consequently, if Congress is to act now to par down the budget effect of our milk price support program, we should also be willing to limit the amount of casein that is imported into our country. And that is competing with our milk products. Therefore, I believe, as do the dairy farmers from my home State of Iowa, that this amendment to limit by 50 percent our casein imports is an equitable compromise.

We all recognize the merits of waiting for the June 1981, Department of Agriculture report that addresses the issue of casein import impacts on the use of our domestic milk supply. And as I indicated, this issue must be discussed during our consideration of the farm bill. However, in light of the years that our dairy producers have spent trying to alert the Federal Government to the problems of casein imports, and in light of the lack of positive action that the Federal Government has exhibited regarding these requests, perhaps it is time to turn the tables around, just this once, in favor of the position of the dairy farmers. Perhaps it would be healthy for the burden of proof, regarding the issue of whether or not casein imports adversely impact the use of our domestic milk supply, to be placed on those who have taken the view that it does not hurt domestic use. Perhaps in this way, we can finally get to the bottom of this issue.

I believe that we should still carefully consider the upcoming USDA report, and we should still consider the issue of casein imports, as well as the broader issues involved with the dairy price support program during our work on the farm bill. And I want to make it clear today, that if as a result of our studies, that it is proven that casein imports have had no significant impact on our domestic dairy product use, then I will fully review my position on casein imports. But in the meantime, we should be willing to compromise to help offset the effect of this adjustment suspension until the issue is resolved.

Let me close with two additional points. There has been some concern expressed that limiting casein imports will send a signal to dairy farmers to increase their production. I personally do not believe this argument. However, in order to set at ease those who share this fear, let me

offer this warning to dairy farmers. This action today should in no way be interpreted as a signal to increase milk production. There appear to be some significant problems with the dairy price support program, and therefore Congress will be thoroughly studying this program and will act appropriately to correct any problems. Consequently, any plans to expand milk production will not only likely hurt dairy farmers in the future, it may also cause Congress to act more severely in regard to the dairy price support program than normally would have been necessary.

There has also been some fear expressed that our foreign trading partners might view this import limitation as inconsistent with our trade obligations. Let me point out that we have already established our right to protect the effectiveness of our price support programs. Furthermore, we are taking significant steps, through this bill to suspend price support adjustments, to correct some of the problem with our support program. And our foreign trade partners have our assurances that we will further review the entire milk price support program during our work on the farm bill. And finally, I believe that it is safe to say that if we find that casein imports have not had a significant impact on the use of our dairy products, and has not rendered ineffective our price support program, then full resumption of casein imports will be ordered.

Consequently, our trading partners must realize that any over-reaction on their part over our limit on casein imports may be in the end fully unjustified, as well as detrimental to the future of our trading relations.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa (Mr. JEPSEN).

Mr. JEPSEN. Mr. President, I intend to oppose the distinguished Senator from Montana's amendment—my good friend Senator MELCHER. He and I are on the same side of things most of the time, but I intend to oppose this amendment for several reasons.

First of all, imposition of quotas are prohibited under the general agreement on tariffs and trade (GATT). Article XI of GATT prohibits the imposition of quotas. In 1955, the United States obtained a waiver from prohibitions in article XI of GATT with regards to section 22 of the Agricultural Adjustment Act. The question posed by several Senators here today is whether or not the limitation of casein would be within the section 22 actions.

I appreciate the hard work the National Milk Producers Federation has done on studying this issue. I understand they feel that the limitation of casein would be within the section 22 actions. However, the General Counsel for the Senate Agriculture, Nutrition and Forestry Committee takes a different view of the situation. I refer to a quote from the General Counsel which states:

> After consultations with the General Counsel's Office, the U.S. Department of Agriculture and the Office of the U.S. Trade Representative, it is my conclusion that the proposed amendment would not be consistent with article XI of the GATT and would not be within the waiver for section 22 actions.

Therefore, it appears to me that by passing legislation to limit the importation of casein, we would very likely be in violation of the general agreement on tariffs and trade. I do not think any Senator wants to do this.

I know that the farm producers around the Nation do not want this to happen because the marketplace and exports is the name of the game for farmers, profit is the name of the game for farmers.

Second, the necessity of sending a clean bill regarding eliminating the April 1 inflation adjustment for dairy price supports is great. There are several indications that adding the casein quota amendment on the bill would force it to be referred to both the House Agriculture and the House Ways and Means Committee. If this was to happen, it would be much more difficult for the bill to be passed by the April 1 deadline.

Third, while I understand dairy producers concern that casein imports are displacing the milk they are producing, I do not feel any adequate case has been made to show that. In fact, to my knowledge, the International Trade Commission study is the latest study made on that issue and it indicated that casein imports did not damage our domestic milk industry. I am not arguing the validity of this report, but I am arguing that we should wait on imposing quotas on casein imports until a study shows that there is some type of relationship between the import level and surpluses of domestic milk.

As we all know, the Department of Agriculture has already undertaken a study to determine the effects of casein imports and have scheduled the study to be done by June 1, 1981.

If at that time it shows they do have a very definite impact on the surplus of domestic milk, I assure the distinguished Senator from Montana that I will be one of the first to sign up and cosponsor an amendment at that time for whatever action is necessary to place some limits on casein imports.

But until that time, I strongly urge my colleagues at this time to vote against the amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I want to repeat something that I said earlier today, that all of us do want to help the President's program. We want to not only pass this bill and forego the outlay of Federal expenditures of $140 million—some for domestic production, but with the amendment we want to add another $160 million of reduction in Federal outlays by reducing the amount that will be spent for the domestic product that really could be offset by having a reduction in the importation of casein.

Now, that is what the amendment is about. Why should we do it now? Just pure and simple, to cut back on the Federal outlays, to have some fairness in our approach as we cut back on Federal outlays, not only cut back on some Federal outlays for domestic producers but also cut back on Federal outlays for foreign producers. It seems ironic that we have to argue over that point.

Casein is a displacement of skim milk—skim milk that is produced here in this country. We have about $1.5 billion in surplus purchases of domestic milk products, as indicated in the study by the CCC, the Credit Commodity Corporation warehouses.

So it is urgent that we take this step to reduce Federal outlays to that extent by reduction in some of the casein imports.

The question is asked, why do it now? Well, the answer is very simple: to control inflation.

We are cutting programs for people in this country. You name it. The Reagan administration has recommended a cut for whatever program you can think of that is domestic, anything from food stamps and education to the program for the arts and humanities. So it is apparent that the mood of the country and the mood of Congress is to have substantial reductions in Federal outlays. This should be one of them. We can help the President's program by acting now on them.

We need to reduce these Federal outlays on unneeded and unnecessary imported casein that is used for food products. And that is all that we are referring to in the amendment is just the casein that is used for food products.

The argument is made to refer it to other committees. The Senator from Kansas, the chairman of the Finance Committee, and others have made that argument, that this really should be referred to another committee. Well, I do not think we have time. I do not think we have time to do that.

We do not really have time to wait for the Department of Agriculture to complete their study, which is going to be sometime in June, and then to start processing the bill. It is well and good, all this talk about let us have some more hearings, let us have it bounced off another committee to see whether the jurisdiction is properly assessed.

Well, if you want to make reductions in Federal outlays—and we are certainly launching on that program—this is a very fine and timely spot to make a reduction in Federal outlays.

On the hearings in the Senate Agriculture Committee on March 11—that was just a few days ago—the information was brought out that there is a growing surplus of milk products in this country. They expect it to continue to grow. We just cannot afford to import as much as we are importing in casein right now.

What would this amendment amount to in dollars? Well, I guess it is $160 million to $200 million. We just cannot wait to see if we want to save Federal outlays in other programs. I think this is very timely, that we approach this problem and address this problem right now.

All the talk about referring it to other committees or what will happen in the other body, we will simply have to take timeliness into consideration. We will

simply have to take the urgency of the situation and controlling inflation, and we will simply have to weigh whether we want to make this reduction in Federal outlays for this amount of imported product coming from other countries to match some of the reductions we are making in Federal outlays on domestic programs.

We are told also that this might interfere with friendly trade. Well, I think, under the circumstances that face this country right now, this is a very friendly amendment. It is just a 50-percent reduction in the amount of casein that we are importing. It does not single out any country.

The countries that sell casein to us are all subsidized. I want to reiterate that point. All of the countries that sell casein to this country from whom we import subsidize their industry. This is not something that is in free trade. All of these countries subsidize their dairy industries, including New Zealand and Australia.

All of these countries that sell us the casein right now can qualify to send us a substantial amount. Whether or not they send us exactly 50 percent of what they sent us before is a question of competition with them.

But with the huge surplus of milk that we have in this country, we may be even too generous in allowing 50 percent of the existing 5-year average casein imports to remain as a quota.

Nevertheless, the amendment will eliminate 65 million pounds of imported casein. And that is equivalent of over 2 billion pounds of skim milk—skim milk and the milk products that we are raising here in surplus eventually end up going into storage and we are paying for that.

Historically, casein imports have been used for such industrial products as adhesives, plastics, paper coatings, paint, and leather finishings, but there has been a marked shift toward the production of food and animal feed products using casein as a primary ingredient.

A 1979 study by the U.S. International Trade Commission documented the fact that 81 percent of the casein use in the United States during the year was in food and feed products.

In many of these uses, casein displaces domestic milk that, as a result, must find other outlets. Much of this milk is processed into nonfat dry milk which is sold to the Commodity Credit Corporation under the dairy price support program.

A number of objections have been raised to the proposed amendment and I have responded to some of them. But let me respond to the one concerning the International Trade Commission study. It did not find significant substitution of casein for nonfat dry milk but, in some instances, there is a direct substitution of casein for nonfat dry milk. To the extent this occurs, there is a direct connection.

This point comes up. This ITC, International Trade Commission study, was in 1979. There was not too much urgency in 1979 on how much surplus dairy products we were having in storage. But now, with $1.5 billion in surplus of CCC storage, and it continues to mount and grow, it is indeed urgent and it is an emergency.

In the larger picture, it is a question of substitution of casein and other imported milk proteins for domestically produced skim milk. Almost 65 million pounds of casein were used in products definitely replacing 2.165 billion pounds of skim milk in 1979. If this skim milk were converted to nonfat dry milk, as much of it would have been, it would produce 201.4 million pounds of product.

Sale of this to the Commodity Credit Corporation at current purchase prices would cost the Government $189.3 million.

In a dissent from the Commission's report, the Commission Chairman stated that the report's conclusions were based on inadequate data and could not be supported.

The United States produced substantial amounts of casein until 1952 when production virtually ceased. At the same time, there was about a 50-percent cut in world prices for the product. This cut was of such an extent that it made U.S. production uneconomical.

Today, casein prices in the world market are determined, as are the prices for other dairy products, by the export subsidies or other assistance some nations provide their producers to assist their products to find markets outside their borders. The European Community, for example, subsidizes the production of casein to a substantial degree.

Even though some nations such as New Zealand and Australia do not rely on export subsidy programs, they have no choice but to meet this subsidized price in international trade.

The fact remains that even New Zealand and Australia, as well as all the other countries producing dairy products, do subsidize their basic industry.

The amendment uses the vehicle of section 22 of the Agricultural Adjustment Act to direct establishment of the limitation. The United States has been granted a specific exemption for actions taken under section 22 under the terms of the general agreement on tariffs and trade.

This is due to the fact that section 22 is aimed exclusively at assuring the effective operation of domestic price support and similar programs and is not an instrument of international trade policy. Further, the provisions of section 22 itself make it clear that no international agreement is to take precedence over the provisions of the law.

To the extent that casein is absolutely essential, the 69.5 million pound annual quota would be fully sufficient to meet the needs of industrial users of casein in the United States.

The fact is, that the major uses of casein today are based on the fact that imports with subsidy-induced prices are cheaper than the utilization of domestic milk solids.

The largest and fastest growing single use—the production of imitation cheese—does not require imported casein as an ingredient. Some imitation cheese producers are making these products using a blend of domestic skim milk and vegetable oil in a traditional cheesemaking process.

If casein at subsidy-induced prices were not freely available, casein would not be used as a primary ingredient in many products.

The United States does produce casein every day as cottage cheese. Cottage cheese curd, before final processing, is casein. It has not been dried and milled to the final product stage. The production technology is not complex, however, and could easily be assembled by any modern dairy processing firm, if necessary.

The proposed ceiling on imports would provide for sufficient product to meet the demand for casein where no feasible substitute is available.

The present situation is actually wasteful of energy resources. Presently, casein displaces domestic skim milk which is processed into nonfat dry milk. This operation uses substantial amounts of energy, chiefly, natural gas.

The use of skim milk in the production of products such as imitation cheese products would actually reduce energy use.

To the extent that a domestic casein industry might be reestablished, the energy demand would be about the same as at present. The major energy demand is in the drying of the product. Drying operations are done with the skim milk displaced and there would be little, if any, increase in this use.

Mr. President, I have not even mentioned that until last year, the Soviet Union was a major exporter of casein to our country, at the same time American farmers were forbidden to sell their wheat to Russia. As we work this year to develop a new dairy program, asking our farmers and ranchers to shoulder their share of the burden for economic recovery, we should at the same time link orderly marketing restrictions to any prospective changes in dairy price supports.

Mr. President, there has been a discussion of the prospects of retaliation against the United States and that we take legislative action to restrict casein imports.

The first argument is that we permit legitimate retaliation under section XXIII of the GATT treaty if we impose import restrictions legislatively rather than under the proceedings of section 22 of the Agricultural Adjustment Act.

The long and short of this question is that action by Congress is no more likely to result in retaliation than any action, whether under the procedures of section 22 or otherwise, which would have the effect of limiting casein imports, if that is what the exporting country decides to do.

Section XXIII of the GATT agreement, which governs retaliation, states three specific grounds for retaliation:

(a) The failure of another contracting party to carry out its obligations under this Agreement, or

(b) The application by another contracting party of any measure, whether or not it conflicts with the provisions of this Agreement, or

(c) The existence of any other situation.

In short, any action by the United States to limit casein imports could lead to retaliation under the GATT agreement by casein exporting nations. It does not matter whether such actions violate

the letter of the agreement or not. If we limit imports we are open to retaliation.

The second argument is that we cannot afford to chance possible retaliation by those nations exporting casein.

The threat of retaliation is not a new argument against amendments like mine. It has been raised for years as an excuse for inaction by the United States in seeking to enforce its specific rights in international trade, and has even been used as a reason not to enforce our own laws.

During the years 1974–79 we did not collect the countervailing duties that were legally called for on subsidized Common Market dairy products. Why? Because the Common Market might retaliate by not negotiating a new set of GATT agreements.

Throughout the seventies, our antidumping laws and duties were not enforced against Japanese television imports. Why? Because the Japanese might retaliate.

Now the same argument is being raised again, against my amendment. I say it is high time to stop worrying about what other nations will do because we take legal, legitimate action to protect our own producers from being undercut by subsidized imports.

We should stop beating ourselves with the whip of free trade in this country and start taking action to insure that our trade with other nations is fair as well as free. If this is not good enough for our trading partners, then maybe we had better rethink our trading relations with them.

TRADE AND THE COMMON AGRICULTURE POLICY OF THE EUROPEAN ECONOMIC COMMUNITY

The Geneva trade agreement was supposed to be an important step toward greater freedom and fairness in world trade. But it fell short of this goal because our negotiators were not able to gain agreement from the Common Market countries that they would stop subsidizing their exports and remove nontariff barriers to our agricultural products. This is a fatal flaw in GATT and in our trade with the Common Market.

Under the European Economic Community's common agricultural policy, they set artificially high prices for their farmers' products, from wheat to dairy products and, when they produce a surplus, they unload these products by subsidizing exports. Without these subsidies, many European agricultural products would sell at twice the world price.

On the other hand, the Common Market uses a variable rate tariff on imports of American agricultural products that compete with their own to set the cost of U.S. products at a level high enough to insure that they are not competitive. The result, for example, is that almost no American wheat or dairy products are imported by the countries of the Common Market.

If the GATT agreement really created free trade, it would have eliminated such practices by the Common Market. However, this would have caused much readjustment for European agriculture, which cannot compete without rigid protection. The Common Market negotiators in Geneva rejected such proposals out of hand, claiming they had to protect their farmers and their domestic economy.

Our negotiators acquiesced and agreed not to touch the common agricultural policies of high subsidies for exports, and high tariffs to stop competitive imports.

I have heard arguments on this floor that we are the beneficiaries of restrictive trade policies and it is only the European consumers that suffer. European consumers may suffer, but so do our producers, who are shut out of foreign markets and attacked by subsidized imports. If you do not believe this is the case, ask those in our country who produce electronics, steel, automobiles, textiles, and so forth. Better yet, ask the workers who lost their jobs.

It is also hard to understand the arguments that we are better off than the countries that subsidize their exports and protect their domestic markets when you look at the size of the trade deficits we have been running in recent years, compared to the surpluses of our trading partners—trading partners who, by the way, import as much or even more of their energy needs than we do.

Mr. President, what all this boils down to is if we are going to make an adjustment for domestic producers, there is nothing wrong, and indeed it is very appropriate, that we make an adjustment for foreign producers that sell casein to us.

On the point about this slowing down the bill, if we are going to be given that old argument on the first bill of the President's program when we seek to improve the President's program, we are going to be sort of a rubber stamp Senate, a rubber stamp Congress. They send up a bill, we see some flaws in it, we see how we can improve it and meet the President's goal, and we dare not touch it.

We have the opportunity here, instead of reducing the Federal outlays by $147 million, to perhaps increase the reduction another $160 million to $200 million. That is a substantial reduction in Federal outlays.

It is really worth taking our time to make sure that it is attached to this bill this afternoon.

The argument that maybe that will slow it down in the other body is a poor argument, in my opinion, because they are compelled by the same urgencies and same desires that we are compelled by, and the same logic, I would hope.

The point is, if we are going to reduce Federal outlays for a whole host of programs in this country, including this one in the price support for dairy producers in the United States, we should look at the other side and see how we are going to reduce outlays for programs that are a little bit out of line, a little bit foolish, a little bit harmful to the United States.

The amendment simply says that we reduce the casein imports by 50 percent. To reduce that amount of Federal outlays I believe is well worth the time. I do not believe that the argument that the amendment will slow down action in the House is a consistent argument.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABDNOR. Mr. President, I rise in support of S. 509 and the Melcher amendment concerning casein imports.

Dairymen are not making as much as has been presumed. Costs of production have risen greatly, especially with the decontrol of petroleum products.

There have been claims made that the dairy price support has cost the Federal Government $1.3 billion dollars in fiscal year 1980. In the annual report of the Commodity Credit Corporation we find the facts to be different.

What other reports fail to explain is that $1.3 billion was the total outlay made under the program for purchasing overstocks of dairy products. After these stocks were utilized, predominantly in the school lunch and Public Law 480 programs, the total net cost to the U.S. Treasury was $314 million; a far cry from $1.3 billion. However, S. 509 is no real solution to the problems dairymen face today.

Many of their problems stem from the Federal Government's cheap food policy. The problem is not that the price support is too high; it is that other commodities, particularly livestock and grains, are too low. Low feed grain prices and high fuel prices have forced dairymen to make the only prudent business decision under the circumstances. They have fed more cheap grains to their dairy herds and have increased production. The price support has kept an artificial demand on the dairy products.

Because of the high cost of farm equipment, supplies, and fuel prices, other farmers have joined the dairy industry, increasing production even more. In face of growing surpluses it seems we must skip the April 1 increase, as provided by S. 509, or institute mandatory production control of some kind. Dairymen tell me they do not want production controls.

Senator MELCHER's amendment which I have cosponsored, seems to follow along quite well with the purpose of S. 509. If we are going to skip the April 1 increase in the dairy price support because of surpluses, does it not then make sense that we should limit the import of dairy products entering this country? Is it reasonable of us to force our own dairy farmers into a market situation in competition with imports that are heavily subsidized by as much as one-third of the value of the product, and in some cases even more.

The administration has stated that there is a well-defined procedure under section 22 of the Agriculture Adjustment Act of 1933 to deal with situations where imports threaten to interfere with our price support programs. The administration should know also that there is a well-defined procedure for lifting the Soviet grain embargo, a campaign promise that the President has never carried out, and it continues to do damage to chances for the fair return that the American farmer deserves for his products.

It is my hope that we can keep this overall view in mind as we consider the 1982 farm bill, and I am committed to

doing everything I can to fight the cheap food policies in effect today which are bankrupting our family farmer system.

I urge passage of S. 509 with the Melcher amendment.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. PRESSLER. Mr. President, I am pleased to join with my distinguished colleague from Montana, Senator MELCHER, in sponsorship of his amendment to S. 509, which suspends the requirement that the support price of milk be adjusted semiannually.

The amendment would place a quota on the amount of casein, a milk protein produced from skim milk, that could be imported into the United States. The quota would be set at 50 percent of the average of the importation during the 5-year period preceding 1981. The average casein imports for the years 1975–79 is about 120 million pounds. The amendment would reduce this to about 60 million pounds.

Casein has historically been imported and used in industrial products such as paint, adhesives, paper coatings, and plastics. In recent years synthetic products have displaced casein. The U.S. imports have increased because casein has found new uses. These uses are in food products such as ersatz dairy products, coffee whiteners, frozen desserts and whipped toppings, bakery products, breakfast foods, and diet foods.

This shift has occurred mostly in the last 25 years. In 1955, the USDA estimated that less than 2 percent of the 77.5 million pounds of casein utilized in the United States went into food and animal feed products. A study by the U.S. International Trade Commission in 1979 indicated 79 percent of the 135,906,000 pounds of casein used in 1978 went into food and feed products and they projected that figure to rise to 81 percent during 1979. In these food uses, casein displaces domestic skim milk and causes domestic producers to find other outlets for their milk. A prime outlet is the production of nonfat dry milk.

It is estimated by the International Trade Commission that in 1978, casein imports displaced 4,214 million pounds of skim milk or 391.914 million pounds of nonfat dry milk produced from skim milk.

The amendment, by reducing the amount of skim milk displaced by casein, would double the savings of S. 509 to the Federal Government. This savings would be gained by a reduction in the amount of American dry milk that the Commodity Credit Corporation would be obligated to buy under the milk price support program. One hundred ninety million dollars of the price support program costs in 1979 can definitely be attributed to the purchase of products produced from milk displaced by these casein imports and a portion of an additional $88 million of the program cost was attributable to casein imports.

This amendment would add two important things to S. 509:

First, the amendment would increase the savings to the Federal Government, and;

Second, reduce the supplies of dairy products the Government has to purchase.

I urge my colleagues to give the amendment their most serious consideration.●

Mr. BAKER. Mr. President, in a moment, I will make a motion to table the amendment, and I will ask for the yeas and nays on the motion.

Before I do so, however, I would like to say that I strongly urge all Senators to consider that, in my view at least, this is not the right place for this measure and for this effort.

May I cite the fact, which I am sure has been cited in previous debate, that this measure really is a tax measure. It is not one that has even been before the Finance Committee.

May I suggest that there is every reason to think that if this amendment were adopted and enacted into law, it would cause serious difficulties in our GATT arrangements.

Mr. President, I speak on behalf of the administration when I say that the President hopes this amendment will not be adopted.

Mr. President, I move to table the amendment and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Montana. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) and the Senator from Georgia (Mr. MATTINGLY) are necessarily absent.

The PRESIDING OFFICER. Are there any Senators in the Chamber who have not voted?

The result was announced—yeas 45, nays 53, as follows:

[Rollcall Vote No. 33 Leg.]

YEAS—45

Armstrong	Hatch	Packwood
Baker	Hatfield	Percy
Bradley	Hawkins	Quayle
Chafee	Hayakawa	Roth
Cochran	Helms	Rudman
Cohen	Humphrey	Schmitt
D'Amato	Jepsen	Simpson
Danforth	Kassebaum	Specter
Denton	Laxalt	Stevens
Dole	Lugar	Symms
Domenici	Mathias	Thurmond
East	McClure	Tower
Garn	Moynihan	Wallop
Goldwater	Murkowski	Warner
Gorton	Nickles	Weicker

NAYS—53

Abdnor	Durenberger	Matsunaga
Andrews	Eagleton	Melcher
Baucus	Exon	Metzenbaum
Bentsen	Ford	Mitchell
Biden	Glenn	Nunn
Boren	Grassley	Pell
Boschwitz	Hart	Pressler
Bumpers	Heflin	Proxmire
Burdick	Hollings	Pryor
Byrd, Harry F., Jr.	Huddleston	Randolph
	Inouye	Riegle
Byrd, Robert C.	Jackson	Sarbanes
Cannon	Johnston	Sasser
Chiles	Kasten	Stafford
Cranston	Kennedy	Stennis
DeConcini	Leahy	Tsongas
Dixon	Levin	Williams
Dodd	Long	Zorinsky

NOT VOTING—2

Heinz	Mattingly

So the motion to table Mr. MELCHER's amendment (UP No. 14) was rejected.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I thank the Senator from North Carolina for yielding. If we can have order in the Senate I have an announcement to make.

The PRESIDING OFFICER. The Senator is correct.

The Senate is not in order.

The majority leader is recognized.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I thank the Chair.

Mr. President, it is clear that we will not be able to finish this bill today. I know of at least one other amendment to this amendment or perhaps a substitute. I know of several other amendments that must be dealt with before we can reach final passage.

I previously announced that it was our intention to stay in until about 6 p.m. today.

An order has already been entered to recess the Senate over at the conclusion of business today until Thursday at 11 a.m.

I know that schedule may inconvenience some Members on both sides of the aisle and I sincerely regret that. But I had not anticipated that it would take this long. It is now 20 minutes past 5 in the afternoon and I had not anticipated that we would have any difficulty in finishing with this measure today.

I am trying to keep the commitment that I made earlier in respect to the recess over of the Senate. I wish to announce there will be no more rollcall votes today and at 6 p.m. or thereabouts there will be a motion made to recess over until Thursday morning.

Mr. HUDDLESTON. Mr. President, will the majority leader yield?

Mr. BAKER. The Senator from North Carolina has the floor but with his consent I am happy to yield.

Mr. HUDDLESTON. Mr. President, will the majority leader in order to expedite matters and stay closer to the schedule allow us now to express the sentiment of the Senate which has just been expressed by voice voting this amendment on through and getting it out of the way?

Mr. BAKER. Mr. President, if the Senator can assure me I will win, I will be glad to do that. If he cannot give me that assurance, and I rather expect he cannot, then I expect there are minds to be changed and debate to be conducted, and I see an air of enthusiasm exuding from every pore of the distinguished chairman of the Agriculture Committee, Mr. HELMS, and I would not for all the world thwart that effort to change minds.

Mr. PRESSLER addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. HELMS. I yield the floor.

Mr. PRESSLER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The Chair is advised that the amendment is not in order for the reason that only an amendment to the pending amendment offered by the Senator from Montana will be in order at this time.

Mr. PRESSLER. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PRESSLER. I have an amendment that involves the grain embargo. When will it be proper to offer the amendment?

Will the vote on the Melcher amendment be in the morning or are there other amendments today?

The PRESIDING OFFICER. The Senator's amendment would be in order after the disposition of the Melcher amendment. However, the majority leader has indicated that there will be no more rollcall votes today. The Senate will be recessed over until Thursday.

Mr. PRESSLER. A further parliamentary inquiry: If I can get the consent of the leadership, will someone object if the amendment is laid down so that we can save time?

The PRESIDING OFFICER. The Senator can ask for unanimous consent to temporarily set aside the Melcher amendment.

Mr. PRESSLER. A further parliamentary inquiry: If the leadership would agree to it, would it be possible to temporarily lay aside the Melcher amendment so that I may introduce the amendment and make my statement on it? It is on the grain embargo.

The PRESIDING OFFICER. The Senator would require unanimous consent to call up his amendment at this time.

Mr. PRESSLER. Mr. President, I shall wait, at the request of my leader.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SCHMITT). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I rise today in support of S. 509, a bill to delete the requirement that the support price of milk be adjusted semiannually. This is a much-needed piece of legislation that will result in substantial savings to the taxpayers; without significant adverse effects on milk producers.

Mr. President, the dairy price support program has proven to be one of the most beneficial of all Federal Government programs. It has assured consumers of an adequate supply of milk, reflected changes in the cost of production, and provided dairymen with sufficient income to maintain productive capacity and meet anticipated future needs. However, the need for change in the existing program is demonstrated by the fact that the supply of milk has exceeded demand since mid-1979.

Commodity Credit Corporation stocks of butter, cheese, and nonfat dry milk have increased dramatically as a result of this excess supply, as has the cost of the price support program. At the end of the 1978–79 marketing year, Government-held dairy stocks of butter, cheese, and nonfat dry milk amounted to 147 million pounds, zero, and 448 million pounds, respectively. However, the repective holdings of these commodities are expected to increase to 562 million, 479 million, and 970 million pounds unless we forego the scheduled April 1 increase. Even without the increase in price supports, the USDA estimates we will have nearly 11 billion pounds of surplus milk in this marketing year. In January alone, the Government bought 49 percent of all the butter produced domestically.

Mr. President, dramatic increases in the cost of the dairy price support program have been experienced as well. The cost for storage, interest, and handling of current Commodity Credit Corporation stocks amounts to $0.5 million a day. Unless the April 1 increase is foregone, the Government will spend about $2 billion on dairy price supports this year. This is an increase of nearly $1.6 billion over the cost of the program 2 years ago. Such tremendous cost increases should not be allowed to continue.

According to the administration's figures, the Government will save about $147 million, nearly $750,000 a day, by forgoing the April 1 increase; without adversely affecting milk producers to any significant extent. Maintaining price supports at the current level of $13.10 per hundredweight will result in cash receipts from milk marketing, increasing by nearly $1.9 billion, or 12 percent, over the last marketing year. In addition, there would be a savings to the consumer by eliminating an expected retail price increase of 3.5 to 4 cents per half gallon as a result of the price-support adjustment.

Mr. President, there has been a growing amount of concern over the effect casein imports have had in the current disparity between the supply and demand for dairy products. I share that concern. However, I do not feel that this is the proper time to address this problem. The Foreign Agricultural Service of the Department of Agriculture is currently conducting a study of the effect of casein imports on the dairy price-support program. Senator HELMS, chairman of the Senate Agriculture Committee, has also given assurances that if the casein import question is not fully addressed by the Agriculture Department in its June 1, 1981, report, his committee will address the problem.

Mr. President, this legislation is one of the first of the administration's proposals to reduce the rate of growth in Federal Government spending. This is an opportunity for the Senate to demonstrate our support of the President's economic recovery program. I sincerely hope that my colleagues will join in supporting enactment of this measure, thereby clearly indicating to the American people that Congress has the will and resolve to do what is necessary to get our economy back on the right track.

Mr. CHAFEE. Mr. President, I rise today in support of S. 509 which would eliminate the semiannual adjustment provision in our dairy price support program.

The dairy price support program has been quite successful over the years. It has achieved its purpose of providing the American consumer with an adequate and stable supply of milk. It has guaranteed farm income levels which have served to preserve our operational capabilities required to meet our commercial needs.

Recent figures provided by the Commodity Credit Corporation, however, indicate that perhaps this program has been too successful, an overachiever you might say. For, in spite of all the positive aspects of the program, it has also provided a very strong incentive for dairymen to engage in excessive production—production which is outpacing consumer demand at an extraordinary rate. The result? An overwhelming volume of milk and milk products which the Government is committed to purchase and stockpile at an astronomical cost—$1.9 billion in 1981.

According to the Commodity Credit Corporation estimates, by the end of this marketing year, if no change in the current law is made and we proceed with the April 1 adjustment, the Government will own an estimated 562 million pounds of butter, 479 million pounds of cheese and 970 million pounds of nonfat dry milk. Another startling figure is that in January of this year, the Government had bought 49 percent of all butter produced in this country.

As incredulous as this may seem, it

underscores the incongruity of increasing support levels at a time when there exists a serious oversupply of milk.

Supporting this legislation should not be interpreted as singling out one particular group to bear an unfair share of the budget cuts. We are faced with a very serious problem which requires immediate remedial action. We can no longer justify this inflationary double-indexing at the same time we are slashing the budgets of many other worthwhile Federal programs.

Elimination of the semiannual adjustment will, in fact, have only a modest impact on our dairy producers. It will not reduce their current payment levels or alter program eligibility guidelines. As a matter of fact, cash receipts will still see a 12-percent increase this year.

Annualizing the price support adjustment will, however, save the American consumer close to 10 cents per pound of cheese and 4 cents per half gallon of milk. In addition, Government expenditures will be reduced by $147 million in 1981, or $750,000 per day for the remainder of this marketing year, and $86 million in 1982. This legislation will also clarify the whole market picture and signal to our dairy farmers to stop expanding production and encourage milk consumption instead.

In short, Mr. President, this legislation is economically sound, fiscally responsible and absolutely necessary. It is one more positive step toward scaling down Government costs and reducing the Federal budget deficit as we continue to wage our war on inflation.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a period now for the transaction of routine morning business to extend for not to more than 30 minutes in length in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

FRIENDS OF IRELAND

Mr. KENNEDY. Mr. President, on this St. Patrick's Day 1981, a group of 26 Senators, Members of the House of Representatives, and Governors have joined in a statement calling for peace in Northern Ireland and announcing the formation of a new organization, "Friends of Ireland," whose purpose will be to work for the achievement of this important goal.

I believe the statement will be of interest to all of us who care about an end to the violence and a peaceful settlement of the conflict in Northern Ireland. I ask unanimous consent that the statement and the response of the Government of Ireland may be printed in the RECORD, along with a series of newspaper articles and editorials on the statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESPONSE OF THE GOVERNMENT OF IRELAND

The Government greatly welcomes the announcement by leading members of the American Congress of their intention to establish an American-Irish "Friends of Ireland" group in Congress.

The Government are confident that the links between the Irish and American peoples, which are of such longstanding, will be even further strengthened by the setting up of this group. They will be glad to facilitate it in its endeavors to promote friendship and understanding between our two countires.

JOINT ST. PATRICK'S DAY STATEMENT 1981

Four years ago, a group of us, as Americans deeply concerned over the tragic conflict in Northern Ireland, first joined together to issue a St. Patrick's Day statement calling for an end to the killing and destruction and urging our fellow citizens to reject the path of violence. Each year since then, we have renewed our call for peace.

On this St. Patrick's Day 1981, we take satisfaction that American support for the violence has declined. We have seen the decline not just in weapons or financial aid, but in the insidious support of those who create or credit the propaganda that can only increase the tension and worsen the violence. More and more Americans have come to understand the critical importance of avoiding any activity in the United States or abroad that can lend itself in any way to the terror and brutality in Northern Ireland.

So today we reaffirm our appeal for peace. We urge all Americans to join us in condemning the violence in Northern Ireland, and to forswear any word or deed that fosters further violence.

We also take satisfaction in the increasing degree to which the Governments of Great Britain and Ireland have come to accept an American dimension in the Northern Ireland issue. We believe that the United States has a constructive role to play in promoting a peaceful settlement of the conflict. The Carter Administration's 1977 statement was a milestone in this regard, and we look forward to working with President Reagan and Secretary Haig—our fellow Irish-Americans—in continuing this indispensable effort.

We are confident that the American people will give their full support to a policy of the United States that seeks a peaceful settlement in Northern Ireland, that helps bring terrorism to an end, that demands respect for the human rights of all the people of Northern Ireland, that recognizes the legitimate aspirations of both the Protestant and Catholic communities, and that strengthens the ties between two of America's closest friends—Ireland and Great Britain.

Recent events have brought new hope. In our statement a year ago, we urged the British Government to join with the Government of Ireland in working together for peace. We welcome the meetings last year between Prime Minister Haughey of Ireland and Prime Minister Thatcher of Great Britain. In particular, we welcome their Dublin meeting last December, in which they acknowledged the strain caused in the relationship between the peoples of Britain and Ireland by the problem of Northern Ireland. We find special promise in their recognition of the need to develop policies and proposals leading to peace, stability and reconciliation, and their decision to devote their next meeting, in London this year, to consideration of the "totality of relationships within these islands." We look forward to that meeting, and to the joint studies the British and Irish Governments have commissioned to prepare for it.

We believe that the encouragement of the United States has been a significant factor in this hopeful initiative, and that continuing encouragement from the United States can provide a vital incentive for peace in Northern Ireland. We reject the machinations of all those who seek for their own advantage to subvert this constructive new approach.

We emphasize that the only settlement we favor is a peaceful one achieved by consent. We know that a settlement cannot be dictated or imposed—not from Belfast or Derry, not from London, not from Dublin, and not from Washington.

We reaffirm our belief that the only way to secure a lasting peace is to end the division of the Irish people. We share the great goal of Irish unity. But we agree that the goal can be reached only with the consent of a majority of the people of Northern Ireland, and with full safeguards for the rights of both sections of the community.

We must build as well on the progress we have made with the American people. We are therefore announcing today our intention to establish a new organization, "Friends of Ireland," whose purpose will be to seek an end to the violence and to support a peaceful settlement in accord with the principles we have stated. The organization will be open to membership of all those in Congress who share our principles. It will strive to inform Congress and the country fully about all aspects of the conflict in Northern Ireland. It will emphasize our concern for both the Catholic and Protestant traditions in Ireland. It will seek in other appropriate ways to serve the cause of peace and to facilitate greater understanding of the positive role America can play in resolving this tragic conflict.

On this St. Patrick's Day, we ask all Americans to join our cause, to reject the bomb and the bullet, the fear and the terrorism and the bigotry.

We look to a future St. Patrick's Day, one that we can foresee, when true peace shall finally come and Irish men and women everywhere, from Dublin to Derry, from Boston and New York to Chicago and San Francisco, shall hail that peace and welcome the dawn of a new Ireland.

SIGNERS

SENATE

Edward M. Kennedy; Daniel Patrick Moynihan; Christopher J. Dodd; Joseph R. Biden, Jr.; Alan Cranston, Democratic Whip; Thomas F. Eagleton; Gary Hart; Daniel K. Inouye, Secretary of the Democratic Conference; Patrick J. Leahy; George J. Mitchell; Claiborne Pell; and William Proxmire.

HOUSE OF REPRESENTATIVES

Thomas P. O'Neill, Jr., Speaker; Thomas S. Foley, Majority Whip; Edward P. Boland; Charles F. Dougherty; Don Edwards; James J. Howard; Paul N. McCloskey, Jr.; Joseph M. McDade; James M. Shannon; Pat Williams; and Edward J. Markey.

GOVERNORS

Hugh L. Carey, Governor, State of New York; Brendan T. Byrne, Governor, State of New Jersey; J. Joseph Garrahy, Governor, State of Rhode Island.

[From the Boston Globe, Mar. 17, 1981]

A PLEA FROM "FRIENDS OF IRELAND"

(By Thomas Oliphant)

WASHINGTON.—The words are so innocuous, it's hard to understand why they are so controversial.

"On this St. Patrick's Day," said the statement from three governors, 11 senators, and 10 congressmen yesterday, "we ask all Americans to join our cause, to reject the bomb and the bullet, the fear and the terrorism and the bigotry.

"We look to a future St. Patrick's Day, one that we can foresee, when true peace shall finally come and Irish men and women everywhere, from Dublin to Derry, from Boston and New York to Chicago and San Francisco, shall hail that peace and welcome the dawn of a new Ireland."

Such language has been coming out of Capitol Hill for nearly 10 years, rhetorical punctuation for the continuing tragedy of Northern Ireland.

In the beginning, the group was much smaller: a Jewish senator from Connecticut, Abraham Ribicoff; an Irish-American congressman from Brooklyn, Hugh Carey (now the governor); and an Irish-American senator from Massachusetts, Edward Kennedy.

Yesterday, on the eve of St. Patrick's Day, the swollen ranks of signers announced their intention to form an organization, "Friends of Ireland," in Congress. It is their statement of principles that contains the explanation of the controversy, particularly the following two points:

"We urge all Americans to join us in condemning the violence in Northern Ireland, and to forswear any word or deed that fosters further violence."

"We reaffirm our belief that the only way to secure a lasting peace is to end the division of the Irish people. We share the great goal of Irish unity. But we agree that the goal can be reached only with the consent of a majority of the people of Northern Ireland, and with the full safeguards for the rights of both sections of the community."

In short, what is being supported is the long, tortuous road of negotiation among the British, the Irish, and the Protestants and Catholics in Northern Ireland.

What is being opposed is anything having to do with any wing of the Irish Republican Army, be it guns, money or moral support.

Specifically, the new group in Congress—heavily laden with Democratic leadership members from both Houses—is designed to counteract the influence of another outfit, the Ad Hoc Committee for Irish Affairs. This was established four years ago by a Democratic congressman from New York City, Mario Biaggi, and has claimed support from nearly 100 members of the House at various times.

The Biaggi group is hard-line Irish nationalist in sentiment, but that is not what has made it a source of controversy.

Irish, British and American government officials have repeatedly said that the organization is involved with people in this country and in Ireland who have ties to the IRA.

Biaggi has denied it, but his activities brought a specific denunciation three years ago from the then-prime minister of Ireland, John Lynch.

Yesterday, the current prime minister Charles Haughey, issued a statement praising the new group.

"The government are confident," he said, "that the links between the Irish and American people, which are of such long standing, will be even further strengthened by the setting up of this group. They will be glad to facilitate it in its endeavors to promote friendship and understanding between our two countries."

That statement was a public affirmation of the work done all the time in private by the Irish ambassador here, Sean Donlan, to oppose Biaggi and assist politicians willing to support a negotiated settlement and oppose the IRA.

Ten years ago, that was anything but a popular position for an American politician to take. Considerable amounts of money were being raised in this country for arms, and political agitation on behalf of the IRA was considerable.

Today, in contrast, the flow of arms aid has been reduced to a trickle, and the terrorism is said by government officials to be supported mostly by Libya and various Palestinian groups with at least the indirect support of the Soviet Union, and by bank robberies in both Northern Ireland and the republic in the south.

Over the years, the tenor of the original Kennedy-Ribicoff-Carey statement has changed as well. Initially, its call for negotiation was coupled with a more anti-British stance, favoring, for example, withdrawal of that country's military forces from Ulster.

Now, the purpose is more to nudge all the parties to keep a real but fragile communications process going.

In 1977, Kennedy and Carey were joined by House Speaker Thomas P. O'Neill Jr., and New York Sen. Daniel Patrick Moynihan for the first of what are now five St. Patrick's Day statements. Each year the list of cosigners has increased.

Also in 1977, the four Democrats—known around Capitol Hill on this day as The Four Horsemen—prevailed on President Jimmy Carter to make the first statement by an American chief executive since violence broke out again 12 years ago. In addition to urging a peaceful settlement, Carter held out the promise of US economic aid to encourage the parties involved to keep trying.

Yesterday's statement noted that event.

"The Carter Administration's 1977 statement was a milestone in this regard and we look forward to working with President Reagan and Secretary of State Alexander Haig—our fellow Irish-Americans—in continuing this indispensable effort."

Last month, just before the visit here of British Prime Minister Mararget Thatcher, Kennedy called the President and asked him to encourage her to continue efforts to keep a dialogue going with the Irish government.

According to Administration officials, Reagan did so, but in such an informal fashion that Thatcher could later deny she had been pressured, a very sore point in British politics.

According to congressional and diplomatic officials a subtle effort is underway to woo Reagan to the cause of promoting a negotiated settlement.

Today, in a break with tradition and after some intense White House efforts to arrange an invitation, the President is going to the Irish embassy here for lunch. Previously, it was traditional on St. Patrick's Day for the Irish ambassador to call at the White House with a Waterford crystal vase filled with shamrocks.

To get ready for the President today, the Irish government has been hard at work on establishing Reagan's family tree in the old country, beginning with his grandfather.

"In exchange for his roots," said one official, "the hope is that eventually he will use his influence to help the delicate process along."

"We think we can hook him on the anti-terrorism issue," said one source, "but the deal about his ancestry also helps."

[From the New York Times, Mar. 17, 1981]

24 POLITICIANS URGE U.S. ROLE IN ENDING ULSTER STRIFE

(By Bernard Weinraub)

WASHINGTON, March 16.—Twenty-four American political figures, most of them of Irish ancestry, today urged an end to "the fear and the terrorism and the bigotry" in Northern Ireland and proposed that the Reagan Administration find a way to promote a peaceful settlement of the Ulster conflict.

In a joint St. Patrick's Day statement, the 24—including Governor Carey, Governor Byrne, Senator Daniel Patrick Moynihan of New York and Senator Edward M. Kennedy of Massachusetts—announced the creation of an organization seeking "to facilitate greater understanding of the positive role America can play resolving this tragic conflict."

They stressed that the organization, known as the Friends of Ireland, will seek the unification of the six counties of Northern Ireland with the Irish Republic but that "the goal can be reached only with consent of a majority of the people of Northern Ireland, and with full safeguards for the rights of both sections of the community."

It was the fourth consecutive year that the group had issued a statement on St. Patrick's Day calling for an end to violence in Ulster, but it was the first time it had sought to define a role for the United States. The group was set up to counter a vocal lobby for the Irish Republican Army.

Two-thirds of the people of Northern Ireland are Protestants, while the Irish Republic is overwhelmingly Roman Catholic. Efforts to resolve the violent conflict between Protestants and Catholics, and work out a settlement aimed at erasing the border, have been thwarted by terrorists on both sides.

The Irish Government promptly applauded the creation of the group. In a statement released by the Irish Embassy here, Prime Minister Charles Haughey said that the links between the Irish and American peoples, "which are of such long standing, will be even further strengthened by the setting up of this group."

In their statement, the political figures said that the Friends of Ireland will be open to all members of Congress and will "strive to inform Congress and the country fully about all aspects of the conflict in Northern Ireland."

"It will emphasize our concern," the statement said, "for both the Catholic and Protestant traditions in Ireland."

Besides Governors Carey and Byrne and Senators Moynihan and Kennedy, the following officials signed the statement:

The Speaker of the House, Thomas P. O'Neill, Jr.;

Gov. J. Joseph Garrahy of Rhode Island;

Senator Joseph R. Biden, Jr., Democrat of Delaware;

Senator Alan Cranston, Democrat of California;

Senator Christopher J. Dodd, Democrat of Connecticut;

Senator Thomas F. Eagleton, Democrat of Missouri;

Senator Daniel K. Inouye, Democrat of Hawaii;

Senator Patrick J. Leahy, Democrat of Vermont;

Senator George J. Mitchell, Democrat of Maine;

Senator Claiborne Pell, Democrat of Rhode Island; and

Senator William Proxmire, Democrat of Wisconsin.

Representative Edward P. Boland, Democrat of Massachusetts;

Representative Charles F. Dougherty, Republican of Pennsylvania;

Representative Thomas S. Foley, Democrat of Washington;

Representative James J. Howard, Democrat of New Jersey;

Representative Paul N. McCloskey, Jr., Republican of California;

Representative Joseph M. McDade, Republican of Pennsylvania;

Representative Edward J. Markey, Democrat of Massachusetts;

Representative James M. Shannon, Democrat of Massachusetts; and

Representative Pat Williams, Democrat of Montana.

[From the Chicago Tribune, Mar. 17, 1981]

4 IRISH-AMERICANS PLEAD FOR PEACE IN N. IRELAND

(By John Maclean)

WASHINGTON.—Four Irish-American politicians who virtually ended fund-raising in

the United States for the violently anti-British Irish Republican Army called on the U.S. Monday to support a peaceful settlement in Northern Ireland.

"We urge all Americans to join us in condemning the violence in Northern Ireland, and to forswear any word of deed that fosters further violence," the group said in a St. Patrick's Day statement. The four are Sen. Edward Kennedy (D., Mass), Sen. Daniel, Moynihan (D., N.Y.), House Speaker Thomas "Tip" O'Neill (D., Mass.), and Gov. Hugh Carey of New York.

They also announced formation of a new organization, "Friends of Ireland," open to congressmen who supported a peaceful settlement in Northern Ireland. Their statement was signed by 20 other politicians, including 18 members of Congress.

"Four years ago, a group of us first joined together to issue a St. Patrick's Day statement calling for an end to the killing and destruction and urging our fellow citizens to reject the path of violence," the statement said.

"On this St. Patrick's Day, 1981, we take satisfaction that American support for the violence has declined. We have seen the decline not just in weapons or financial aid, but in the insidious support of those who create or credit the propaganda that can only increase the tension and worsen the violence.

"More and more Americans have come to understand the critical importance of avoiding any activity in the United States or abroad that can lend itself in any way to the terror and brutality in Northern Ireland."

The statement said the signers found "special promise" in talks last year between Prime Minister Charles Haughey of Ireland and Prime Minister Margaret Thatcher of Britain.

[From the New York Times, Mar. 17, 1981]

IRELAND'S FRIENDS

St. Patrick's Day is at once a clarion of spring, a saint's day and the celebration of a people. At least 20 million Americans are of Irish descent—including, it happens, both the new President and Secretary of State. But numbers alone fail to explain why today's rites strike so universal a chord. Troubles bring nations as well as families together, and the sorrows of Ireland evoke a compassion that transcends ties of blood. In a real sense, the violence that scars a distant land has become local news.

What has become a common American view is expressed again by four prominent Irish-Americans: Senators Moynihan and Kennedy, Governor Carey and Speaker O'Neill. As in previous St. Patrick's Day statements, they once more reject the "bomb and the bullet" and urge that Americans provide no comfort to apostles of violence in the Irish Republic and the British-ruled, predominantly Protestant North. They call on the United States to play a healing diplomatic role in finding a workable solution.

Better still, they are establishing a new forum for the responsible discussion of what Americans can and should do to help. They are inviting members of Congress to join a new organization, the Friends of Ireland. Joining in their appeal are 20 other prominent Americans, Democrats and Republicans, Catholics and non-Catholics. This is an open challenge to the Ad Hoc Congressional Committee for Irish Affairs, led by the clamorous Mario Biaggi of New York.

Mr. Biaggi has managed to make himself a spokesman for Irish nationalism, but he has yet to find words to emphatically disavow the bomb and bullet. The Friends of Ireland can counter the confusion about who really speaks for the United States, and in doing so make common cause with advocates of peace and reason in both Britain and Ireland.

Those forces have been gaining, despite the killings, the jailings and the angry arguments over prison hunger strikes. Britain's Prime Minister Thatcher and Ireland's Prime Minister Haughey are weighing new ideas for an "Irish dimension" that can bring North and South closer together. Yet opponents of any concessions are waiting to spring in all three countries. In this critical phase, American pressure for moderation can in fact help contain the politics of hate. May the Friends of Ireland provide it.

[From the Washington Post, Mar. 17, 1981]

THIS ST. PATRICK'S DAY

The hope of genuine civic peace in Northern Ireland seems stronger today than for many St. Patrick's Days past. Britain is now treating the intermittent guerrilla warfare there as a matter of international politics. For many years the British government had insisted on considering it purely a domestic affair. But last December, in a notable act of statesmanship, Prime Minister Thatcher of Britain went to Dublin for meetings that acknowledged the Irish Republic's inevitable role in the outcome. Perhaps there was also, by implication, a degree of recognition that a great many Americans also have more than a passing interest in Irish affairs. The cooperation between Dublin and London gives new substance to the promise of an end to the tit-for-tat campaigns of assassination and bombing between the IRA and its Protestant counterpart that have now been going on for 10 years.

Mrs. Thatcher, in Belfast last week, asserted again her determination to keep working "between nation and nation, between community and community." The Republic's Prime Minister Haughey, a few days later, spoke of a spreading belief that this cooperation has become "the most hopeful development . . . in a situation in which it would have been all too easy to give way to despairing inactivity."

A great many Americans of Irish descent, particularly in the earlier stages of the fighting in Northern Ireland, were giving money to the IRA. The IRA was supposedly using it to fight the British Army but, in fact, the bombs mostly killed Irish civilians. As the bloodshed continued, on St. Patrick's Day 1977, four very prominent Americans with Irish names courageously urged an end to the violence, and an end to the flow of dollars that supported it. Today the four—Speaker O'Neill, Senators Kennedy and Moynihan and Governor Carey of New York—repeat their call, and this time they are joined by 18 more senators and congressmen, as well as the governors of New Jersey and Rhode Island. They announce the founding of a new organization, the Friends of Ireland, to support a peaceful settlement.

The Republic of Ireland yearns for the unification of the island, north and south. The British government properly insists that there can be no change in the status of Northern Ireland without the assent of a majority of the people who live there, and full protection of the rights of the Protestant community. The American group, the Friends of Ireland, accepts both the goal and the condition. "On this St. Patrick's Day, we ask all Americans to join our cause, to reject the bomb and the bullet, the fear and the terrorism," the Friends said. "We look to a future St. Patrick's Day, one that we can foresee, when true peace shall finally come . . ."

[From the Washington Star, Mar. 17, 1981]

A HOPEFUL ST. PATRICK'S DAY

News about Ireland has frequently been grim in recent years, so a few felicitous signs marking this St. Patrick's Day observance are doubly welcome. The fine pre-spring weather that helped make the annual parade on Constitution Avenue a pleasant scene on Sunday may have been no accident.

President Reagan's decision to be the luncheon guest today of Ambassador Sean Donlon is an appropriate recognition of that diplomat's solid work as Dublin's chief representative in this country. We trust it also signals a wise choice by the president of his Irish contacts. Expectations in Ireland are high, too, that a presidential visit to investigate the O'Regan roots in Tipperary will evoke the pilgrimage of President Kennedy in 1962. The Irish, anyway, feel comfortable about having traceable blood ties with the occupant of the White House.

At the other end of Pennsylvania Avenue, the cause of reason in the handling of Irish affairs should be served with yesterday's announcement of the formation of the Friends of Ireland, inviting as members "all those in Congress who share our principles." The new group is an outgrowth of several years' effort by some Irish-American politicians led by Senators Kennedy and Moynihan, Speaker O'Neill and Governor Carey to focus thinking about the Ulster conflict on genuine steps toward peace and away from extremism.

Now two dozen strong and including such honorarily Irish names as Inouye and Proxmire, the Friends call for a U.S. policy "that seeks a peaceful settlement in Northern Ireland, that helps bring terrorism to an end, that demands respect for the human rights of all the people of Northern Ireland, that recognizes the legitimate aspirations of both the Protestant and Catholic communities, and that strengthens the ties between two of America's closest friends—Ireland and Great Britain."

An important function of the Friends of Ireland could be to offset the harmful operation of Congressman Biaggi's Ad Hoc Committee for Irish Affairs," with its endorsement of extremist anti-British priorities in Northern Ireland and its links with a less responsible brand of Irish-Americanism.

Some House members have unthinkingly, without knowledge of Irish complexities, allowed their names to be put to mischievous use on the Biaggi roster. The well-meaning among them should consider whether they belong with the new Hill group instead, particularly if the ethnic politics of their districts would make a simple withdrawal from the Biaggi committee embarrassing.

Across the Atlantic, the little place that exports such political dilemmas is doing well in some important respects. Eight years after joining the European Economic Community, Ireland has good prospects for economic growth and technological advancement. Prime Minister Haughey points to a population that is expanding and getting younger, reversing the effects of past emigration. An imaginative dialogue has begun with the Thatcher government in Britain. Ulster remains a dangerous problem, but the signs are not exclusively bad.

[From the New York Post, Mar. 17, 1981]

THE FAR-FLUNG IRISH AND THE WEARIN' OF THE GREEN

For those of us who have a little of the old Irish in us, or even a lot, and most certainly for those who are Irish every year on this splendid day, here's to the gaiety of the wearin' of the green.

It is America's oldest parade and as Senator Pat Moynihan wisely observed on Sunday, it is the feast day which teaches us to be both conscious of our ethnic roots, and therefore of our differences, and yet, at the same time, brings us together in joyous celebration, despite those differences.

This year there are some additional reasons for the compassion that is inspired by unity.

Let us, in our prayers, remember also the sorrows and anxieties of the people of Atlanta in their present fearful trial. Let us welcome the Friends of Ireland movement launched by Senators Dodd, Moynihan and Kennedy, Speaker Tip O'Neill and Gov. Carey: the way to peace in Ireland is not through the barrel of a gun but via the reconciliation now sought by Prime Ministers Thatcher and Haughey.

Finally, let us take good note of Cardinal Cooke's warnings against excess: excess of drinking, excess of coarseness, excess of celebration for celebration's sake. St. Patrick deserves better from us all.

MASSACHUSETTS SCHOOL REDUCES FUEL USE BY 38 PERCENT

Mr. KENNEDY. Mr. President, I would like to bring to the attention of my colleagues today an article which recently appeared in Energy Users News. New England has very few indigenous energy resources. Our greatest energy resource and our greatest economic resource is the ingenuity of our citizens. The article that I am inserting in the RECORD today concerns the success the Oakmont Regional High School of South Ashburnham, Mass., has had in reducing its fuel use. This article reports that this high school has been able to reduce its fuel use by 38 percent by a combination of technical improvements and good management practices. I want to personally compliment Mr. John Davis, the business manager of Oakmont Regional High School, on the major contribution he has made in helping my State and region in dealing with its energy problems.

I ask unanimous consent the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MASSACHUSETTS SCHOOL REDUCES FUEL USE BY 38 PERCENT

(By Tim Mead)

SOUTH ASHBURNHAM, MASS.—John Davis, business manager at Oakmont Regional High School here, has trimmed fossil fuel consumption by 38 percent, and is hoping to cut the school's electric usage by 25 percent.

Davis says the school is no ordinary structure. It has 11,000 square feet of single-pane glass that bears an R-89 insulating factor and a thousand inhabitants who largely ignore energy costs.

How, then, has the 56-year-old retired Air Force major with no degree in engineering accomplished feats such as saving $50,000 in annual fuel costs, especially under a two-year payback guideline for costly energy improvements?

Among other things, said Davis, by talking a lot with janitors and, lately, by watching a clock at the high school—three buildings spanning 115,000 square feet on the border of Ashburnham and Westminister.

The clock drawing Davis' attention of late is a 2400 EMS made by Simplex Time Recorder Co., which connects to 14 Simplex 2801 remote relays via a Simplex 2850 signal generator.

The school paid $4,345 for the entire energy management system says Davis, who serves as business manager for the entire Ashburnham/Westminister school district.

The system, used limitedly, saved Oakmont $1,600 during December and January combined, according to Davis. He says electric consumption at the main high school building dropped nearly 22,000 kwh during the two-month period compared to a year ago. Electricity supplied the school sold for 8.5 cents per kwh in January, 1.5 cents more than December's rate.

"That's a significant saving," Davis says, noting that the system only regulated exhaust fans at the main building during the two months. "We should be able to knock off 150,000 kwhs a year before we're through."

In the main 111,000-square-foot building, the system eventually will regulate overhead lighting which, Davis figures, accounts for nearly two-thirds of the building's annual 630,000 kwh electric consumption.

Simplex installed the system in late September. It placed the 2400 EMS, a yard-by-yard box 5 inches deep, outside the principal's office. The location allows the principal, the chief custodian or the vice principal to run or program the system, which essentially is a clock connected to a micro-processor capable of handling up to 256 loads.

Nearby stands the 2850 signal generator, a foot-by-foot box 2-inches deep that accepts messages from the 2400 EMS. It then translates the messages into radio waves and sends them to the 2801 remote relays on existing electrical circuits.

"The main selling point is being able to use our own circuitry by superimposing a radio frequency over the 110 wire," Davis says. "We must have payback within two years."

The messages sent to the 2801 relays, which each can handle up to four loads, tell things when to run and stop. Instead of running an exhaust fan for eight hours a day, for instance, the system may run the fan for only two or three minutes an hour or whatever minimum time is needed to vent the required amount of air.

The $4,345 charged the school for the system reflects a discount, Simplex officials say, because data from Oakmont are to be used to promote the product.

Glenn Cunningham, time systems marketing manager for Simplex, Gardner, Mass., acknowledges, "We've done a lot of things at Oakmont without a pricetag. . . . It (the price quoted by Davis) wouldn't be that low in other cases."

"John Davis is not your typical business manager. He and his staff have implemented a lot of other energy-saving measures," Cunningham says.

The energy-saving program at Oakmont started in early 1974, when the oil embargo quickly doubled and tripled the $3.63 price the school had been paying for a barrel of fuel. Davis says, "the bottom line provided impetus for the program."

The school now pays about $40 for a barrel of No. 6 oil. If Oakmont now used as much fuel as in the years preceding the embargo, when annual fuel consumption averaged 3,366 barrels, its yearly fuel bill would total nearly $135,000.

But Oakmont last year only burned 2,069 barrels, which would cost about $83,000 at the $40 per barrel rate. That's a savings of slightly more than $50,000 a year.

How did Oakmont do it? "It's a working relationship with our janitors that has made this thing fly," Davis says. "Unless you have an incentive—even if it's only recognition of what they've accomplished—the program won't work. You can't give the janitors dollars and cents for their efforts, but at least you can give them facts."

The fact pointed to most often by Davis is the school's oil consumption as measured in gallons per heating degree day. Before the embargo the measurement stood at 20.5. By last year it had dropped to 12.8, representing about a 38 percent decrease in fuel use.

Davis attributes the drop to several things. In 1974, Powers Regulator Co. showed janitors how the univentilators heating each classroom could be adjusted to reduce the amount of outside air flowing through the heater.

'We're no longer heating just cold air, we're heating a lot of recirculated air," says Ronald Snell, chief of the eight-custodian staff at the high school. He explains that much more fuel is needed to heat air from outside, where it might be 30 degrees F., than recirculated air from the inside, where it might be 68 degrees.

In 1975, Powers installed a $1,800 NRG Savings I sensing device on the roof of the school's auditorium. After gauging temperature wind speed, humidity and other weather characteristics, the device tells Oakmont's burners when to start heating its boilers.

Before installation of the device, Davis says, the burners and boilers automatically would start at 6 a.m. to heat the school, regardless of weather conditions. Much energy, he adds, was wasted on days when the heating system didn't have to start so early in order to warm Oakmont to 68 degrees F. by the start of classes at 8 a.m.

Last year, the school found two ways to reduce its hot water costs. During the spring, janitors attached an aquastat and a timer to Oakmont's 2,000-gallon hot water tank, which is heated with oil. The attachments allowed the school to lower the temperature of the water to 110 degrees F. for 23 hours a day.

The school previously heated the tank 24 hours a day to 140 degrees, the temperature needed by Oakmont's cafeteria to wash dishes. The tank now only rises to that temperature an hour a day, beginning at 10:30 a.m., Davis says.

The janitors last spring also got themselves a domestic-sized, 30-gallon hot water tank fired by gas to provide water for their showers during the summer. That allowed Oakmont to turn off the 2,000-gallon hot water tank for the summer—saving 2,000 gallons of oil, Davis says.

The latest energy-saving move involves Oakmont's 65 teachers. They have built wooden frames to fit 244 windows at the school—each measuring 4 feet by 8 feet, and intend to staple 6-mill thick plastic to them before installing the home-made storm windows.

Davis says the project only cost the school $500, the price of the plastic.

SUPPORT FOR SOCIAL SECURITY

Mr. KENNEDY. Mr. President, I want to call the attention of my colleagues to the recent report on attitudes toward social security conducted by the American Association of Retired Persons that demonstrates again the strong and vigorous support of the American people for this vital program.

The AARP survey, summarized by Cy Brickfield in the recent monthly newsletter of that organization, shows the clear opposition of all age groups to restrictions on social security benefits.

I urge my colleagues to examine this report as they consider recent proposals which would limit social security benefits.

I ask unanimous consent that the article from the AARP News Bulletin be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXECUTIVE DIRECTOR'S REPORT

(By Cyril F. Brickfield)

Contrary to popular belief, it appears that older and younger Americans generally share the same views about maintaining and strengthening the Social Security system.

In a nationwide public opinion survey conducted for our Association, the Hamilton &

Staff research firm found surprising similarities in the views of those 55 and older and those age 25 through 54 on how to solve—and not to solve—the financial problems that are plaguing the system.

According to the study, most older and younger persons do not approve of reductions in Social Security benefits to help stabilize the system over the next few years. For example, the survey found that 78 percent of those under age 55 and 81 percent of those over 55 opposed reducing benefits to persons who begin drawing Social Security after this year. Clear majorities of both age groups were also against placing a ceiling on cost-of-living benefits; reducing or eliminating benefits to dependent spouses who become eligible next year; and eliminating the $225 Social Security lump sum death benefit.

At the same time, both age groups strongly supported the use of general tax revenue to help supplement Social Security payroll taxes as well as the financing of Medicare Part A (hospitalization) out of general tax revenues. The majority of both groups (59 percent and 56 percent respectively) said they would support general revenue financing of Medicare Part A even if this meant that only lower-income persons would be covered.

Proposals to tax Social Security benefits or to further increase Social Security payroll taxes in order to raise revenue were not favored by the majority of respondents from both age groups.

When asked to consider solutions to the long-term problems of Social Security, both young (81 percent) and old (76 percent) endorsed the use of incentives to encourage older workers to stay on the job longer and delay drawing Social Security benefits. The majority of both groups also supported steps to strictly relate future Social Security benefits to workers' earnings and contributions and to cover any future Social Security deficit out of general tax revenues.

Neither age group supported raising the eligibility age for Social Security benefits from 65 to 68.

On the whole, the results of this survey are encouraging. Instead of the worker backlash or conflict between generations that some had predicted, we may find that young and old alike are in general agreement and are willing to work together to help strengthen Social Security for this and future generations of retirees.

WHY NO BUDGET CUTS FOR NUCLEAR?

Mr. KENNEDY. Mr. President, I ask unanimous consent to insert into the CONGRESSIONAL RECORD at this time an excellent editorial from the New York Times of March 9, 1981, in which they asked the Reagan administration why no budget cuts had been proposed in the nuclear energy budget. Now that the budget has been released it is clear that not only were no budget cuts made but that in fiscal 1981 and fiscal 1982 nuclear funding will be 30 percent higher than previously expected. Mr. President, I do not think it makes sense for the Federal Government to spend billions and billions of dollars to create a substitute for our most abundant domestic fuel, coal.

I think instead we should concentrate our energy spending on those programs that can do the most to reduce oil imports. According to a recent study by the Solar and Conservation Division of the Department of Energy, by 1985 solar and conservation spending could achieve an incremental oil savings of 103 million barrels per year. The huge spending on nuclear energy research and development will achieve virtually no oil savings at all. I do not think this is an energy policy that makes sense in terms of our economic needs or our energy security.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHY NO BUDGET CUTS FOR NUCLEAR?

Most Federal energy programs are being cut, but nuclear energy is headed for a costly, and indefensible, boost. Full details won't be known till Tuesday, but Senate Majority Leader Howard Baker has told reporters that the heavily subsidized Clinch River breeder reactor, which the Carter Administration wisely tried to kill, will continue to be built in Senator Baker's state of Tennessee. And Energy Secretary Edwards has urged the Government to buy a huge plant for reprocessing nuclear fuel in his state of South Carolina. Both projects are a waste of money.

Breeder reactors and reprocessing plants that prepare fuel for breeders are well worth experimentation. A successful breeder would burn nuclear fuel far more efficiently than current reactors and thus might, someday, provide vast amounts of energy. But that day is far off. Uranium for reactors is plentiful and cheap; the breeder will not be able to compete economically until well into the 21st century. There is no point now in subsidizing the plant at Clinch River, which is intended to demonstrate the possibility of rapidly commercializing breeders.

Nor is there any need for a reprocessing plant to service it. If there is any reasonable case for the Government's acquisition of the now-idle plant at Barnwell, S.C. it will have to rest on other grounds—say for example as a storage facility for nuclear wastes.

Breeders and reprocessing plants are objectionable for another reason. They use plutonium which can more readily than most reactor fuel be made into bombs. That's why President Carter tried to persuade the world not to turn prematurely to breeder technologies. President Reagan may want to change Mr. Carter's nonproliferation policy. But that ought to be done only after the most careful consideration. The potential consequences are too important to world peace for the policy to be frittered away piecemeal.

The economic case against Clinch River was stated forcefully in 1977 by Representative David Stockman. He stated that this plant was "totally incompatible with our free-market approach to energy policy" and would entangle the Government in further subsidies. "Today it is the nuclear breeder lobby looking for a large uneconomic subsidy'" he said. "Tomorrow it will be the solar power gang then the windmill freaks, and so on in a never ending stream of outstretched palms."

Now the same Mr. Stockman is concerned both with market approaches and energy policy as director of the Reagan budget office. His counsel was right then; it is right now.

A CONSTRUCTIVE ASEAN-JAPAN RELATIONSHIP

Mr. KENNEDY. Mr. President, 2 months ago, Zenko Suzuki completed his visit to Southeast Asia, his first overseas visit since becoming Prime Minister of Japan. Before returning to Tokyo, Prime Minister Suzuki delivered a forward looking and eloquent address in Bangkok about Japanese relations with Southeast Asia and the members of the Association of Southeast Asian Nations (ASEAN). His address reflected the growing, positive political and economic role which Japan is playing in international affairs and looked toward an increasingly constructive relationship between Japan and ASEAN.

As Prime Minister Suzuki pointed out:

Japan and the ASEAN countries are today linked by close and friendly ties of a relationship rapidly evolving toward maturity and with unlimited potential for greater cooperation.

That relationship is one which I, and I am sure my colleagues in the Congress, would want to both welcome and encourage. I ask unanimous consent that the full text of the Prime Minister's important address be inserted at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY PRIME MINISTER ZENKO SUZUKI

Prime Minister Prem, Ladies and Gentlemen:

1. My visit to Southeast Asia—my first overseas visit since becoming Prime Minister—is now drawing to its close. Since leaving the winter cold of Tokyo and arriving in Manila ten days ago, I have had heart-to-heart discussions with the leaders of all the ASEAN countries, and have also seen at first hand the vigorous efforts being made by the peoples of all these countries to develop their economies and improve their quality of life.

Now, at the end of my visit to Southeast Asia, I am here in Thailand, a respected member of ASEAN and an ancient country with which Japan has a long history of fruitful contact. Today, I am honored to have this opportunity to share my ideas with you, ladies and gentlemen, here in the presence of Prime Minister Prem, who has welcomed us with sincerity and friendly warmth.

In spite of the fact that the daily life of Thailand is neighbored by the fighting and devastation beyond its northeastern borders in the Indochina peninsula, the Thai government and people have maintained political stability, improved national welfare and achieved economic development. I am filled with admiration for this national effort of the Thai people.

The day before yesterday, Mrs. Suzuki and I were received in audience by Their Majesties the King and Queen, and were both deeply impressed by Their Majesties' profound wisdom and graciousness.

Ladies and Gentlemen:

2. It is commonplace these days to say that the world is now in a state of flux. The world order formed in the wake of World War II has been exposed to one crisis after another since the early 1970's, and the nations of the global community are now groping their way toward a new order.

It was in 1967, almost as if they had foreseen this trend, that, here in this very city of Bangkok, five countries of Southeast Asia declared the creation of the association of Southeast Asian nations, an association committed to the pursuit of peace and development in the region through mutual cooperation and solidarity.

At that time, many expressed misgivings as to whether viable regional cooperation in Southeast Asia was feasible at all, given the differences in race, language, religion and culture among the member countries.

During the past thirteen years, however, the ASEAN nations, facing these challenges, have succeeded in transcending such differences and consolidated the ties binding them to each other. Thorough discussion and growing mutual understanding among its mem-

bers have enabled ASEAN to work steadily and reasonably for the attainment of ever-higher goals. Those efforts, which may collectively be termed "The ASEAN Challenge", have been a major factor enabling the member nations to maintain peace and stability in the region despite the growing international tension, and to sustain high rates of economic growth amidst continuing global economic recession. The ASEAN nations have significantly improved their economies and living standards, and enhanced their respective position among the community of nations.

My reasons for visiting the ASEAN countries on my first overseas tour since becoming Prime Minister are not only that Japan, as another Asian and Pacific basin country, attaches great importance to the peace and stability of the region, but also to underline the fact that Japan believes that ASEAN's sustained efforts aimed at strengthening solidarity among diverse elements are a shining example for the world as it works to build a new order for the international community of the future. Visiting the countries of ASEAN has confirmed me in this belief.

What I have found most impressive and heartening everywhere has been the intense desire for self-reliance and self-help that I have seen in all the countries I have visited. It is this spirit that underlies the concepts of national identity and national resilience which their leaders have so often stressed to me. It is, indeed, this spirit of independence and self-reliance which has been the driving force in all Asian countries striving for political, economic, and social modernization over the last hundred years. I have been most impressed by the way this spirit, so deeply rooted in each and every one of the ASEAN countries, has served as the keystone for ever-closer political ties among the members. I have also admired the dynamism with which each member country uses the solidarity and common achievement of the association to enhance the spirit of independence and self-reliance within its nation.

Looking at other parts of the world, we see resurging attempts to control other nations through the use of direct force, as in Afghanistan and Cambodia. In the Middle East, Poland, the Horn of Africa, and elsewhere, international disputes and internal political instability are becoming increasingly frequent.

In striking contrast to all this, the ASEAN nations have successfully maintained peace and stability in their region. Let me here express my sincere admiration for this achievement. It is indeed encouraging to see how the ASEAN countries are, with dedicated hard work and timely economic policies, undertaking the difficult task of economic management in an environment of higher oil prices and global recession. No less noteworthy are their social policies aimed at a more equitable distribution of wealth.

3. Japan has now come to account for ten percent of both world GNP and world trade. I am aware that Japan is being called upon to contribute, in a manner commensurate with its growing national strength, to the maintenance of world peace and the development of the world economy. How to fulfill our responsibilities in the international community is one of the most important tasks for Japan in the 1980's. It goes without saying that Japan, as an Asian country, should first and foremost work for peace and prosperity in Asia.

Let me assure you first that our determination never to take the path toward becoming a military power remains immutable. Given the severe international situation of the present time, we are seeking to reinforce our self-defense capability, as part of our efforts to ensure our security. There is also an increasing awareness among the Japanese people of security issues.

Nevertheless, we remain as firmly committed as ever to the fundamental principle that our defense capability shall be an exclusively defensive one. This position is the result of our soul-searching reflection on the grave mistakes of the past. The national consensus of the Japanese people is that Japan shall never become a military power threatening other nations—and this consensus is unshakable. It would, thus, be completely mistaken either to hope that Japan will play a military role in the international community, or to feel anxiety that Japan might once again emerge as a military giant.

What is expected of Japan instead is to play a political role to help maintain world peace—a role commensurate with Japan's status in the community of nations.

While Japan will, as I shall stress here today, undertake resolutely international cooperation in the fields of agriculture, energy, human development and the promotion of small and medium-sized enterprises, we will give a most serious thought on the task of defining the type of political role of Japan and thus fulfill most seriously our international responsibilities.

4. The way for Japan to contribute to peace and prosperity in Asia is, first and foremost, to consolidate our friendly and cooperative relations with Asian countries, particularly with ASEAN countries. As one of the cornerstones of our foreign policy is to promote our friendship with ASEAN, it is gratifying to note that our cooperative relations are expanding in a broad range of fields—political, economic and cultural.

Japan set the challenging medium-term target of doubling Japan's official development assistance over three years from 1978. I am happy to say that we had more than achieved the target by the end of last year. ODA allocations for cooperation with the five ASEAN countries have continued to be on a larger scale than those for any other region. I believe you will agree that Japan has been making a meaningful and substantial contribution to economic development and social stability in the ASEAN region. This year, we intend to set another medium-term ODA target, to continue expanding our aid in both volume and quality and to strive to contribute to the stability and development of the Southeast Asian region.

Which fields, then, should be given priority in our economic cooperation with the ASEAN region? Let me mention the following important areas.

The first area is rural development and the promotion of agriculture. The economic fabric of a nation cannot be strengthened without agricultural development and stabilization of the farmers' livelihood.

Hasty development of heavy industry at the expense of agriculture has in some instances led a nation's economic management astray and has played havoc with the stability of the people's life. Policies that facilely equated industrialization with modernization have often come to be questioned within only a few years, but, in contrast, expanding agricultural production has come to be seen as a basic strategy for modernization. There are instances of inadequate agricultural production obliging a country to spend much of what it has earned through hard work and imaginative initiatives—their precious foreign currency reserves—to pay for imported foodstuffs. An old proverb advises us to "make haste slowly." The road to modernization begins with building a viable infrastructure for a nation's agricultural sector and for the lives of its farmers.

Priorities in social and economic development are, naturally, something for each country to decide independently. Nevertheless, Japan will eagerly respond to requests from any of the ASEAN countries for cooperation, for example, in the areas of rural infrastructure, such as irrigation, drainage, roads and electrification, or of programmes such as community health and medical care intended to improve the quality of life and technical assistance to increase agricultural productivity. If the ASEAN countries agree, I propose that we start discussions at governmental level immediately, in order to put our combined strength behind the promotion of agricultural and rural development.

The second is development of energy sources, an area of urgent concern since the second oil crisis. We will continue to expand our efforts for development of those conventional sources of energy—oil, coal, LNG, hydro-electric power, etc.—that can be undertaken with cooperation on a governmental basis. I know the region's great untapped potential for the development of new and renewable energy sources, such as solar, geothermal or biomass energy, and that there is an increasing desire for Japanese cooperation in this field. I should like to see expansion of our cooperative relations with ASEAN countries on this scope.

Thirdly, it is indispensable to develop human resources—a task to train personnel who will undertake the development of agriculture, rural communities, energy resources and industries. The need for skilled human resources will increase as the ASEAN countries continue their present remarkable economic progress, and here I have in mind a programme for an ASEAN human resources development.

The basic framework of this programme envisages the opening, with the ASEAN countries' concurrence, of ASEAN human resources development centres in each of the member nations. These centres will be open to people from all the ASEAN countries, with Japan contributing an appropriate amount of grant aid and technical cooperation.

Another centre will be established in Okinawa, as part of Japan International Cooperation Agency's activities, to serve as a centre for training, for contacts between the peoples of the ASEAN countries, and as the liaison office for the other five centres. I should like to propose that we begin government-level consultations to bring this project on stream as soon as possible. We envisage Japanese cooperation in the region of 100 million dollars for the whole project.

The fourth area concerns promotion of small and medium-sized enterprises. The populous ASEAN countries, while enjoying an ample labor supply, also face the social difficulties of serious underemployment. In such circumstances, it is sensible to steadily foster labor-intensive smaller enterprises, mainly those enterprises producing consumer goods, in order to contribute to social stability. This will also assist the organic development of the national economy by means of forming complementary relations between large-scale basic materials industries and the smaller enterprises. From this point of view, Japan's experience and know-how in fostering small and medium-sized enterprises can make a contribution in our cooperation towards ASEAN nations.

Furthermore, Japan will, naturally, continue to cooperate with the determined efforts being made by the ASEAN countries to achieve industrialization. In this area, I attached great importance to the prompt completion of the "ASEAN Industrial Projects" for which one billion dollars have been earmarked. In this connection, it is gratifying to note that the industrial projects in Indonesia and Malaysia, for which Japan is providing financial cooperation, are now being implemented. We shall continue our cooperation for the early implementation of the other industrial projects.

I have so far discussed government-level efforts in economic cooperation with the ASEAN countries, but I should like to em-

phasize particularly the vital importance of cooperation in the private sector. The development of Japan's economy would have been a very different story without the ingenuity and vitality of our private sector. I intend to encourage and to guide those concerned in Japan's private sector to further promote private-sector exchange and cooperation with those in ASEAN countries.

5. In parallel with economic cooperation, we wish to expand our cooperative relations with the peoples of the ASEAN region in the cultural, educational and academic fields. As a new project in academic exchange, I should like to propose a programme to promote ASEAN regional studies designed to give a scientifically based understanding of what I have described before as "The ASEAN Challenge," that challenge which delves into the linking together of diverse elements. If the ASEAN nations agree, I shall immediately have a study of the concrete details initiated.

6. Japan and the ASEAN countries are today linked by close and friendly ties of a relationship rapidly evolving toward maturity and with unlimited potential for greater cooperation. Our task is, I submit, "to think together and to work together" as we try to translate that potential into reality. It may be that, as we come to understand each other better, we shall be obliged to recognize that we have differences. We have, however, learned enough by now not to be unduly worried about differences. Close friends that we are, we can afford to be quite open in stating our opinions. A process of continuing dialogue and consultation—of constantly "thinking together and working together"—will always enable us to solve whatever problems may lie ahead of us.

Prime Minister Prem, Ladies and Gentlemen:

The cultural tradition of Asia has given its peoples the wisdom needed to create integrated harmony out of the conflicts and confrontations between diverse elements. We in Japan also happen to have the time-honored philosophy to "cherish the virtue of harmony," and I believe that the same faith in harmony lives on in the life and international relations of Asia today.

7. Some two hundred kilometers to the east of this City of Bangkok, over one million Cambodians are suffering from the horrors of war and starvation. As Japan's relations with the ASEAN countries mean "thinking together and working together," I must mention the matter of peace in Indochina. With a sense of profound anxiety and concern, I have discussed the Indochina problem with the leaders of the ASEAN nations in the last ten days.

The continuation of this traumatic state of affairs is a tragedy for the Cambodian people, and its adverse effects on the surrounding nations are of grave proportions. It must not be allowed to go on. Vietnam's military intervention in Cambodia has cast a pall over the hopes of the peoples of the ASEAN nations for permanent peace and stability in Southeast Asia. It is the common desire of the entire international community to attain peaceful settlement of the Cambodian problem, thereby eliminating the most serious factor making for uncertainty in this region.

In Cambodia, where fighting still persists, people are suffering from starvation and sickness amid devastation, and hundreds of thousands of Cambodians are fleeing to neighboring countries in search of food and safety. This tragic situation was, however, not brought about by the Cambodians themselves—it is the result of military intervention by Vietnam.

To restore peace in Cambodia and settle the problem at its roots, Vietnamese troops must withdraw from Cambodia and an environment in which the Cambodians themselves can freely decide their future must be created.

Japan supported the resolution on Cambodia submitted by the efforts of the ASEAN countries at the United Nations General Assembly. We did so because we also believe that discussions, aimed at agreement upon the attainment of the complete withdrawal of all foreign troops, free elections supervised by the United Nations, etc., should be held at an international conference attended by all the parties to the conflict and all the other parties concerned. The overwhelming majority by which that Cambodian resclution was carried at the United Nations General Assembly is to be attributed to the united appeal to world opinion made by ASEAN, Japan and other nations which share the desire for peace for the people of Cambodia, who are agonized by unimaginable hardships, and for stability in the Southwest Asian region as a whole.

Japan strongly hopes that the United Nations will respond to this appeal, which is overwhelmingly supported by the international community, and work actively for the implementation of the resolution. Japan appeals to the Secretary-General of the United Nations to take the steps necessary in convening an international conference as promptly as possible. Furthermore, as a country which is at present a member of the United Nations Security Council, Japan is ready to cooperate fully in the efforts of the Secretary-General to this end.

I should like to urge Vietnam to respond now, immediately and positively, to the call of the international community, and to participate in discussions for bringing back peace to Cambodia. Once peace has been restored in Indochina, Japan is ready to cooperate as much as possible in the reconstruction of Indochina.

I have used the term "The ASEAN Challenge" in admiration of the steady nation-building by the five ASEAN countries through their remarkable self-reliant efforts and cooperative ties of solidarity that transcend national differences. I have promised you that Japan will cooperate with "The ASEAN Challenge." And also, I stated that to do so is one of the most important means of discharging Japan's international responsibilities.

In our foreign policy, we have not the slightest intention of wielding military influence. We desire to see our economic capability helping to foster a peaceful international environment, and our political role that of steadily serving the cause of international peace, particularly that of stability in Asia. For this purpose, accumulation of experience is necessary. Courage and wisdom will also be called for. On this score, we intend to think and work together with ASEAN.

One of the vital keys to world peace in the last two decades of the present century lies in harmonious development of a Southeast Asia that is stable both economically and politically. It is my firm belief that Southeast Asia, especially the ASEAN countries, will emerge as a driving force of the global economy in the coming twenty-first century, which has been called the "Age of the Pacific." It is my ardent hope that Japan will, then as now, be a reliable partner of the ASEAN nations in the pursuit of peace and prosperity.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON BUDGET RESCISSIONS AND DEFERRALS—MESSAGE FROM THE PRESIDENT—PM 37

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Environment and Public Works, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Labor and Human Resources, the Committee on Energy and Natural Resources, the Committee on Banking, Housing, and Urban Affairs, the Committee on Finance, the Committee on Veterans' Affairs, the Select Committee on Small Business, the Committee on Governmental Affairs, the Committee on Armed Services, and the Committee on the Judiciary:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 81 proposals to rescind a total of $11.1 billion in budget authority previously provided by the Congress. In addition, I am proposing to reduce authority to incur obligations for direct loans by a total of $751.8 million and I am reporting one new deferral of $3.4 million. These proposals are an integral part of my plan to reduce government spending.

The details of the rescission proposals and the deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *March 17, 1981.*

MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of March 12, 1981, the Secretary of the Senate, on March 16, 1981, received a message from the President of the United States submitting a sundry nomination; which was referred to the Committee on Foreign Relations.

(The nomination received on March 16, 1981, is printed at the end of the Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Thomas W. Pauken, of Texas, to be Di-

rector of the ACTION Agency. Referred to the Committee on Foreign Relations.

(The above nomination reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

REFERRAL OF A NOMINATION

Mr. BAKER. Mr. President, I ask unanimous consent that the nomination of Thomas W. Pauken, of Texas, to be the Director of ACTION, be referred to the Committee on Foreign Relations for 15 days of Senate session.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MEASURES REFERRED

S. 681.—OIL SPILL LIABILITY AND CLEANUP

Mr. BAKER. Mr. President, I ask unanimous consent that the Oil Spill Liability and Compensation Act of 1981 be referred as follows: Titles I and III to be referred jointly to the Committees on Environment and Public Works and Commerce, Science and Transportation; sections 201(b)(1)(A), 203(b), 204, 205, and 206, all from title II, to the Committee on Finance; and, the remainder of title II jointly to the Committees on Finance, Environment and Public Works, and Commerce, Science and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 6—AMENDMENT TO S. 681

The amendment (No. 6) proposed by Mr. STAFFORD (for himself and Mr. MITCHELL) to the bill S. 681 was referred jointly to the Committee on Environment and Public Works and the Committee on Commerce, Science, and Transportation.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. FORD:

S. 717. A bill for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children: Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor; to the Committee on the Judiciary.

By Mr. PROXMIRE:

S. 718. A bill to amend title IV of the Social Security Act to provide that States must require recipients of aid to families with dependent children to participate in community work programs if they are able to do so; to the Committee on Finance.

By Mr. PRYOR (for himself, Mr. SASSER, Mr. EAGLETON, Mr. PERCY, Mr. LEVIN, Mr. PROXMIRE, Mr. DECONCINI, Mr. WILLIAMS, Mr. BAUCUS, Mr. SIMPSON, Mr. BURDICK, Mr. RIEGLE, and Mr. COCHRAN):

S. 719. A bill to amend section 3109 of title 5, United States Code, to clarify the authority for appointment and compensation of experts and consultants, to provide statutory guidelines concerning the award of contracts for the procurement of consulting services, management and professional services, and for other purposes; to the Committee on Governmental Affairs.

By Mr. GOLDWATER (for himself, Mr. PACKWOOD, Mr. SCHMITT, and Mr. PRESSLER):

S. 720. A bill entitled the "Public Telecommunications Act of 1981"; to the Committee on Commerce, Science, and Transportation.

By Mr. HUMPHREY:

S. 721. A bill to prohibit the imposition of any tax by a State on the income derived by any individual from services performed at the Portsmouth Naval Shipyard if such individual is not a resident or domiciliary of the State in which such shipyard is located; to the Committee on Finance.

By Mr. DOMENICI:

S. 722. A bill for the relief of Mrs. Ascenion M. Lujan, Noe Lujan, Sevedeo Lujan, Junior, Cordelia Lujan Lons, Antonioa Lujan, Venceslao Lujan, Marta Lujan, Felix Lujan, and Tovia Lujan; to the Committee on the Judiciary.

By Mr. TOWER (for himself and Mr. BENTSEN):

S. 723. A bill to amend the Clean Air Act with respect to the prevention and control of air pollution in border areas of the United States and countries contiguous to the United States; to the Committee on Foreign Relations.

By Mr. NICKLES (for himself and Mr. BOREN):

S. 724. A bill to remove certain lands from the Wichita Mountains Wildlife Refuge, Oklahoma; to the Committee on Environment and Public Works.

By Mr. WALLOP (for himself, Mr. GARN, Mr. SIMPSON, and Mr. MATSUNAGA):

S. 725. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain shale property for the purposes of the energy investment credit; to the Committee on Finance.

By Mr. WEICKER:

S. 726. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Human Resources.

By Mr. WILLIAMS:

S. 727. A bill to permit the Secretary of Defense to authorize officers and employees of the Department of Defense who provide police or security functions, including individuals employed pursuant to contract with the Department of Defense, to have the power of arrest on military facilities and installations, and for other purposes; to the Committee on Armed Services.

By Mr. KENNEDY (for himself, Mr. TSONGAS, Mr. LEAHY, and Mr. LEVIN):

S. 728. A bill to amend the Foreign Assistance Act of 1961 to prohibit the assignment to or presence in El Salvador of United States military personnel and to prohibit the furnishing of military and other security assistance for El Salvador; to the Committee on Foreign Relations.

By Mr. CHILES:

S. 729. A bill to amend section 8e of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HUDDLESTON (for himself, Mr. HELMS, and Mr. COCHRAN):

S. 730. A bill to provide for the use of the funds of the Commodity Credit Corporation in implementing the Federal Crop Insurance Act of 1980; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GLENN:

S. 731. A bill to provide for an accelerated program of research, development, and demonstration of energy storage technologies to be carried out by the Department of Energy with the support of other Federal agencies, and for other purposes; to the Committee on Governmental Affairs.

By Mr. NUNN (for himself, Mr. CHILES, Mr. DECONCINI, Mr. COHEN, Mr. BENTSEN, Mr. DOMENICI, Mr. LONG, Mr. ROTH, Mr. RUDMAN, and Mr. JACKSON):

S. 732. A bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of Justice; to the Committee on Finance.

By Mr. BAUCUS:

S. 733. A bill to establish a field office of the United States Customs Service and the Immigration and Naturalization Service at Glacier International Airport; to the Committee on the Judiciary.

By Mr. WEICKER (for himself, Mr. PACKWOOD, Mr. HATCH, Mr. HAYAKAWA, Mr. BOSCHWITZ, Mr. GORTON, Mr. NICKLES, Mr. RUDMAN, Mr. D'AMATO, Mr. NUNN, Mr. HUDDLESTON, Mr. BUMPERS, Mr. SASSER, Mr. BAUCUS, Mr. LEVIN, Mr. TSONGAS, and Mr. DIXON):

S.J. Res. 47. Joint resolution to authorize and request the President to issue a proclamation designating the week beginning May 10, 1981, as "National Small Business Week"; to the Committee on the Judiciary.

By Mr. THURMOND:

S.J. Res. 48. Joint resolution to provide for the erection of an appropriate statue or other memorial in the Arlington National Cemetery to honor individuals who were combat glider pilots during World War II; to the Committee on Veterans Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 718. A bill to amend title IV of the Social Security Act to provide that States must require recipients of aid to families with dependent children to participate in community work programs if they are able to do so; to the Committee on Finance.

(The remarks of Mr. PROXMIRE on this legislation appear earlier in today's RECORD).

By Mr. PRYOR (for himself, Mr. SASSER, Mr. EAGLETON, Mr. PERCY, Mr. LEVIN, Mr. PROXMIRE, Mr. DECONCINI, Mr. WILLIAMS, Mr. BAUCUS, Mr. SIMPSON, Mr. BURDICK, Mr. RIEGLE, and Mr. COCHRAN):

S. 719. A bill to amend section 3109 of title 5, United States Code, to clarify the authority for appointment and compensation of experts and consultants, to provide statutory guidelines concerning the award of contracts for the procurement of consulting services, management and professional services, and for other purposes; to the Committee on Governmental Affairs.

CONSULTANT REFORM AND DISCLOSURE ACT OF 1981

Mr. PRYOR. Mr. President, for the past year and a half, I have conducted an investigation of the billions of taxpayer dollars that the Federal Government spends each year for consultant services. Estimates of the amount of Federal funds

spent annually on consultant services range from a conservative $2 billion to over $9 billion. My concern began when I became aware of work contracted for which was duplicative, senseless, and overpriced. The results of my investigation have convinced me that what I originally found was not random waste—but a byproduct of a basic change in the way our Government does its work.

Today, the passage of each new law, the emergence of each new "crisis," the creation of each new program is cause for delegating the basic work of Government to an ever growing contractor work force that is increasingly planning and implementing Federal policy and programs.

As the General Accounting Office has recently summarized, the consulting problem has been with us for at least two decades, and Federal managers have done little to bring it under control. It is now apparent that the issues posed by the use of consultants are not simply management issues, but basic questions of government that command the attention of us all. These issues include the invisibility of a large and growing portion of the Federal work force, the lack of accountability of that work force, and the failure to apply to that work force even the minimal standards of ethics and disclosure that apply to officials at virtually every level of American government.

The legislation that I am introducing today will respond to the problems that currently exist in the Federal Government's use of consultant and related services. The legislation has been carefully drafted so that it will have the maximum beneficial effect on certain wasteful spending practices, while having no adverse effect on an already overburdened procurement process. Furthermore, the legislation has been designed not to add unduly to the Government's paperwork requirements.

The legislation being introduced today responds directly to the abuses, problems, and especially, to the disturbing lack of information concerning the use of consultants which my investigation has uncovered. During the course of my study, I have found that—

Consultant studies costing millions of dollars are a complete waste because the agencies never actually use them;

Conflicts of interest exist which negate the objectivity and independence which the Government thought it would obtain when awarding the contract;

Consultant contracts are awarded to perform basic governmental functions, including writing Federal regulations, drafting legislation, and preparing agency budgets to be sent to Congress;

There is an almost complete absence of competition in awarding consultant-type contracts despite estimates that competition saves 20 percent of contract price; and

Contracts often are awarded not on the basis of a firm's qualifications but rather on the contractor's friendship with agency officials.

The list goes on.

The most remarkable finding was the abysmal lack of information available concerning consulting contracts, and even procurement generally. This is true despite a Presidential mandate to all Federal agencies that they identify the total Federal expenditures for consultants. We still do not have accurate and reliable information today. It is impossible to identify these expenditures in agency budgets, a fact which may not be particularly surprising since we have found consultants themselves are preparing many agency budgets that are submitted to the Congress.

Mr. President, when the legislation was in the early drafting stages, it was thought that the abuses could be dealt with through simple and direct prohibitions. But, as work proceeded, it became apparent that another layer of regulatory prohibitions was not the answer, at least at this time.

First, we found that, at least in some important cases, the problem is not the absence of rules, but the failure to honor them—or by the same token, the creativity employed in finding new ways to avoid them. Indeed, it became apparent that the official response to each wave of consulting scandals is the restatement of existing rules, the announcement of new rules, and the promise of better management. It is now evident that the issuance of new rules, as opposed to the enforcement of old rules, has become a powerful way of avoiding confrontation with, and control of, the real problem.

Second, it became distressingly apparent that, despite decades of management concern, we know very little about Federal use of consultants. It is difficult to contrive new regulatory schemes in the dark.

The legislation I propose therefore is a sunshine approach. It does not try to tell agencies that they must—or must not—use consultants. It says to agencies "if you use consultants, we in Congress and the public want to know about it. We want to know whom you use, what you have them do, and how you use the work they do for you." The record we have developed shows that the need for sunshine could not be more pressing.

Quite simply, we have found that the Federal Government has not only contracted out virtually every type of basic Government activity, but has done so on terms designed to insure the invisibility of this reliance.

In proposing sunshine legislation I hope to serve three basic ends—the protection of the integrity of government, the enforcement of existing rules, and the production of basic information on which to base future reform. In so doing, the public's right to know who governs it will be reaffirmed. Sunshine will be employed as a deterrence to the continuation of the abuses that characterize the present use of consultant services. The potential embarrassment of public explanation should, in itself, deter abuse. And, the disclosure required will permit us to begin to develop basic information now lacking about the consulting bureaucracy—information on which further reforms can be built.

Those who would claim that the coverage of the legislation is overbroad and that the topic is best dealt with by executive branch management would both misread the legislation and ignore the sad story of decades of management failure. The legislation, in view of the magnitude of its subject, is actually very modest. It does not impose new layers of regulations, but rather, the disclosure of ongoing activities. But to say the legislation is modest is not to suggest that it will be ineffective. Rather, it is to state that those who would propose to limit the sunshine in the legislation bear a very strong burden. They must explain to the American public why it is that the public cannot know the most basic information about a hidden work force to whom it not only pays billions of dollars, but to whom we are increasingly entrusting the basic work of Government.

Very simply stated, this legislation will clarify agency appointive authority. It will require an agency to make public the procurement requests it plans to award, and once awarded, to make the contracts available for public scrutiny. It will require consultants to disclose the role they played in preparing reports under Government contracts. The legislation will require consultants to fully disclose any conflict of interest they have that could result in biased advice. It would require agencies to disclose in their budgets sent to the Congress the amount of funds requested for the procurement of consultant services. Agencies would be required to evaluate contractor's performance in certain contracts.

The legislation will establish a working plan for the Federal Procurement Data Center to make it of greater value to the Congress and to the public.

The legislation being introduced today is a further development of the concepts contained in S. 2880, the Consultant Reform Act of 1980. When that legislation was introduced in June 1980, I believed that it represented an informed response to the problems and abuses which my investigation had uncovered. At the same time, realizing the potential impact of such legislation upon the procurement process, I decided to elicit as many comments and criticisms as possible from both the Government and private sectors. Two days of legislative hearings were conducted in August, and since introduction of S. 2880 I have exchanged comments with various groups and individuals regarding the substance of the legislation. The legislation introduced today is the result of that effort.

This bill includes several refinements to S. 2880 and numerous GAO recommendations have been adopted. The categories of contracts which the legislation addresses are now defined, and further, are defined in terms with which the agencies should be familiar. With limited exceptions, the requirements imposed are applicable to only those contracts within the categories defined. The conflict-of-interest provisions are introduced for a 3-year test period at certain selected agencies.

Mr. President, I urge my colleagues to

support this legislation which is based on the simple principle that when the Government undertakes to serve the public interest by procuring services from the private sector, this activity should be subject to congressional and taxpayer scrutiny. Unfortunately, this is not how our federal system works today.

Mr. President, I also want to say that in the legislation I am introducing today, I am proud to be joined and have as cosponsors Senators SASSER, EAGLETON, PERCY, LEVIN, PROXMIRE, DECONCINI, WILLIAMS, BAUCUS, SIMPSON, BURDICK, RIEGLE, and COCHRAN.

Mr. President, I ask unanimous consent that the legislation I am introducing today, with these distinguished cosponsors, and a summary of the major provisions of the bill be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 719

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consultant Reform and Disclosure Act of 1981".

STATEMENT OF FINDINGS

SEC. 2. The Congress finds and declares that—

(1) Federal procurement officials have not consistently complied with the laws relating to procurement activities and regulations and management guidelines in awarding contracts for the procurement of consulting services, management and professional services, and special studies and analyses;

(2) procurement practices, insofar as they relate to the procurement of consulting services, management and professional services, and special studies and analyses, do not presently provide for (A) full and open competition, (B) the prevention of duplication or overlap among contracts, (C) adequate consideration of conflicts of interest, or (D) the public disclosure of the use and role of contractors who provide such services, studies, and analyses;

(3) information regarding the Federal Government's use of consulting services, management and professional services, and special studies and analyses is not maintained in a manner that results in helpful or meaningful information being available to the Congress, the executive branch, or the public;

(4) the competitive pressures of the free marketplace increase the likelihood that consulting services, management and professional services, and special studies and analysis will be provided at competitive prices;

(5) full and open competition in the Federal procurement process supports the basis of the free enterprise system while guaranteeing maximum return on Federal procurement expenditures;

(6) the costs of performing governmental functions are borne by the taxpayer regardless of whether the functions are performed in the private or public sector;

(7) the integrity of the governmental process, especially when consulting services, management and professional services, and special studies and analyses are used in the performance of governmental functions, requires full public disclosure of the use and role of contractors who perform such functions; and

(8) legislation and oversight is necessary to achieve the consistent policies and practices needed in Federal procurement of consulting services, management and professional services, and special studies and analyses.

STATEMENT OF POLICY

SEC. 3. It is the policy of the United States that—

(1) governmental policymaking and decisionmaking functions should be performed by accountable Federal officials;

(2) the procurement of consulting services, management and professional services, and special studies and analyses by contract should be in compliance with applicable laws and regulations; and

(3) governmental functions should be accomplished through the most economical means available while recognizing the inherently governmental nature of certain activities.

TITLE I—APPOINTMENTS

REVISION OF SECTION 3109 OF TITLE 5

SEC. 101. (a) Section 3109 of title 5, United States Code, is amended to read as follows:

"§ 3109. Employment of individual experts and consultants

"(a) For the purpose of this section—

"(1) 'agency' has the same meaning as in section 552(e) of this title;

"(2) 'appointed consultant' means an individual—

"(A) who has a high degree of knowledge, skill, or experience in a particular field, and

"(B) whose primary function is to serve an agency in an advisory capacity in that field, rather than to perform or supervise an operating function of the agency; and

"(3) 'appointed expert' means an individual—

"(A) who has excellent qualifications and a high degree of attainment in a professional, scientific, technical, or other field,

"(B) who, because of such qualifications and attainment, is usually regarded as an authority, or as a practitioner of unusual competence and skill, by other individuals engaged in that field, and

"(C) whose primary function is to perform or supervise an operating function of an agency rather than to provide advisory services.

"(b) When authorized by an appropriation Act or other statute, the head of an agency may appoint and fix the pay of appointed experts and consultants for temporary (not in excess of one year) or intermittent services, without regard to—

"(1) the provisions of this title governing appointment in the competitive service; and

"(2) chapter 51 and subchapter III of chapter 53 of this title (relating to position classification and pay rates),

except that the rate of pay for any individual so appointed may not exceed the rate of basic pay payable for GS–18 unless otherwise specifically authorized by statute.

"(c) Positions in the Senior Executive Service may not be filled under the authority of subsection (b) of this section.

"(d) The Office of Personnel Management shall prescribe regulations governing the employment of appointed experts and consultants and the reporting requirements of this section, and may take such action as it considers appropriate to assure compliance with those regulations, including audit of individual cases, and, if necessary, suspension of the authority to appoint experts and consultants. Agencies shall comply with the requirements of the Office, including taking any corrective action the Office may direct.

"(e) Each agency shall report to the Office of Personnel Management on a periodic basis with respect to—

"(1) the number of days each appointed expert or appointed consultant employed by the agency during the period was so employed, and

"(2) the total amount paid by the agency to each appointed expert and appointed consultant for such work during the period.

"(f) The head of any agency with statutory authority to appoint experts and consultants without regard to the provisions of this section shall, to the extent practicable and in keeping with the provisions of such authority, appoint such experts and consultants in a manner consistent with the provisions of this section.

"(g) The head of each agency shall establish procedures for the review and approval of—

"(1) any determination relating to the need for the services of an appointed expert or appointed consultant under this section; and

"(2) the appointment of each appointed expert or appointed consultant.".

(b) The table of sections at the beginning of chapter 31 of title 5, United States Code, is amended by striking out the item relating to section 3109 and inserting in lieu thereof the following new item:

"3109. Employment of individual experts and consultants.".

EFFECTIVE DATE

SEC. 102. The amendments made by this title shall take effect one hundred and eighty days after the date of enactment of this Act.

TITLE II—CONTRACTS

DEFINITIONS

SEC. 201. For purposes of this title:

(1) The term "agency" has the same meaning as in section 552(e) of title 5, United States Code.

(2) The term "contract" means (A) any agreement, including any amendment to or modification of an agreement between the Government and a contractor for the procurement of goods and services, or (B) any letter authorizing a contractor to provide goods or services to the United States prior to a specification of the compensation for the provision of such goods or services.

(3) The term "contractor" means any person, firm, unincorporated association, joint venture, partnership, corporation or affiliates thereof, including consultants and organizations thereof, which is a party to a contract with the Government.

(4) The term "report" means a written study, plan, evaluation, analysis, manual, or similar document, in draft or final form, which is prepared by a contractor pursuant to a contract with an agency and which is submitted—

(A) to such agency, or

(B) on behalf of such agency to any other agency of the Government,

but does not mean a billing document, invoice, or other routine business transmittal made with respect to the contract.

(5) The term "consulting services" means advisory services with respect to agency administration and management or agency program management.

(6) The term "management and professional services" means professional services related to management and control of programs, including—

(A) management data collection services;

(B) policy review and development services;

(C) program evaluation services;

(D) program management support services;

(E) program review and development services;

(F) systems engineering services; and

(G) other management and professional services of a similar nature which are not related to any specific program.

(7) The term "special study or analysis" means any nonrecurring examination of a subject with—

(A) is undertaken to provide greater understanding of relevant issues and alternatives regarding organizations, policies, procedures, systems, programs, and resources; and

(B) leads to conclusions or recommendations with respect to planning, programing, budgeting, decisionmaking, or policy development.

Such term includes—

(i) any study initiated by or for the program management office;

(ii) a cost benefit analysis, a data analysis (other than a scientific analysis), an economic study or analysis, an environmental assessment or impact study, a feasibility study which does not relate to construction, a legal or litigation study, a legislative study, a regulatory study, or a socioeconomic study;

(iii) a geological study, a natural resources study, a scientific data study, a soil study, a water quality study, a wildlife study, or a general health study; or

(iv) any similar special study or analysis.

PUBLICATION OF CONTRACTS

SEC. 202. (a) Notwithstanding any other provision of law, as soon as an agency completes preparation of a procurement request for consulting services, management and professional services, or a special study or analysis which the agency estimates will result in the award of a contract in excess of $10,000, the agency shall transmit to the Secretary of Commerce a written notice describing such contract. The Secretary of Commerce shall publish each notice received pursuant to this subsection in the publication "Commerce Business Daily" published by the Department of Commerce. An agency is not required to transmit to the Secretary of Commerce a notice with respect to any contract—

(1) for which a national security classification has been lawfully made relative to the contract or the terms therein; or

(2) which is awarded due to such an unusual and compelling emergency that the Government would be seriously injured if prior notice of the contract were required to be published.

(b) Whenever an agency modifies a contract for consulting services, management and professional services, or a special study or analysis, and in the modification of such contract increases the amount of the contract award by at least $25,000, the agency shall transmit to the Inspector General of such agency or comparable official, or in the case of an agency which does not have an Inspector General or comparable official, the head of the agency or his designee, a written notice describing—

(1) the original contract;

(2) the modification being made; and

(3) the justification for the modification.

DISCLOSURE OF INFORMATION CONCERNING THE USE OF CONTRACTORS

SEC. 203. Each report prepared by a contractor pursuant to a contract for consulting services, management and professional services, or a special study or analysis, and each report prepared by an agency which is substantially derived from or includes substantial portions of any such report, shall include a statement disclosing—

(1) the name and business address of the contractor who prepared or contributed to the report;

(2) the total amount of the contract;

(3) whether the contract was awarded through competitive or noncompetitive procedures;

(4) the name of the office which or employee who authorized the award of the contract;

(5) in any case in which a contractor uses a subcontractor to prepare any portion of a report for an agency, the name and business address of the subcontractor and the amount paid to the subcontractor for the work;

(6) the names of all employees of the contractor, and any subcontractor, who substantially contributed to the report; and

(7) in any case in which an organizational conflict of interest has been determined under section 205 to exist with respect to the contract, the facts and circumstances of the conflict of interest.

CONTRACT EVALUATION

SEC. 204. (a) Within one hundred and twenty days after the completion of any contract for consulting services, management and professional services, or a special study or analysis, the total amount of which is in excess of $50,000, the agency shall prepare a written evaluation of the contract performance. The evaluation shall include a summary of the performance of the contractor under the contract, including—

(1) the performance of the contractor, based upon the terms and specifications included in the contract; and

(2) any deviation by the contractor from the provisions of the contract originally awarded with respect to cost and time for completion of the contract and a statement of the reasons for any such deviation.

(b) The agency shall include the evaluation required by subsection (a) in the records maintained by the agency regarding the contract and shall maintain a copy of the evaluation in a central location within the agency.

(c) A written copy of any evaluation made under this section shall be transmitted to the contractor concerned together with a notice stating that the contractor may, within 10 days after receipt of such copy, transmit comments to the agency concerning such evaluation. Any such comments shall be included in the evaluation as a supplement.

ORGANIZATIONAL CONFLICT OF INTEREST

SEC. 205. (a) Beginning on the effective date of this title and ending three years after such date, this section applies to the award of contracts by the Department of Energy, the Department of Transportation, and the Environmental Protection Agency.

(b) For purposes of this section:

(1) The term "organizational conflict of interest" means any relationship or situation in which an offeror or contractor has past, present, or anticipated interests that either directly, or indirectly through a client relationship, relate to work to be performed under a contract for consulting services, management and professional services, or a special study or analysis, and which—

(A) may diminish the capacity of the offeror or contractor to give impartial, technically sound, and objective assistance and advice; or

(B) may result in an unfair competitive advantage to the offeror or contractor;

but such term does not include the normal flow of benefits from the performance of the contract.

(2) The terms "offeror" and "contractor" include—

(A) a chief executive or director of the offeror or contractor, to the extent that such executive or director will or does become substantially involved in the performance of a contract entered into with an agency; and

(B) a consultant or subcontractor proposed to be used by the offeror or contractor in the performance of a contract entered into with an agency in any case in which such consultant or subcontractor may be performing services similar to the services provided by the offeror or contractor.

(c)(1) Whenever an offeror submits to any agency a proposal for a contract for consulting services, management and professional services, or a special study or analysis, the offeror shall include with such proposal—

(A) a statement which discloses all relevant facts relating to an existing or potential organizational conflict of interest concerning the contract; or

(B) a statement certifying, to the best knowledge and belief of such offeror, that no relevant facts exist relating to such an existing or potential organizational conflict of interest.

(2) Any consultant or subcontractor which any such offeror proposes to use in the performance of a contract described in paragraph (1) shall also submit a statement containing the information required by paragraph (1) to the agency receiving the proposal.

(3) In any case in which a contract described in paragraph (1) has been entered into by an agency and a modification of the contract becomes necessary, the contractor and any consultant or subcontractor used by the offeror in the performance of the contract shall submit to the agency—

(A) the same type of statement with respect to such modification as required by paragraph (1) with respect to a contract; or

(B) a revision of any statement submitted under paragraph (1) which relates to any potential organizational conflict of interest concerning such modification.

(4) Each contractor, consultant, and subcontractor which has submitted a statement under this subsection shall submit, on a timely basis, revisions of such statement as may be necessary to clearly and accurately reflect any changes in circumstances relating to an existing or potential organizational conflict of interest arising after the statement was made or last revised.

(d) The head of each agency to which this section applies shall establish or designate an office to administer the provisions of this section with respect to contract proposals and contracts of the agency. The head of each such office shall evaluate each statement received pursuant to subsection (c) to determine whether an organizational conflict of interest or the appearance of such a conflict exists with respect to the contract for which the statement is submitted. In making such evaluation, the head of such office shall—

(1) consider whether—

(A) the offeror, contractor, consultant, or subcontractor has conflicting roles or interests which might bias the judgment of the offeror, contractor, consultant, or subcontractor concerning the work to be performed pursuant to the contract; or

(B) the offeror or contractor will have an unfair advantage in the performance of the contract; and

(2) pay particular attention to proposed contractual requirements which call for the provision of advise, evaluation, or other actions which will have a direct effect on future decisions of the agency relating to contracts, procurement, research and development programs, production, or regulatory activities.

(e) Whenever the head of an office established or designated under subsection (d) determines that an organizational conflict of interest or that the appearance of such a conflict exists with respect to a contract for consulting services, management and professional services, or a special study or analysis, or a proposal for such a contract, he shall transmit a notice of his determination to the offeror or contractor involved. Within 10 days after the receipt of such notice, the offeror or contractor may transmit written comments to the head of the office concerning the determination or may transmit such comments to the head of the agency with a request that the head of the agency review such determination. Within 30 days after receiving such a request, the head of the agency shall review the determination of the head of the office and shall issue a written decision. In conducting such review, the head of the agency may request the offeror or contractor to provide additional information concerning the issues involved. The head of the agency shall transmit a copy of his

decision under this subsection to the offeror or contractor and the head of the office.

(f) If, prior to the award of a contract for consulting services, management or professional services, or a special study or analysis, the head of the office determines that an organizational conflict of interest or the appearance of such a conflict exists with respect to the contract, and such determination is not reversed by the head of the agency—

(1) the agency shall disqualify the offeror from eligibility for award of the contract or, in the case of an organizational conflict of interest or the appearance of such a conflict involving a consultant or subcontractor proposed to be used by the offeror in the performance of the contract, shall prohibit the offeror from using the services of such consultant or subcontractor;

(2) the agency shall include in the contract awarded to the offeror such conditions as the agency determines would avoid an organizational conflict of interest or the appearance of such a conflict involving such offeror or any consultant or subcontractor; or

(3) in any case in which the agency determines that—

(A) the facts and circumstances surrounding the contract necessitate immediate action; and

(B) the agency is unable to obtain the services to be performed pursuant to the contract from any other person other than the offeror, consultant, or subcontractor involved in the organizational conflict of interest or the appearance of such a conflict, the agency may award the contract to the offeror if the agency includes in the records maintained by the agency on the contract, makes available to the public, and transmits to each committee of the Senate and the House of Representatives having legislative jurisdiction over the agency, a complete statement of the relevant facts disclosed by the offeror, consultant, or subcontractor pursuant to subsection (c), or otherwise known or made available to the agency.

(g)(1) If, after the agency has entered into a contract for consulting services, management and professional services, or a special study or analysis, the head of an office established or designated in the agency under subsection (d) determines that an organizational conflict of interest or the appearance of such a conflict exists with respect to the contract, and such determination is not reversed by the head of the agency, the agency shall—

(A) terminate the contract; or

(B) in any case in which termination is not in the best interest of the Government, modify the contract to the extent necessary to prevent or mitigate to the greatest extent possible the conflict or the appearance of the conflict and include in the records maintained by the agency on the contract, make available to the public, and transmit to each committee of the Senate and the House of Representatives having legislative jurisdiction over the agency, a complete statement of the relevant facts determined to exist regarding the offeror, consultant, or subcontractor.

(2)(A) Except as provided in subparagraph (B), a contractor who has entered into a contract with an agency for consulting services, management and professional services, or a special study or analysis, or a consultant or a subcontractor to any such contractor shall have no claim against the United States for damages as a result of an action of an agency under paragraph (1) (other than a claim specified pursuant to a convenience clause in the contract), but such a contractor, consultant, or subcontractor may have a claim against the United States for compensation for work performed prior to such agency action.

(B) A contractor who has entered into a contract with an agency for consulting services, management and professional services or a special study or analysis, or a consultant or a subcontractor to any such contractor shall have no claim for compensation for work performed prior to an agency action under paragraph (1) if it is determined that such contractor's, consultant's or subcontractor's failure to completely disclose the relevant facts under subsection (b) precluded a determination of the existence of an organizational conflict of interest or the appearance of such a conflict involving such contractor, consultant, or subcontractor prior to the award of the contract.

(h) Two years after the effective date of this title, the Comptroller General of the United States, in conjunction with the Director of the Office of Management and Budget, shall commence an evaluation of the operations of the provisions of this section, and, within nine months after the commencement of such evaluation, shall prepare and transmit a report to the Congress concerning the result of such evaluation, including recommendations for the continuation, modification, or termination of such provisions.

BUDGET IDENTIFICATION AND JUSTIFICATION

SEC. 206. (a) The head of each agency shall include with the request for regular appropriations for each fiscal year submitted to the Director of the Office of Management and Budget pursuant to section 215 of the Budget and Accounting Act, 1921 (31 U.S.C. 23), an itemized statement of the amounts requested by the agency for procurement in such fiscal year. The statement shall identify such amounts according to the same subfunctional categories to be used by the President in the submission of the Budget for such fiscal year pursuant to section 201(a) of such Act (31 U.S.C. 11), and, within each such category, shall identify such amounts according to classifications for (1) procurement of consulting services, management and professional services, and special studies and analyses, and (2) all other procurement activities.

(b) The Budget transmitted by the President to the Congress for each fiscal year under section 201(a) of the Budget and Accounting Act, 1921 (31 U.S.C. 11) shall set forth separately, within each subfunctional category used in such Budget, requests for new budget authority for, and estimates of outlays by, each agency for (1) procurement of consulting services, management and professional services, and special studies and analyses, and (2) all other procurement activities.

(c)(1) By April 1 of the fiscal year preceding the fiscal year for which the Budget is submitted pursuant to section 201(a) of the Budget and Accounting Act, 1921, the head of each agency shall prepare and transmit to the Committees on Appropriations of the Senate and the House of Representatives an analysis of each request for new budget authority and of the estimates of outlays included in such Budget for such agency pursuant to subsection (b) of this section and a statement justifying the need for each such request and estimate.

(2) Within sixty days after the President transmits to the Congress a revision of any request or estimate included in the Budget for any fiscal year pursuant to subsection (b), the head of the agency affected by such revision shall prepare and transmit to the Congress a modification of the analysis and statement required by paragraph (1) which reflects the revision made by the President.

FEDERAL PROCUREMENT DATA SYSTEM

SEC. 207. (a) The Administrator for Federal Procurement Policy shall establish a data system for the collection and dissemination of information regarding all contracts entered into by each agency. The system shall classify every contract or contract modification for an amount in excess of $10,000 as either for professional type services or for commercial and industrial type activities, and shall include for each such contract or contract modification—

(1) the name of the agency awarding the contract;

(2) an identification number or other designation for the contract or modification, as the case may be;

(3) the name of the contracting office of the agency which awarded the contract;

(4) the name of the contractor;

(5) whether the contractor is a small business or a minority business;

(6) the date on which the contract award or the modification was made;

(7) the city, county, State, or country in which the work under the contract will be performed;

(8) a brief description of the work to be performed under the contract;

(9) the total dollars payable by the Government under the contract;

(10) the estimated completion date of the contract;

(11) whether the contract was awarded through competitive or noncompetitive procedures;

(12) the type of contract, such as a cost reimbursement contract or fixed price contract; and

(13) if applicable, the negotiation authority used to award the contract under the provisions of section 2304(a) of title 10, United States Code, or section 302(c) of the Federal Property and Administrative Services Act of 1949.

(b)(1) Consistent with otherwise applicable law, the Administrator for Federal Procurement Policy shall make information within the system available, on request, to the Congress, the various agencies, and the public.

(2) The Administrator for Federal Procurement Policy shall prepare and transmit to the Congres quarterly and annual reports regarding the information maintained on each agency within the system.

(c) Each agency shall provide such information to the Administrator for Federal Procurement Policy as may be necessary to assure that the data concerning the agency in the system and in the reports under subsection (b)(2) is current, accurate, and complete.

PUBLIC AVAILABILITY

SEC. 208. (a)(1) Each agency shall compile and make available to the public a list of all contracts entered into by the agency during the 12-month period immediately preceding the month in which the list is prepared and a separate list of all contracts entered into by the agency for which performance has not been completed at the time of the preparation of such list. The lists shall be updated on a quarterly basis and shall include, for each such contract—

(A) the contract identification number assigned by the agency;

(B) the contractor's name;

(C) the date of award and the estimated completion date;

(D) the original and current amounts to be paid by the agency under the contract; and

(E) a brief description of the work to be performed.

(2) Every agency shall prepare and maintain a written statement justifying the need for each contract for consulting services, management and professional services, or a special study or analysis which is entered into by the agency. The statement shall include the name of the Government employee who authorized the award of the contract and the Government employee who is re-

sponsible for the administration of the contract.

(3) Each agency shall permit the public to inspect and make copies of the list prepared under paragraph (1) and the statements prepared under paragraph (2). The agency may make a reasonable charge for the costs of making such copies.

(b) (1) Except in any case in which the disclosure of a contract or any information therein is prohibited by law, and except in any case in which, for national security reasons, the terms of a contract are lawfully determined to be of a classified nature—

(A) all contracts shall be considered public information and shall be available to the public upon request; and

(B) the following information shall be available to the public for every contract for consulting services, management and professional services, or a special study or analysis:

(i) the name and qualifications of any personnel designated in the contract; and

(ii) the sole source justification if such contract was awarded on a sole source basis.

(2) Paragraph (1) does not require an agency to make technical proposals available to the public.

EXEMPTIONS

SEC. 209. Notwithstanding any other provision of this Act, contracts for consulting services, management and professional services, and special studies or analyses, and any data, reports, or other material pertaining thereto, which relate to sensitive foreign intelligence or foreign counterintelligence activities, which relate to sensitive law enforcement investigations, or which are classified under the national security classification system are exempt from the provisions of this title.

EFFECT ON OTHER LAW

SEC. 210. The provisions of this title shall supersede any statute enacted before the date of enactment of this Act to the extent such statute is inconsistent with the provisions of this title.

EFFECTIVE DATE

SEC. 211. The provisions of this title shall take effect one hundred and eighty days after the date of enactment of this Act.

CONSULTANT REFORM AND DISCLOSURE ACT OF 1981

MAJOR PROVISIONS

Clarifies the authority of agencies to appoint experts and consultants pursuant to title 5, section 3109 U.S.C. Requires that OPM assume a more active oversight and reporting role in relation to the use of appointments by agencies.

Defines consulting services, management and professional services, and special studies and analyses as the universe to which most provisions apply.

Requires the publication of all consulting services, management and professional service, and special study and analysis contracts in excess of $10,000 in the Commerce Business Daily prior to award. Also requires notification and justification of all subsequent modifications which increase the contract value by $25,000 to be sent to the respective Inspector General or comparable official.

Requires basic attribution information to be included in reports prepared pursuant to a consulting service, management and professional service, or special study contract and in agency-prepared reports which include substantial portions of such contractor-prepared reports.

Requires the evaluation of consulting, management and professional service, and special study and analysis contracts which exceed a value of $50,000. Special attention is focused on performance according to the terms of the contract and deviations from cost and time as specified in the original contract.

Organizational conflict of interest determinations are required which are to be applied on a test basis—for three years—at the Departments of Energy and Transportation, and the Environmental Protection Agency. Actual conflicts and appearances of conflict are addressed in regard to consulting, management and professional service, and special study and analysis contracts only. Where an adverse determination is made the contractor will have an appeal procedure.

Line item identification in the budget submitted by the President to Congress is required for consulting service, management and professional service, and special study and analysis procurement requests. Agencies will also be required to explain these requests in the budget justification process.

The Federal Procurement Data System is codified.

Agency contract listings for all contracts entered into within the preceding 12 months, and contracts which are active, are required to be maintained and be made available to the public for inspection. Such listing will be updated quarterly.

Written justifications for consulting service, management and professional service, and special study and analysis contracts are required to be maintained by the agencies and are to be made available to the public.

All contracts, unless classified for national security purposes, are to be considered public documents and thus available for inspection by the public unless disclosure is prohibited by law.

By Mr. GOLDWATER (for himself, Mr. PACKWOOD, Mr. SCHMITT, and Mr. PRESSLER):

S. 720. A bill entitled the "Public Telecommunications Act of 1981"; to the Committee on Commerce, Science, and Transportation.

PUBLIC TELECOMMUNICATIONS ACT OF 1981

● Mr. GOLDWATER. Mr. President, the bill I introduce today is entitled, the "Public Telecommunications Act of 1981." It provides a 3-year authorization for the Corporation for Public Broadcasting, beginning in 1984, and authorizes appropriations 2 years in advance of their use.

The Corporation for Public Broadcasting (CPB), a private, nonprofit corporation, was authorized to be established by Congress in 1967 to foster the growth and development of high-quality programing by public or noncommercial radio and television broadcasters. CPB also acts as a "heat shield" to protect the broadcaster from encroachments upon his first amendment freedoms.

In 1975, Congress agreed to appropriate funds for CPB 2 years in advance of their actual use to allow long-range program development, and an added measure of insulation from Federal control over or interference with program decisions. This bill retains the advance year mechanism as a reflection of the continued concern of its sponsors that the availability of Federal money not be used to influence public broadcasting.

The 1975 act also established a matching scheme, by which the amount of non-Federal support—fair market value of property and services—received by public broadcasters is matched by the Federal Government at a 2.5-to-1 ratio. In 1978 Congress reauthorized CPB for 3 years, retaining the matching scheme at a 2-to-1 ratio, and keeping the advanced appropriation cycle. The 1978 act also imposed greater administrative and social responsibilities, for example, establishment of volunteer service accounting procedures, community and program advisory boards, and oversight of equal employment performance of contractors.

The 1978 act authorized appropriations ceilings of $180 million for fiscal year 1981; $200 million for fiscal year 1982; and $220 million for fiscal year 1983.

Actual appropriations have been $162 million for fiscal year 1981; $172 million for fiscal year 1982; and $172 million for fiscal year 1983.

The Public Telecommunications Act of 1981 authorizes ceilings which reduce available dollars for public broadcasting through 1986. It also reflects our concern that the Federal role in public broadcasting can, and must be, reduced. As such, we recommend authorized levels as follows: $110 million for fiscal year 1984; $100 million for fiscal year 1985; and $100 million for fiscal year 1986.

The major features of this bill reflect an examination of the best way to: First, insure the needed insulation for the broadcaster; second, foster the continued excellence in programing we all enjoy; and third, target the Federal dollar to existing system needs.

MAJOR FEATURES OF THE PUBLIC TELECOMMUNICATIONS BILL

First. Needy stations: The bill develops a method of diverting the direct grant dollars from major market stations to those that are smaller.

Under the present law, each year CPB certifies to the Secretary of the Treasury an amount that equals the level of non-Federal support given in that year to public broadcasters. As described above, the Federal Government matches this amount 2 years later at a 2-to-1 ratio. This match mechanism serves as an incentive to increase community support for public broadcasters—encouraging them to become more self-sustaining. As a practical matter, however, the Federal appropriation has been less than that which the match would trigger.[1]

By statute, CPB takes a minimum of 50 percent of those Federal dollars, and give them to stations in the form of unrestricted grants. The grant amount received by a station is primarily a percentage of the non-Federal dollars raised. Thus, stations receive grants in direct proportion to their ability to raise money—not on the basis of need.[2]

Our bill recognizes that one of the most significant rationales for the match no longer exists; the Federal Government has not been, and will not be, in a position to make funds available under the ceilings proposed in the 1978 act. Community and other forms of non-Federal support have outdistanced the Federal commitment. Thus, our bill eliminates the match.

Under the matching formula, stations in major markets, for example, New

Footnotes at end of article.

York, Los Angeles, Boston, Chicago, and San Francisco, receive into the millions of dollars each year in direct, unrestricted CPB grants. For example, under current projections, New York's WNET will receive $4.9 million in fiscal year 1982 and Boston's WGBH, $2.6 million. Yet, KUAT in Tucson and KNME in Albuquerque will get $350,000 each. These amounts are based primarily on these stations' abilities to raise support from non-Federal sources.

This bill will limit station direct grants to $1 million, freeing up in excess of $6 million—under fiscal year 1984 projections at $110 million—for distribution to the less affluent stations.

The major market stations are not forsaken by the bill, however.[3] It recognizes that decreased Federal dollars should allow them greater freedom to engage in commercial ventures for increased support. Some stations are already involved in significant profitmaking activities. For example, some larger stations, among other things, lease equipment, provide film editing services, and distribute video tapes of programs—all for profit. A consortium of major market stations under Public Broadcasting Communications, Inc., publishes a program guide magazine, the Dial, which accepts advertisements. The bill does not prohibit this activity. In fact, in light of the fewer dollars available to them by this measure, it is essential that most existing restraints on a noncommercial broadcaster's commercial activities be lifted. For example, we strongly encourage the Federal Communications Commission to reexamine its rules and regulations regarding on-air sponsoring identification. Perhaps the time has come for some form of limited advertising for public broadcasting.

There is one caveat in the bill. If the Internal Revenue Service determines that income from any activity in any years is taxable as "unrelated business income," that is, inconsistent with a station's nonprofit status, the station is disqualified the following year from receiving direct CPB grants, but only to the extent of the income it reports. This meets some concerns that the Federal Government not subsidize blatant commercial activities.

Second. Eliminate CPB support for interconnection: The 1967 act authorized CPB to assist in the establishment of a system of interconnection to distribute programs to local stations. The Public Broadcasting Service (PBS) and National Public Radio (NPR) were privately chartered in the early 1970's to manage the physical and actual distribution of programs to local stations, using leased A.T. & T. land lines. By 1979, public television and radio became the first extensive broadcasting system in the world to switch from a system of landline distribution to interconnection by satellite. This relatively new interconnection system allows for the simultaneous distribution of multiple programs to a virtually unlimited complex of ground terminals. It provides the opportunity for the multiple and simultaneous distribution of diversified programs.

This satellite interconnection system was built, with Federal support, for $60 million. Under current fiscal year 1982 projections, CPB's support for PBS and NPR costs to operate the interconnection system exceeds $11 million.[4]

That system is now in place, and fully operational, with excess capacity. New technologies are providing other forms of program delivery, for example, cable, video cassettes, video disks, videotapes, multipoint distribution systems, and teletext. All of these methods of delivery will influence public telecommunications radically over the next 5 years, even without a curtailment of Federal support. The problem is that public broadcasting's supply of programs has been outpaced by the technology. There are delivery alternatives, but not enough programs to deliver.

Our bill reallocates the $11 million—assuming current fiscal year 1982 projections—to the production or acquisition of programs.

Third. Emphasize program support: The bill creates a supply of programing dollars that exceeds 90 percent of the Federal appropriation.

Federal support for public broadcasting has accounted for no more than 28 percent of total industry income in any recent fiscal year. Non-Federal support, spurred to some degree by the Federal financing matching scheme, shows good indications of being on steady increase. Non-Federal support increased by 11.3 percent in fiscal year 1979 and 12 9 percent in fiscal year 1980. State and local taxes constitute the largest income source for public broadcasting at 40.3 percent. Amounts from businesses and community subscribers showed significant gains in their proportional share of total contributions. Also noteworthy is the income from foundations, which increased both in actual dollars and as a percentage of the industry's total income. Thus, even if it is assumed that State and local tax based income will decrease, other forms of support, including greater entrepreneurial ventures by the industry, are clearly on an upward curve.

Most of the Federal dollars that go to stations directly—this does not include CPB contracts executed for the production of programs, research and development, or training—in unrestricted grants are used to cover general and administrative costs of operations.[5] The increasing non-Federal support and profitmaking ventures by public broadcasters along with greater delivery alternatives can all allow the Federal Government to more effectively target declining Federal dollars to the production of programs.

The general and administrative costs of stations can and should be borne by non-Federal support. More "local" support would increase the opportunity for greater community/local input into station operations. Thus, this bill provides that CPB's direct support of stations should be restricted to the production or acquisition of local or national programs. This direct support would be 50 percent of the CPB appropriation. Forty-five percent would be used by the Corporation to promote the production of programs for national, local, regional, or special audience distribution.[6] At the $110 million appropriations level, this would create a program fund for the system that would probably exceed $100 million. Under the current scheme, the fund devoted solely to programs is less than 25 percent of the Federal appropriation.

Fourth. Facilities: The public telecommunications facilities program provides grants for broadcast equipment and other telecommunications hardware to public broadcasting stations. The program is administered by the National Telecommunications and Information Administration—NTIA—of the Department of Commerce.

The facilities program has been authorized at $40 million each year, since fiscal year 1979, and extends through fiscal year 1981. It has been funded at almost half that level, $23.5 million in fiscal year 1981. About 75 percent of that amount goes to facilitate expansion of public radio and public television service into unserved or underserved areas, such as in the more sparsely populated Western States. Most of the remaining 25 percent are strengthening grants, which enhance the facilities of already existing stations.

Our bill will maintain expansion as a priority of the facilities program. This way, we hope that the almost 35 percent of the population now unserved by public radio will be wholly covered,[7] within a 3-year period. As such, the bill proposes ceilings of $16 million in fiscal year 1982, $11 million in fiscal year 1983, and $7 million in fiscal year 1984. At that time, the Congress will have another opportunity to reassess the population's coverage needs.

MISCELLANEOUS PROVISIONS

Under current law, the 15 CPB Board members are appointed by the President with the advice and consent of the Senate. As a costsaving measure, our bill reduces the number of Board members to seven, six of whom would be presidentially appointed. The seventh member would be the President of the Corporation, and Chairman of the Board—serving at the Board's pleasure. At no time would more than four members appointed by the President be of the same political party.

The bill does not require that CPB empanel an advisory board to evaluate its program decisions.

Repeals the provision that requires a noncommercial broadcaster to retain tapes of broadcasts of issues of public importance. This reflects a recent court decision on this provision. See, *Community Service Broadcasting* v. *FCC*, 593 F.2d 1102 (D.C. Cir. 1978). Noncommercial broadcasters that do not receive Federal dollars are relieved from the prohibition against editorializing or sup-

Footnotes at end of article.

porting or opposing any candidate for political office.

FOOTNOTES

[1] See the following table:

Request year	Base year	Non-Fed. support	Max. Fed. support	Auth. max	CPB app.
1981	1979	$429	$214	$180	$162
1982	1980	469	234	200	172
1983	1981	516	258	220	172
1984	1982	586	293	----------	----------

[2] We recognize that "need" is a relative term. A major market station has greater needs in relation to the large diverse community it serves. These larger communities, however, have an equally large number of resources to which a station can appeal for support.

[3] In eight of twelve major markets, the amount of CPB basic grant constitutes less than 10 percent of the station's annual budget.

[4] Before 1980, CPB covered the full interconnection cost. Since that time, CPB has supported only 50 percent of the costs of television interconnection. The other half is borne by the television stations. This reflects some desire and ability of the stations to shoulder more of the interconnection burden.

[5] It can be demonstrated that over 80 percent of radio and TV CSG's are used to cover operational expenses. Radio personnel expenses, however, are more directly related to program production than those for television.

[6] A small amount of these funds retained by CPB would be used to cover the cost of further engineering and educational research. The Corporation would also be directed to continue its highly effective and successful projects (e.g. training) for enhancing the roles of women and minorities in the industry. The bill retains a 5 percent cap on CPB's administrative expenses.

[7] Over 90 percent of the U.S. population is served by public television. So, as a practical matter, the facilities program would make public radio the focus of its attention.

Mr. President, I ask that at this point the bill be placed, in its entirety in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 720

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Telecommunications Act of 1981".

SEC. 2. (a) Section 396(a) of the Communications Act of 1934 is amended to read as follows:

"Subpart C—Corporation for Public Broadcasting

"DECLARATION OF POLICY

"SEC. 396. (a) The Congress hereby finds and declares that—

"(1) it is in the public interest to encourage the growth and development of public audio and video programs, however delivered. Such services may include those that may promote instructional, educational, and cultural ends;

"(2) expansion and development of diversified public audio and video programs depend on freedom, imagination, and initiative on both local and national levels;

"(3) the encouragement and support of public audio and video programs, while matters of importance for private and local development, are also of appropriate and important concern to the Federal Government;

"(4) it furthers the general welfare to encourage public audio and video program services which will be responsive to the interests of people both in particular localities and throughout the United States, and which will constitute an expression of diversity and excellence;

"(5) it is necessary and appropriate for the Federal Government to complement, assist, and support a national policy that will most effectively make public audio and video programs available to all citizens of the United States; and

"(6) the Corporation for Public Broadcasting created pursuant to the Public Broadcasting Act of 1967, as amended, is the appropriate entity to facilitate the development of public audio and video programs, and to afford maximum protection from extraneous interference and control.".

(b) Subsection (c) of section 396 of such Act is amended to read as follows:

"BOARD OF DIRECTORS

"(c)(1) The Corporation for Public Broadcasting shall have a Board of Directors (hereinafter in this section referred to as the 'Board'), consisting of the President of the Corporation and six members appointed by the President, by and with the advice and consent of the Senate. No more than four members of the Board appointed by the President may be members of the same political party. The President of the Corporation shall serve as the Chairman of the Board.

"(2) The six members of the Board appointed by the President (A) shall be selected from among citizens of the United States (not regular full-time employees of the United States) and who are eminent in such fields as education, cultural and civic affairs, or the arts, including radio and television; (B) shall be selected so as to provide as nearly as practicable a broad representation of various regions of the country, various professions and occupations, and various kinds of talent and experience appropriate to the functions and responsibilities of the Corporation.

"(3) The members of the initial Board of Directors shall serve as incorporators and shall take whatever actions are necessary to establish the Corporation under the District of Columbia Nonprofit Corporation Act.

"(4) The term of office of each member of the Board appointed by the President shall be five years; except that (A) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and (B) any term that shall be expired on the date of enactment of the Public Telecommunications Act of 1981 shall not be filled, and all other such expired terms occurring subsequent to enactment shall not be filled until the number of members of the Board appointed by the President has been reduced to less than six. No member shall be eligible to serve in excess of two consecutive terms of five years each.

"(5) Any vacancy in the Board shall not affect its power, but shall be filled in the manner consistent with this Act.

"(6) Meetings of the Board shall be held in Washington, D.C.".

(c) Subsection (d) of section 396 of such Act is amended to read as follows:

"Election of the Vice Chairman; Compensation

"(d)(1) Members of the Board shall annually elect one or more of their members as a Vice Chairman or Vice Chairmen.

"(2) The members of the Board shall not, by reason of such membership, be deemed to be officers or employees of the United States. They shall, while attending meetings of the Board or while engaged in duties related to such meetings or other activities of the Board pursuant to this subpart be entitled to receive compensation at the rate of $150 per day including traveltime. Such compensation shall be paid only when such meetings or activities of the Board take place outside the Board member's State of residence. No Board member shall receive compensation of more than $10,000 in any one fiscal year. While away from their homes or regular places of business, Board members shall be allowed travel and actual reasonable and necessary expenses.".

(d) Subsection (e)(1) of section 396 of such Act is amended by—

(1) striking "the Chairman and any" and substituting "a"; and

(2) striking "from any source other than the Corporation during the period of" and substituting "for services rendered during".

(e) Subsection (g) of section 396 of such Act is amended to read as follows:

"Purposes and Activities of Corporation

"(g)(1) In order to achieve the objectives and to carry out the purposes of this subpart, as set out in subsection (a), the Corporation is authorized to—

"(A) facilitate the availability to all the people of the United States of public audio and video programs of high quality, diversity, creativity, excellence, and innovation, which are obtained from diverse sources, and made available through public telecommunications entities or through other entities on a noncommercial, nonprofit or sustaining basis. The Corporation shall carry out the objectives of this subpart with strict adherence to objectivity and balance in all programs or series of programs of a controversial nature; and

"(B) carry out its purposes and functions and engage in its activities in ways that will most effectively assure the maximum freedom of the public telecommunications entities and systems from interference with, or control of, program content or other activities.

"(2) In order to carry out the purposes set forth in subsection (a), the Corporation is authorized to—

"(A) obtain grants from and make contracts with individuals and with private, State, and Federal agencies, organizations, and institutions;

"(B) contract with or make grants to public telecommunications entities, and independent producers and production entities, for the production or acquisition of public audio and video programs to be made available for use by public telecommunications entities or other entities on a noncommercial, nonprofit or sustaining basis;

"(C) establish and maintain, or contribute to, a library and archives of public audio and video programs and related materials and develop public awareness of, and disseminate information about, public audio and video programs by various means, including the publication of a journal;

"(D) hire or accept the voluntary services of consultants, experts, advisory boards, and panels to aid the Corporation in carrying out the purposes of this subpart, and the purposes set forth in subsection (a);

"(E) conduct (directly or through grants or contracts) research, demonstrations, or training in matters related to public television or radio broadcasting and the use of nonbroadcast communications technologies for the dissemination of noncommercial educational and cultural television or radio programs; and

"(F) take such other actions as may be necessary to accomplish the purposes of this subpart and the purposes set forth in subsection (a).

Nothing contained in this paragraph shall be be construed to commit the Federal Government to provide any sums for the payment of any obligation of the Corporation which

exceeds amounts providing in advance in appropriation Acts.

"(3) To carry out the foregoing purposes and engage in the foregoing activities, the Corporation shall have the usual powers conferred upon a nonprofit corporation by the District of Columbia Nonprofit Corporation Act (D.C. Code, sec. 29-1001), except that the Corporation is prohibited from—

"(A) owning or operating any television or radio broadcast station, system, or network, community antenna television system, interconnection system or facility, program production facility, or any public telecommunications entity, system, or network; and

"(B) producing audio and video programs, or scheduling their electronic dissemination to the public via broadcast or cable technologies.

"(4) All meetings of the Board of Directors of the Corporation, including any committee of the Board, shall be open to the public under such terms, conditions, and exceptions as are set forth in subsection (k)(4).".

(f) Paragraph (2) of subsection (h) of section 396 of such Act is amended to read as follows:

"(2) Subject to such terms and conditions as may be established by public telecommunications entities receiving space satellite interconnection facilities or services purchased or arranged for in whole or in part with funds made available pursuant to this Act, other public telecommunications entities shall have reasonable access to such facilities or services for the distribution of public audio and video programs to public telecommunications entities. Any remaining capacity shall be made available to other persons for the transmission of public audio and video programs at a charge or charges comparable to the charge or charges, if any, imposed upon a public telecommunications entity for the distribution of public audio and video programs to public telecommunications entities. No such person shall be denied such access whenever sufficient capacity is available.".

(g) Subsection (k) of section 396 of such Act is amended to read as follows:

"Financing; Open Meetings and Financial Records

"(k)(1)(A) There are authorized to be appropriated for operations of the Corporation pursuant to this subpart $110,000,000 for the fiscal year 1984, $100,000,000 for the fiscal year 1985, and $100,000,000 for the fiscal year 1986.

"(B) Funds appropriated under this subsection shall remain available until expended.

"(2)(A) The funds authorized to be appropriated by this subsection shall be used by the Corporation, in a prudent and financially responsible manner, solely for its grants, contracts, and administrative costs, except that the Corporation may not use any funds appropriated under this subpart for purposes of conducting any reception, or providing any other entertainment, for any officer or employee of the Federal Government or any State or local government.

"(B) Funds appropriated and made available under this subsection shall be disbursed by the Secretary of the Treasury on a quarterly basis, in such amounts as the Corporation certifies to the Secretary will be necessary to meet its financial obligations in the succeeding quarter.

"(3)(A) The Corporation shall reserve for distribution among the licensees and permittees of public television and radio stations an amount equal to 50 percent of such funds in each fiscal year.

"(B)(i) The Corporation shall establish an annual budget of its Federal appropriations according to which it shall make grants and contracts for production of public audio and video programs by independent producers and production entities and public telecommunications entities, for acquisition of such programs by public telecommunications entities, for distribution of funds among public telecommunications entities, for engineering and program-related research, and for promotion of training and other projects designed to increase and enhance the role of minorities and women in public telecommunications.

"(ii) All funds contained in the annual budget of the Federal appropriations established by the Corporation under clause (i) shall be distributed to entities outside the Corporation and shall not be used for the general administrative costs of the Corporation, the salaries or related expenses of Corporation personnel and members of the Board, or for expenses of consultants and advisers to the Corporation.

"(iii) During each of the fiscal years 1981, 1982, 1983, 1984, 1985, and 1986 the annual budget established by the Corporation under clause (i) shall consist of not less than 95 percent of the funds made available by the Secretary of the Treasury to the Corporation pursuant to paragraph (2)(A).

"(C) In fiscal years 1981, 1984, 1985, and 1986, the Corporation may expend an amount equal to not more than 5 percent of the funds made available by the Secretary of the Treasury during such fiscal year pursuant to paragraph (2)(A) for those activities authorized under subsection (c)(2) which are not among those grant activities described in subparagraph (B).

"(4) Funds may not be distributed pursuant to this subsection to the Public Broadcasting Service or National Public Radio (or any successor organization), or to the licensee or permittee of any public broadcast station, unless the governing body of any such organization, any committee of such governing body, or any advisory body of any such organization, holds open meetings preceded by reasonable notice to the public. All persons shall be permitted to attend any meeting of the board, or any such committee or body, and no person shall be required, as a condition to attendance at any such meeting, to register such person's name or to provide any other information. Nothing contained in this paragraph shall be construed to prevent any such board, committee, or body from holding closed sessions to consider matters relating to individual employees, proprietary information, litigation and other matters requiring the confidential advice of counsel, commercial or financial information obtained from a person on a privileged or confidential basis, or the purchase of property or services whenever the premature exposure of such purchase would compromise the business interests of any such organization. If any such meeting is closed pursuant to the provision of this paragraph, the organization involved shall thereafter (within a reasonable period of time) make available to the public a written statement containing an explanation of the reasons for closing the meeting.

"(5) Funds may not be distributed pursuant to this subsection to any public telecommunications entity that does not maintain for public examination copies of the annual financial and audit reports, or other information regarding finances, submitted to the Corporation pursuant to subsection (l)(3)(B).

"(6)(A) The Corporation, in consultation with public television and radio licenses, shall review annually the criteria and conditions regarding the division and distribution of funds reserved pursuant to paragraph (3)(A) among public television and radio stations.

"(B) The funds reserved for public broadcast stations pursuant to paragraph (3)(A) shall be divided into two portions, one to be distributed among radio stations and one to be distributed among television stations. Except as provided in paragraph (8), the Corporation shall make a basic program grant from the portion reserved for television stations to each licensee and permittee of a public television station that is on the air. The balance of the portion reserved for television stations and the total portion reserved for radio stations shall be distributed to licensees and permittees of such stations in accordance with eligibility criteria that promote the public interest in public audio and video programs, and on the basis of a formula designed to—

"(i) provide for the programing needs and requirements of stations in relation to the communities and audiences such stations undertake to serve; and

"(ii) except as provided in paragraph (8), assure that each eligible licensee and permittee of a public radio station receives a basic program grant.

"(7) The funds distributed pursuant to paragraph (3)(A) may be used at the discretion of the recipient for purposes related exclusively to the production or acquisition of public audio or video programs.

"(8) Funds distributed pursuant to this subpart to any public telecommunications entity which during any fiscal year has filed or was required to file a return with the Internal Revenue Service declaring unrelated business income related to station operations under section 501 of the Internal Revenue Code, shall refund to the Corporation an amount equal to the amount of unrelated income as stated in such filed return.

"(9) Notwithstanding any provisions of this subpart, no basic program grant to any public television or radio station shall exceed the sum of $1,000,000.".

(h) Subparagraph (B) of subsection (l)(3) of section 369 of such Act is amended by—

(1) striking "an annual" and substituting "a biannual" in clause (ii); and

(2) striking "annually" and substituting "biannually" in clause (iii).

SEC. 3. Section 397 of the Communications Act of 1934 is amended by—

(1) striking paragraph (9);

(2) redesignating paragraph (10) as paragraph (9);

(3) inserting after paragraph (9) (as redesignated by paragraph (2) of this subsection) the following:

"(10) The term 'public audio and video programs' means programs licensed, distributed, and disseminated on a noncommercial, nonprofit, or sustaining basis."; and

(4) striking "Health, Education, and Welfare" and substituting "Health and Human Services" in paragraph (15).

SEC. 4. Section 398(b)(3) of the Communications Act of 1934 is amended by—

(1) striking "any information which the Corporation may require to satisfy itself that such" and substituting "such information as will demonstrate that the" in subparagraph (A);

(2) striking "requirements" and substituting "provision" in subparagraph (A);

(3) striking the last sentence in subparagraph (A) and substituting: "The Secretary shall instruct the Corporation as to the type of information that the Corporation shall require that is probative of the issue of compliance with equal opportunity standards.";

(4) striking "is not satisfied that any such person is" and substituting "has reason to believe that any such person is not" in subparagraph (B);

(5) striking "in employment" the first time it appears in subparagraph (B); and

(6) striking the last sentence of subparagraph (B).

SEC. 5. Section 399 of the Communications Act of 1934 is amended by—

(1) striking "; RECORDINGS OF CERTAIN PROGRAMS" in the heading thereof; and

(2) inserting "that receives a basic grant pursuant to this Act," after "station" in subsection (a).

SEC. 6. Section 399(b) of the Communications Act of 1934 is repealed.

SEC. 7. Section 391 of the Communications Act of 1934 is amended by inserting "and $16,000,000 for the fiscal year 1982, $11,000,000 for the fiscal year 1983, and $7,000,000 for the fiscal year 1984," after "1981,".

SEC. 8. (a) Except as provided in subsection (b) the amendments made by this Act shall take effect October 1, 1983.

(b) The amendments made by subsections (b), (c), and (d), of section 2, paragraph (4) of section 3, and sections 4, 5, 6 and 7 shall take effect on the date of enactment of this Act.●

By Mr. HUMPHREY:

S. 721. A bill to prohibit the imposition of any tax by a State on the income derived by any individual from services performed at the Portsmouth Naval Shipyard if such individual is not a resident or domiciliary of the State in which such shipyard is located; to the Committee on Finance.

PROHIBITION OF STATE TAX ON NONRESIDENT WORKERS AT PORTSMOUTH NAVAL SHIPYARD

● Mr. HUMPHREY. Mr. President, today I am introducing a bill to correct a continuing injustice to New Hampshire residents.

Since 1969, the State of Maine has required several thousand New Hampshire citizens, working at the Portsmouth Naval Shipyard, to pay a State income tax. The shipyard is a U.S. Navy installation located on the Maine-New Hampshire border. As Federal property, the U.S. Government maintains its access roads, provides security, and offers those services which the State would otherwise provide. Clearly, neither the yard nor its employees burden the State, yet its New Hampshire employees are, nonetheless, subject to Maine's income tax.

Nearly 4,000 residents of New Hampshire are today employed at the Portsmouth Naval Shipyard. New Hampshire, by a clear margin, contributes the largest State share of workers to the yard and they take home almost half of the yard's payroll of $150,000,000. New Hampshire can be proud of its many sons and daughters that have helped to build 134 submarines at Portsmouth since 1917 and set a record for the number of submarines built in a shipyard in a single year. The people of New Hampshire were a vital force in the creation of the Portsmouth Naval Shipyard, and they continue to play a dynamic role in the operation of what is one of the Nation's finest shipyards.

Jurisdictional disputes concerning the property in which the Portsmouth Naval Shipyard is sited date back to the early 19th century. The confusion caused by having the shipyard claimed by the State of Maine while it is named after the adjacent New Hampshire city underscores the problem presented by the levying of this tax. The Portsmouth Naval Shipyard's land access is from the State of Maine, but its vessels reach the sea by navigating New Hampshire waters. Certainly, there are grounds to question the validity of this tax.

Few people like to pay an income tax. Families across America suffer with high taxes. Yet the need, indeed the duty, to support the Government financially is not in question here. The issue I raise is whether a State should be able to levy an unjust, inconsistent income tax on nonresidents employed at the Portsmouth Naval Shipyard. I maintain it should not.

The Senate can redress this inequity by exercising the Federal Government's sovereign control over the Portsmouth Naval Shipyard. We can, and should, enact legislation to protect Portsmouth Shipyard employees from an income tax imposed by a State other than their own. I urge my colleagues to support this effort, to put an end to such unwarranted taxation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 721

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 106(b) of title 4 of the United States Code is amended to read as follows:

"(b) Subsection (a) shall not apply with respect to income received during any period by any individual from transactions occurring, or services performed, at the Portsmouth Naval Shipyard if during such period such individual is not a resident or domiciliary of the State in which such shipyard is located.".

(b) The amendment made by subsection (a) shall apply with respect to income received from transactions occurring or services performed after December 31, 1980.●

By Mr. DOMENICI:

S. 722. A bill for the relief of Mrs. Ascenion M. Lujan, Noe Lujan, Sevedeo Lujan, Jr., Cordelia Lujan Lons, Antonioa Lujan, Venceslao Lujan, Marta Lujan, Felix Lujan, and Tovia Lujan; to the Committee on the Judiciary.

RELIEF OF SEVEDEO LUJAN FAMILY

● Mr. DOMENICI. Mr. President, I am again introducing legislation to provide relief for the Sevedeo Lujan family. This private bill will correct the longstanding inadequacies of relief originally extended to the Lujan family following the tragic death of Sevedeo Lujan in an explosion accident at Los Alamos National Laboratories in 1959.

The troubling circumstances of the original settlement with the Lujan family raises serious doubt that the needs of the family were justly and adequately met. Mrs. Lujan was subjected to a settlement with adjusters and lab representatives without the benefit of an interpreter or counsel. This mother of five children was left to represent the needs of her family even though, for all practical purposes, she could not read or write English. I also understand that the family was never informed of the details of the accident because of its top secret classification.

The legislation I introduce today would allow a determination to be made whether the family is equitably entitled to additional compensation and, if so, the amount of such compensation. This bill will finally provide for an equitable examination of this tragic and most unfortunate case.●

By Mr. TOWER (for himself and Mr. BENTSEN):

S. 723. A bill to amend the Clean Air Act with respect to the prevention and control of air pollution in border areas of the United States and countries contiguous to the United States; to the Committee on Foreign Relations.

PREVENTING AND CONTROLLING AIR POLLUTION IN BORDER AREAS OF THE UNITED STATES

● Mr. TOWER. Mr. President, in November 1977, the city of El Paso, Tex., in conjunction with the Texas Air Control Board and the Texas Attorney General's Office, conducted an International Air Pollution meeting in El Paso. Officials of the Republic of Mexico and the U.S. Environmental Protection Agency participated in those discussions, as did staff members from my office and that of my distinguished colleagues from Texas, Senator LLOYD BENTSEN and Representative RICHARD WHITE of El Paso.

Issues discussed at that 1977 meeting focused on air pollution control matters of mutual interest and importance to Mexico and the United States. The States bordering Mexico in the Southwestern United States are extremely concerned about air pollution problems, particularly since our standards are, in most instances, more stringent than those prevailing in Mexico. As our cities strive to comply with ambient air quality standards resulting from the Clean Air Act Amendments of 1977, the situation experienced by the Southwestern border States is one which causes great concern.

Today I am introducing legislation designed to address some of the unique air pollution problems faced by the border States. Similar legislation has been introduced in the House of Representatives by Representative RICHARD WHITE.

My bill would encourage the President, acting through the Secretary of State, to take such actions as may be necessary to enter into treaties or other appropriate agreements with those countries whose borders are contiguous with ours for the purpose of preventing or controlling air pollution in these areas.

Under this bill, the EPA administrator would be directed to test air quality in the border areas and determine the percentage of pollutants emanating from foreign sources. Those pollutants determined to be from foreign sources would then be eliminated for the purposes of determining attainment or nonattainment of ambient quality standards in the region. Until those determinations are made, the border cities would be exempt from the current standards.

Finally, the EPA Administrator, in establishing ambient air quality standards, would be directed to take into account those unusual geographical and topographical conditions which directly or indirectly affect air quality. Such conditions include, for example, mountain ranges, stagnant air, and inversion layers.

Mr. President, this legislation is intended to address these unique border area air pollution problems in a reason-

able way, and I welcome my colleagues' support in this effort.

I ask unanimous consent that the text of my bill be included in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 723

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 115 of the Clean Air Act is amended by adding at the end thereof the following new subsection:

"(e) The President, acting through the Secretary of State, shall take such actions as may be necessary to enter into negotiations with countries contiguous to the United States for the purpose of—

"(1) preventing and controlling air pollution in border areas of the United States; and

"(2) reducing or eliminating air pollution which originates in such other countries and affects any area of the United States.

It is the sense of the Congress that the goals described in paragraphs (1) and (2) should be achieved as soon as feasible through treaties or other appropriate international agreements and diplomatic actions.".

SEC. 2. Section 109 of the Clean Air Act is amended by adding at the end thereof the following new subsections:

"(e) In carrying out the provisions of this Act, the Administrator, after testing the air quality control regions in border areas, shall determine the per centum of pollutants in each such region which results from foreign sources and shall eliminate such per centum for the purpose of determining attainment or nonattainment of ambient air quality standards in such region. Such testing shall be conducted not later than three months after the date of the enactment of this subsection. Effective on the date of the enactment of this subsection and until such determination is made with respect to any such region the provisions of this Act shall not apply in such region.

"(f) In implementing and enforcing the provisions of this Act relating to the attainment and nonattainment of ambient air quality standards in any air quality control region, the Administrator shall take into account the pollutants attributable to unusual topographical and geographical conditions, such as mountain ranges, stagnant air and inversion layers and other such conditions which may contribute to such attainment or nonattainment and shall adjust ambient air quality standards in each such region accordingly.".●

● Mr. BENTSEN. Mr. President, today I join with Senator TOWER to introduce legislation to amend the Clean Air Act with respect to prevention and control of air pollution in border areas of the United States and countries contigous to the United States. This legislation is designed to respond to a problem that is perhaps most prevalent in the area around El Paso, Tex. It is a problem that must be resolved on an international basis. El Paso, like other cities in the United States, is now attempting to comply with requirements of the Clean Air Act amendments passed by this Congress in 1970 and again in 1977. It is, however, constrained in the success of its effort as a result of pollutants generated outside our boundaries that are contributing to the ambient air quality of El Paso.

One element of this legislation would provide for the administration to undertake efforts to enter into treaties and other appropriate agreements with those countries contiguous to the United States for the purpose of preventing and controlling air pollution in border areas. Mr. President, for areas near the border countries next to the United States to hope to have success in meeting the requirements that this country has mandated in attainment of ambient air quality standards we must have the participation of our neighbors. I believe this Government must participate in developing the conditions that will allow for the necessary cooperation between border communities on both sides of the border.●

By Mr. NICKLES (for himself and Mr. BOREN):

S. 724. A bill to remove certain lands from the Wichita Mountains Wildlife Refuge, Okla.; to the Committee on Environment and Public Works.

WICHITA WILDLIFE LEGISLATION

● Mr. NICKLES. Mr. President, I am introducing a bill today that will alleviate a problem in Oklahoma that should not be allowed to continue.

Near Lawton, Okla., is the Wichita Mountains Wildlife Refuge consisting of over 59,000 acres. This bill would remove 90 acres where an Easter sunrise service has been conducted for almost 50 years and place the acreage into the custody of the Wichita Mountains Easter Sunrise Service, Inc., a nonprofit organization.

The necessity for this legislation has arisen since objection has been made to religious activities being conducted in the Wichita Mountains Wildlife Refuge since it is Federal land. An organization has announced plans for legal action to remove the religious structures and forbid religious activity of any kind.

Oklahomans very much value the heritage of this annual pageant. Annually, over 15,000 people from all over the United States attend the service. More than 70,000 people have signed petitions to retain this section of the refuge which has become known as the "Holy City."

The Federal Government had a very active role in establishing the Easter sunrise service in the refuge. The WPA under President Franklin Delano Roosevelt constructed the buildings at the site. In the 1930's, Federal grants of $13,000 and $94,000 were made available for the pageant.

A local group, the Wichita Mountains Easter Sunrise Service Association, Inc., has had the responsibility since 1936 for maintaining and operating the "Holy City." The association would, under this bill, have title to the 90-acre tract with the caveat that ownership would return to the Federal Government at any time the lands are no longer used for public purposes. The site will be available for public recreational and cultural activities under the administration of the association.

Mr. President, this historical religious observance has great significance to the people of Oklahoma and the surrounding States. It has been demonstrated over a period of 44 years that the Wichita Mountains Easter Sunrise Service Association, Inc., is capable of operating and maintaining this site to the benefit of all Americans. Therefore, Mr. President, I urge early consideration by my colleagues to bring a sane and sensible solution to this dilemma.●

By Mr. WALLOP (for himself, Mr. GARN, Mr. SIMPSON, and Mr. MATSUNAGA):

S. 725. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain shale property for the purposes of the energy investment credit; to the Committee on Finance.

OIL SHALE TAX CREDIT

● Mr. WALLOP. Mr. President, today I am introducing legislation to broaden the definition of oil shale property eligible for the 10-percent energy investment tax credit. This legislation would allow shale oil equipment used in the hydrogenation or similar upgrading processes to be eligible for the 10-percent energy investment tax credit. This broadened definition of oil shale property is needed so that oil shale investments will receive full incentives from the Energy Tax Act of 1978, and receive equal treatment as compared to other alternative fuels.

Mr. President, oil shale is one of the few alternative fuels that can play a significant role in increasing domestic energy supplies over the decade. While technologies for other synthetic fuels are still on the drawing board, oil shale technologies are on the verge of going to commercial production in the next few years.

Under the import reduction program oil shale is to supply 400,000 barrels of production per day by 1990. Less than one-fourth of the feasible shale oil properties have been leased by the Federal Government, but the Department of Energy estimates that if all known shale properties under consideration were brought into development, production from shale oil could exceed 850,000 barrels per day by 1990.

Once oil shale production is begun, it promises a long future of secure domestic energy supplies. Mr. President, it is estimated that 600 billion barrels of oil are recoverable from the oil shale deposits of Colorado, Utah, and Wyoming. When this is compared to the 6.8-billion barrels of oil presently consumed annually in the United States, it can be seen that oil shale can help meet our energy needs well into the next century.

Mr. President, these optimistic projections of the role oil shale can play in our energy future will not change our energy situation until we provide the incentives required to get the oil shale industry into commercial production. This legislation will help provide needed incentives for the development of oil shale by giving oil shale property the full incentive originally intended under the Energy Tax Act of 1978.

The Energy Tax Act was enacted at the end of the 95th Congress to encourage new technologies and provide domestic energy alternatives to oil and gas. While the intent of the law was correct, the limitation placed on certain categories of expenditures have denied

needed incentives to oil shale technologies and created inequities in tax treatment between various alternative fuels.

Specificallly, the definition of "oil shale equipment" under section 48(1)(7) of the Internal Revenue Code is very limited. The definition excludes expenditures for equipment necessary to upgrade and treat shale oil before it can be refined.

Many people do not fully understand the nature of oil shales, and why upgrading is a crucial process in the production of marketable shale oil. Oil shales are underground sedimentary layers of finely grained rock which is rich in organic matter. The oil which can be extracted from this shale by in situ or above-ground retorting is called kerogen or shale oil. Many people mistakenly believe that the oil comes from the shale rock is a substitute for natural petroleum and can be utilized for refining.

In reality, the opposite is true. Shale oil or kerogen is a complex hydrocarbon which is removed from the shale rock primarily through heat treatment at about 900° Fahrenheit. At that stage, kerogen is unsuitable for direct use or immediate or direct processing in a refinery. It is a thick tar-like substance that will not flow in pipelines, that can solidify in a refinery, and that contains chemicals and elements that must be removed before refining so that they do not poison the refinery catalysts.

The necessary process by which the kerogen is upgraded is commonly called hydrogenation. It removes the impurities from the shale oil and makes it flow more easily. Upgrading processes require large equipment and property investments adding several dollars to the cost of a barrel of shale oil before it is suitable as a substitute for petroleum or use in a refinery. Approximately 40 percent of the cost to mine, retort, and prepare shale oil for use in a refinery can be attributed to the upgrading or hydrogenation process.

The prohibition on the use of the energy credit for such oil shale expenditures is not within the intent of the Energy Tax Act nor the treatment given for other alternative fuels. By comparison, a much larger percentage of expenditures for projects in coal gasification, liquefaction, solar, ocean thermal, wind, and biomass will qualify for the extra energy percentage.

There is no reason to provide full credit to synthetic fuels such as coal gasification or liquefaction, and deny incentives to the one alternative fuel that has potential of being commercially produced in meaningful quantities in this decade. This results in a substantial inequity for expenditures for shale oil. There is no logical policy reason to penalize oil shale production. On the contrary, a broad definition of oil shale property should be adopted so that expenditures made on an oil shale site to produce oil from shale rock will get the full benefit of the Energy Tax Act of 1978.

Mr. President, by broadening the definition of shale oil property, equipment used in hydrogenation or similar upgrading processes subsequent to retorting would be eligible for the 10-percent energy investment credit. It should be made clear that this legislation does not expand the definition of property to cover equipment used in refining shale oil.

The bill would have no budget impact or revenue loss until the mid 1980's. This is because the expenditures for upgrading facilities will normally come toward the end of the building of a shale oil facility. In the meantime, the credit for such property gives certainty and stability in planning long leadtime projects that must compete economically with conventional oil and gas fuels.

Mr. President, this legislation would carry out the intent of existing law and remove the inequity of expenditures for oil shale projects. The energy crisis in this country dictates that full tax benefits be given to the development of oil shale when that resource is one of the most promising near-term alternatives to foreign oil.

I urge my colleagues to act quickly to pass this needed legislation.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 725

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TREATMENT OF CERTAIN SHALE OIL PROPERTY AS ENERGY PROPERTY.

(a) IN GENERAL.—Paragraph (7) of section 48(1) of the Internal Revenue Code of 1954 (relating to energy property) is amended to read as follows:

"(7) SHALE OIL PROPERTY.—The term 'shale oil property' means property used—

"(A) in the mining of oil-bearing shale rock, or

"(B) in the production or extraction of oil from oil-bearing shale rock, including property used for hydrogenation (or for a similar process subsequent to retorting), but not including property used for refining.".

(b) CONFORMING AMENDMENT.—Clause (v) of section 48(1)(2)(A) of such Code (relating to definition of energy property) is amended by striking out "equipment" and inserting in lieu thereof "property".

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall apply to periods after December 31, 1980, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.●

By Mr. WEICKER:

S. 726. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Human Resources.

CHILD AND YOUTH CAMP SAFETY ACT

● Mr. WEICKER. Mr. President, today I am pleased to introduce, along with my colleague Senator TSONGAS, the Children and Youth Camp Safety Act of 1981. For well over a decade my former colleague from Connecticut, Senator Ribicoff, and I have worked to provide protection for youngsters who attend our Nation's summer camps. We have pointed out that while 8 to 10 million boys and girls attend 10,000 summer camps each year, only 10 States have any type of agency responsible for monitoring camp conditions and operations. We have urged this body to pass legislation that establishes a Federal role in aiding States to develop camp health and safety standards. Unfortunately, no affirmative steps have yet been taken.

The remarkable truth is that the majority of States make no effort to safeguard our millions of camping youngsters by requiring that any minimum safety standards be met. The results of this inaction recur each summer: drownings, accidental shootings, blindings, and cripplings. To an alarming extent, these are the result of poorly trained camp staffs, many of whom are juveniles themselves, or delapidated facilities that are somehow thought adequate for camping youngsters under the guise of roughing it.

In March 1978 my constituent, Mitch Kurman of Westport, Conn., presented forceful testimony before the Senate Child and Human Development Subcommittee on the need for Federal camp safety legislation. Mitch lost his own son in a tragic camping accident in Maine and he has devoted many years to documenting camp accidents and unsafe camp conditions throughout the United States. He has aroused the conscience of many Americans and I commend him for his tireless efforts in behalf of meaningful camp safety standards.

The problem of inadequate safety standards has repeatedly been brought to the States attention. Yet the protection necessary to safeguard the health and well-being of our Nation's youth has not yet materialized. In an effort to prevent future deaths or accidents, this bill would provide for Federal financial and technical aid to States to encourage them to develop programs for implementing youth camp safety standards. Furthermore, this measure would insure that States and youth camps are not overburdened by unnecessary Federal regulations. It would essentially direct any Federal standard promulgated by the Office of Youth Camp Safety to the Congress for its approval within 60 days.

Now let us work expeditiously, Mr. President, to see that in this session of Congress prompt and favorable action will be taken to alleviate this persistent problem of camp accidents. Early passage will mean one less summer of disability or death due to preventable camping accidents.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 726

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Children and Youth Camp Safety Act".

STATEMENT OF PURPOSE

SEC. 2. (a) It is the purpose of this Act to protect and safeguard the health and well-being of the youth of the Nation attending day camps, residential camps, short-term group camps, travel camps, trip camps, primitive or outpost camps, and Federal recreational youth camps, by providing for establishment of Federal standards for safe operation of youth camps, to provide Federal financial and technical assistance to the States in order to encourage them to

develop programs and plans for implementing safety standards for youth camps, and to provide for the Federal implementation of safety standards for youth camps in States which do not implement such standards and for Federal recreational youth camps, thereby providing assurance to parents and interested citizens that youth camps and Federal recreational youth camps meet minimum safety standards.

(b) In order to protect and safeguard adequately the health and well-being of the children and youth of the Nation attending camps, it is the purpose of this Act that youth camp safety standards be applicable to intrastate as well as interstate youth camp operators.

CONGRESSIONAL INTENT REGARDING STATE INVOLVEMENT

SEC. 3. It is the intent of Congress that the State assume responsibility for the development and enforcement of effective youth camp safety standards. The Secretary shall provide, in addition to financial and technical assistance, consultative services necessary to assist in the development and implementation of State youth camp safety standards.

DEFINITIONS

SEC. 4. For purposes of this Act:

(1) The term "youth camp" means any residential camp, day camp, short-term group camp, troop camp, travel camp, trip camp, primitive or outpost camp, or Federal recreational youth camp located on private or public land, which—

(A) is conducted as a youth camp for the same ten or more campers under eighteen years of age:

(B) may include activities promoted or advertised as something other than a youth camp, but offers youth camp activities;

(C) may include any site or facility primarily designed for other purposes, such as, but not limited to, any school, playground, resort, or wilderness area; and

(D) may include any site or facility advertised as a camp for youth regardless of activities offered.

(2) The term "youth camp activities" includes, but is not limited to, such waterfront activities as swimming, diving, boating, lifesaving, canoeing, sailing, and skindiving; such other activities as archery, riflery, horseback riding, hiking, and mountain climbing, and other sports and athletics; and campcraft and nature study activities, under the auspices of a youth camp operator. The term does not include—

(A) the activities of a family and its guests carried out as a purely social activity;

(B) regularly scheduled meetings of voluntary organizations such as the Girl Scouts or Boy Scouts that do not involve camping experience;

(C) regularly scheduled athletic events that do not involve camping experience;

(D) bona fide extracurricular activities conducted under the auspices of the schools;

(E) learning experiences in the arts and drama or conferences of forums; and

(F) activities carried on in private homes.

(3) The term "permanent campsite" means a campground which is continuously or periodically used for camping purposes for a portion of a day by a youth camp operator, which may or may not include temporary or permanent structures and installed facilities.

(4) The term "residential camp" means a youth camp operating on a permanent campsite for four or more consecutive twenty-four-hour days.

(5) The term "day camp" means a youth camp operated on a permanent campsite for all or part of the day but less than twenty-four hours a day and which is conducted for at least five days during a two-week period, but does not include—

(A) swimming facilities operated by a public agency or by a private organization on a membership basis, except where that private organization utilizes such facilities as part of a youth camp;

(B) a day care center except where the center operates a day camp; or

(C) playgrounds and other recreational facilities provided for neighborhood use by local public agencies.

(6) The term "troop camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day for organized groups of campers sponsored by a voluntary organization serving children and youth.

(7) The term "short-term group camp" means an organized camping activity of more than twenty-four but less than a ninety-six-hour period for groups, clubs, and troops of campers sponsored by an organization or person.

(8) The term "travel camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day and which uses motorized transportation to move campers as a group from one site to another over a period of two or more days.

(9) The term "trip camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day which moves campers under their own power or by a transportation mode permitting individual guidance of a vehicle or animal from one site to another.

(10) The term "primitive or outpost camp" means a portion of the permanent camp premises or other site, under the control of the youth camp operator at which the basic needs for camp operation, such as places of abode, water supply systems, and permanent toilet and cooking facilities are not usually provided.

(11) The term "Federal recreation camp" means a camp or campground which is operated by, or under contract with, a Federal agency to provide opportunities for recreational camping to campers.

(12) The term "camper" means any child under eighteen years of age, who is attending a youth camp or engaged in youth camp activities.

(13) The term "youth camp operator" means any private or public agency, organization, or person, and any individual, who operates, owns, or controls, a youth camp, whether such camp is operated for profit or not for profit.

(14) The term "youth camp staff" means any person or persons employed by a youth camp operator, whether for compensation or not, to supervise, direct, or control youth camp activities.

(15) The term "youth camp director" means the individual on the premises of any youth camp who has the primary responsibility for the administration of program operations and supportive services for such youth camp and for the supervision of the youth camp staff of such camp.

(16) The term "youth camp safety standards" means criteria issued by the Secretary designed to provide to each camper safe and healthful conditions, facilities, and equipment which are free from hazards that are causing, or are likely to cause, death, serious illness, or serious physical harm, including adequate supervision to prevent injury or accident, and safety instruction by properly qualified personnel, wherever or however such camp activities are conducted and with due consideration to the type of camp involved and to conditions existing in nature. The criteria shall address areas including—but not limited to—personnel qualifications for director and staff; ratio of staff to campers; sanitation and public health; personal health, first aid and medical services; food handling, mass feeding and cleanliness; water supply and waste disposal; water safety, including use of lakes and rivers, swimming and boating equipment and practices; firearms safety; vehicle condition and operation; building and site design; equipment; and condition and density of use.

(17) The term "Secretary" means the Secretary of Health and Human Services.

(18) The term "State" includes each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Guam, the Virgin Islands, and the Trust Territories of the Pacific.

(19) The term "serious violation" means any violation in a youth camp if there is substantial probability that death or serious physical harm could result, unless the operator did not, and could not, with the exercise of reasonable diligence know of the presence of the violation.

(20) The term "consultative services" means (A) advice on the interpretation or applicability of the general duty under section 5, of the general duty under State law required by section 8(b)(2), or of youth camp safety standards, and (B) advice on the most effective methods of complying with such duties and such standards.

(21) The term "Director" means the Director of Youth Camp Safety established under section 6.

GENERAL DUTY

SEC. 5. Each youth camp operator shall provide to each camper—

(1) safe and healthful conditions, facilities, and equipment which are free from recognized hazards which cause, or are likely to cause, death, serious illness, or serious physical harm, and

(2) adequate and qualified instruction and supervision of youth camp activities at all times, wherever or however such youth camp activities are conducted and with due consideration existing in nature.

DIRECTOR OF YOUTH CAMP SAFETY

SEC. 6. (a) There is established in the office of the Secretary an Office of Youth Camp Safety which shall be headed by a Director of Youth Camp Safety. In the performance of his functions under this Act, the Director shall be directly responsible to the Secretary.

(b) The Director shall be appointed by the Secretary.

(c) The Director shall prepare and submit a report to the President and to the Congress, on or before January 1 of each year, on the activities carried out under this Act, including the statistics submitted to and compiled by the Director under section 11(c), and such report shall include the certification required under section 8(d).

PROMULGATION OF YOUTH CAMP SAFETY STANDARDS

SEC. 7. (a) The Director shall develop, with the approval of the Secretary, and shall by rule, promulgate, modify, or revoke youth camp safety standards. In developing such standards, the Director shall consult with the Federal Advisory Council on Youth Camp Safety established under section 15, with State officials, and with representatives of appropriate public and private organizations, and shall consider existing State regulations and standards, and standards developed by private organizations which are applicable to youth camp safety, and shall make such suitable distinctions in such standards as are necessary and appropriate in order to recognize the differences in conditions and operations among residential camps, day camps, short-term group camps, travel camps, trip camps, primitive or outpost camps, or Federal recreational youth camps. The Director shall promulgate the standards required by this section within one year after the effective day of this Act. Such standards shall take effect in each State at the completion of the first regular legislative session of such State which begins after the date on which such standards are promulgated.

(b) Notwithstanding any other provision of law, the Director shall, before promulgating any standard under subsection (a), or any rule or regulation under any other provision of this Act, transmit such proposed standard, rule, or regulation to each House of the Congress. No such proposed standard, rule, or regulation may take effect if either House of the Congress adopts a resolution, within sixty legislative days of continuous session of the Congress after such proposed standard, rule, or regulation is transmitted by the Director, which disapproves such proposed standard, rule, or regulation. Any such resolution shall void the proposed standard, rule, or regulation involved. The failure of either House of the Congress to adopt any such resolution shall not be considered to be an expression by the Congress that the standard, rule, or regulation involved is within the scope of authority delegated to the Director by this Act.

STATE JURISDICTION AND STATE PLANS

SEC. 8. (a) During the two-year period after the initial promulgation of Federal standards and annually thereafter any State which, at any time, desires to assume responsibility for development and enforcement of comprehensive youth camp safety standards applicable to youth camps in the State (other than Federal recreational youth camps operated by a Federal agency) shall submit a State plan for the development of such standards and their enforcement.

(b) The Director shall approve a plan submitted by a State under subsection (a), or any modification thereof, if the Director determines that such plan—

(1) designates a State agency as the agency responsible for administering the plan throughout the State,

(2) provides that each youth camp operator has the same general duty under State law as is provided under section 5,

(3) provides, after consultation with youth camp operators and other interested parties in the State, for adoption and enforcement of comprehensive youth camp safety standards which standards (and the enforcement of such standards) are or will be at least as effective in providing safe operation of youth camps in the State as the standards promulgated under section 7, and provides that where penalties are not employed as a method of enforcement of such standards, a system of licensing and loss of license is in effect which is at least as effective as penalties,

(4) provides for the enforcement of the standards developed under paragraph (3) in all youth camps in the State which are operated by the State or its political subdivisions,

(5) provides a procedure whereby the State agency may petition the appropriate State court to seek injunctive relief to restrain any conditions or practices in any youth camp or any place where camp activities are conducted which are such that a danger exists which would reasonably be expected to cause death or immediate serious physical harm, or before the imminence of such danger can be eliminated through the enforcement procedures otherwise provided by State law or regulation, which is at least as effective as that provided in section 13.

(6) provides for a procedure for the issuance of variances from standards developed under paragraph (3) upon application by a youth camp operator showing extraordinary circumstances or undue hardship, on terms and conditions at least as effective as that provided in section 14,

(7) provides for consultative services to youth camps in the State with respect to the general duty and comprehensive youth camp safety standards under such State plan,

(8) provides for an inspection of each such youth camp at least once a year during a period that camp is in operation,

(9) provides for a State youth camp advisory committee, to advise the State agency on the general policy involved in inspection and licensing procedures under the State plan, which committee shall include among its members representatives of other State agencies concerned with camping or programs related thereto; persons representative of professional or civic or other public or nonprofit private agencies, organizations, or groups concerned with organized camping; and members of the general public having a special interest in youth camps.

(10) provides for a right of entry and inspection of all such youth camps which is at least as effective as that provided in section 11,

(11) contains satisfactory assurances that such State agency has or will have the legal authority and qualified personnel necessary for the enforcement of such standards,

(12) gives satisfactory assurances that such State will devote adequate funds to the administration and enforcement of such standards,

(13) provides that such State will coordinate the inspection efforts of such State agency so that undue burdens are not placed on camp operators with multiple inspections,

(14) provides that such State agency will make such reports in such form and containing such information as the Director may reasonably require,

(15) provides assurances that State funds will be available to meet the portions of the cost of carrying out the plan which are not met by Federal funds, and

(16) provides such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting of funds received under this Act.

(c) The Director shall approve any State plan which meets the requirements of subsection (b), but shall not finally disapprove any such plan, or any modification thereof, without affording the State agency reasonable notice and an opportunity for a hearing.

(d)(1) The Director shall review annually each of the State plans which he has approved, and the enforcement thereof, and shall certify that each such plan is administered so as to comply with the provisions of such plan and any assurances contained therein, and report such certification to the Congress in the annual report required under section 6(c).

(2) Whenever the Director finds, after affording due notice and opportunity for a hearing, that in the administration of the State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), and such failure would result in the failure to meet the standards developed by the Director under section 7, he shall (A) notify the State agency of his withdrawal of approval of such plan and upon receipt of such notice such plan shall cease to be in effect, but the State may retain jurisdiction in any case commenced before the withdrawal of the plan in order to enforce standards under the plan whenever the issues involved do not relate to the reasons for the withdrawal of the plan; and (B) shall notify such State agency that no further payments will be made to the State under this Act (or in his discretion, that further payments to the State will be limited to programs or portions of the State plan not affected by such failure), until he is satisfied that there will no longer be any failure to comply. Until he is so satisfied, no further payments may be made to such State under this Act (or payment shall be limited to programs or portions of the State plan not affected by such failure). Any such failure of a State to comply with any provision of the State plan shall not in any way impede any youth camp therein pending action by the Secretary under this section.

(e) The State may obtain a review of a decision of the Director withdrawing approval of or rejecting its plan by the United States court of appeals for the circuit in which the State is located by filing in such court within thirty days following receipt of notice of such decision a petition to modify or set aside in whole or in part the action of the Director. A copy of such petition shall forthwith be served upon the Director and thereupon the Director shall certify and file in the court the record upon which the decision complained of was issued as provided in section 2112 of title 28, United States Code. Unless the court finds that the Director's decision in rejecting a proposed State plan or withdrawing his approval of such plan is not supported by substantial evidence the court shall affirm the Director's decision. The judgment of the court shall be subject to review by the Supreme Court of the United States as provided in section 1254 of title 28, United States Code.

(f)(1) The Secretary, at the request of the Director, is authorized to make personnel from the Department of Health and Human Services who have the necessary expertise, available to States to assist in developing State plans, and in training State inspectors and other personnel associated with youth camps. The Director may call upon the expertise of organized camping groups for such assistance to Federal and State personnel.

(2) The Secretary, at the request of the Director, shall provide technical assistance and consultative services necessary to assist in the development and implementation of the plan.

GRANTS TO STATES

SEC. 9. (a) The Director shall make grants to the States—

(1) for the development of State youth camp safety plans in accordance with section 8;

(2) to carry out plans approved under section 8;

(3) to assist with plan initiation and training costs; and

(4) for the early operation and improvement of youth camp safety programs.

Any grant made under this section shall be based upon objective criteria which shall be established under regulations promulgated by the Secretary in order to insure equitable distribution. No such grant may exceed 80 per centum of the cost of developing and carrying out the State plan.

(b) Payments under this section may be made in installments and in advance or by way of reimbursement with necessary adjustments on account of underpayments or overpayments.

CONSULTATIVE SERVICES AND ENFORCEMENT

SEC. 10. (a) Upon the request of any youth camp operator or director, or during any inspection under section 11(a), the Director shall provide consultative services to youth camps in States which do not have in effect a State plan approved under section 8. No citations shall be issued nor shall any civil penalties (except penalties for repeated violations under section 12(b)) be proposed by the Director upon any inspection or visit at which consultative services are rendered, but if, during such inspection or visit, an apparent serious violation of the duty imposed by section 5, of any standard, rule, or order provided pursuant to section 7, or of any regulations prescribed pursuant to this Act is discovered, the Director shall issue written notice to the youth camp operator describing with particularity the nature of the violation, and the action which must be taken within a reasonable period of time specified by the Director for the abatement of the violation. Where a youth camp operator fails to comply with the abatement instructions within the prescribed period, a citation may be issued as provided in subsection (b) or a

civil penalty under section 12 may be assessed. Nothing in this subsection shall affect in any manner any provision of this Act the purpose of which is to eliminate imminent dangers.

(b) The Director shall issue regulations and procedures providing for citations to youth camp operators in States which do not have in effect a State plan approved under section 8 for any violation of the duty imposed by section 5, of any standard, rule or order promulgated pursuant to section 7, or of any regulations prescribed pursuant to this Act. Each citation shall fix a reasonable time for abatement of the violation. The Director may prescribe procedures for the issuance of a notice in lieu of a citation with respect to minor violations which have no direct or immediate or serious relationship to safety or health.

(c) The Director shall afford an opportunity for a hearing in accordance with section 554 of title 5, United States Code, to any youth camp operator issued a citation under procedures promulgated pursuant to subsection (b) or subject to penalties under section 12, or under any other procedure applying enforcement by the Director under this Act. Any youth camp operator adversely affected by the decision of the Director after such hearing may obtain a review of such decision in the United States court of appeals for the circuit in which the youth camp in question is located or in which the youth camp has its principal office by filing in such court within thirty days following receipt of notice of such decision a petition to modify or set aside in whole or in part such decision. A copy of the petition shall forthwith be served upon the Director, and thereupon the Director shall certify and file in the court the record upon which the decision complained of was issued as provided in section 2112 of title 28, United States Code. Such decision, if supported by substantial evidence, shall be affirmed by the court. The judgment of the court shall be subject to review by the Supreme Court of the United States, as provided in section 1254 of title 28, United States Code.

INSPECTIONS, INVESTIGATIONS, AND RECORDS

SEC. 11. (a) In order to carry out his duties under this Act, the Director may enter and inspect any youth camp and its records in States which do not have in effect a State plan approved under section 8, may question employees privately, and may investigate facts, conditions, practices, or matters to the extent he deems it necessary or appropriate. The Director shall inspect each such youth camp at least once a year during the period the camp is in operation.

(b) In making his inspections and investigations under this Act the Director may require the attendance and testimony of witnesses and the production of evidence under oath. Witnesses shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of a contumacy, failure, or refusal of any person to obey such an order, any district court of the United States, or the United States courts of any territory or possession, within the jurisdiction of which such person is found, or resides, or transacts business, upon the application by the Secretary, shall have jurisdiction to issue to such person an order requiring such person to appear to produce evidence if, as, and when so ordered, and to give testimony relating to the matter under investigation or in question, and any failure to obey such order of the court may be punished by said court as a contempt thereof.

(c) To determine the areas in which safety standards are necessary and to aid in promulgating meaningful regulations, camps subject to the provisions of this Act shall be required to report annually, on the date prescribed by the Director, all accidents resulting in death, injury, and serious illness, other than minor injuries which require only first aid treatment, and which do not require the services of a physician, or involve loss of consciousness, restriction of activity or motion, or premature termination of the camper's term at the camp. Camps operating solely within a State which have in effect a State plan approved under section 8 shall file their reports directly with that State, and the State shall promptly forward such reports on to the Director. All other camps shall file their reports directly with the Director. The Director shall compile the statistics reported and include summaries thereof in his annual report required under section 6(c).

(d) Any information obtained by the Director, or his authorized representative, under this Act shall be obtained with a minimum burden upon the youth camp operator and with full protection of the rights of youth camp staff members. Unnecessary duplication of efforts in obtaining information shall be reduced to the maximum extent feasible.

(e) A representative of the youth camp staff director and a representative authorized by the youth camp staff shall be given an opportunity to accompany the Director or his authorized representative during the inspection. Where there is no authorized youth camp staff representative, the Director shall consult with a reasonable number of youth camp staff members concerning the matters of health and safety.

PENALTIES

SEC. 12. (a) Any youth camp operator who fails to correct a violation for which a citation has been issued under section 10(b) or for which a notice has been issued under section 10(a) within the period permitted for its correction may be assessed a civil penalty of not more than $500 for each day during which such failure or violation continues, until the camp closes in its normal course of business.

(b) Any youth camp operator who willfully or repeatedly violates the requirements of section 5, or any standard, rule, or order promulgated pursuant to section 7, or of any regulations prescribed pursuant to this Act may be assessed a civil penalty of up to $1,000 for each day during which such violation continues, until the camp closes in its normal course of business.

(c) Civil penalties assessed under this Act shall be paid to the Director for deposit into the Treasury of the United States and shall accrue to the United States and may be recovered in a civil action in the name of the United States brought in the United States district court for the district in which the violation is alleged to have occurred or in which the operator has his principal office.

PROCEDURES TO COUNTERACT IMMINENT DANGERS

SEC. 13. (a) The United States district courts shall have jurisdiction, upon petition of the Director, to restrain any conditions or practices in any youth camp, or in any place where camp activities are conducted in States which do not have in effect a State plan approved under section 8, which are such that a danger exists which could reasonably be expected to cause death or immediate serious physical harm or before the imminence of such danger can be eliminated through the enforcement procedures otherwise provided by this Act. Any order issued under this section may require such steps to be taken as may be necessary to avoid, correct, or remove such imminent danger and prohibit the presence of any individual in locations or under conditions where such imminent danger exists except individuals whose presence is necessary to avoid, correct, or remove such imminent danger.

(b) Upon the filing of any such petition, the district court shall have jurisdiction to grant such injunctive relief or temporary restraining order pending the outcome of an enforcement proceeding pursuant to this Act.

(c) Whenever and as soon as an inspector concludes that conditions or practices described in subsection (a) exist in any campsite or place of camp activity, he shall inform parents or guardians, camp owners, and camp supervisory personnel and shall assure that all affected campers are so informed of the danger and that he is recommending to the Director that relief be sought.

VARIANCES

SEC. 14. The Director, in States which do not have in effect a State plan approved under section 8, upon application by a youth camp operator showing extraordinary circumstances or undue hardship, and upon the determination by a field inspector, after inspection of the affected premises and facilities, that the conditions, practices, or activities proposed to be used are as safe and healthful as those which would prevail if the youth camp operator complied with the standard, may exempt such camp or activity from specific requirements of this Act, but the terms of such exemption shall require appropriate notice thereof to parents or other relatives of affected campers. Such notice shall be given at least annually. Nothing in this Act shall allow the operation of a substandard camp.

FEDERAL ADVISORY COUNCIL ON YOUTH CAMP SAFETY

SEC. 15. (a) The Director shall establish in the Department of Health and Human Services a Federal Advisory Council on Youth Camp Safety to advise and consult on policy matters relating to youth camp safety, particularly the promulgation of youth camp safety standards. The Council shall consist of the Director, who shall be chairman, and fifteen members appointed by him, without regard to the civil service laws, from persons who are specially qualified by experience and competence to render such service. The Council shall include one representative from the Department of the Interior, the Department of Health and Human Services, the Department of Agriculture and the Department of Labor. There shall be eight members appointed from appropriate associations representing organized camping. There shall be three members appointed from the general public who have a special interest in youth camps.

(b) The Director may appoint such special advisory and technical experts and consultants as may be necessary in carrying out the functions of the Council.

(c) Members of the Advisory Council, while serving on business of the Advisory Council, shall receive compensation at a rate to be fixed by the Director but not exceeding $100 per day; including traveltime; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

ADMINISTRATION AND AUDIT

SEC. 16. (a) The Director is authorized to request directly from any department or agency of the Federal Government information, suggestions, estimates, and statistics needed to carry out his functions under this Act; and such department or agency is authorized to furnish such information, suggestions, estimates, and statistics directly to the Director.

(b) The Director shall prepare and submit to the President for transmittal to the Congress at least once in each fiscal year a comprehensive and detailed report on the administration of this Act.

(c) The Director and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of States receiving assistance under this Act.

NONINTERFERENCE

SEC. 17. (a) Nothing in this Act or regulations issued hereunder shall authorize the Director, a State agency, or any official acting under this Act, to prescribe, determine, or influence the curriculum, admissions policy, program, or ministry of any youth camp.

(b) Nothing in this Act or regulations issued hereunder shall be construed to control, limit, or interfere with either the religious affiliation of any camp, camper, or camp staff member, or the free exercise of religion of any youth camp which is operated by a church, association, or convention of churches, or their agencies.

(c) Nothing in this Act or regulations issued hereunder shall authorize the Director, a State aegncy, or any official acting under this Act, to require or authorize medical treatment for a person who objects (or, in the case of a child, whose parent or guardian objects) thereto on religious grounds; nor shall examination or immunization of such person be authorized or required except during an epidemic or threat of an epidemic of a contagious disease.

AUTHORIZATION

SEC. 18. There are authorized to be appropriated $7,500,000 for the fiscal year 1981, and for each of the four succeeding fiscal years, to carry out the provisions of this Act.

EFFECT ON EXISTING LAWS

SEC. 19. (a) Nothing in this Act shall be construed to supersede or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of youth camp operators and campers under any law with respect to injuries, diseases, or death of campers arising out of, or in the course of, participation in youth camp activities covered by this Act.

(b) Notwithstanding the provisions of this Act, no State law which provides youth camp health and safety standards equal to or superior to standards promulgated under the provisions of this Act shall be superseded by the provisions of this Act.●

By Mr. WILLIAMS:

S. 727. A bill to permit the Secretary of Defense to authorize officers and employees of the Department of Defense who provide police or security functions, including individuals employed pursuant to contract with the Department of Defense, to have the power of arrest on military facilities and installations, and for other purposes; to the Committee on Armed Services.

PEACE OFFICER STATUS FOR CIVILIAN EMPLOYEES OF THE DEPARTMENT OF DEFENSE

● Mr. WILLIAMS. Mr. President, I would just like to take a few minutes to bring to the attention of my colleagues a problem which has escalated due to the Army's increased use of civilian employees to perform duties previously handled by military personnel.

Although the military police have traditionally handled all law enforcement and security functions on military installations, the Defense Department presently employs a number of civilians in a law enforcement capacity. These civilians perform all of the functions formerly handled by the military police; however, they possess no arrest powers beyond those of an ordinary citizen's arrest. Unfortunately, this situation has seriously undermined both the morale of the employees, whose lack of status as peace officers leaves them vulnerable to legal action on the grounds of false arrest and their effectiveness, since the people with whom these employees deal are well aware of their lack of warrantless arrest powers.

The Department of Defense feels it necessary to have explicit legal authority before it can grant these civilian employees arrest powers. Therefore, I am reintroducing legislation to permit the Secretary of Defense to grant arrest powers to civilian employees who perform law enforcement or security functions on military facilities and installations.

At this time, Mr. President, I ask that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 727

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Defense is authorized to invest officers and employees of the Department of Defense, including individuals employed pursuant to a contract, who provide police or security services to the Department of Defense, with the power to arrest individuals on military facilities and installations.●

By Mr. KENNEDY (for himself, Mr. TSONGAS, Mr. LEAHY, and Mr. LEVIN):

S. 728. A bill to amend the Foreign Assistance Act of 1961 to prohibit the assignment to or presence in El Salvador of U.S. military personnel and to prohibit the furnishing of military and other security assistance for El Salvador; to the Committee on Foreign Relations.

SUSPENDING MILITARY AID TO EL SALVADOR

Mr. KENNEDY. Mr. President, I am introducing today with my distinguished colleagues, Senators TSONGAS, LEAHY, and LEVIN, legislation to suspend military aid and remove American military advisers from El Salvador.

The suspension would remain in effect until the President determines and the Congress concurs that the following conditions have been met:

First, clear evidence of a thorough and complete investigation and steps taken to prosecute those responsible for the recent murders of six American citizens in El Salvador, and similar action with respect to investigating other such killings and acts of terrorism.

Second, active U.S. encouragement of international mediation of the conflict. This would involve an in-place truce and a halt to the arms flow from any foreign source. A useful source for such mediation might well be the conference of the parties to the dispute which successfully ended the fighting in Zimbabwe. The object must be a fair and peaceful mediated solution. In that process, the Government of El Salvador must give evidence of cooperating in these efforts.

Third, Salvadoran civilians must continue to have some substantial role in the leadership of the Government of El Salvador. The United States at no point should be in a position of providing arms and advisers to a military dictatorship.

Fourth, the U.S. Government must vigorously investigate and prosecute reported Miami-based financing of death squads and terrorists in El Salvador.

Finally, the Government of El Salvador must submit a specific written request that the U.S. Government provide any military personnel, military or security assistance before this assistance can be provided.

In recent months, beginning even prior to the inauguration of President Reagan, a shift in U.S. policy toward El Salvador occurred, with a turn toward a military solution to the political crisis in that country.

Since the inauguration, that shift has become far more pronounced, and the policy appears to be leading to more and more dangerous levels of escalation. U.S. military involvement with the present government is out of proportion to the level of conflict in that country, excessive in its risk to U.S. personnel and threatening to long-term U.S. interests.

The executive branch has announced increased military assistance—now including a second $25 million arms allotment and a total of 78 military advisers by the end of this month—for a total level of aid that is nearly twice the size of the entire defense budget of neighboring Honduras. The recipients of that aid are the security forces of El Salvador, elements of which have been identified as responsible for kidnapings, torture, and murders. The Government itself has failed to take effective action to halt a campaign of violence against the Catholic Church which already has claimed the lives of the archbishop of San Salvador, Oscar A. Romero, 10 Salvadoran priests, and 4 American missionaries.

In December, the United States cut off all military aid to the ruling junta when those American citizens were brutally murdered and a coverup was attempted. Ambassador Robert White and others have testified that the investigation of these killings has not been vigorously pursued. In January, two more Americans, labor leaders of the American Institute for Free Labor Development, also were murdered. An American freelance journalist has been missing for nearly 3 months. Nevertheless, this administration not only has concurred in the reinstitution of military aid but has greatly expanded that assistance, multiplied the number of American military advisers, and spread them to military garrisons in the heart of the areas of strife.

A portion of the arms and political support to the rebels undoubtedly was supplied by Communist countries—as well as from other foreign sources. Regardless of the sources of supply of arms—a supply which observers say has been now substantially choked off—this remains a secondary aspect to the conflict. It should be condemned and opposed, and I strongly support the administration's apparently successful diplomatic efforts toward that end.

However, the primary cause of the crisis remains within El Salvador itself: The arbitrary use of power in place of an open political process and the refusal to move effectively to end longstanding social and economic inequities.

Although the profound polarization in El Salvador extends back into history, the modern era can be traced to the massacre of thousands of peasants in 1932 and the establishment of a military-dominated political process which ever since faithfully carried out the desires of the economic elite. After hesitant steps at evolution away from that past during the late 1960's, destruction of the final shreds of credibility in the political system has dominated the past decade. Napoleon Duarte, now a member of the junta, was elected in 1972 to the Presidency; but his victory was overturned by the weapons of the Salvadoran military. His running mate, Guillermo Ungo, now presides over the umbrella political organization which spans dissident Christian Democrats and Social Democrats as well as Communist and other leftist viewpoints. The 1972 debacle was repeated in 1977, when again a military intervention denied power to a political coalition including the legitimate opposition.

Extensive repression of the people, including officially condoned murder, disappearances, and torture, has brought condemnations of the Government's security forces by the Inter-American Commission on Human Rights, the International Commission of Jurists, Amnesty International, and our own State Department.

More than any other factor, it was the uncontrolled killings of the past 18 months which led to the dissolution of the first reformed junta in October 1979 and to the steady departure from succeeding juntas of moderate political and military leadership. Now only a single sector of the Christian Democratic Party remains, and the power and weight of the military within the junta is dominant.

In this context, the provision of arms and military advisers strengthens the military within the Government, diminishing even further the capacity of the civilian members to determine policy and affect events. It is no wonder that we see news reports, confirmed by Ambassador Robert White, indicating Mr. Duarte has had serious doubts about accepting U.S. military advisers and a burgeoning of U.S. weapons and military equipment.

Militarizing the conflict also gives weight to the more extreme elements of the opposition, who can more easily portray the conflict as one which matches them not merely against the Salvadoran Government but against the United States as well. The result is to discredit those opposition leaders who have been interested in pursuing a political rather than a military solution to the conflict.

For the United States, there are significant added risks entailed in the present path of policy. Successive steps are being taken to escalate U.S. military involvement, without specifying clear limits. Military aid was nonexistent a year ago, then moved to nonlethal equipment, then to a small amount of arms, and now to the largest arms package for any country in the hemisphere along with an on-the-ground presence of American military advisers and trainers.

The War Powers Act was designed to force a major debate before American forces could be placed in a situation of hostilities in the absence of a declaration of war. Yet, now we see 78 Americans being shipped into El Salvador, where gunfire, bombings, and hostilities can occur in San Salvador or in the remotest peasant village. I concur with the concern expressed by Senator EAGLETON and other colleagues that the War Powers Act should apply to this case.

It is no answer to say that American military personnel are either in the Salvadoran Government's headquarters or at three other military garrisons around the country. The risk of American casualties is too great to be accepted when the policy itself is flawed. As I stated last week, no one yet has answered the question of what this administration plans to do if any of those Americans are wounded or killed. That remains true today.

Our objective in El Salvador is an end to the violence and the beginning of a process leading to a condition of peace, respect for human rights, and economic and political reform. That process can only come through negotiations in a setting in which there is some guarantee of fair treatment to both the junta and the opposition, a setting most likely to occur under international mediation.

Our objectives are shared by our democratic allies in the region and in Western Europe. But they reject in private and caution in public against the pursuit of a military solution to the crisis or its definition in terms of East-West competition. They have been pressing for a policy of mediation.

It is another example of the counterproductive nature of our military aid proposals that Mr. Duarte now has reportedly rejected proposals for mediation from respected international statesmen such as Willy Brandt as well as from institutions such as the Organization of American States. Our voice in favor of mediation was not heard very loudly either in San Salvador or in Washington. Statements and briefings from the administration focused more on forthcoming arms shipments and arrivals of military advisers rather than on forthcoming negotiations or the arrival of peacemakers.

I would hope that the administration would recognize the dangers for the United States inherent in the present policy and alter that policy. This legislation is designed to take the road of peace, not the road of war, in El Salvador. Negotiation, not military escalation, is the only hope for a peaceful solution of this tragic conflict. Let us think together and work together to avoid the road that leads to wider war.

I also ask that the bill be inserted in the RECORD.

Mr. President, I also would ask to have inserted at the conclusion of my remarks the most recent Amnesty International Report on Human Rights Violations of February 2, 1981, the State Department's own Human Rights Report, and Amnesty's 1980 Report on El Salvador. I also would like to include the recent testimony of Archbishop James A. Hickey of Washington on El Salvador and a statement of the Conference of Major Superiors of Men, the Leadership Conference of Women Religious, and the United States Catholic Conference urging a termination of military aid to El Salvador.

There being no objection, the bill and report were ordered to be printed in the RECORD, as follows:

S. 728

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress—

(1) is deeply concerned with the escalating violence within El Salvador and the increasing military involvement of outside countries; and

(2) affirms its support for a negotiated settlement to the Salvadoran conflict and for establishment of democracy and the respect for human rights in El Salvador.

(b) It is the purpose of this Act to prohibit the assignment to or presence in El Salvador of United States military personnel and to prohibit the furnishing of military and other security assistance for El Salvador, unless certain conditions are met, including a thorough and complete investigation by the Government of El Salvador of the recent murders in El Salvador of Catholic missionaries and other Americans.

SEC. 2. Chapter 1 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 620E. Prohibition Against the Provision of Military Personnel to and the Furnishing of Security Assistance for El Salvador.—(a) Notwithstanding any other provision of law, on or after the date of enactment of this section, no United States military personnel may be assigned to or may be present in, and no military or other security assistance may be furnished for or delivered to, El Salvador unless the provisions of subsection (b) are met.

"(b) The provisions of subsection (a) shall not apply if—

"(1) the President determines, and prepares and transmits to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report setting forth such determination, that—

"(A) the Government of El Salvador—

"(i) has carried out a thorough and complete investigation of the recent murders in El Salvador of six United States citizens, including the murders of three Catholic sisters and a Catholic lay worker on December 2, 1980, and the murders of two representatives of United States labor organizations on January 3, 1981;

"(ii) is taking definitive steps to bring to justice the individuals responsible for such murders; and

"(iii) is investigating and pursuing the prosecution of individuals, whether or not such individuals are members of the security forces of El Salvador, responsible for acts of murder and terrorism;

"(B) the United States Government is actively encouraging international efforts, including the efforts of the Organization of American States and other Latin American and European countries—

"(i) to oppose the introduction of any arms or military personnel from any foreign source into El Salvador,

"(ii) to obtain an in-place truce between the parties to the Salvadoran conflict,

"(iii) to seek a conference of the parties to the conflict, and

"(iv) to achieve a fair and peaceful mediated solution of the conflict which prevents foreign military intervention,

and the Government of El Salvador has cooperated with such efforts;

"(C) Salvadoran civilians continue to have a substantial role in the decision-making and leadership of the Government of El Salvador;

"(D) the United States Government is vigorously investigating reports of, and prosecuting any individual in the United States found to be responsible for, the financing or assassination squads or other terrorist activities in El Salvador; and

"(E) the Government of El Salvador has submitted a specific written request that the Government of the United States provide United States military personnel and military or other security assistance to El Salvador; and

"(2) the Congress, within 30 calendar days of receiving such report and under procedures described in subsection (c), adopts a concurrent resolution stating in substance that it approves the determination made by the President.

"(c)(1)(A) A concurrent resolution referred to in subsection (b)(2) shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976.

"(B) For purposes of section 601(b) of such Act, the report described in subsection (b)(1) shall be considered to be a certification.

"(2) For the purpose of expediting the consideration and adoption of a concurrent resolution under subsection (b)(2), a motion to proceed to the consideration of any such resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

"(d) For purposes of this section—

"(1) the term 'military assistance' means assistance under chapter 2 of part II of this Act;

"(2) the term 'other security assistance' means—

"(A) assistance under chapter 5 (military education and training) or chapter 6 (peacekeeping operations) of part II of this Act;

"(B) sales of defense articles or services, extensions of credits (including participations in credits) and guarantees of loans under the Arms Export Control Act;

"(C) any license in effect with respect to the export of defense articles or defense services to or for the armed forces, police, intelligence, or other internal security forces of a foreign country under section 38 of the Arms Export Control Act; or

"(D) military assistance or any assistance described in clause (A), (B), or (C), which is provided under section 614 of this Act without regard to any provision of this Act or of the Arms Export Control Act; and

"(3) the term 'United States military personnel' means members of the Armed Forces of the United States and other personnel of the Department of Defense who are assigned to perform or are performing duties under this Act or under the Arms Export Control Act.".

AI Concerns in El Salvador

The human rights situation in El Salvador has deteriorated sharply in recent months. Amnesty International is seriously concerned and fears a further increase in summary execution, torture and abduction by government forces as civil conflict continues between guerrillas and the government. Of some 8,000 Salvadorians estimated to have been killed during the past year, many are known to have been the victims of extrajudicial execution by the armed forces. Peasants and young people appear to be particular targets. Sources in the country say that nearly 3,300 peasants were among those killed for political reasons in 1980.

Despite government claims that those killed by its forces are guerrillas and guerrilla sympathisers, victims of torture and death at the hands of the security forces were not generally shown to have any direct involvement in armed guerrilla activity.

International attention was captured by the killing on 3 December 1980 of three nuns and a woman missionary, all United States nationals, reported to have been abducted by security forces the previous day. However, in the week after those killings, from 6 to 12 December, according to sources in El Salvador, 144 people were killed, 66 of them by uniformed members of the security forces.

On 17 December 1980, members of the National Guard raided the town of Cojutepeque at the department of San Salvador and killed eight leaders (names on attached list) of the Central Campesina Salvadorena (Salvadorian Peasants Organization) who were meeting to discuss plans for participation in the government's agrarian reform program. There have been similar attacks in the past.

There is evidence that young people are singled out because of their youth. On 10 January 1981, troops took 22 teen-agers from Mejicanos; all were later found dead, with marks showing that they had been tortured. An army spokesman said they died of bullet wounds in a confrontation with troops; but a doctor who examined 17 of the bodies said they had all been shot after dying. Five of the young women were unidentifiable because their faces had been erased.

AI has received reports that Salvadorian paramilitary squads regularly cross the border into Honduras to attack Salvadorian refugee camps. Inside El Salvador, church sources report that refugees have been taken from camps and killed. On 31 December 1980 soldiers from San Carlos garrison searched the Domus Mariae refugee centre in Mejicanos and took away Marcial Cruz, aged 18. He was later seen at the garrison, and on 9 January was found dead.

Red Cross clinics have been attacked: on 12 January, troops broke into a clinic in Chalatenango. They killed or wounded people being treated there and abducted five young women aged from 14 to 22. On the same day, three men, members of the Baptist Church, were seized by security forces in San Salvador as they delivered provisions to the Red Cross. The whereabouts of all the people abducted in these two incidents are unknown.

Killings and disappearances of foreign journalists, including journalist John Sullivan, United States citizen, who was abducted on 28 December, have been widely reported in the international media; but Salvadorian journalists have also been targets of the armed forces. On 15 January 1981, nine staff members of the newspaper Independiente, including journalists Vida Cuadra and Francisco Ramirez Avila, were taken from the newspaper's offices by troops. The authorities deny that they are in detention. (On 25 January, the newspaper closed down and its director Jorge Pinto took refuge in the Mexican Embassy.)

Members of the Roman Catholic Church and others helping refugees and victims of the civil fighting have been hampered in their work by the security forces. The Archbishopric of San Salvador reported in mid-December that it had been forced to close its legal aid office (Socorro Juridico) because it had been raided 17 times in the previous week by the National Police. Even government offices have been subject to army raids. On 9 January, the publications department of the Education Ministry was raided by troops while it was printing leaflets with instructions for refugees; eight staff members, including the director of the department, were seized. Their whereabouts are unknown. Members of the El Salvador Human Rights Commission who witnessed the seizures have denied army allegations that subversive literature was found on the premises.

On 25 January, a leading member of the El Salvador Human Rights Commission, Victor Medrano, aged 29, was abducted from his home by plainclothes members of the National Police. Although he has been seen in the barracks of the National Police in San Salvador, authorities deny that he is in detention and there is very serious concern for his safety. Two other members of the same commission have been killed since the beginning of October last year. One was Maria Magdalena Enriquez, its press secretary who was found dead in a shallow grave about 20 miles from the capital. She was abducted on 3 October 1980 while shopping and appears to have been killed the day after her abduction. Witnesses confirmed that two of the heavily armed men who detained Sra. Enriquez were uniformed members of the National Police.

Representatives of the Junta (that headed the government of El Salvador until December 1980) however denied that police carried out the detention and stated that the government "was not implicated" in the matter. The other member of the commission killed was Ramon Valladares Perez, who was shot dead on 26 October while driving a car in the capital. The El Salvador Human Rights Commission is an independent human rights monitoring group that provides both assistance to victims of human rights abuse and publicises their cases. The Commission's offices have been destroyed by bombings three times last year in the presence of the permanent police guard on the premises. The Commission had reportedly been accused by the president of El Salvador, Ing. Jose Napoleon Duarte, of being "anti-patriotic" a few days before the abduction of Victor Medrano. The offices of the Commission were again surrounded by troops on 18 January and the Commission has seen itself forced to close down.

People have been killed because of their association, or presumed association, with peasant, labour or religious organizations, or with political parties or other organizations which do not actively support the present government. Although these killings took place against a background of conflict between government forces and guerrilla organizations, evidence reaching AI shows that many civilians not involved in guerrilla activity are being tortured and killed by the security forces. Most of the deaths have occurred after people were seized at their homes or places of work.

During 1980 the government of El Salvador repeatedly claimed that independent "anti-communist" assassination squads beyond government control were responsible for these abductions and murders. However, evidence collated by AI from hundreds of individual cases proves the responsibility of the regular security forces for serious violations of human rights. By attributing detentions, torture and killings to groups beyond government control, the government of El Salvador seems to have sought a means of evading accountability for the extra-legal measures carried out by its own security forces.

AI fears that the current wave of extrajudicial killings and "disappearances" will continue to escalate as the Salvadoran security forces use the cover of civil warfare to carry out large-scale killings of young people, peasants and others not shown to be involved in guerrilla activities.

EL SALVADOR—40 CASES OF "DISAPPEARANCE" AND KILLING OF CIVILIANS, DEC. 11, 1980–JAN. 25, 1981

AMNESTY INTERNATIONAL REPORT 1980

EL SALVADOR

Amnesty International concerns before and after the 15 October 1979 military coup that overthrew the government of General Carlos Humberto Romero included the torture and murder of prisoners, the "disappearance" and probable murder of suspected political activists and violence directed against individuals and institutions involved in monitoring and defending human rights.

Archbishop of San Salvador Oscar Arnulfo Romero, an outspoken critic of human rights violations who offered sympathy, support and a hearing to victims of torture and imprisonment and to the relatives of the murdered and "disappeared", was shot dead by an unidentified assassin on 24 March 1980 as he was saying mass. Prior to the assassination Amnesty International, in a press statement of 17 March, gave warning that the Archbishop had been made the target of death threats since the start of a campaign of political murder and abduction begun by the government after its imposition of a state of siege on 9 March 1980.

In a communication to the Inter-American Commission on Human Rights on 21 March, Amnesty International called attention to the dangers faced by Archbishop Romero and other defenders of human rights in El Salvador and to the placing of a bomb in the sacristy of the San Salvador cathedral on 16 March. In its later public statement of 25 March, condemning the murder of the Archbishop, who had been denounced by government and military for his critical stance towards them, Amnesty International stated that he "had been martyred in the cause of human rights", and stressed the evident dangers facing members of the church and others associated with the Archbishop in El Salvador. It called particular attention to the bombing earlier in March of the Salvadorian Human Rights Commission.

On Sunday 23 March, the day before his murder, the Archbishop said in his homily, broadcast nationwide on the church radio stations, that security forces in the countryside were "sowing terror" and called on soldiers to refuse to obey orders to kill that "were against the law of God". A military spokesman immediately condemned the call to disobedience as a "crime".

The Archbishop was not the only defender of human rights threatened or attacked with violence for anti-government criticism. All members of the Salvadorian Human Rights Commission have repeatedly been threatened with murder should they continue their activities. On several occasions Amnesty International has appealed to the authorities to ensure their safety. In July 1979 Amnesty International appealed for the protection of Commission member José Napoleón Gonzalez, who was later forced into exile. The office of his newspaper, La Crónica, was burned to the ground in late July 1979 and its new premises were destroyed by bombs in March 1980. The offices of the Commission itself have been attacked with gunfire, and immediately after a bomb attack on 13 March 1980 documentation on human rights abuses was confiscated by police.

Amnesty International appealed also for the protection of lay religious leaders, catechists and "Delegates of the Word" in rural areas and for clergy persecuted for their teaching of a doctrine of "social justice," such as Father Rafael Palacios, killed on 20 June 1979 in Santa Tecla. Several days earlier, a white hand—a symbol of death squads in some countries of Central America—had been painted on his door. Another priest, linked by authorities to peasant organizations, Father Alivio Napoleon Macias, was shot dead on 5 August by unknown gunmen while saying mass in the village of San Esteban Catarina. As in the case of Archbishop Romero, he was killed at the altar, while lifting up a chalice. Several priests and nuns were arrested and summarily expelled from El Salvador in 1979.

Amnesty International issued many urgent appeals on behalf of "disappeared" prisoners during the last six months of the government of General Romero. Most of the "disappeared" were subsequently found dead; several survivors of "disappearance" and witnesses of summary execution told of the murder by beheading with machetes of members of trade unions and peasant organizations supporting political opposition movements.

A Christian Democrat campesino, peasant farmer, detained on 19 May 1979 by the National Guard near San Vincente was tortured by electric shock in the local Guard headquarters and then taken with others to the Pacific shore, where he was hacked nearly to death and then thrown into the sea. He survived to give sworn testimony to the "execution" by beheading of his four companions, whose bodies were later found at a nearby beach resort.

Most of the victims of "disappearance" and murder were individuals believed to be linked to the three opposition movements, all largely trade union based, the *Bloque Popular Revolucionario* (BPR), Popular Revolutionary Bloc; the *Ligas Populares 28 de Febrero* (LP-28), Popular Leagues of 28 February; the *Frente de Acción Popular Unificada* (FAPU), Popular Front of Unified Action. Moves to crush the opposition movements were met by increasingly militant activity. Left-wing guerrilla organizations also stepped up anti-government activity, including kidnappings and killings.

Throughout the final months of the Romero administration and even now up to the time of writing the Salvadorian authorities refused to recognize the mass political organizations FAPU, BPR, and LP-28 as lawful political organizations, or to negotiate with their leaders. By October 1979, after months of street demonstrations and increasingly militant protest actions by the opposition, including bloody actions by guerrilla groups, polarization between government and opposition was extreme.

On 15 October a military coup overthrew the government of President Romero. He and chief security officials fled to Guatemala The coup leaders, Colonel Adolfo Majano and Jaime Abdul Gutiérrez, announced an amnesty for political prisoners, the restoration of human rights and the implementation of agrarian reform. A junta was formed with the two colonels and three civilian representatives of centre opposition parties. The political organizations that had called for the overthrow of Romero was not represented.

In a memorandum to the new government, on 19 October 1979, Amnesty International welcomed the statement of the junta that human rights would be restored and political prisoners released. It presented documentation on 257 Salvadorians murdered or detained or who had "disappeared" because of their political, trade union or religious activities in 1979. The documentation included 60 cases of prisoners who had not been acknowledged to be in detention and were considered "disappeared" and 114, almost all *campesinos*, whose murder by official or semi-official security forces was confirmed. The memorandum did not include all of the cases reported in 1979; the Salvadorian Human Rights Commission compiled documentation on 312 "political killings" alleged to have been perpetrated by official forces between January and July 1979, including individuals killed in demonstrations, and on 267 political arrests between January and August 1979. In February 1980 Amnesty International confirmed that 27 of the 60 "disappeared" cited in the memorandum had been released and that eight had been murdered in official custody.

The major opposition groups denounced the new junta as a continuation of military government. Security forces acted with

the same brutality as those under Romero. One day after the coup security forces of police and army moved to dislodge striking workers from several San Salvador factories, detaining 78, some of whom were then tortured, and killing 18. Within a week, the new government was held responsible for more than 100 killings of demonstrators and striking workers who had been occupying farms and factories.

Although the new government was composed largely of civilians with longstanding commitments to social change, some of them former exiles and political prisoners, from its first days it manifested a high level of governmental violence. The mass resignation of most of the civilians from the government on 3 January 1980 came when civilian ministers, most of whom immediately went into exile, denounced the unchecked violations of human rights that were beyond their power to control.

In the weeks after the resignations and the appointment of a new cabinet, the major opposition groups increased their protests against government policies. Authorities responded with violence, killing at least 52 when a street demonstration was dispersed by gunfire on 22 January, and at least 11 in attacks on another demonstration on 12 February; they also carried out hundreds of arrests and abductions.

During this period violent take-overs of embassies and public buildings and occupations with the threat of violence were among those methods used by the mass political organizations to demand the release of their "disappeared" leaders. In addition, guerrilla groups demanded prisoner releases, ransoms and the publication of political manifestos in exchange for the lives of their kidnapping victims.

On 6 February 1980 Amnesty International sent cables to the government and to Archbishop Romero, in connection with official killings and three kidnappings in which left-wing guerrillas had threatened "execution" of their "prisoners" and several cases in which hostages were threatened with violence. The cables requested the church and government to make it clear that Amnesty International "condemns every case of the execution of prisoners, kidnap victims, or hostages by governments or other organizations of whatever political orientation". The text of the cable was read the next day by Archbishop Romero in his sermon, broadcast on nationwide radio; the Archbishop had himself condemned kidnapping and the taking of hostages on several occasions. But killings by left-wing guerrilla forces continued as did many more by the government.

In mid-February press reports indicated that the United States of America (USA) would provide military assistance to El Salvador. Advisers were to be provided to train the army in "logistics, communications and intelligence". In a letter to President Carter on 17 February, Archbishop Romero sharply criticized the proposal and asked that it be withdrawn "to avoid a greater spilling of blood in this suffering nation".

On 29 February Amnesty International wrote to US Deputy Secretary of State Warren Christopher noting that the provision of some 200,000 dollars worth of training and material for crowd control by the USA in November 1979 was followed by scores of deaths when demonstrations were dispersed. In the conditions prevailing in El Salvador after 3 January, the nature of the newly proposed aid, believed to be for the police and public order operations of the military, could be expected to lead to further violations of human rights. The letter requested official information on the nature and intent of the assistance. No reply was received.

On 17 March Amnesty International publicly urged the Government of El Salvador to call a halt to the campaign of murder and abduction of peasants which followed the announcement on 9 March of agrarian reform and a state of siege. Hundreds of men, women and children were reported "disappeared," shot dead, or forced to flee to the capital, where they had sought refuge under the protection of the Roman Catholic Church. In Chalatenango Department, underbrush was set on fire around one village, the inhabitants of which were supporters of opposition unions, to prevent local people escaping; troops then entered the village, killing at least 40 people. Other villages were razed and crops destroyed in the countryside, particularly in Morazán, Cuscatlán and Chalatenango departments.

The authorities stated that troops moved into the rural areas to occupy plantations intended for expropriation in the agrarian reform. Local sources said, however, that villages supporting peasant unions, such as the Christian Federation of Salvadorian Peasants and the Union of Rural Workers, were attacked by troops, and the land seized was handed over to members of government organizations, including the Union Communal Salvadoreña, the Salvadorian Communal Union farmers organization and the Organización Democrática Nacionalista (ORDEN), a movement organized to use clandestine terror against government opponents.

In a submission to the Inter-American Commission on Human Rights on 21 March, Amnesty International described human rights violations that had continued or worsened since the October coup. These included 32 cases of unacknowledged detention—"disappearance"—and 131 cases in which individuals in the hands of security forces were reported summarily executed, all occurring between 3 January and 13 March. Most were peasant farmers said to be supporters of opposition peasant unions. The cases did not include "persons killed when street demonstrators, some of whom may have borne arms, were attacked by government and auxiliary forces"; nor did it include any case in which there was the least evidence "that the victim was either the attacker, bearing arms, or resisting arrest".

Several cases concerned the murder of children. The 29 individuals detained and killed by combined National Guard and ORDEN forces in the Las Vueltas area of Chalatenango between 29 December and 16 January included three young brothers, Adán Recinos aged 11, Santos Recinos aged 16, Francisco Recinos aged 18, and another boy, Alfonso Navarro aged 14.

The submission noted that Amnesty International was studying a total of 102 cases of people reported killed in rural areas and 30 in urban areas in January, 248 rural and 23 urban killings in February, and 130 killings, largely in rural areas, reported in the first week of March alone, which may have been summary executions.

The submission commented on the progress towards implementation of recommendations made in the Commission's own report of November 1978. Amnesty International paid particular attention to the following recommendations: that the paramilitary organization ORDEN be dissolved; that *campesinos* be protected in the full exercise of their rights; that reports of individuals killed, arrested, tortured or missing after arrest be investigated and the authorities responsible be investigated, tried and punished; that the persecution of members of the Roman Catholic Church be halted.

In a news conference on 7 November 1979, junta member Dr. Guillermo Ungo (who resigned on 3 January 1980) said that ORDEN had been a part of "the repressive machinery" and that a staff of 40 people had directed ORDEN from offices in the Presidential Palace, although ORDEN "had neither statutes nor legal status, that is to say that legally it did not exist". Although a decree of 6 November ordered ORDEN to be dissolved, it continued to be a principal auxiliary of lawful security forces. Local ORDEN personnel were named in innumerable reports since November 1979 as having assisted security forces in identifying suspected "subversives" and in their detention and murder of these individuals. No concrete measures were taken to dismantle the ORDEN organization nor to break the relationship between the police and military and ORDEN. No arms were confiscated from the tens of thousands of ORDEN members nor was any member reported arrested for abuses of human rights.

The plight of the *campesinos* clearly worsened after 3 January 1980. Amnesty International emphasized that at the time of the Commission's own 1978 report and thereafter the authorities continued to regard *campesino* organizations as "subversive" and to subject them to the same repression as members of avowedly violent guerrilla groups.

The submission noted that a Special Commission of Inquiry, created by the junta in November 1979 to investigate the whereabouts of political prisoners and the "disappeared", reported the discovery of 67 unidentified bodies and identified 25 bodies of the "disappeared". The Special Commission recommended that trial proceedings be opened against the individual military officers who it claimed had been responsible for the human rights abuses. In its final report on 3 January 1980, the Special Commission stated that although none of the "disappeared" had been found alive it had acquired "proof of the capture of many of them, by various public security forces, or in several cases, of their detention in the barracks of the same forces. . . . We have found a great quantity of cadavers, among which those that have been identified correspond to disappeared persons . . .".

The junta's Special Commission concluded that all the individuals who "disappeared" under the Romero and previous governments should be considered to have died in the custody of security forces. The Amnesty International submission, while not disputing the findings of the junta's Special Commission, noted that the government had taken no steps to bring to justice individuals named by the Special Commission as responsible for torture and murder of prisoners.

Amnesty International recommended that the threat to dignitaries of the Roman Catholic Church should be understood within the larger context of the threat to all organizations and individuals who conscientiously monitor and report on human rights; and that all such organizations and individuals should be protected from threats of this kind. The submission called special attention to the threats against the person of Archbishop Romero, members of the *Socorro Juridico*, Legal Aid, department of the Archbishopric of San Salvador, the Salvadorian Commission of Justice and Peace and the Salvadorian Human Rights Commission.

Many individual appeals were made on behalf of members of trade union and political opposition groups. In several cases the authorities at first denied the arrests, notably those of Juan Angel Chacon, Secretary General of the Popular Revolutionary Bloc (BPR), detained with his wife and baby on 27 February, and Enrique Alvarez Cordova, Secretary General of the Frente Democratico Revolucionario, the Revolutionary Democratic Front (which brings together most opposition groups from the BPR to social democrats), detained on 21 April. National Police later acknowledged custody of these prisoners and released them after mass protests. Amnesty International appealed for the safety of a "disappeared" prisoner, Norma Guevara, Youth Secretary of the Union Democratica Nacionalista (UDN), the Democratic Na-

tionalist Union, who "disappeared" after arrest by the National Police. While police denied the arrest, the army-linked "death squad" Union Guerrera Blanca (UGB), the White Warrior's Union, said Norma Guevara was in their custody and would be "executed" if hostages then held by an opposition group were not released. On 26 February police admitted that they were holding her. She was subsequently released for lack of evidence.

A total of 44 cases of "disappeared" prisoners having been investigated by Amnesty International groups since 1977 were closed in February 1980 when it became evident that these "disappeared" had been killed.

On 30 November 1979 El Salvador ratified the United Nations International Covenants on Economic, Social and Cultural Rights and on Civil and Political Rights.

GRENADA

In March 1979, after the overthrow of the government of Eric Gairy, many ministers, officials and supporters of the previous government were arrested and held without charge or trial, some for more than a year. Amnesty International first expressed concern about these detentions to the new Prime Minister, Maurice Bishop, in April 1979. Further appeals were made in July and August 1979. More arrests took place in October and November 1979 of people alleged by the government to be plotting its overthrow. Amnesty International wrote to Maurice Bishop: "Our concern is that all those who are at present detained, including those recently arrested and accused of intending the violent overthrow of the government, should be given a fair and public trial".

On 26 November 1979 Amnesty International informed Maurice Bishop that it had received allegations that some detainees had been subjected to ill-treatment. A reply received from the Prime Minister's Office stated that: ". . . any allegation of ill-treatment of any detainee is entirely false".

In March 1980 Amnesty International again raised the subject of the detainees with Maurice Bishop and urged him that ". . . in the interests of human rights, all those people at present detained should be charged with specific offences or released".

Cases of detainees have been reviewed at intervals by special tribunals established for this purpose, but these hearings have been held in camera and detainees have not been allowed legal representation. Releases have taken place from time to time. On 15 December 1979 the Grenada Newsletter, a local publication, estimated the number of detainees to be 77 but said that the figure was provisional. On 31 December 1979 the same publication announced the release of 37 detainees during December and on 29 March 1980 reported a further 13 releases. According to information given to Amnesty International by the Grenada Council for Human Rights, there were 56 people detained in April 1980.

In November 1979 Amnesty International wrote to Maurice Bishop appealing for commutation of the death sentence passed on Septimus Gilbert, convicted of murder.

THREE CATHOLIC AGENCIES URGE AN END OF MILITARY ASSISTANCE TO EL SALVADOR

WASHINGTON.—Three Church agencies have issued a joint statement calling for the termination of all military aid to El Salvador and for new efforts to facilitate a negotiated political solution to the conflict there.

The statement expressed solidarity with the Bishops of El Salvador who have said that a political solution is preferable to the fratricidal conflict in that Central American country.

The joint statement, linked to the coming anniversary (March 24) of the assassination of Archbishop Oscar Romero of San Salvador, was issued by the Conference of Major Superiors of Men, the Leadership Conference of Women Religious, and the United States Catholic Conference, the national level action agency of the Church in the United States.

The three groups recalled that shortly before his death Archbishop Romero sent a "prophetic" letter to President Carter asking for a guarantee that the United States would not "intervene with military, economic, diplomatic or other pressures to determine the destiny of the Salvadoran people."

"Since that time the Catholic Church and other major religious communities in the United States have consistently opposed any American military involvement in the El Salvadoran conflict," the statement noted.

"In light of this position," it continued, "we found profoundly disturbing the decisions taken in the last two months to renew military aid to the Salvadoran Junta, to increase this aid through the delivery of weapons and ammunition, and finally, to propose even more significant increases for the future."

"Our judgment in this matter is not an endorsement of other political forces in El Salvador," the church agencies said. "We remain convinced, however, that the provision of military assistance by the United States to the Junta has three negative consequences: it identifies the United States, at least symbolically, with the repressive role of the security forces whose actions have been consistently criticized by the Church in El Salvador; it increases the risk of wider military intervention; and it jeopardizes a constructive role the United States might play in the conflict."

The full text of the statement is attached.

"JOINT STATEMENT OF THE USCC-CMSM-LCWR ON EL SALVADOR

"As we approach the anniversary of Archbishop Romero's assassination, we recall his prophetic letter to President Carter of February 17, 1980, asking for a guarantee that the United States would not 'intervene with military economic, diplomatic or other pressures to determine the destiny of the Salvadoran people.' Since that time the Catholic Church and other major religious communities in the United States have consistently opposed any American military involvement in the El Salvadoran conflict.

"In light of this position we found profoundly disturbing the decisions taken in the last two months to renew military aid to the Salvadoran Junta, to increase this aid through the delivery of weapons and ammunition, and finally, to propose even more significant increases for the future.

"We are aware that the conflict in El Salvador is complex in its roots and requires continuing analysis. We have supported the assessment of Bishop Rivera y Damas that the principal responsibility for violence rests with the Junta. Our judgment in this matter is not an endorsement of other political forces in El Salvador. We remain convinced, however, that the provision of military assistance by the United States to the Junta has three negative consequences: it identifies the United States, at least symbolically, with the repressive role of the security forces whose actions have been consistently criticized by the Church in El Salvador; it increases the risk of wider military intervention; and it jeopardizes a constructive role the United States might play in the conflict.

"We join with Bishop Rivera y Damas and the Bishops of El Salvador in expressing our belief that a political solution is both possible and preferable to the continued fratricidal conflict in El Salvador.

"We use the anniversary of Archbishop Romero's death to call again, in the name of the Bishops and Religious Communities of the United States, for the termination of all military aid to El Salvador and for new efforts to facilitate a negotiated political solution to the conflict."

TESTIMONY OF MOST REV. JAMES A. HICKEY FOR THE UNITED STATES CATHOLIC CONFERENCE

Mr. Chairman and Members of the Committee:

I am Archbishop James A. Hickey, Archbishop of Washington. I testify today in the name of the U.S. Catholic Conference (USCC), the agency which represents the Catholic Bishops of the United States in issues of public policy. I am accompanied today by Father J. Bryan Hehir and Mr. Thomas E. Quigley of the USCC staff. I wish at the outset to express, Mr. Chairman, my personal appreciation and that of the USCC for this opportunity to present our views on the situation in El Salvador and the relationship of U.S. policy to that conflict.

In introducing this testimony, I stress that I come before this Subcommittee as a pastor. The Church's concern for any events in the political or economic order is rooted in its concern for the human person. It is what happens to people, especially the poor, which is the focus of the Church's attention as it speaks to questions of public policy, domestic or foreign. On this basis, the Catholic Bishops in the United States have spoken often to the El Salvador question, precisely because of the impact which U.S. policy has on the lives of large numbers of the poor and oppressed in El Salvador. In addition to this general concern which I share with my fellow bishops in the United States, I have had a personal connection with the situation in El Salvador from my six years as the Bishop of Cleveland. That diocese has a pastoral team in El Salvador. I maintained regular contact with them, visited them often, talked with the Church leaders in El Salvador, came to know the people and their country. Two of the missionaries who were slain, Sr. Dorothy Kazel and Miss Jean Donovan, served there at my request and direction. In consequence I speak from personal acquaintance with the work of the Church in El Salvador especially as it took shape under the leadership of Archbishop Romero, who was assassinated a year ago this month.

I. AN HISTORICAL PERSPECTIVE

I want to stress the value of an historical perspective for the debate regarding the present conflict in El Salvador. Couched largely in terms of "super-power politics" the current discussion seems to forget that for a long time the people of El Salvador have been struggling for social justice and for participation in the life of their society. The conflict which now captures our attention has been going on, admittedly in less visible and less noteworthy terms, for decades. We need perhaps to reflect on the infamous massacre of the campesinos in 1932. The nature of the conflict in El Salvador is a perduring one. My point is that long before there were charges of outside intervention there was a struggle on behalf of large numbers in El Salvador for social, political and economic change. The conflict has been over land, wages, the right to organize and the issue of political participation. To ignore this long struggle of a people for justice, dignity and freedom is to misunderstand the nature of the conflict today in El Salvador.

As a Catholic bishop, I wish to stress that a specific dimension of the El Salvador situation requires attention: the role of the Church. Here again historical perspective is crucial. To understand the role that the Church in El Salvador is playing today, we must see its pastoral decision to give special attention to the poor. This it did in the light of the teachings of the Second Vatican Council, of the Medellin (1968) and Puebla (1979) Conferences of the Latin American Bishops and of the teaching of Pope John

Paul II. The changing posture of the Church in Latin America in the last fifteen years, from a socially conservative position to that of the leading voice for reform and social change, can be traced to the experience and teaching of Vatican II. It was the Council which called the Church to stand as the sign and safeguard of the dignity of the human person (Guadium et Spes, Number 76). It was the Council which called the Church to see in "the signs of the times" an invitation to witness to the Gospel. The Church in Latin America responded to the conciliar call in a systematic and prophetic fashion. Through the Medellin Conference and the Puebla Conference it outlined a pastoral plan of evangelization which includes the defense of human dignity and the promotion of human rights as essential elements.

The Church in El Salvador exemplifies this larger movement of the Church in Latin America. Under the pastoral leadership of Archbishop Romero and of Bishop Rivera y Damas it has followed the imperative of the Puebla Conference, "to make an option for the poor" and it has brought it about that the Church is intimately joined to the struggle of the people of El Salvador for social justice and social reform. Catechists, members of the communidades de base (Christian family groupings) together with other laity and clergy have taken to hear the Gospel message and have tried to live it genuinely in all facets of their lives. From a truly spiritual perspective they have tried to introduce Christian principles to farming, business and government. For attempting this renewed Christianization of their country they have been called communists, subversives; and they have suffered persecution, even death for the Gospel. An archbishop, eleven priests, thousands of lay people and now four American missionaries are dead in that effort.

At the same time, in fulfilling this ministry, the Church of El Salvador has drawn support from the words of Pope John Paul II. His recent statements in the Philippines about the right of workers to share in the fruits of their labor apply with striking similarity to the situation in El Salvador. Equally applicable is the forceful statement of the Holy Father that, "Even in exceptional situations that may at times arise, one can never justify any violation of the fundamental dignity of the human person or of the basic rights that safeguard this dignity." The Church's ministry in El Salvador and throughout Latin America since Medellin has been at the service of human dignity and human rights. It is my conviction that one cannot understand the role of the Church in El Salvador today apart from these themes. Furthermore, one cannot understand the situation in El Salvador apart from the Church and its ministry.

II. FROM HISTORY TO PERSPECTIVES ON POLICY

A sense of the social and religious history of the Salvadoran struggle for justice shapes my views on the present policy debate in the United States about El Salvador.

I share the apprehensions expressed last week by the United States Catholic Conference in testimony before the Foreign Operations Subcommittee of the House Appropriations Committee. Our mutual concerns are based on the way the El Salvador conflict has come to be seen, principally in the last few weeks, as a United States-Soviet or United States-Cuba test of will and strategy. While not denying that an international dimension of the conflict exists, we are very concerned that the internal quest for justice by the people of El Salvador receive due and proper regard in the policy debate of the United States. We can never achieve world-wide justice and peace by failing to recognize and support the efforts for justice and peace in the single nation of El Salvador.

It would be particularly unfortunate, in my view, if our necessary and proper concern for the security of the United States were to be used as justification for additional United States military aid to the present government in El Salvador. Neither the USCC nor I am complacent about the actions of other outside powers in the El Salvador conflict. To quote the USCC testimony, we find "the involvement of the Soviet Union (and other Eastern bloc nations) on its own or through Cuban cooperation, in the internal struggles of Central America, is unwarranted, unhelpful and ultimately unacceptable behavior on the part of a superpower". Our position is to oppose military aid and intervention from all outside powers. We urge and support political pressure and other diplomatic measures by Latin American nations and by ourselves and our allies to stop the flow of arms from Cuba through Nicaragua to El Salvador. But as a part of this approach we earnestly and vigorously oppose the sending of United States military assistance to El Salvador.

Our opposition to military aid has been based on the conviction that such aid associates the United States with the actions of the security forces which, in our view, still remain uncontrolled. A further reason for opposing military aid at this time is the danger of so strengthening the power of the military that the ever-present possibility of a rightist coup would be increased. This, in my judgment, would in turn provoke reversal of the land reforms and an increased repression of the people that could result in a civil war of immense proportions. The United States should not be associated with such a chain of events.

In the long term no nation can be kept from freedom, from the exercise of human dignity or from the use of its land by force of arms. And in that same long term our American government should be remembered, not as the supplier of arms used to kill the people, but as a government that stood for the dignity and integrity of the human person and the free exercise of God-given rights. This is our American heritage and tradition!

A particularly ominous development of recent policy is the introduction of more United States military advisers into El Salvador. I find the move risky to the point of being reckless. It confirms the worst suspicions of Latin Americans that we are slowly preparing for an invasion of El Salvador. It could be used by unfriendly powers to justify similar actions. It will increase the volatility and symbolic significance of the conflict for us if any United States military personnel are injured or killed. I am particularly concerned that the sending of any American military personnel commits the United States to the conflict in a way which is difficult to reverse. Furthermore, it is my understanding that since United States law prohibits the training of the Treasury (hacienda) police or other internal police forces of a foreign power, our advisers may not be in a position to remedy those elements of the Salvadoran security forces most in need of restraint.

The problem in El Salvador is rooted in the need for political and economic reform within the country. United States diplomacy should be aimed at producing such reforms; military aid, in my view, mortgages our potential to do this.

III. PROPOSALS FOR POLICY

To promote the absolutely necessary reforms within El Salvador will require United States diplomatic pressure, but also continuing amounts of United States economic assistance. I realize we are now sending much assistance to the Salvadoran government. In distinction from its position on military aid, the USCC does not oppose economic aid, it encourages it. I wish to add a strong personal plea for an increased United States effort to provide emergency aid for El Salvador for long-term development assistance that will benefit the common working man and woman. There are specific needs of the moment—from aid for the refugees left homeless when their homes and villages are destroyed by military action, to the replacement of bridges and power stations destroyed by guerrilla action, to necessary medical supplies. This kind of aid, rather than more equipment for the security forces, is what the United States should be contributing to the situation.

On the diplomatic front, there is a notable silence in our American policy with regard to fostering that kind of political dialogue in El Salvador which a basic resolution of the conflict will require. I realize the complexity of this topic at the moment; the efforts of West Germany testify to the difficulty of serving as catalyst for political discussions. Yet I am not satisfied that it is sufficient to say that the Church in El Salvador has offered to mediate and that the Salvadoran Government has, in principle, agreed, that it is the left which refuses to negotiate. I believe that there are ways in which approaches can be made to the various elements which form the opposition to the present government in El Salvador. I believe that options are open to our government to encourage that dialogue between all parties which is so necessary for a true and lasting peace. The United States voice at a political level is a unique one; in collaboration with other key nations we may be able to open channels of communication which move the civil strife from the fields and homes of the campesinos into the political process.

Finally, I wish to address a topic which is of the highest concern to the Church in the United States: the investigation of the murders of our four American missionaries. In that connection I add also the murder of the three labor leaders, two of whom were American citizens. Without entering into the details of the investigations, I simply want to cite the degree of doubt and suspicion in church circles here and in El Salvador with regard to the nature and pace of the investigation. Furthermore, I wish to express the concern we have that the progress and outcome of the murder of the churchwomen has been divorced from other aspects of United States policy. In December we understood that the seriousness of the investigation would be taken by the United States Government as one important sign of the commitment of the Junta to discipline the security forces. In recent weeks we find little or no stress, at the level of United States policy, on the connection between the progress on the investigations and United States aid to the Salvadoran Government. The missionaries are important to us because they gave their lives in the service of the poor and of the Gospel. However, they are also important because their deaths, like those of the labor leaders, remind us of the thousands of ordinary Salvadorans who have been murdered, principally from the political right, and whose deaths have gone unrequited. The Church in the United States will not forget what the missionaries have done; we will not let this issue rest unresolved.

I close, Mr. Chairman, where I began: with a plea for a perspective on the tragic conflict in El Salvador. The pressure of the present debate should not move the United States down a road which both we and the Salvadoran people will regret. The conflict there has deep roots; it reaches into the life of a people too long denied the fruits of their labor, too long denied meaningful participation in the life of their society. The United States response should address the roots of the conflict: it is not principally a matter of guns but of justice. My prayer is that

our government will be of assistance in achieving a political solution in El Salvador, a solution based on justice, charity and a full recognition of the dignity of the human persons involved.

COUNTRY REPORTS ON HUMAN RIGHTS PRACTICES

(Report submitted to the Committee on Foreign Relations, U.S. Senate and Committee on Foreign Affairs, U.S. House of Representatives by the Department of State)

EL SALVADOR

El Salvador has long been dominated by powerful elites who ruled through the security forces. The elites' power rested in large landholdings and in the control of banking and the export of staple crops for their benefit. Faced with increasing demands for social change in the 1970s, traditional ruling groups continued their dominance by employing electoral fraud and repression. In the 1970's some political forces which were previously moderate, joined the radical left. The late 70's witnessed the emergence of an armed radical left. On October 15, 1979, a group of progressive military officers overthrew the regime of General Humberto Romero and created a civilian-military governing coalition called the Revolutionary Governing Junta (JRG).

That Junta faced a highly polarized society in which the political process was discredited and a sizeable minority on both left and right employed violence to achieve their political ends. On the right, the Broad Nationalist Front (FAN) became the main force, and its supporters soon spawned death squads, most notably the Maximilliano Hernandez Martinez Brigade. The major leftist armed groups were wedded into first the United Revolutionary Directorate (DRU), and then the Farabundo Marti National Liberation Front (FMLN), while their political front groups together with some more democratically oriented organizations, formed the Democratic Revolutionary Front (FDR). The Marxist-oriented FMLN/DRU, however, controls the FDR.

Unable to act effectively and frustrated by their own inability to agree on promised reforms and to control the security forces, the civilian members of the first post-October 15 government resigned after ten weeks. The military members of the Junta then reached an agreement with the Christian Democratic Party to form a new government. In spite of coup attempts from the extreme right, guerrilla warfare from the radical left, and terrorism from all sides, this second Junta undertook a far-reaching socioeconomic reform program in March. Those reforms nationalized large estates, the export of staple crops, and the financial institutions.

Alarmed by reforms which attack the very basis of their domination, the armed extreme right has declared its intention to bring down the government and re-establish the old order through violence perpetrated by its supporters, some of whom are members of the security forces only nominally under the control of the Junta. The armed left has rejected the reforms and also declared its intention to bring down the revolutionary government through violence in order to establish a Marxist state in El Salvador.

The result of these contending force has been a vicious cycle of provocation, outrage, and revenge which leaves a daily toll of murdered and often mutilated bodies on El Salvador's streets and highways. The Church has condemned the violence of left, right, and the security forces, affirming that the nation has reached the point where respect for human life no longer exists. Church institutions have been attacked and several clergy murdered, including the Archbishop of El Salvador, Oscar Romero, who many suspect to be a victim of the extreme right. An offer to mediate made by the Salvadoran Bishop's Council has been accepted by the Junta in principle, but refused by the FDR and FMLN.

About 9000 persons have been killed in 1980. Killings and terrorist acts are the work of both leftist "Democratic Front" forces who often claims responsibility for them, and of rightist elements with whom some members of the official security organizations are associated. Sometimes the extreme right claim responsibility as was the case in the murders of the five leaders of the FDR. Both right and left wing violence is reported to have increased in the last months of the year, during which time four American Churchwomen were brutally murdered. Many persons are also murdered by non-political groups or individuals. Death squads and other rightist terrorist groups which include present or retired members of the military or police have claimed that they have murdered suspected delinquents and leftist subversives.

The government has been unable to end such abuses. About 1400 enlisted men reportedly have been cashiered from the military for various abuses over the past year, but there are indications that some of these men have been recruited subsequently into rightist terrorist squads. Government forces have broken up few right-wing groups, mostly because the right does not attack the security forces. Terrorist activity and army sweeps into areas of guerrilla concentrations have produced roughly 62,000 internal refugees.

The government's efforts to control violence have included the invocation in March of a constitutional provision suspending the rights of free entry and exit from El Salvador, the right to inviolability of communications and the right freely to express and circulate opinions. The latter restriction has been limited to prohibiting political advertising by extremist groups to perpetrate kidnapping or ransom demands. Following a politically inspired strike which blacked out much of the country for twenty-four hours in August 1980, the government declared a state of emergency which placed the workers of four semi-public companies (the electrical, water, and telephone companies and the port authority) under military control. These provisions remain in effect.

1. Respect for the Integrity of the Person, Including Freedom from:

a. Torture:

Article 165, paragraph 2 of the 1952 Constitution prohibits "all kinds of torture." However, terrorists of both the right and left have used torture to gain information and to intimidate their opponents. Bodies bearing burns or numerous wounds frequently appear along the highways. Despite governmental policy against using torture, the history of the security forces suggests the involvement of some of its members in unsolved crimes of murder with torture. Some members of leftist groups who have been captured by government forces have alleged after their release that they were beaten, scarred with acid, or subjected to electric shock during interrogations.

b. Cruel, Inhuman or Degrading Treatment or Punishment:

Complaints of physical punishments or brutal treatment in prisons are not commonly made against the government. Detention facilities are overcrowded and inadequate, reflecting El Salvador's low standard of living. Prisoners are allowed visits from family members and their attorneys. Delegates from the International Committee of the Red Cross (ICRC) visit detainees held in security detention centers, military facilities or civilian jails. The ICRC also provides assistance to displaced persons.

Summary executions are common. Confrontations between the military/security forces and guerrilla bands rarely result in the taking of prisoners by either side. There are reports of military/security forces arriving in villages with lists of suspected terrorists and guerrillas and shooting those named on the spot. The radical left regularly publishes communiques claiming credit for similar executions of suspected enemies. The far left claimed that government forces were responsible for the massacres of hundreds of peasants at Rio Sumpul near the Honduran border. This allegation has been refuted by impartial observers.

Armed leftists are responsible for a large number of kidnappings for ransom and murders of government officials, diplomats, landowners, members of a now proscribed rightist para-military group and suspected informers. The guerrilla bands' tactics of join-us-or-die have caused tens of thousands of persons to flee their homes in rural areas, as have the armed rightists' efforts to disrupt the agrarian reform program or exact vengeance on leftists. Security forces have at times supported such rightist actions. Members of the clergy, students, teachers, businessmen, and political leaders have been victims of extreme right violence.

Estimates of the number of political killings in El Salvador vary widely. In early October the Apostolic Administrator stated that 4,730 persons had died in incidents of political violence during the first nine months of 1980. This figure appeared to be accurate, but by year's end the more accepted figure was 9,000, along with claims that violence from the right and security forces was increasing in November and December.

c. Disappearances:

The Apostolic Administrator also estimated that 269 persons had disappeared after last being seen in the custody of the security forces. No other figures on disappearances are available. The government has denied any connection with these disappearances.

d. Arbitrary Arrest and Imprisonment:

El Salvador's judicial system does not function effectively when politically-motivated crimes are brought before it, and no serious attempts have been made to use the judiciary to control the political violence. No matter how strong the evidence against them, those of the right and left charged with crimes of violence, including leaders of terrorist groups, are regularly released by intimidated courts. The irrelevance of the judicial system has encouraged elements of the security forces to ignore it and to dispense their own brand of justice.

Under Salvadoran law, a person can be arrested and legally held without charge for up to seventy-two hours. There are now about fifty cases of persons who have been charged, but have spent months awaiting trial. Most are members of armed leftist groups arrested during raids or routine searches for arms or propaganda.

e. Denial of Fair Public Trial:

The judiciary is slow and overburdened. After arraignment, long delays usually occur before trial. Trials are public and courts are believed to operate fairly and independently in non-political cases.

F. Invasion of the Home:

Forced entry is regularly practiced by terrorist groups of the right and left and by the security forces.

2. Government Policy Relating to Fulfillment of Such Vital Needs as Food, Shelter, Health Care, Employment and Education:

El Salvador is a largely agricultural nation. It has a population of roughly 4.5 million living in an area 8,300 sq. miles. It faces the problems of a large semi-skilled workforce, a population density of nearly 330 persons per square kilometer of arable land, and a negative growth rate of its gross domestic product. That negative growth rate, which

may reach from six to nine percent this year, spells economic hard times for a population which had a per capita GDP of only $560 in 1979 (in 1976 dollars), and is directly attributable to the political strife which has engulfed the nation since 1978. Balance of payments problems have seriously reduced the nation's international reserves. Unemployment and under-employment affect roughly 50 percent of the workforce. As the government has continued to repay old loans and found it difficult to obtain new ones, its foreign exchange position has also deteriorated—in spite of its low level of public external debt (only 10.9 percent of GDP) and external debt service (only 3.8 percent of exports).

Historically, wealth has been concentrated in the hands of a few. Although 57 percent of El Salvador's labor force works in agriculture, until March 1980, 20 percent of the country's farmland was concentrated in 2.6 farms, and only 5 percent of the arable land was in the smallest 50 percent of farms. The same families which dominated agriculture also dominated banking, agricultural processing plants, insurance companies, and export concerns. The new revolutionary government attacked its economic problems and its political problems at once with a massive reform program which has undertaken to redistribute land and has nationalized the banking industry and the exporting of staple crops.

Income distribution in El Salvador has been significantly skewed toward the rich; the wealthiest 5 percent of the population accounts for 21.4 percent of national income, while the poorest half of the population receives 17.9 percent (1976 figures). Most Salvadorans live within ten kilometers of a health clinic and are relatively unthreatened by such diseases as measles, tuberculosis, and diphtheria. However, health care remains a problem. Infant mortality in rural areas exceeds one in ten. Life expectancy in rural areas at birth is 54 years compared to 59 for the country as a whole. Nearly 20 percent of medically certified deaths are due to dysentary and respiratory illnesses. Approximately 25 percent of the rural populace has access to safe water, and only 17 percent has adequate means of waste disposal. Existing Ministry of Health services generally are overcrowded and poorly administered. About 67 percent of the adult population is literate, with about the same percentage of 9–15 year-olds attending schools. Current net growth rate of the population is probably around 2.6 percent (compared with a natural growth rate of 3.3 percent) due to violent deaths and increased emigration. Patterns of migration inside the country have been dramatically altered by the violence—with roughly 62,000 refugees displaced from their homes. The re-distribution of land by the agrarian reform might slow the movement from countryside to city slightly.

Traditionally, El Salvador has strongly supported property rights, and the agrarian reform recognizes those rights in its proposals to repay former owners and to provide titles to the beneficiaries of redistribution. Some of the larger farms are held cooperatively. The first phase of the agrarian reform has converted almost all farms of over 500 hectares into cooperatives made up of the families which worked them. Another phase grants ownership of up to 17 acres of land to each farmer who cultivated it as a tenant farmer or sharecropper. These two phases of agrarian reform are benefiting about 225,000 rural families. Due to bureaucratic delays, and the magnitude of the task, the government has been slow to issue titles to the new owners. Lack of titles is causing problems as many families do not live on the land they farm. A third and controversial phase of the agrarian reform, dealing with the redistribution of 125 to 500 hectare farms, was to have been implemented in 1980. This phase involves the most difficult divisions of land, and is still under consideration. The reform program faces continuing problems of economic support as well as attacks from right and left. Compensation of former owners has also been slow, with the government only beginning to distribute the thirty-year bonds with which it will pay for the land.

The government entered the foreign commerce and banking sectors to lessen elitist control of the nation's credit institutions, provide sufficient local credit to fund the reforms, and to prevent massive capital flight. Although most management officials have retained their positions, the banking system is now administered by the Central Bank. Credit is rationed and concessionary credits are awarded to projects according to government objectives. Similarly, the foreign commerce sector was nationalized in order to limit imports, prevent massive manipulation of exports earnings by individuals, and control capital flows during this crucial period of reform.

The government has adopted some emergency measures to smooth the transition period and maintain employment levels. These include: public works projects, housing and construction projects, and assistance to marginal communities. Political and economic turbulence, plus an already skyrocketing government budget, has forced reductions in these program goals.

3. Respect for Civil and Political Freedom, Including:

a. Freedom of Speech, Press, Religion and Assembly:

The government invoked a constitutional provision in March which allows it to limit the free expression and circulation of opinions, but has applied the limitation specifically to prohibit ads placed by extremist groups that seek to inflame public opinion or issue terrorist demands. In practice, freedom of speech and the press are limited, not by governmental action, but by fear of retribution from rightist and leftist terrorists. The Catholic hierarchy's radio station "YSAX" has twice been destroyed by bombs. Two leftist newspapers have been bombed, and employees of each have been murdered by right wing terrorists. One was driven out of business, but the other continues to publish in a reduced format. An editor of a rightist newspaper was badly wounded during an assassination attempt for which the left claimed credit. The activities and pronouncements of the leftist opposition groups are covered in the major newspapers as news stories.

Freedom of assembly is guaranteed by the constitution and limited only by fear of terrorism. Freedom of religion also is guaranteed and no complaints of its abridgement have been raised. Politically activist Catholic priests—including Archbishop Oscar Romero—and a number of protestant pastors have been assassinated by extremists. In December, four American Catholic women, three of them nuns, were murdered in El Salvador. A special Salvadoran commission is currently investigating these murders. A U.S. mission reported circumstantial evidence of possible security force involvement.

Although the government's expressed attitude toward labor unions is positive, trade unions have difficulty in operating in the midst of the violence. A number of trade union leaders were killed. Some of these were involved in leftist political activities; others were centrists or tried to remain politically neutral. Both rightists and radical leftists have been accused in these incidents. Some union leaders who have attempted to withdraw from leftist groups have been killed and others threatened, presumably by their erstwhile collaborators. A reform of the labor code which will facilitate strikes and strengthen workers' rights is under discussion. During 1980, workers concentrated more on preserving jobs in a declining economy than on expanding economic benefits. The union of workers in the state-owned electric power generation company was dissolved and its leaders arrested in August after they had blacked out most of the country for twenty-four hours in a politically motivated strike, and had staged an armed occupation of power plants.

B. Freedom of Movement Within the Country, Foreign Travel, Emigration and Repatriation:

The constitutional provision which guarantees the rights freely to enter and leave El Salvador and to reside where one wishes, and prohibitions against expatriation, has been formally suspended, but with no discernible effects. In theory, freedom of movement within the country is not restricted; in practice, it is restricted by the fighting. Foreign travel and emigration are limited only by bureaucratic delays and the expense involved.

A number of opposition political leaders are currently residing outside of El Salvador, but they appear to be doing so for fear of their lives, rather than the government's unwillingness to let them return. Fear of violence has also caused large numbers of Salvadorans to emigrate. There are no refugee groups from other countries currently in El Salvador. Those who have sought asylum in embassies within El Salvador—often by force of arms—have been allowed to depart the country freely.

c. Freedom to Participate in the Political Process:

It is government policy to open the political process and to encourage the formation of political parties and groups willing to participate in it. On October 15, 1980, the government offered amnesty to its opponents and scheduled elections for a constituent assembly in 1982, and pledged to hand over power to a popularly elected government by no later than mid-1983. However, the government's radical right and left opponents have to date refused to consider participation in a political process—preferring to try to overwhelm the government by force.

Women have legal equality with men, but social restraints often limit their practical possibilities. They do hold some important positions in the professions, political parties, and in the government, as well as in more traditional jobs in factories, offices, schools, and homes.

4. Government Attitude and Record Regarding International and Non-governmental Investigation of Alleged Violations of Human Rights:

The issue of human rights investigations in El Salvador is complicated by the participation of the local human rights organization in political activities. The Salvadoran Human Rights Commission (CDHES) has several members who represent extreme leftist groups. Its publications call for the overthrow of the present government. The political organization (FDR) which serves as public front for the leftist guerrilla groups holds press conferences at CDHES headquarters. A member of the Commission was kidnapped and assassinated by unidentified assailants in October.

The government has invited the Inter-American Commission on Human Rights to make a second visit to El Salvador. The visit is expected some time in February or March of 1981. Many representatives of human rights groups visited El Salvador during the past year and made extensive reports.

● Mr. TSONGAS. Mr. President, I am pleased to join with my colleague, Senator KENNEDY, as a cosponsor of his bill to cut off American military assistance to El Salvador.

The bill is a conditional termination of military assistance. If the President determines that certain conditions have been met and the Congress concur with that determination by a concurrent resolution, then assistance may be resumed by the President.

The objectives of this bill go beyond a cutoff of military aid. The central concerns are to encourage a negotiated solution to the conflict in El Salvador, and to end the campaign of terror launched by groups acting with the knowledge, consent, or encouragement of the Government. The murders of three American nuns and one religious lay person are a tragic instance of this pattern. The perpetrators of this crime must be brought to justice.

There is no denying the interference of east bloc actors in this civil war. That interference must be stopped. We must not neglect, however, our own strategy for a stable, democratic outcome in El Salvador.

We all know from experience that to mount an effective counterinsurgency effort, the Government of El Salvador will require much more than armaments; it will require a strong, political base, drawing on wide popular support. This cannot be achieved without economic and political reform. Some of those reforms are underway and others need to be pursued vigorously. Reforms, however, will be ineffective and undercut if the Government remains complicit with murder and terror. A sound political base cannot be constructed on a foundation of murder and assassination.

If the United States is to avoid a Central American quagmire, these concerns must be met. Senator KENNEDY's bill is the logical vehicle with which to pursue our vital interests in El Salvador.●

By Mr. CHILES:

S. 729. A bill to amend section 8e of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to subject imported tomatoes to restrictions comparable to those applicable to domestic tomatoes; to the Committee on Agriculture, Nutrition, and Forestry.

RESTRICTIONS ON IMPORTED TOMATOES

● Mr. CHILES. Mr. President, I am introducing today legislation to amend section 8e of the Agricultural Marketing Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, to require that imported tomatoes conform with pack-of-container standards imposed on domestic tomatoes under marketing orders.

This legislation seeks to clarify section 8e with respect to the requirements imposed under marketing orders on the pack of the container in which tomatoes are shipped. This amendment is entirely consistent with the original intent of section 8e and is offered only to revise an interpretation of that section which the U.S. Department of Agriculture has adopted. The resolution of the current disagreement between domestic producers and the Department on this issue is important to an orderly marketing situation for tomatoes and to the ability of domestic producers to effectively compete with imports.

The original purpose of section 8e of the act was to require that all restrictions imposed by marketing orders on the handling of domestically grown agricultural commodities should apply equally to imported commodities. Section 8e was intended to insure that market regulations would have equal benefit to both domestic and foreign producers. It is in no way aimed at excluding or curtailing imports. Rather, its aim is to put imports and domestic produce on an equal footing with respect to marketing orders. In the case of tomatoes, the Senate report accompanying the act states—

> Imports of tomatoes . . . would be prohibited if they did not comply with grade, size, quality, and maturity provisions of all marketing orders applicable to the same commodities produced in the United States.

By marketing order, domestic producers of fresh tomatoes are prohibited from mixing different grades of tomatoes in a shipping container, or mixing different sizes of tomatoes. Since tomatoes are sold by grade and size, this requirement is very important from the standpoint of pricing and to the orderly marketing of fresh tomatoes.

However, the Department of Agriculture maintains that the prohibition against the mixing of grades or sizes within a container is not a grade or size regulation, but a pack regulation. The Department further maintains that pack regulations cannot be imposed on imports under section 8e of the Agricultural Marketing Agreement Act.

As a result of the Department's interpretation, foreign shippers are permitted to ship different grades and sizes of tomatoes in a single container, while U.S. producers must comply with the pack regulation. A substantial volume of the tomatoes sold in the United States are foreign grown. Because pack restrictions are not applied to these tomatoes, the buyer does not know what he is getting and the domestic producer is placed at a disadvantage.

I am convinced that the solution to this problem lies in a clarifying amendment to section 8e, which would apply pack regulations to imports. Such a clarification would benefit the grower, shipper, importer, and, ultimately, the consumer of tomatoes. Enactment of this legislation would incur no additional cost to the Government. It would not create hardship for other States or for foreign producers, and would not create a trade barrier. It would standardize the sizes and grades of tomatoes offered for sale in the United States, and equalize the competition between domestic and foreign producers.

Mr. President, I ask unanimous consent that the text of the bill I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 729

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8e of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608e–1), is amended—

(1) by inserting in the first sentence after "eggplants" a comma and "or regulating the pack of any container of tomatoes,";

(2) by inserting in the first sentence after "provisions", each time such word appears, a comma and "and in the case of tomatoes any provisions regulating the pack of any container,"; and

(3) by inserting in the fourth sentence after "classifications" a comma and "and with respect to imported tomatoes such restrictions on the pack of any container,".●

By Mr. HUDDLESTON (for himself, Mr. HELMS, and Mr. COCHRAN):

S. 730. A bill to provide for the use of the funds of the Commodity Credit Corporation in implementing the Federal Crop Insurance Act of 1980; to the Committee on Agriculture, Nutrition, and Forestry.

TRANSFER FROM COMMODITY CREDIT CORPORATION TO FEDERAL CROP INSURANCE

Mr. HUDDLESTON. Mr. President, today I am introducing a bill to authorize the Secretary of Agriculture to use funds of the Commodity Credit Corporation to cover administrative and operating expenses of the Federal Crop Insurance Corporation incurred in fiscal year 1981.

This bill is needed because the Federal Crop Insurance Corporation does not now have sufficient 1981 funding to continue operation of the expanded crop insurance program for farmers authorized by the Federal Crop Insurance Act of 1980.

Although the Department of Agriculture requested funds for expansion of the crop insurance program last year, the request did not reach Congress in time for inclusion in the Agricultural Appropriations Act for fiscal year 1981. However, the Department of Agriculture received permission from the Office of Management and Budget in December 1980 to begin expansion, and requested a supplemental appropriation of $49,200,000 to cover the costs of expansion in fiscal year 1981.

Action has not been taken yet on the supplemental appropriation request, and the Federal Crop Insurance Corporation will exhaust the funds allotted for operating and administrative expenses under the current Appropriations Act by the end of April.

Further, it appears that the Department of Agriculture will not be able administratively to reallocate other funds available to it to meet the corporation's budget emergency.

Congress will have to act to assure that the needed funds are provided in a timely manner.

Therefore, Mr. President, the bill that I am introducing today will authorize the Federal Crop Insurance Corporation, on a majority vote of its board of directors, to request the Secretary of Agriculture to use the funds of the Commodity Credit Corporation to cover crop insurance operating and administrative costs incurred during fiscal year 1981. The Secretary of Agriculture, on receiving such a request, could use up to $49,200,000 of the funds of the Commodity Credit Corporation to cover such costs.

As I understand it, the Commodity Credit Corporation has enough funds available to it now to meet this tem-

porary emergency without adversely affecting the other programs funded by it. However, the legislative authorization provided under this bill is needed before the Commodity Credit Corporation can act.

The $49,200,000 involved has been taken into account by the new administration in its recent review of Government spending in 1981, and has remained a part of the 1981 budget. Thus this bill will not increase the 1981 budget, but will merely facilitate the use of 1981 budget funds when they are needed.

Mr. President, I made a proposal similar to this bill duing the Agriculture Committee markup of S. 509. During the discussion of my proposal, it was argued that my concerns could be handled administratively by the Department of Agriculture so that congressional action would not be needed. And, at that meeting, the Department representative stated that the Department committed itself to making the needed funds available for the crop insurance program by administrative action.

After the committee meeting, I wrote to Secretary Block, asking for more detailed information on the administrative action the Department was taking to obtain the needed funds for the Federal Crop Insurance Corporation. Yesterday, I received a response to my letter from the Deputy Secretary of Agriculture, Richard Lyng. His letter states that the matter cannot be handled administratively, and that additional congressional action will be necessary to provide the required funding.

Thus, the situation now is that all are in agreement that the crop insurance program should be completely funded in 1981, that the money for the program has been budgeted for, and that congressional action is necessary to insure that program funds do not run out at the end of April. This bill will enable Congress to take the action required of it now.

Mr. President, Congress worked long and hard in the 96th Congress to develop a crop insurance bill that would be helpful to farmers and minimize the cost to taxpayers of Federal disaster assistance for U.S. agriculture. The Federal Crop Insurance Act of 1980 met those goals, and the conference report on the 1980 act was approved unanimously by the Senate. However, unless budgeted funds are made available as provided under this bill, the implementation of the 1980 legislation could be seriously jeopardized. Therefore, I urge the Senate to act expeditiously on this bill.

I will advise that the cosponsors are the distinguished Senator from North Carolina (Mr. HELMS) and the distinguished Senator from Mississippi (Mr. COCHRAN).

The PRESIDING OFFICER. Does the Senator wish those Senators to be added as cosponsors?

Mr. HUDDLESTON. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. We had intended to offer an amendment to S. 509 to accomplish this, although it is totally unrelated to the subject of S. 509, but what has happened is that due to the closing moments of the last session of Congress we did not provide adequate funding for the implementation of the crop insurance program.

It is very important that this program be implemented in a timely manner. It is important not only to the farm producers of the country, because of the expanded coverage that they have available to them under a crop insurance program, but it is important to the Federal Government from the standpoint of expenditures because it is intended to replace the disaster payment program that we have at the present time.

We have determined that the best way to provide the funding is through this bill we are introducing at this time, and I am delighted to have the chairman of the Committee on Agriculture join in that effort.

By Mr. GLENN:

S. 731. A bill to provide for an accelerated program of research, development, and demonstration of energy storage technologies to be carried out by the Department of Energy with the support of other Federal agencies, and for other purposes; to the Committee on Governmental Affairs.

ENERGY STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT

● Mr. GLENN. Mr. President, I introduce and send to the desk the Energy Storage Research, Development, and Demonstration Act to correct what I perceive to be a glaring deficiency in our national energy program—a deficiency which has been exacerbated by the administration's revised budget request. The purpose of this bill is to dramatically accelerate our efforts in research, development, and Demonstration Act establishes storage technologies across the board.

The Energy Storage Research, Development, and Demonstration Act establishes national goals for achieving annual fuel substitution and fuel conservation savings of the equivalent of 20 million barrels of oil by 1985 and 750 million barrels of oil by the year 2000 through the use of energy storage technologies.

Energy storage technologies act as bridges or buffers between energy supply systems and energy demand systems. Economic energy storage would have a nearly incalculable impact on our long-term energy supply picture by allowing us to substitute coal and nuclear energy for oil and gas. We could also take advantage of renewable and inexhaustible energy sources such as solar wind, and tidal energy by spreading the supply of these intermittent sources over a 24-hour period. Utilities could use their facilities much more efficiently. The current practice of building baseload electrical capacity to meet rising peak demand is an inefficient and inappropriate use of our scarce financial and technological resources and is a major contributor to the upward spiral of electricity rates.

This legislation will provide support for the entire spectrum of energy storage technologies, whether they are of the electrochemical, physical, or chemical type. Specific areas that will be accelerated include the following:

First. Batteries;

Second. Electrolytic technology;

Third. Flywheels;

Fourth. Hydrogen technologies including electrolytic production, advanced production, transportation, use, and storage;

Fifth. Fuel cells for vehicular use;

Sixth. Chemical heat pumps;

Seventh. Magnetic energy storage;

Eighth. Underground energy storage, including seasonal aquifiers and compressed air/underground pumped hydro storage for electric power;

Ninth. Thermal energy storage; and

Tenth. Basic research in electrochemistry and electrochemical engineering.

I want to emphasize, Mr. President, that this list was meant to be merely illustrative of the type of efforts to be supported under this comprehensive legislation.

Mr. President, I would like to give a couple of specific examples which help illustrate the potential to be realized from effective utilization of energy storage technologies. These are the electric vehicle and the Redox storage system.

Probably the most serious energy problem confronting the United States for at least the remainder of this century is that of liquid fuels for transportation. Petroleum-derived fuels provide over 97 percent of our transportation needs—transportation accounts for about half of our petroleum consumption. Significant reductions in oil consumption for transportation is possible through the use of electric vehicles. A number of energy storage technologies can help make this a reality. For example, the biggest obstacle thus far to the development of an electric car has been the lack of a cheap, lightweight, and powerful battery. Fuel cells offer the possibility of electric vans, trucks, and buses, and perhaps electric cars, if sufficient miniaturization is feasible. The flywheel can also help commercialize electric vehicles. Electric cars can improve their operating range between recharges by 20 percent when assisted by flywheels. I might also note that flywheels can also help heat engines to improve their fuel economy by 50 to 100 percent. Flywheels alone represent a potential savings of 55 million barrels of oil per year for the petroleum-fueled auto and 2 million barrels per year for the flywheel-assisted electric vehicle.

The Redox storage system is a new and unique type of battery which should prove attractive for utility use. Battery-type storage is preferred for many utility applications on several counts: Both the input and output is electrical and can respond rapidly to load changes; storage capacity can be increased in modular increments; and intermittent sources such as solar. wind, and tidal energy could be used. The Redox system is an unusual battery whose anode and cathode consist of tanks of chemicals separated by a membrane along which ion flow occurs. Preliminary results from the laboratory working scale model indicate an impressive 70- to 75-percent rate of efficiency for the system. And be-

cause the battery's capacity is limited only by the size of the tanks—which one could make, theoretically, as small as a bathtub or as large as the Pentagon—it could also prove to be highly practical for use by utilities. I would expect to see this concept supported under this bill so that a multiple-kilowatt capacity system could be demonstrated by 1985 and tests initiated on a megawatt system by 1986.

In its January budget submission, the Department of Energy stated that successful development and commercialization of known technologies could lead to annual fuel substitution and fuel conservation savings of 23 million barrels of oil equivalent in 1985 and 825 million barrels of oil equivalent, or 5 quads, in 2000. In other documents, DOE has been much more optimistic about the role of energy storage. For example, in its January 1980 budget request, DOE placed oil savings as high as 62 million barrels of oil equivalent by 1985 and 1.3 billion per year by 2000. Note that the goals stated in the bill are extremely conservative—the equivalent of 20 million barrels of oil per annum by 1985 and 750 million barrels per annum by 2000. However, the payoff is huge. If one assumes a smooth introduction of energy storage technologies, this could result in fuel displacement and savings of over 6 billion barrels of oil for the period 1985–2000.

Mr. President, the administration's revised budget request for fiscal years 1981 and 1982 for energy storage amounts to what I would term "technocide," a process that started with the previous administration's January request. The January 15 budget request contained only $59.5 million for energy storage for fiscal year 1982, a reduction of $12.4 million from the level of $71.9 million appropriated for fiscal year 1981—a level, incidentally, I considered too small at the time, and said so. The Reagan administration has taken a much more drastic, and I believe unacceptable, step with its revised budget which proposes a $20 million recission for fiscal year 1981 and a $20.5 million cut in fiscal year 1982. This means that the fiscal year 1981 and fiscal year 1982 funding levels for all of energy storage will amount to only $51.9 million and $39.0 million, respectively.

This legislation, on the other hand, will provide for a healthy and vibrant energy storage program which offers high payoffs. The bill authorizes $100 million for fiscal year 1982 and incremental increases of $25 million for each of the 4 successive years for a 5-year total of $750 million. This funding level will allow the Department of Energy to implement an aggressive 5-year energy storage program consistent with that proposed in the conservation and solar applications program memorandum prepared by DOE this past year.

Mr. President, there will be those who will say that we cannot afford this. I say that we cannot afford not to do this. This is a much needed investment in our Nation's energy future which we must make if we are to have an abundant and prosperous tomorrow. I urge support of my colleagues for this measure.

Mr. President, I ask that the text of the bill and a section-by-section analysis be printed at this point in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 731

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Energy Storage Research, Development, and Demonstration Act".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress hereby finds that—

(1) progress toward achievement of energy independence for the United States and the long-term security of energy sources and supplies is essential to the health of the national economy, the well-being of our citizens, and the maintenance of national security;

(2) substantial amounts of petroleum and natural gas are used in the United States for transportation, by electric utilities for meeting peak demand, for heating and cooling services in the residential, commercial and industrial sectors, and for industrial processes;

(3) the intermittent nature of certain energy sources inhibits their full utilization;

(4) adding baseload electrical capacity to meet rising peak load demand is an inefficient use of financial and technology resources;

(5) energy storage technologies enable the substitution of plentiful and virtually inexhaustible energy resources for scarce fuels and promote energy conservation by increasing energy productivity and expediting the use of more energy-efficient processes;

(6) an aggressive research, development and demonstration program to accelerate use of energy storage systems and technologies should solve the existing technical problems and should maximize the contribution of energy storage to the Nation's energy future;

(7) it is in the national interest to accelerate efforts to develop and commercialize energy storage systems and technologies; and

(8) it is the proper role of the Federal Government to undertake research and development, to participate in demonstration projects for energy storage, and to assist private industry, other entities, and the general public in hastening the widespread use of these technologies.

(b) Therefore, the purpose of this Act is to accelerate the national effort in research, development, and demonstration activities related to energy storage systems and technologies to provide a technical base for meeting the following goals:

(1) achievement of annual fuel substitution and fuel conservation savings of 20 million barrels of oil equivalent in the year 1985 by energy storage technologies; and

(2) achievement of annual fuel substitution and fuel conservation savings of 750 million barrels of oil equivalent in the year 2000 by energy storage technologies.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "energy storage" means any process utilizing electrochemical, chemical, or physical phenomena to store electrical, chemical, thermal, and mechanical energy generated from any energy resource for subsequent end-use in transportation, building heating and cooling, industrial processes, and utility applications; and

(2) the term "Secretary" means the Secretary of Energy.

RESEARCH, DEVELOPMENT, AND DEMONSTRATION

SEC. 4. (a) The Secretary in pursuing an aggressive program for the development of prototypes of energy storage technologies shall—

(1) initiate research and development or accelerate existing research and development in areas in which the lack of knowledge limits the utilization of energy storage technologies to achieve the purposes of this Act;

(2) solicit proposals and evaluate any reasonable new or improved technology or process, a description of which is submitted to the Secretary in writing, which could lead to or contribute to the development of energy storage technology;

(3) enter into contracts, grants, and cooperative agreements with public and private entities for the purchase, fabrication, installation, and testing to obtain scientific, technological, and economic information from the demonstration of a variety of energy storage technologies under a variety of circumstances and conditions; and

(4) ensure that activities in the energy storage program are fully coordinated with the activities under the Solar Heating and Cooling Demonstration Act of 1974, Public Law 93–409; the Electric and Hybrid Vehicle Research, Development and Demonstration Act, Public Law 94–413 as amended; the Solar Photovoltaic Energy Research, Development and Demonstration Act of 1978, Public Law 95–590; the National Energy Conservation Policy Act, Public Law 95–619; and the Ocean Thermal Energy Conversion Research, Development and Demonstration Act, Public Law 96–310.

(b) The Secretary is authorized to promulgate such regulations as he determines necessary to carry out the purposes and achieve the goals of this Act.

COMPREHENSIVE PROGRAM MANAGEMENT PLAN

SEC. 5. (a) The Secretary shall prepare a comprehensive program management plan for the conduct of research, development, demonstration and technology application activities to carry out the purposes of this Act. Such plan shall include as a minimum—

(1) a presentation of the program strategy which will be used to achieve the purposes of this Act;

(2) a 5-year program implementation schedule, including identification of detailed program milestone goals and critical paths, with associated budget and program management resources requirements;

(3) cost-benefit analyses and risk assessments of the activities and programs authorized under the Act;

(4) supporting research and development needed to solve problems which may inhibit or limit development of energy storage technologies;

(5) an analysis of institutional, environmental, and economic considerations, including materials requirements, which are limiting the utilization of energy storage technologies; and

(6) the estimated relative financial contributions of the Federal Government and non-Federal participants in the program.

In preparation of such plan, the Secretary shall consult with the heads of such other Federal agencies and such public and private organizations as he deems appropriate.

(b) The Secretary shall transmit the comprehensive program management plan developed pursuant to subsection (a) to the Committee on Energy and Natural Resources of the Senate and the Committee on Science and Technology of the House of Representatives within 6 months after the date of the enactment of this Act.

TECHNICAL PANEL ON ENERGY STORAGE

SEC. 6. (a) A technical panel on energy storage of the Energy Research Advisory Board shall be established to advise the Secretary on the conduct of the energy storage program.

(b)(1) The technical panel shall be comprised of such representatives from domestic industry, universities, government laboratories, and other scientific and technical organizations as the Chairman of the Energy Research Advisory Board determines appropriate based on his assessment of the technical qualifications of each such representative.

(2) Members of the technical panel need not be members of the full Energy Research Advisory Board.

(c) The activities of the technical panel shall be in compliance with any laws and regulations guiding the activities of technical and factfinding groups reporting to the Energy Research Advisory Board.

(d) The technical panel shall review and may make recommendations on the following items, among others:

(1) the preparation of the 5-year comprehensive program management plan prepared pursuant to section 5;

(2) the type of future demonstrating activities needed to meet the objectives of this Act along with their projected completion dates;

(3) the adequacy of participation by universities and industry in the program; and

(4) institutional, environmental, and economic factors, including materials requirements limiting, or prospectively limiting, efforts to achieve commercial application of energy storage technologies.

(e) The technical panel shall submit to the Energy Research Advisory Board on a biennial basis a written report of its findings and recommendations with regard to the energy storage program.

(f) After consideration of the technical panel report, the Energy Research Advisory Board shall submit such report, together with any comments such Board deems appropriate, to the Secretary.

INFORMATION DISSEMINATION

SEC. 7. (a) The Secretary shall take all necessary steps to assure that technical information relevant to the status and progress of the energy storage program is readily made available to interested persons in domestic industry and universities in the United States. Upon a showing to the Secretary by any person that any information or portion thereof provided to the Secretary directly or indirectly from such person would, if made public, divulge (1) trade secrets or (2) other proprietary information of such person, the Secretary shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18, United States Code.

(b) The Secretary shall maintain an aggressive program in the United States for the provision of public information and educational materials to promote widespread knowledge of energy storage among educational, community, business, environmental, labor, governmental entities, and the public at large.

ENCOURAGEMENT AND PROTECTION OF SMALL BUSINESS

SEC. 8. (a) In carrying out his functions under this Act, the Secretary shall take steps to assure that small business concerns will have realistic and adequate opportunities to participate in the programs under this Act to the maximum extent practicable.

(b) The Secretary shall, to the maximum extent practicable, use all authority provided by law to protect trade secrets and other proprietary information submitted by small business under this Act and to avoid the unnecessary disclosure of such information.

REPORTS

SEC. 9. As a separate part of the annual report submitted pursuant to section 801 of the Department of Energy Organization Act, the Secretary shall submit to Congress an annual report of activities pursuant to this Act. Such report shall include—

(1) modifications to the comprehensive program management plan for implementing this Act;

(2) an evaluation of the state of the energy storage program in the United States;

(3) a summary of the findings and recommendations of any report of the Energy Research Advisory Board on energy storage;

(4) an analysis of the progress made in commercializing energy storage technologies; and

(5) suggestions for improvements in the energy storage program, including recommendations for legislation.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. (a) There is authorized to be appropriated $100,000,000 for the fiscal year ending September 30, 1982; $125,000,000 for the fiscal year ending September 30, 1983; $150,000,000 for the fiscal year ending September 30, 1984; $175,000,000 for the fiscal year ending September 30, 1985; and $200,000,000 for the fiscal year ending September 30, 1986.

(b) In carrying out the provisions of this Act, the Secretary is authorized to enter into contracts only to such extent or in such amounts as may be provided in advance in appropriation Acts.

ENERGY STORAGE RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT

SECTION-BY-SECTION ANALYSIS

Section 2. Findings and purposes

This section sets forth the findings, purposes, and goals of the Act.

The findings, in summary, acknowledge the severe economic and national security problems associated with excessive dependence on foreign sources of energy. Substantial amounts of petroleum and natural gas can be displaced or conserved through the use of energy storage technologies by improving energy productivity and by substituting plentiful and virtually inexhaustible energy resources for scarce fuels. It is further recognized that an aggressive research, development, and demonstration program to accelerate the development and commercialization of energy storage technologies could maximize their contribution to the Nation's energy future, and that it is the proper role of the Federal Government to assist with this effort.

The purpose of the bill is to accelerate the national effort in energy storage research, development, and demonstration which will provide a technical basis for meeting the following goals:

(1) achievement of annual fuel substitution and fuel conservation savings of 20 million barrels of oil equivalent in 1985 by energy storage technologies; and

(2) achievement of annual fuel substitution and fuel conservation savings of 750 million barrels of oil equivalent in the year 2000 by energy storage technologies.

Section 3. Definitions

This section defines the terms "energy storage" and "Secretary."

Section 4. Research, development, and demonstration

This Section directs the Secretary of Energy (hereafter referred to as the Secretary) to initiate research and development activities or accelerate ongoing research and development activities in areas in which the lack of knowledge limits the widespread utilization of energy storage technologies. The Secretary is also directed to solicit proposals and evaluate any reasonable new or improved technology or process; to enter in contracts, grants, and cooperative agreements with public and private entities to obtain information from the demonstration of energy storage technologies; and to ensure that energy storage program activities are fully coordinated with those activities under previous legislation. Finally, the section directs the Secretary to promulgate such regulations deemed necessary to carry out the purposes and achieve the goals of the Act.

Section 5. Comprehensive program management plan

This section establishes a requirement that the Secretary prepare a comprehensive management plan which contains the program strategy, a five-year implementation schedule including milestones, budget and program management resource requirements, and other information to provide Congress and the public at large a detailed guide for measuring progress in the program. The plan shall be transmitted to Congress within 6 months after the date of enactment of this Act.

Section 6. Technical panel on energy storage

This section establishes a technical panel on energy storage which may include representatives from industry, universities, government laboratories, and other scientific and technical organizations to review and submit a written report on at least a biennial basis.

Section 7. Information dissemination

This section calls for the Secretary to provide all segments of the scientific community, industry, the Government, and the public at large with full and complete information on the potential benefits of energy storage and the status of current research programs.

Section 8. Encouragement and protection of small business

This section requires the Secretary to encourage to the maximum practicable the participation of small businesses in the program. The Secretary is also directed to protect trade secrets and proprietary information of small businesses.

Section 9. Reports

This section requires the Secretary to include in the Department of Energy's annual report submitted to Congress a separate part which reports on activities pursuant to this Act including recommendations for improvements in the energy storage program and legislation.

Section 10. Authorization of appropriations

This section authorizes $100 million in fiscal year 1982, $125 million in fiscal year 1983, $150 million in fiscal year 1984, $175 million in fiscal year 1985, and $200 million in fiscal year 1986.

By Mr. NUNN (for himself, Mr. CHILES, Mr. DECONCINI, Mr. COHEN, Mr. BENTSEN, Mr. DOMENICI, Mr. LONG, Mr. ROTH, Mr. RUDMAN, and Mr. JACKSON):

S. 732. A bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminals laws and the effective administration of justice;

LEGISLATION TO STRENGTHEN FIGHT AGAINST ORGANIZED CRIME AND ILLEGAL NARCOTICS

● Mr. NUNN. Mr. President, on behalf of myself and Senators CHILES, COHEN, DECONCINI, DOMENICI, BENTSEN, ROTH, LONG, and JACKSON, I am today introduc-

ing a bill which is designed to restore the Internal Revenue Service to the role it once played in cooperative law enforcement efforts aimed at organized criminals and narcotics traffickers.

This bill is similar to S. 2402, S. 2404, and S. 2405, which I and 10 other cosponsors introduced on March 11, 1980, in the 96th Congress.

The Finance Subcommittee on Oversight of IRS, under the leadership of our distinguished colleague from Montana (Mr. BAUCUS), held a hearing on these measures on June 20, 1980.

In addition, the House Ways and Means Subcommittee on Oversight, under the chairmanship of Representative GIBBONS of Florida, held a hearing on July 30, 1980.

These two subcommittees received considerable testimony on all sides of these issues. I would like to compliment the respective chairmen and thank them for their interest in these problems. Congressman GIBBONS already has introduced our new bill in the House.

After these hearings, I undertook to revise last year's bills, taking into consideration the testimony of the various witnesses and the views of the Carter administration. The result, which is embodied in the bill we introduce today, was endorsed—except for one provision—by President Carter. I sincerely hope that the Reagan administration will see fit to do likewise.

I might add that the general issue of IRS' role in law enforcement came before this body on the night of December 10 in the form of a committee amendment to the continuing resolution. That amendment was designed as an interim measure to be replaced by substantive legislation. Our bill is that substantive legislation, although it bears little resemblance to the amendment that was tabled in December.

This bill is an outgrowth of extensive work done by the Permanent Subcommittee on Investigations, of which I was honored to serve as chairman during the 96th Congress.

Our subcommittee spent the better part of the last 2 years investigating various aspects of organized crime, labor racketeering, and narcotics trafficking. As I look back on our studies and hearings, I am astounded at the size and sophistication of these triple menaces to the well-being of our Nation.

The "underground economy" is estimated at upward of $124 billion a year, of which the traffic in illegal narcotics amounts to somewhere between $44 billion and $63 billion. Included in these astronomical figures are an estimated $25 billion to $50 billion in unreported and untaxed profits. In other words, we may not have had a deficit last year if taxes had been paid on all these illegal profits.

All of this money has had a tremendous inflationary impact on the economy of several regions of the country, especially Florida, Texas, and the Southwest areas bordering Mexico. Even my homestate of Georgia has experienced an increase in narcotics trafficking, for as enforcement authorities have cracked down on smuggling into Florida from South America, many traffickers have moved their operations northward.

The permanent subcommittee explored this problem extensively, and in December or 1979 we conducted very thorough hearings on "Illegal Narcotics Profits." We issued a comprehensive report on this investigation in August 1980 (Senate Report No. 96–887).

Our major finding was that the Internal Revenue Service had withdrawn from the fight against organized crime and narcotics trafficking.

It has long been recognized that financial investigations, relying on financial and tax records, are one of the most effective tools in piercing the veil of secrecy that protects those at the top of any organized crime ring—be it a drug smuggling operation or a traditional organized crime family.

Indeed, it was the ability of the Internal Revenue Service to conduct sophisticated financial investigations that sent such notorious mobsters as Al Capone and Frank Costello to jail on income tax evasion charges when other agencies were unable to gather enough evidence of nontax crimes to have them indicted; much less convicted.

We found, however, that even though organized crime and narcotics trafficking have become bigger and more sophisticated than ever before, the one law enforcement agency that the kingpin criminals fear most—the IRS—had withdrawn from the fray.

Prosecutors and others involved in Federal law enforcement testified before our subcommittee that they were hindered in doing financial investigations by the reluctance of IRS to lend them a hand in attacking those who call the shots in organized crime.

We found that there were two prime reasons for this withdrawal by the IRS. One was the disclosure provisions of the Tax Reform Act of 1976. The other was a general attitude on the part of IRS officials that the agency only should collect taxes and not serve in any capacity as a nontax law enforcement agency.

THE TAX REFORM ACT OF 1976

The disclosure provisions of the Tax Reform Act of 1976 are found in section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103). They were enacted in the dying days of the 94th Congress and were intended to avoid future abuses of a "Watergate" nature.

Until the act became effective, tax returns were considered to be public records, and access to them was governed by Presidential Executive order. Many Federal agencies, including the White House, had easy access to tax returns for a wide variety of uses.

During the Watergate investigations, it was revealed that the Nixon White House had used tax returns to pressure potential campaign contributors and certain other individuals who were on a White House "enemies list," and that the administration had ordered IRS to conduct audits of its "enemies."

It also was revealed by the Senate Judiciary Committee that an IRS special service staff collected and disseminated information about thousands of individuals and groups which the IRS considered to have "extremist views and philosophies."

In short, various congressional committes found that tax returns and tax information were made available to a number of Federal agencies for many questionable purposes. I think all of us would agree that such disclosure represented an abuse of taxpayer privacy.

But I want to point out, Mr. President, that the permanent subcommittee was unable to document any abuse of tax information on the part of a Federal prosecutor.

To cure these abuses, the Tax Reform Act made tax returns and most other information gathered by the IRS confidential and subject to disclosure by IRS only in accordance with very strict procedures. These procedures apply across the board and govern disclosure to all Federal agencies. They are so sweeping that they can be compared to the use of a sledge hammer to kill an ant.

IRS agents are forbidden to disclose, on their own initiative, any tax return or "tax return information," which is any information they gather in connection with a tax return, or "taxpayer return information," which is any information they obtain from a taxpayer or his representative, such as his attorney or accountant.

Let us say, for example, that IRS agents conduct an audit of the bank records of a taxpayer, and they discover in his checking account statements that he has made a series of unexplained cash deposits. This may very well lead them to suspect that he has been dealing in narcotics. If they tell the Drug Enforcement Administration about this evidence, however, they would be guilty of a felony under the Tax Reform Act.

As a result, there is very little criminal information exchanged today between IRS and the other Federal law enforcement agencies. IRS turned over an average of just 32 pieces of criminal evidence per year during 1977, 1978, and 1979. DEA officials testified at our hearings that they received no nontax criminal evidence over that same period.

What happens to the nontax criminal evidence that IRS agents come across during the course of their tax investigations? Apparently, it is buried somewhere in the IRS files.

For example, IRS agents told our subcommittee that they found evidence of massive embezzlements when they audited a labor union's records, but they could not report this information to the Justice Department. Thus, Justice had no information upon which to begin a nontax prosecution.

In another example, IRS agents found evidence in a taxpayer's business records that a policeman had been bribed. That evidence was never disclosed, and the policeman is still on the job.

These examples pale in comparison to an incident known as the case of the trash can, in which DEA was investigating a chemist suspected of concocting illegal drugs. DEA learned that an IRS agent had searched the chemist's trash can and had discovered evidence that the chemist indeed was making illegal drugs.

However, IRS would not volunteer this evidence to DEA.

The prosecutor subpenaed the IRS agent and the trash can documents, but IRS cited the Tax Reform Act and refused to let the agent answer the subpena. IRS said the trash was gathered in connection with the chemist's tax return; therefore, the prosecutor needed a court order under section 6103 to see the documents.

In my mind, by keeping secret this evidence of criminal activity found in a taxpayer's business books and records, bank account statements, and check stubs, we legislated an exemption for criminals.

Our investigation has convinced me that the disclosure provisions of section 6103, coupled with the way they have been interpreted and enforced by IRS, have had a highly detrimental effect on our Federal law enforcement system.

That system is complex and sophisticated. We do not have a Federal police state. Instead, we have a series of agencies broken down by criminal jurisdiction that must operate with a high degree of coordination and cooperation. It is not unusual, in fact it is quite common, to combine the skills and information of many agencies to achieve any measure of success in criminal enforcement.

IRS has a fine tradition and history of being one of the most effective law enforcement agencies, especially in cases involving high echelon criminals. Obviously, since the purpose of criminal ventures is to make money, very few substantive crimes can be committed without some tax consequence. Therefore, IRS always has been—and continues to be—a key agency both in terms of financial expertise and in terms of financial information.

The language and interpretation of the Tax Reform Act, however, have caused a severe breakdown in our delicate and complex Federal law enforcement system. It has taken up to 13 months simply to receive the assistance of IRS agents in joint investigations. The Tax Reform Act and its interpretation by IRS has caused a bureaucratic nightmare in cases where Federal agencies should willingly assist each other. Moreover, the Tax Reform Act and its interpretations by IRS have made, in effect, common criminals out of IRS agents who must ignore the dictates of justice for every other American, and refuse to turn over evidence of serious crimes to the appropriate authorities.

THE "CATCH 22"

It is possible, of course, for other agencies to obtain tax returns and other IRS-gathered information under section 6103. However, they must apply for a court order in order to get tax returns and related information, and they must make written requests to obtain other IRS information about nontax crimes such as forgery, bribery, or narcotics violations that comes from sources other than tax returns.

In either situation, the requesting agency must describe the information it seeks to obtain.

The court order and written request requirements have created a "Catch 22" situation. Since IRS agents are forbidden to tell the other agencies of the criminal evidence they gather, it is virtually impossible for these other agencies even to know that such information exists, much less to describe that information with such particularity that they can satisfy the requirements for a court order or written request.

In other words, section 6103 requires Federal investigative agencies to go through elaborate request procedures to obtain information that they may not even know that IRS has.

This "Catch 22" situation has made it all but impossible for the FBI, DEA, and other agencies to receive the necessary information and cooperation from the IRS.

The disclosure provisions were intended to prevent the abuse of tax information for primarily political reasons, such as the President's ordering IRS to audit a taxpayer for political purposes. However, IRS Commisisoner Kurtz testified at our hearings that the President still could give such an order to IRS, and there is nothing in the Tax Reform Act to prevent that order from being carried out. In other words, the "cure" does not really treat this type of abuse, but it has hamstrung law enforcement in its wake.

IRS ATTITUDE

Section 6103 is only a part of the reason why IRS dropped out of the cooperative law enforcement community. Another part is the attitude of the top officials of the IRS and the policies and procedures they adopted in interpreting and applying section 6103.

Between 1974 and 1980, a series of IRS commissioners and their top aides took the view that IRS should stick to the "tax administration"—by which they meant tax collection and only tax collection—and out of the general law enforcement arena.

They said that paying attention to ordinary taxpayers was a better way of keeping the voluntary tax collection system working than was cracking down on organized criminals who pay no taxes on their tremendous ill-gotten gains.

In our report on "Illegal Narcotics Profits," the Permanent Subocmmittee on Investigations differed with that view of tax administration.

Obviously, IRS must be aggressive in collecting the Nation's taxes, but we understand the skepticism of a smalltown waitress who is caught for underreporting her tips when organized crime millionaires escape without reporting a cent of their illegal income.

Our subcommittee believes that if the average taxpaver knows that IRS can successfully collect taxes from the mob, he is a lot more likely to ante up his fair share—if for no other reason than the fear of being caught.

When he sees a drugpusher prosecuted as the result of work by the IRS, he is likely to have confidence in our voluntary tax collection system and feel that his taxes are being well spent, especially on law enforcement. On the other hand, if he sees criminals getting away with tax evasion on top of murder and extortion, his natural skepticism toward our tax policy will increase.

IRS recent emphasis on ordinary taxpayers has not increased voluntary compliance with the tax laws. In fact, statistics compiled by both the IRS and the General Accounting Office indicate that voluntary compliance with the tax laws actually has decreased since passage of the Tax Reform Act of 1976 and the subsequent withdrawal of IRS from cooperative law enforcement efforts aimed at big-time criminals.

The GAO findings also refute the contention that voluntary compliance is in direct proportion to the degree of confidentiality of tax return information. If that is so, then the total confidentiality of the Tax Reform Act would have resulted in total compliance. Obviously, it has not.

Other statistics indicated the extent of IRS withdrawal: Between 1974 and the first 9 months of 1978, the number of organized crime cases which originated from IRS-developed tax information dropped from 620 to just 221.

Partially as a result of our subcommittee's work, the Carter administration ordered IRS to step up its investigations of suspected narcotics dealers and organized criminals. IRS has devoted more of its resources to these efforts, and it has adjusted some of its policies and interpretations with respect to the disclosure of nontax criminal evidence obtained by its agents. Just within the last few weeks, for example, IRS cooperation with other agencies resulted in the arrests of several persons allegedly involved in laundering some $70 million of drug money through a south Florida bank.

These are steps in the right direction; however, much more needs to be done, and I hope the Reagan administration will increase these efforts by IRS and support the legislation we introduce today.

DISCLOSURE AMENDMENTS

This legislation will not scrap the privacy safeguards which were written into the Tax Reform Act, but the overwhelming evidence has convinced my colleagues and me that a balance needs to be struck so that IRS can and will again cooperate with Federal prosecutors, to whom no documented abuse of tax information has been attributed. Our amendments will strike that balance.

Let me try to dispel some of the unfounded fears of our disclosure amendments by explaining how they will protect the privacy of tax returns and other information supplied to IRS. I am sure that once these provisions are understood—and I admit this is an intricate, sometimes confusing area of the law—they will be accurately seen for their privacy merits as well as their attempt to improve law enforcement.

Let us look at the types of information that could be disclosed only by ex parte court order, just as under existing law. This includes individual tax returns and all supporting attachments, such as W–2 forms, lists of donations to charitable and nonprofit organizations, and various other schedules submitted by individuals and entities alike.

It also includes the returns and supporting documentation of small, closely held corporations, partnerships, associations, or other entities consisting of no more than two owners or members. In other words, the tax and supporting records of these organizations—in which

there is a privacy expectation because they usually are closely owned by only two family members or friends—will be protected just as they are today.

On the other hand, information gathered from other sources, such as from larger corporations or from third parties, such as banks, would not have the same degree of protection. But why should it? The courts have consistently held that corporate information does not enjoy the same constitutional protections as individual information; nor is there the same practical privacy expectation in corporate records, simply because of the number of people in most corporations who have access to that information. And we really cannot expect the same degree of privacy for information about us that is maintained by third parties as we do for information that is in our own possession.

The fact of the matter is that other Government agencies, such as the Securities and Exchange Commission and the Department of Labor, have access to similar information concerning entities, but those agencies, unlike IRS, have no disclosure prohibitions to interfere with their referring criminal information to the Justice Department, which they do on a regular basis.

Let us look at the judicial standards that the Justice Department would have to meet before it could gain access to the information protected by court order. In order to obtain an ex parte order, Justice Department attorneys would have to present information believed to be reliable that establishes reasonable cause to believe that a specific criminal act has been committed. Those attorneys would have to certify that the information is sought exclusively for use in a Federal criminal investigation or proceeding, and they would have to establish to the satisfaction of a district judge or magistrate that there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of the criminal act.

These are essentially the same standards that must be met under Federal law in order for authorities to wiretap our telephones or put listening devices in our homes and offices. It seems to my colleagues and me that if they are sufficient to protect the privacy of our most personal conversations, they also are sufficient to protect our tax information.

In addition to these privacy protections, I would point out that our bill—unlike the existing provision of the Tax Reform Act—would channel all requests for IRS information through the Justice Department. Only one agency would be permitted to obtain tax information, and the requesting official in every case would be a government attorney.

In other words, Mr. President, our disclosure amendments are laden with safeguards for the privacy of all information we can reasonably expect to keep private. There is no wholesale scrapping of privacy here. There is no sell-out to a few law enforcement authorities who might like to see their work made easier. There certainly is no attempt here to create a breeding ground for a repeat of the so-called Watergate abuses. And there is certainly no meat-ax attempt to butcher the Tax Reform Act.

On the other hand, there is a very balanced, well-thought-out effort to fine tune section 6103 of the Internal Revenue Code, which, as the record clearly indicates, needs to be done.

These amendments are the product of a solid year's hard work on the part of several congressional subcommittees and the Justice Department and the IRS itself. They have been developed in the broad daylight with the views of all sides considered.

These amendments strike that delicate balance between privacy and law enforcement as well as it can be struck.

No one who is concerned about the privacy of tax returns or a repetition of the abuses of tax information should fear these bills. Hard working, law-abiding taxpayers can rest assured that the information they supply IRS will remain within that agency where it belongs.

The only people that need fear this legislation are narcotics traffickers and organized crime figures and white-collar criminals who are contributing to inflation and who are cheating other taxpayers by not paying their fair share.

This amendment would give no additional power or abilities to IRS to gather information about ordinary taxpayers.

The ordinary citizen is and always has been handled "in-house" by the IRS with no need for cooperation with the FBI or DEA. On the other hand, criminal tax evaders, who earn their money by participating in a life of crime, receive different treatment by IRS. In cases where criminal ventures generate profits, IRS must have the capability to cooperate with and exchange information with the Federal investigative and prosecutive agencies.

It is in this very small area—criminal tax evaders—that we seek our primary change so that IRS and other Federal law enforcement agencies can work even more effectively together against these criminals than they can today. As it now stands, the Tax Reform Act makes it much easier for IRS to go after the average taxpayer than the criminal. This is a complete reversal of the societal priorities that we should be encouraging. In this respect, we propose changing a very limited and isolated portion of the Tax Reform Act without altering the other provisions of that act.

CIVIL DAMAGE PROVISIONS

As I pointed out earlier, the Tax Reform Act of 1976 contains severe criminal and civil penalties for persons who disclose tax returns or related information in violation of the act.

The civil damage provision, 26 U.S.C. 7217, makes any person who willfully or negligently discloses a tax return or tax return information in violation of the act personally liable for civil damages in a suit brought against him by the taxpayer.

Existing law provides that there is no civil liability for disclosures which result from good faith, but wrong, interpretations of the act.

Our proposed amendment to section 7217 provides that the Government will be liable for damages awarded against a Federal official or employee so long as the disclosure occurred within the scope of his employment and was not done corruptly, maliciously, in return for anything of value, or willfully in violation of the disclosure provisions of the act.

We do not believe that IRS agents should be personally liable for damages arising out of disclosures which are not done with wrongful intent, and our proposal, S. 2405 spells this out.

CRIMINAL PENALTIES

The criminal penalties of the Tax Reform Act, 26 U.S.C. 7213, makes it a felony to willfully disclose tax returns or tax return information in violation of the act. Persons found guilty can be fined up to $5,000 or sentenced to jail for up to 5 years, or both, and assessed the costs of prosecution.

Under existing law, there is no defense available for good faith but wrong interpretations of the disclosure provisions. As a result, IRS agents testified before our subcommittee, they will always stay on the safe side of the law and not disclose any IRS information to other agencies except in the most serious situations. The disclosure provisions are not always easy to interpret in every situation when an IRS agent comes across evidence of a nontax crime. In fact, even though IRS has issued a number of "clarifying" interpretations and instructions, its agents testified that they never could be sure if they were violating the act when they disclosed information. In fact, IRS' own legal counsel had difficulty interpreting the provisions when asked questions at our hearings.

In order to ease the minds of IRS agents and to encourage them to report nonreturn information of possible crimes, we propose in S. 2404 that an affirmative defense provision be added to the criminal penalty section to relieve them of criminal liability when they can establish that they made the disclosure based on a good faith, though erroneous, interpretation of the disclosure provisions.

CONCLUSION

Mr. President, for generations the Internal Revenue Service led the way in this Nation's battle against organized crime and narcotics trafficking, but since 1977 it has hidden behind the disclosure provisions of the Tax Reform Act to stay out of the fray.

Fred Bonadonna, whose father was an identified member of the Kansas City mob, testified before the permanent subcommittee that organized criminals—who once feared the IRS—now arrogantly display the wealth created by their criminal ventures, knowing full well that the IRS will do nothing about their ill-gotten gains.

Only part of the IRS withdrawal can be blamed on the existing law. In passing the disclosure provisions, Congress intended to provide greater protection for the privacy of each citizen's tax returns, but we did not intend for IRS to withdraw from this important fight.

In an interview just before he retired after his distinguished 15-year term as Comptroller General, Elmer B. Staats told the Washington Star that he believes the Government should be more concerned with eliminating drug traffic and the loss of revenues that derive from the untaxed "underground economy."

A recent IRS report estimated that

this "underground economy" involves at least $135 billion a year, with a loss in taxes of $26 billion.

It is now time for us to decide that IRS should become once again the effective force for justice that it was in the days of bootleggers and rumrunners.

My colleagues and I believe that our proposals will send IRS a clear and unmistakable signal that it should do just that.

We have spent many long hours in drafting what we feel is very well-reasoned legislation. We will retain very important privacy safeguards that will prevent any repetition of Watergate type abuses. At the same time, we put a duty on IRS to cooperate once again with the fight against the ever increasing organized crime and narcotics problems facing the Nation.

Three years of inactivity by this once effective law enforcement agency is enough. It is time to act.

Mr. President, I ask unanimous consent that comparisons of our proposal to existing law, a section-by-section analysis of our amendments to section 6103, and a letter from President Carter be printed in the RECORD at this point.

There being no objection, the bill and other material ordered to be printed in the RECORD, as follows:

S. 732

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (1) of subsection (b), section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended to read as follows:

"(1) RETURN INFORMATION.—The term 'return information' means—

"(A) any tax or information return, declaration of estimated tax, or claim for refund required by, or provided for or permitted under the provisions of this title which is filed with the Secretary by, on behalf of, or with respect to any person, and any amendment or supplement thereto, including supporting schedules, attachments, or lists which are supplemental to, or part of, the returns so filed, (or information taken therefrom) and

"(B) any information provided to the Secretary by or on behalf of an individual taxpayer to whom such information relates."

SEC. 2. Paragraph (2) of subsection (b), section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended as follows:

"(2) NONRETURN INFORMATION.—The term 'nonreturn information' means—

"(A) any information, other than return information, which the Secretary collects, prepares, obtains, or receives with respect to a taxpayer or return relating to the determination of the existence, or possible existence of liability (or the amount thereof) of any person under this title for any tax penalty, interest, fine, forfeiture, or other imposition or offense, (including whether a return was filed and whether the taxpayer's return was, is being, or will be examined or subject to other investigation or processing) and

"(B) any part of any written determination or any background file document relating to such written determination (as such terms are defined in section 6110(b)) which is not open to public inspection under section 6110,

"but such term does not include data in a form which cannot be associated with, or otherwise identify, directly or indirectly, a particular taxpayer."

SEC. 3. Paragraph (3) of subsection (b) of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended to read as follows:

"(3) INDIVIDUAL TAXPAYER.—The term 'individual taxpayer' means any natural person or a corporation, partnership, association, union, or other entity consisting of no more than two owners, shareholders, partners, or members.

SEC. 4. Paragraphs (1), (2), (3), and (4) of subsection (1), section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) are amended to read as follows:

"(1) DISCLOSURE OF RETURN INFORMATION.—

"(A) DISCLOSURE PURSUANT TO ORDER OF JUDGE OR MAGISTRATE.—Return information shall, pursuant to, and upon the grant of, an ex parte order by a Federal district court judge or magistrate as provided by this paragraph, be open, but only to the extent necessary as provided in such order, to inspection by or disclosure to officers and employees of the Department of Justice personally and directly engaged in and solely for their use in preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) pertaining to the enforcement of a specifically designated Federal criminal statute (not involving tax administration) to which the United States or such agency is or may be a party. The order may provide for continuous disclosure if such disclosure is justified under subparagraph (B) (iii).

"(B) APPLICATION FOR ORDER.—The Attorney General, the Deputy Attorney General, an Assitsant Attorney General, a United States Attorney, or the Attorney in Charge of a Criminal Division Organized Crime Strike Force may authorize an application to a Federal district court judge or magistrate for the order referred to in subparagraph (A). Upon such application, such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

"(i) there is reasonable cause to believe, based upon information be'ieved to be reliable, that a specific criminal act has been committed or is being committed;

"(ii) the information is sought exclusively for use in a Federal crimnal investigation or proceedng concernng such criminal act; and

"(iii) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such criminal act.

"However, the Secretary may decline to disclose any return information under this paragraph if he determines and certifies to the court that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(C) DUTY OF THE SECRETARY.—The Secretary or his designee shall disclose to the appropriate attorney for the Government (referred to in subsection (B) above) such return information ordered disclosed pursuant to paragraph (1) (1) (A) of this subsection as soon as practicable following receipt of an ex parte court order issued pursuant thereto.

"(D) FURTHER DISCLOSURE.—An attorney for the Government (referred to in subsection (B) above) may further disclose any return information, which has been disclosed to him pursuant to an ex parte order, to such other Federal Government personnel or witness as he deems necessary to assist him during the criminal investigation or in preparation for the administrative, judicial, or grand jury proceeding which formed the basis for such order.

"(2) DISCLOSURE OF NONRETURN INFORMATION.—

"(A) Upon written request from the head of a Federal agency, the Inspector General thereof, or in the case of the Department of Justice, the Attorney General or his designee, the Secretary shall disclose nonreturn information as soon as practicable to officers and employees of such agency personally and directly engaged in, and solely for their use in, or preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) described in paragraph (1)(A). Such request shall set forth—

"(i) the name and address of the taxpayer with respect to whom such nonreturn information relates;

"(ii) the taxable period or periods to which the nonreturn information relates;

"(iii) the statutory authority under which the proceeding or investigation is being conducted, and

"(iv) allegations of criminal conduct giving rise to the proceeding or investigation.

"However, the Secretary may decline to disclose any nonreturn information under this paragraph if he determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(B) The head of an agency, an Inspector General, or the Attorney General or his designee may further disclose such nonreturn information to such Federal Government personnel or witness as he deems necessary to assist him during the criminal investigation or in preparation for the administrative, judicial, or grand jury proceeding which formed the basis for such request.

"(C) For purposes of this paragraph, the name, address, and social security number of the taxpayer, whether a taxpayer filed a return for a given year or years, and whether there is or has been a criminal investigation of a taxpayer shall be treated as nonreturn information.

"(3) SECRETARY'S DUTY TO DISCLOSE INFORMATION CONCERNING POSSIBLE CRIMINAL ACTIVITIES.—

"(A) The Secretary shall disclose as soon as practicable and in writing nonreturn information which may constitute evidence of a violation of Federal criminal laws to the extent necessary to apprise the head of the appropriate Federal agency or his designee charged with the responsibility for enforcing such laws. For purposes of the preceding sentence, the name and address of the taxpayer shall be treated as nonreturn information.

"(B) In addition to the above disclosures, when the Secretary makes a recommendation to the Department of Justice for prosecution for violation of the Internal Revenue Code, any return or nonreturn information reviewed, developed, or obtained during the tax investigation, which information may constitute evidence of a violation of Federal criminal laws, shall be furnished to the Department of Justice.

"(C) However, the Secretary may decline to disclose any information under the above paragraphs if he determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.

"(4) USE IN JUDICIAL OR ADMINISTRATIVE PROCEEDING.—Any information obtained under paragraphs (1), (2), or (3) may be entered into evidence in accordance with the Federal Rules of Evidence or other applicable law in any administrative, judicial, or grand jury proceeding pertaining to enforcement of a specifically designated Federal criminal statute (not involving tax administration) or any ancillary civil proceeding to which the United States or any agency thereof is a party. Any such information may be disclosed to the extent required by order of a court pursuant to section 3500 of Title 18, United States Code, or Rule 16 of the Federal Rules of Criminal Procedure, or other applicable discovery requirements, such court

being authorized in the issuance of such order to give due consideration to congressional policy favoring the confidentiality of return and nonreturn information as set forth in this title. However, any information obtained under paragraphs (1), (2), or (3) shall not be admitted into evidence in such proceeding if the Secretary determines and notifies the Attorney General or his designee or the head of such agency that such admission would identify a confidential informant or seriously impair a civil or criminal tax investigation, unless a court shall otherwise direct such disclosures."

SEC. 5. Subsection (i), section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103), is amended by adding new paragraphs (5), (6) and (7) and by renumbering existing paragraphs (5) and (6) accordingly as paragraphs (8) and (9):

"(5) EMERGENCY CIRCUMSTANCES.—Under emergency circumstances involving an imminent danger of physical injury to any person, serious physical damage to property, or flight from prosecution, the Secretary or his designee may disclose information, including return information, to the extent necessary to apprise the appropriate Federal agency of such emergency. As soon as practicable thereafter, the Secretary or his designee shall notify the Department of Justice of his actions with respect to this paragraph, and the Department shall thereupon notify the appropriate United States district court or magistrate of such disclosure pursuant to emergency circumstances.

"(6) ASSISTANCE OF IRS IN JOINT TAX AND NONTAX INVESTIGATIONS.—No portion of this section shall be interpreted to preclude or prevent the Internal Revenue Service from assisting the Department of Justice or any other Federal agency in joint tax and nontax investigations of criminal matters which may involve income tax violations, nor shall any portion of this section be interpreted to preclude or prevent the Internal Revenue Service from investigating or gathering relevant information concerning persons engaged in criminal activities which may involve income tax violations.

"(7) REDISCLOSURE TO STATE AUTHORITY OF INFORMATION OBTAINED FOR FEDERAL CRIMINAL INVESTIGATION OR PROCEEDING.—

"An official authorized to apply for a disclosure under section 6103(i) may make application to a district judge or magistrate for an ex parte order to disclose to the appropriate State Attorney General or District Attorney any return or nonreturn information in his possession which is relevant to the violation of a State felony statute. The application shall set forth the name and address of the taxpayer, the taxable period or periods to which the information relates; a description of the information sought to be disclosed; and the State felony violation involved. Such judge or magistrate may grant such order if he determines on the basis of the facts submitted by the applicant that—

"(A) there is reasonable cause to believe, based upon information believed to be reliable, that a specific State felony violation has occurred or is occurring; and

"(B) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such violation."

SEC. 6. Paragraph (k)(4) of section 6103, Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended to read as follows:

"(4) DISCLOSURE TO COMPETENT AUTHORITY UNDER INTERNATIONAL CONVENTION.—Return or nonreturn information may be disclosed to a competent authority of a foreign government which has an income tax or gift and estate tax convention, treaty on mutual assistance, or other convention relating to the exchange of tax information with the United States but only to the extent provided in, and subject to the terms and conditions of, such treaty or convention. When return or nonreturn information is sought pursuant to the terms of a treaty on mutual assistance in criminal matters for use in an investigation or proceeding not related to the tax laws of the requesting foreign country, disclosure may be made for the use of officials of the requesting country, but only after a United States district judge or magistrate issues an ex parte order that there is—

"(A) reasonable cause to believe that the information sought may be relevant to a matter relating to the commission of a specific criminal act that has been committed or is being committed against the laws of the foreign country, and

"(B) that the information is sought exclusively for use in such foreign country's criminal investigation or proceeding concerning such criminal act."

SEC. 7. Section 7213 of the Internal Revenue Code (26 U.S.C. 7213) is amended by adding a new subsection (d), as follows, and by relettering existing subsection (d) as subsection (e):

"(d) It shall be an affirmative defense to a prosecution under this section that such disclosure of return or nonreturn information resulted from a good faith, but erroneous, interpretation of section 6103 while a Federal employee was acting within the scope of his employment."

SEC. 8. Subsection (a) of section 7217 of the Internal Revenue Code (26 U.S.C. 7217) is amended to read as follows:

"(a) GENERAL RULE.—Whenever any employee of a Federal agency knowingly, or by reason of negligence, discloses return or nonreturn information (as defined in section 6102(B)) with respect to a taxpayer in violation of the provisions of section 6103, such taxpayer may bring a civil action for damages exclusively against such agency. Whenever any person other than an employee of a Federal agency knowingly, or by reason of negligence, discloses return or nonreturn information with respect to a taxpayer in violation of the provisions of section 6103, such taxpayer may bring a civil action directly against such person. The district courts of the United States shall have jurisdiction of any action commenced under the provisions of this section."

SEC. 9. (a) Subsection (b), section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended by adding a new paragraph (4), as follows, and by renumbering existing paragraphs (4) through (9) accordingly:

"(4) COMBINED INFORMATION.—The term 'combined information' means any combination of taxpayer identity information described in paragraph (1)(b), and, or, nonreturn information described in paragraph (2).".

(b) Subsections (a), (b)(7) and (8), (d), (f), (g)(1), (3), (4), and (5), (h), (i)(6) and (7) as redesignated, (j)(3), (4), (5), and (6) of section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) are amended by striking "returns or return information" and "return and return information" wherever such terms appear and inserting in lieu thereof the terms "return information and nonreturn information" and "returns and nonreturn information", as appropriate.

(c) Subsections (c), (e)(6), (g)(2), (k)(1), (3), and (6), (p)(2)(B) and (3), (c)(I)(III), and the last sentence of subsection (d) of section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) are amended by striking the term "return information" wherever such term appears and inserting in lieu thereof the term "combined information."

(d) Subsections (h)(2)(B) and (4)(B) or section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) are amended by striking the word "such" and inserting in lieu thereof the word "the".

(e) Subsection (l)(1)(B) of section 6103 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended by striking the word "return".

(f) Subsection (b) of section 6108 of the Internal Revenue Code of 1954 (26 U.S.C. 6103) is amended by striking the term "return information (as defined in section 6103(b)(2))" and inserting in lieu thereof the term "combined information (as defined in section 6103(b)(4))".

(g) Section 7213 of the Internal Revenue Code of 1954 (26 U.S.C. 7213) is amended to strike the terms "return or return information" and "returns or return information" wherever they appear and inserting in lieu thereof the term "return and nonreturn information" and "returns and nonreturn information", as appropriate.

(h) Section 7217 of the Internal Revenue Code of 1954 (26 U.S.C. 7217) is amended to strike the terms "return or return information" and "returns or return information" wherever they appear and inserting in lieu thereof the terms "return information" or "return or nonreturn information," as appropriate.

SECTION-BY-SECTION SUMMARY OF PROPOSED AMENDMENTS TO 26 U.S.C. 6103, 26 U.S.C. 7213, AND 26 U.S.C. 7217

This bill would streamline and clarify provisions of the Internal Revenue Code governing access to tax information for use in non-tax criminal investigations and prosecutions. The bill combines the salient features of Senate-initiated proposals and those developed by the Carter administration. This compromise measure is based on more than eight months of study and hearings by four Congressional committees. Generally, the bill would clarify ambiguities in existing law, refine needlessly cumbersome procedures, and distinguish between privacy rights of individuals as contrasted with those of legal entities such as corporations. The modest changes proposed would substantially assist federal law enforcement authorities in combatting narcotics trafficking, organized crime and white-collar offenses involving large sums of money. At the same time, the bill preserves the safeguards for taxpayer privacy established in 1976.

Definitions of Protected Information [26 U.S.C. 6103(b)(1-3)]:

Existing law uses a baffling series of four terms to describe information held by IRS, i.e., "returns," "return information," "taxpayer return information," and "return information other than taxpayer return information." S. 2402 would clarify the law by adopting a workable two-part definitional structure.

Section 1. The new § 6103(b)(1) would describe the first category of protected tax information, "return information," which includes (A) returns of all taxpayers and (B) underlying records and information submitted by or on behalf of "individual taxpayers," to support the filing of a tax return.

Section 2. The second category of information held by IRS, "non-return information," is defined to encompass all information held by IRS not covered by the definition of "return information."

Section 3. The bill defines the term "individual taxpayer" as an individual or a legal entity with no more than two owners, shareholders, or members, such as a small, family-owned business.

Taken together, these three definitions simplify existing law by reducing the number of categories of information from four to two; moreover, the two new categories of information conform to the methods of obtaining access: "return information" requires a court order while "non-return information" may be obtained pursuant to a formal law enforcement request under (i)(2) or pursuant to a report of crime under (i)(3). The only substantive change made by the revised definitional structure is that the books and records of legal entities, such as banks and corporations, are made available under

(i)(2) or (i)(3); they are now available only under (i)(1), as are books and records of individuals.

The rationale for the distinction is that natural persons have greater privacy rights than do corporations or other entities. A similar distinction is made in the Privacy Act of 1974 (5 U.S.C. 552a) and the Financial Privacy Act of 1978 (12 U.S.C. 3401–3422), neither of which applies to corporate records. Moreover, records of corporations and other entities are normally subject to inspection by shareholders and others with an interest in the entity, as well as federal, state and local authorities; individual books and records are not. Furthermore, books and records of legal entities are normally maintained for purposes other than tax requirements; individual books and records are frequently maintained solely to comply with tax laws. Finally, the Fifth Amendment privilege against self-incrimination does not extend to legal entities.

For these reasons, S. 2402 accords a higher degree of protection to underlying books and records of individuals than to those of legal entities. Because legal entities comprised of only two persons, such as small, closely held businesses, are usually the alter ego of an individual, they are treated as individuals. Again, it should be noted that all tax returns are accorded the higher degree of protection without regard to the nature of the taxpayer; the distinction between individuals and entities applies only to underlying information, primarily financial books and records.

Disclosure Pursuant to Court Order [26 U.S.C. 6103(i)(1)]:

Section 4, Part 1. The revised § 6103(i)(1) preserves the structure of the existing court order provision. The modifications are intended only to clarify existing law and to make the literal terms of the statute comply with actual practice.

For example, the standards in existing (i)(1), if read literally, require a factual showing that cannot be made unless the prosecutor seeking access is already in possession of the information sought. Courts have interpreted this language in a commonsense fashion to require proof only of those facts a federal prosecutor can realistically be expected to demonstrate: that there is reasonable cause to believe a specific federal crime has occurred or is occurring, that there is reasonable cause to believe tax information is relevant to that offense, and that the information will be used exclusively for investigation and prosecution of that offense. S. 2402 would substitute these standards for those of existing law. Because this merely codifies present practice, it has no practical effect on taxpayer privacy or tax administration. It does, however, reduce the potential for widely varying judicial results and the extreme chilling effect that the unrealistic language of current law has on federal prosecutors who need tax information for legitimate law enforcement purposes.

The proposed standard is more reasonable, with the added safeguard of prosecutorial intervention. The main criticism of the present standard was that it was impossible to meet. Therefore, no one used it. Also, the proposed would eliminate the third requirement that the Government prove the financial information cannot be obtained from any other source. The fact is that the financial information is "available" elsewhere, but the Government would have to completely reconstruct a taxpayer's bank records to duplicate the information on the return. This third requirement of the present act also requires the Government to prove that the tax return was the most probative evidence of the crime to be proven. Since this section deals only with non-tax crimes, the tax return itself would never be the most probative evidence of the crime. Only the actual financial records would qualify. Thus an impossible standard would be deleted.

The new (i)(1) modifies the class of federal officials who may authorize an application for a court order. Existing law requires all such applications to be routed through Washington for approval before being presented to the court, a requirement which results in substantial delay and paperwork. The new (i))(1)(B) would permit United States Attorneys and Attorneys-in-Charge of Organized Crime Strike Forces in the field to present applications directly to the appropriate federal court for consideration.

S. 2402 would delete the authority currently possessed by all heads of federal agencies to approve (i)(1) applications, thereby centralizing application authority in a single agency, the Department of Justice, where it can be more effectively coordinated. Since 1976, only five applications for (i)(1) orders have been signed by non-Justice Department entities; this change will not, therefore, adversely affect federal agencies.

The revised (i)(1)(D) also clarifies existing law by explicitly providing that redisclosure can be made to those support personnel necessary to prepare for a criminal prosecution. This would not change existing practice.

Finally, the new (i)(1) provides that court orders may be granted by U.S. Magistrates as well as U.S. District Judges. Magistrates are now authorized to grant analogous applications such as those for search and arrest warrants.

Disclosure Pursuant to Formal Law Enforcement Request [26 U.S.C. 6103(i)(2)]:

Section 4, Part 2. The revised § 6103(i)(2) clarifies existing law governing requests for non-return information. As amended, (i)(2) would permit requests to be made by Justice Department officials in the field, as designated by the Attorney General, to avoid the necessity of routing all requests through Washington. It is anticipated that the Attorney General would authorize Assistant United States Attorneys and supervisory-level officials of investigative agencies to request non-return information, i.e., officials not directly involved in an investigation. In addition to the heads of agencies now authorized to request (i)(2) information, S. 2402 would grant similar authority to the fifteen Inspectors General whose mandate is to combat fraud, waste and abuse in federal programs.

The new (i)(2)(C) also authorizes these federal law enforcement officials to inquire whether a taxpayer filed a return for a given year and whether there is or has been a criminal investigation of the taxpayer. This will help avoid the waste of resources which has occurred where a court order is sought and obtained only to find that the taxpayer did not file a return for the year in question.

Finally, the revised (i)(2) would modify the factual showing required to support a disclosure of non-return information by substituting "the allegation of criminal conduct giving rise to the proceeding or investigation" for "the specific reason or reasons why such disclosure is or may be material to the proceeding or investigation." Like the (i)(1) court order requirement, a prosecutor cannot show the materiality of tax information to a case without access to the information sought.

IRS-initiated Disclosure [26 U.S.C. 6103(i)(3)]:

Section 4, Part 3. S. 2402 proposes two improvements to the procedure by which IRS initiates reports of non-tax crime to law enforcement authorities. First, the new § 6103(i)(3) would make such reports mandatory rather than discretionary. Second, the new (i)(3)(B) provides that when the IRS refers a tax case to the Department of Justice, it must also refer any evidence it has of non-tax crimes committed by the taxpayer. The purpose of the non-disclosure rule is to encourage taxpayers to report their incomes fully and honestly; taxpayers who evade taxes should not benefit from a policy enacted to encourage honest reporting. The proposed section requires the IRS to disclose criminal information it uncovers except return information. Under the present act, IRS is not required to disclose the information [and the evidence at PSI's hearing disclosed that they do not]. This section eliminates the Catch-22 situation of requiring an agency to request information without ever knowing what information exists. It also requires IRS to alert the Justice Department to criminal information.

Admissibility of Tax Information [26 U.S.C. 6103(i)(4)]:

Section 4, Part 4. Finally, section 4 of the compromise bill would amend (i)(4) of § 6103 to provide that tax information is admissible in judicial and administrative proceedings like other evidence rather than pursuant to special rules. The bill also clarifies that tax information is admissible in proceedings "ancillary" to criminal proceedings, i.e., those arising from the same course of conduct and involving the same parties. Civil proceedings ancillary to criminal proceedings include civil forfeiture or damage actions which may be pursued in addition to or in lieu of criminal prosecution.

The amendments to (i)(4) also clarify that tax information may be disclosed to a defendant pursuant to the Jencks Act, discovery provisions of the Federal Rules of Criminal Procedure or other discovery requirements. This explicitly protects a defendant's Due Process rights and is consistent with current practice.

EMERGENCY DISCLOSURE

Section 5, Part 1. S. 2402 would add three new paragraphs to § 6103(i). The new paragraph (i)(5) would permit IRS, in its discretion, to report to the appropriate federal agency any circumstances involving an imminent danger of physical injury to any person, serious property damage or flight from prosecution. This authority for disclosure in rare emergency situations is patterned on the similar provisions of the Financial Privacy Act of 1978 (12 U.S.C. 3414(b)) and, like the Financial Privacy Act, requires that all such disclosures be reported promptly to the appropriate federal district court.

JOINT INVESTIGATIONS

Section 5, Part 2. The new (i)(6) merely states that § 6103 does not preclude or prevent IRS from assisting or working jointly with federal law enforcement agencies in the investigation of non-tax crimes which may involve violations of federal tax laws. This does not change current law, but clarifies the law which now discourages such cooperation by the vague and uncertain language in the act.

DISCLOSURE TO STATE AND LOCAL AUTHORITIES

Section 5, Part 3. S. 2402 also proposes a new (i)(7) authorizing carefully limited redisclosure of tax information to State and local law enforcement authorities. This limited redisclosure would be permitted only as to information already obtained by federal law enforcement officials for a federal non-tax criminal investigation. If such information reflects a State felony violation, the federal official obtaining access would be authorized to go back to court and seek an order authorizing redisclosure to the appropriate State attorney general or district attorney exclusively for use in the investigation or prosecution of that State felony violation. Like other persons receiving tax information, the State attorneys general and district attorneys receiving tax information under (i)(7) would be subject to civil and criminal sanctions for any unauthorized use.

DISCLOSURE PURSUANT TO MUTUAL ASSISTANCE TREATIES

Section 6. S. 2402 would amend § 6103(k)(4) to permit disclosures to foreign govern-

ments pursuant to mutual assistance treaties for use in nontax criminal matters such as narcotics trafficking, thereby making it possible for federal officials to obtain reciprocal disclosure of foreign tax information. Such treaties, of course, must be ratified by the Senate. To further regulate this foreign access to tax information, the amended (k)(4) would require entry of an order by a U.S. district court, similar to that required by § 6103(i)(1), before a disclosure could be made. Paragraph (k)(4) presently authorizes similar disclosures to foreign governments for tax use pursuant to international tax conventions.

CRIMINAL PENALTIES

Section 7 would amend the criminal provision of the Internal Revenue Code, 26 U.S.C. 7213, to create an affirmative defense to prosecution where the disclosure of tax information in question was made pursuant to a good faith but erroneous interpretation of the law.

The new subsection would make it clear to federal employees that they need not fear criminal prosecution if they proceed reasonably and in good faith. Actually, this makes no practical change in existing law which requires a "willful" violation to sustain a conviction. It would, however, reduce the extreme chilling effect which present law has on legitimate disclosures.

CIVIL REMEDY

Section 8 would amend the civil remedy section of the Internal Revenue Code, 26 U.S.C. 7217, to make federal agencies, rather than individual federal employees, the defendants in suits alleging unauthorized disclosures of tax information. This change would conform § 7217 to the Financial Privacy Act of 1978 (12 U.S.C. 3417) and the Administration's proposed Tort Claims Act amendments.

Under present law, civil suits may be filed against both the federal agency and the employee involved. This creates a potential conflict of interest requiring retention of private counsel to represent the employee. Moreover, it is unduly harsh to place federal employees who work with tax information regularly in the position of risking financial ruin daily for any mistaken disclosure.

Of course, federal employees would continue to be subject to administrative sanctions, including dismissal, for any negligent disclosure as well as criminal prosecution for any willful, corrupt or malicious abuse of tax information.

CONFORMING AMENDMENT

Section 9. The final section of the compromise bill is a technical conforming amendment to make the remaining provisions of § 6103 consistent with the new two-part definition of tax-related data held by IRS.

DISCLOSURE PROVISIONS—COMPARISON OF EXISTING LAW TO NUNN PROPOSAL

26 USC 6103 EXISTING LAW	NUNN PROPOSAL	COMMENTS
(a) General Rule—"Returns" and "return information" shall be confidential, and no person who had had access to returns or return information shall disclose the returns or information, except as authorized in § 6103.	Change in nomenclature to reflect new terms "return information" and "non-return information" vice "returns" and "return information."	
(b) Definitions		
(1) Return—Tax or information return, declaration or estimated tax or claim for refund, or claim for refund, or amending or supplement thereto, including supporting schedules, attachments, or lists which are supplemental to, or part of, the filed return.	(1) Return information—Includes tax returns and supporting documentation now covered under "return" and "any information provided by or on behalf of an individual taxpayer [including natural persons or corporatives, partnership, association, union or other entity consisting of no more than 2 owners, shareholders, partners, or members] to whom such information relates." (See (b)(3) below.)	The 3 existing definitions are reduced to 2. DOJ must obtain an ex parte order to gain access to tax returns, supporting submissions, or any other information submitted to IRS with respect to an individual or a small corporation, partnership, association, union, or other entity made up of no more than two members. The records of a small corporation owned by a man and his wife, for example, will be protected by the court order provision. Records of a large corporation other than tax returns and other accompanying documents required by law to be supplied to IRS (in which privacy expectations are less because a number of persons have access to the information) would not be covered by a court order but would require a formal request from the DOJ to IRS.
(2) Return Information—A taxpayer's identity; the nature, source or amount of his income, payments, receipts, deductions, exemptions, credits, assets, liabilities, net worth, tax liability, tax withheld, deficiencies, overassessments, or tax payments; whether the taxpayer's return was, is being, or will be examined or subject to investigation or processing; any other data received, recorded, prepared, or collected by, or furnished to a determination of tax liability; and written determination, or any background file document relating to such determination, which is not open for public inspection.	(2) Non-Return Information—Any other information in possession of IRS except data in a form which cannot be used to identify, directly or indirectly, a particular taxpayer.	Information which does not identify a particular taxpayer, such as statistical data and rulings which do not identify the taxpayer, may be disclosed without a court order.
(3) *Taxpayer return information*—Return information (as in (2)) which is filed with, or furnished to, IRS by or on behalf of the taxpayer or to whom such information relates.	(3) Individual Taxpayer—Any natural person or a corporation, partnership, association, union, or other entity consisting of no more than 2 owners, shareholders, partners, or members.	Carter administration and other witnesses advocated keeping the books and records of small corporations, etc., within the court order provision since these usually are, for all practical purposes, owned by a single individual, who has an expectation that these records will remain private. In the case of larger corporations, the courts have made clear that no such privacy expectation is present.
(i) Disclosure for administration of Federal laws not relating to tax administration.		

DISCLOSURE PROVISIONS—COMPARISON OF EXISTING LAW TO NUNN PROPOSAL—Continued

26 USC 6103 EXISTING LAW	NUNN PROPOSAL	COMMENTS
(1) Non-tax criminal investigation—	(1) Disclosure of return information	Disclosure of return information would be permitted only to Justice Department personnel, not to those of other federal agencies as now permitted, and only for use in a criminal proceeding or investigation. This provides an additional check on the appropriations and legality of disclosure.
(A) Information from taxpayer—Upon grant of an ex parte order by a Federal district court judge, a return or taxpayer return information shall be open, but only to the extent necessary as provided in the order, to officers or employees of a Federal agency who are personally and directly engaged in—and solely for their use in—preparation of any administrative or judicial proceeding (or investigation which may result in such a proceeding) pertaining to the enforcement of a specifically designated Federal criminal statute	(A) Return information shall be disclosed pursuant to an ex parte order of a Federal district court judge or magistrate, to officers and employees of the Justice Department who are personally and directly engaged in and solely for their use in preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) pertaining to the enforcement of a specifically designated federal criminal statute not involving tax administration).	Magistrates, who may issue search warrants, would be allowed to issue ex parte disclosure orders as well as district judges.
	The order may provide for continuous disclosure if justified under subparagraph (B) (iii) [i.e., there is reasonable cause to believe the information may be relevant to a matter relating to commission of a criminal act.]	The present statute had a provision which included return information which had been loosely interpreted to cover taxpayer books and records, accountants' books and records, corporate records, third-party interviews, tips from other agencies and other material by law to provide IRS. Thus the present act had the unfortunate result of putting IRS in the position of discovering bribery, embezzlement, union payoffs, etc. in financial records of organizations but not being able to turn it over or tell the Justice Department about it.
(B) Application for order—The head of any Federal agency described in (A) or, if the Justice Department, the AG, Deputy AG, or Assistant AG, may authorize an application for an ex parte order.	(B) Application for order—The Attorney General, Deputy AG, an Assistant AG, a United States Attorney, or the Attorney-in-charge of a Criminal Division Organized Crime Strike Force may authorize an application for an ex parte order.	Applications for ex parte orders could be made only by certain DOJ officials, not by officials of other agencies. This is an additional privacy safeguard not in existing law.
The judge may grant the order if he determines on the basis of facts submitted by the applicant that—	The judge or magistrate may grant the order if he determines on the basis of facts submitted that—	The existing standards require DOJ to describe with specificity tax information that its attorneys have never seen. This leads to a "catch-22" situation. The proposed changes would establish standards similar to those now required under the federal wire tap statutes. While they would eliminate the "catch-22" aspects, they are high enough to protect against indiscriminate violations of individual privacy.
(i) there is reasonable cause to believe, based on information believed to be reliable, that a specific criminal act has been committed;	(i) [no change]	
(ii) there is reason to believe that such return or return information is probative evidence of a matter in issue related to the commission of such criminal act; and	(ii) the information is sought exclusively for use in a federal criminal investigation or proceedng concernng such act; and	
(iii) the information sought to be disclosed cannot reasonably be obtained from any other source, unless the information constitutes the most probative evidence of a matter in issue relating to the commission of such criminal act.	(iii) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such criminal act.	The proposed standard is more reasonable with the added safeguard of prosecutorial intervention. The main criticism of the present standard was that it was impossible to meet. Therefore, no one used it.
However, IRS shall not disclose any return or return information if it determines and certifies to the court that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.	No change.	Also we've eliminated the third requirement that the Government prove the financial information cannot be obtained from any other source. The fact is that the financial information *is* "available" elsewhere but that the Government would have to completely reconstruct a taxpayer's bank records to duplicate the information on the return. This third requirement of the present act also requires the Government to prove that the tax return was the most probative evidence of the crime to be proven. Since this section deals only with non-tax crimes, the tax return itself would never be the most probative evidence of the crime. Only the actual financial record would qualify. Thus an impossible standard would be deleted.
No similar provision.	(C) Duty of IRS—IRS shall disclose to the appropriate Justice Department attorney such information ordered disclosed as soon as practicable following receipt of the ex parte order.	Witnesses testified that even when an order is obtained under existing § 6103, IRS has taken inordinate time to comply, even to the point of jeopardizing criminal trials. This new provision would remedy those delays.
Further disclosure is governed by (1) (1) (A) above.	(D) Further disclosure—The government attorney may further disclose return information to such other federal government personnel or witness as he deems necessary to assist him in a criminal investigation or in preparation for the administrative, judicial or grand jury proceedng upon which the ex parte order is based.	Essentially, there would be no change in further disclosure as a practical matter. This language is similar to that already contained in Rule 6(e) of the Federal Rules of Criminal Procedure, regarding the release of secret grand jury evidence.

DISCLOSURE PROVISIONS—COMPARISON OF EXISTING LAW TO NUNN PROPOSAL—Continued

26 USC 6103 EXISTING LAW	NUNN PROPOSAL	COMMENTS
(2) Return information other than taxpayer return information—Upon written request by agency heads authorized to apply for ex parte order [para. (1)(A)], information supplied by third parties (i.e., return information not supplied by or on behalf of a taxpayer) shall be disclosed to officers and employees of such agency personally and directly engaged in, and solely for their use in, preparation for any administrative or judicial proceeding (or investigation which may result in such a proceeding).	(2) Disclosure of nonreturn information. (A) Upon written request from the head of a federal agency, the Inspector General thereof, or the Attorney General or his designee in the case of the Justice Department, the IRS shall disclose nonreturn information as soon as practicable to officers and employees of such agency personally and directly engaged in, and solely for their use in preparation for any administrative, judicial, or grand jury proceeding (or investigation which may result in such a proceeding) as described in paragraph (1)(A).	The procedures for requesting nonreturn information would not be altered substantially. However, since the definitions would be changed, more information—such as corporate records, third party records, and witness interviews—could be produced pursuant to written request rather than by court order than is the case under existing law.
Such written request shall set forth— (A) the name and address of the taxpayer; (B) taxable period(s) to which the return information relates; (C) the statutory authority under which the proceeding or investigation is being conducted; and (D) the specific reason(s) why such disclosure is or may be material to the proceeding or investigation.	Such written request shall set forth— (i) the name and address of the taxpayer; (ii) the taxable period(s) to which the nonreturn information relates; (iii) the statutory authority under which the proceeding or investigation is being conducted; and (iv) allegations of criminal conduct giving role to the proceeding or investigation.	Since it is DOJ and not IRS which must determine if evidence is material to a criminal proceeding or investigation, the change would require DOJ merely to cite the conduct which gave rise to the request.
However, IRS shall not disclose any return or return information if it determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation. The name and address of a taxpayer may be disclosed under this paragraph.	No Change.	
No specific provision on further disclosure (see (i)(2) above).	(B) Further disclosure—The agency head, an I.G., or the AG or his designee may further disclose nonreturn information to such federal personnel or witness as he deems necessary to assist him in preparation for the administrative, judicial, or grand jury proceeding upon which the request is based.	There would be no substantial change in further disclosure except permit disclosure to witnesses, who often must be shown evidence during an investigation or in preparation for a criminal proceeding. This is the same procedure now in effect pursuant to Rule 6(e), Federal Rules of Criminal Procedure concerning the disclosure of secret grand jury evidence.
Under paragraph (i)(1), taxpayer identity information is considered to be taxpayer return information and subject to disclosure only by grant of an ex parte order. However, under paragraph (i)(2), taxpayer identity information may be disclosed in connection with the disclosure, pursuant to written request, of return information other than that provided by or on behalf of a taxpayer (i.e., third-party information).	(C) For this purpose, the name, address and social security number of a taxpayer, whether a taxpayer filed a return for a given year or years, and whether there is or has been a criminal investigation of a taxpayer shall be treated as nonreturn information.	Our section makes it clear that taxpayer identification information is available upon written request of the attorney for the government. This avoids problems such as those faced by law enforcement officers when trying to return stolen property according to social security numbers and IRS won't provide the information under the present act.
(3) Disclosure of return information concerning possible criminal activities.—IRS may disclose in writing return information (other than that provided by or on behalf of a taxpayer) which may constitute evidence of a violation of Federal criminal laws to the extent necessary to apprise the head of the appropriate Federal agency charged with enforcing such laws. The name and address of a taxpayer may be disclosed, even though supplied by the taxpayer, if there is third-party return information that may constitute evidence of a Federal crime.	(3) Secretary's duty to disclose nonreturn criminal information. (A) The IRS shall disclose, as soon as practicable and in writing, nonreturn information which may constitute evidence of a violation of federal criminal laws to the extent necessary to apprise the head of the appropriate federal agency or his designee charged with the responsibility for enforcing such laws. For this purpose, the name and address of the taxpayer shall be treated as nonreturn information.	Present law merely permits IRS to disclose third-party criminal information to DOJ. The change would put an affirmative burden on IRS to carry out every citizens basic duty to report evidence of crime, except where the information is return information. Our section requires the IRS to disclose criminal information it uncovers except anything listed on the tax return itself and accompanying records. Under the present act IRS is not required to disclose the information [and the evidence at the PSI hearing disclosed that they didn't]. The tax return would still be inviolate except via court order. This section eliminates the "catch-22" situation of requiring an agency to request information without ever knowing what information exists. This section also would require IRS to alert the Justice Department to criminal information.
No similar provision.	(B) In addition to the above disclosures, whenever IRS recommends to DOJ a prosecution for tax law violation, it shall furnish to DOJ any return or nonreturn information reviewed, developed, or obtained during the tax investigation which may constitute evidence of a violation of federal criminal laws.	Once IRS has recommended a tax prosecution to DOJ, it can disclose tax information relating to the case. This minor alteration would only allow IRS, after it has recommended a tax case to DOJ for prosecution, the ability to give DOJ all information associated with that case.
IRS shall not disclose any return or return information if it determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.	(C) However, IRS may decline to disclose any information under the above paragraphs if it determines that such disclosure would identify a confidential informant or seriously impair a civil or criminal tax investigation.	No change in substance.

DISCLOSURE PROVISIONS—COMPARISON OF EXISTING LAW TO NUNN PROPOSAL—Continued

26 USC 6103 EXISTING LAW	NUNN PROPOSAL	COMMENTS
No similar provision.	(4) Use in judicial or administrative proceeding—Any information obtained under paragraphs (1), (2), or (3) may be entered into evidence in accordance with the Federal Rules of Evidence or other applicable law in any administrative, judicial, or grand jury proceeding pertaining to the enforcement of a specifically designated federal criminal statute (not including tax administration) or any ancillary civil proceeding to which the United States or any agency thereof is a party.	This section codifies the commonly accepted rise of tax returns obtained pursuant to 6103 in federal courts according to the appropriate rules evidence. This section would also provide a mechanism to transfer information concerning federal civil litigation to the appropriate federal authority. Under the present act, no such provision exists. GAO found, for instance, that the Government under the present act lost federal civil cases of substantial size because it could not obtain information from IRS. This section would provide a mechanism to transfer information in serious civil cases such as civil rights, anti-trust and fraud cases which are ancillary to a criminal proceeding.
No similar provisions.	Any such information may be disclosed to the extent required by order of a court pursuant to 18 USC 3500 or Rule 16 of the Federal Rules of Criminal Procedures, or other applicable discovery requirements, such court being authorized in the issuance of such order to give due consideration to congressional policy favoring the confidentiality of return and nonreturn information as set forth in this title. However, any information obtained under paragraphs (1), (2), or (3) shall not be admitted into evidence in such proceeding if IRS determines and notifies the AG or designee or the head of such agency that such admission would identify a confidential informant or seriously impair a civil or criminal tax investigation, unless the court shall otherwise direct such disclosure.	
No similar provision.	(5) Emergency circumstances—Under emergency circumstances involving an imminent danger of physical injury to any person, serious physical damage to property, or flight from prosecution, IRS may disclose information, including return information, to the extent necessary to apprise the appropriate federal agency of such emergency. As soon as practicable thereafter, IRS shall notify DOJ of this action, and DOJ shall thereupon notify the appropriate federal district court or magistrate of the disclosure.	This section allows IRS to disclose any information to the appropriate agency in circumstances where a threat exists of injury to a person, serious damage to property, or flight from prosecution. This obviates problems that exist under the present law where even threats of assassination couldn't be disclosed without elaborate and time-consuming procedures. This section requires that after the emergency disclosure, the Government notify the appropriate court of the disclosure.
No similar provisions.	(6) Assistance of IRS in joint tax and nontax investigations—No portion of §6103 shall be interpreted to preclude or prevent IRS from assisting any other federal investigative agency in investigations of criminal matters which may lead to income tax violations, or from investigating or gathering relevant information concerning persons involved in such criminal activities.	This section makes it clear on the face of the statute that IRS is free to work jointly with other government agencies in combating crime. This is to obviate the need to process a Title 26 Grand Jury request simply to obtain the assistance of IRS. Hearing testimony revealed that the Grand Jury request process took upwards of one year just to obtain the serviecs of IRS in a criminal case.
	(7) Disclosure to State authority upon certification of evidence of a State felony violation—the official to whom disclosure has been made may apply to a district court for an ex parte order to further disclose to a State Attorney General or district attorney any return or nonreturn information that is relevant to a violation of a State felony statute. The application shall set forth the name and address of the taxpayer, the relevant taxable period(s), the State felony violation and statute, and a description of the information sought to be disclosed.	This section gives the government a mechanism to provide evidence of state crimes to the appropriate authorities. The present act contained no such provision. This section provides for a court-authorized procedure to give evidence of state crimes to state authorities. Under the present act, for instance, evidence of bribing a policeman in the hands of IRS should not be given to the appropriate state authorities. Our revision provides a mechanism to accomplish this which includes a court order as a privacy safeguard.
No similar provision.	The order for disclosure to State authorities may be granted if the judge or magistrate finds on the facts submitted that— (A) there is reasonable cause to believe, based on information believed to be reliable, that a specific state felony violation has occurred; and (B) there is reasonable cause to believe that the information may be relevant to a matter relating to the commission of such violation.	

DISCLOSURE PROVISIONS—COMPARISON OF EXISTING LAW TO NUNN PROPOSAL—Continued

26 USC 6103 EXISTING LAW	NUNN PROPOSAL	COMMENTS
No similar provisions.	(k)(4) Disclosure to competent authority under international convention—Return or nonreturn information may be disclosed to competent authority of a foreign government which has a tax convention, mutual assistance treaty, or other convention relating to the exchange of tax information with the U.S. but only to the terms of the agreement. Disclosure of return or nonreturn information sought pursuant to a treaty or convention for use in non-tax criminal matters may be made only after a U.S. district judge or magistrate issued an ex parte order that there is— (A) reasonable cause to believe that the information may be relevant to a matter of a specific criminal act that has been committed or is being committed against the laws of the foreign country, and (B) that the information is sought exclusively for use in such country's criminal investigation or proceeding concerning criminal act.	This section creates a mechanism to allow the Government to perform according to mutual assistance treaties it has entered into with foreign countries to exchange criminal evidence. Under the present act, IRS refused to give criminal evidence to the Justice Department so that it could comply with this country's mutual assistance treaties.
	(Criminal Penalty for Disclosure)	
(a)(1) It shall be unlawful for any present or former officer or employee of the federal government to willfully disclose any return or nonreturn information except as authorized in 26 USC 6103. A violation is punishable by a fine not exceeding $5,000 or 5 years in prison, or both, together with the costs of prosecution, and any person convicted of a violation shall be discharged from Government employ.	No change.	
	(d) It shall be an affirmative defense that such disclosure of return or nonreturn information resulted from a good faith, but erroneous, interpretation of section 6103 while a federal employee was acting within the scope of his employment.	IRS agents testified that section 6103 is very technical and detailed, and that IRS' interpretations of the section have been confusing to them. Therefore, rather than risk violating 7213, which contains no good faith defense, they are "gun shy" and reluctant to disclose criminal evidence even when, as a technical, they are permitted to do so. Therefore, a good faith defense would be added to 26 USC 7213.
	(Civil Penalties for Disclosures)	
(a) General rule—Whenever any person knowingly, or by reason of negligence, discloses a return or nonreturn information in violation of section 6103, the taxpayer may bring a civil action for damages against such person.	(a) General rule—Whenever any Federal employee knowingly, or by reason of negligence, discloses return or nonreturn information in violation of section 6103, the taxpayer may bring a civil action for damages exclusively against the agency employing that employee. Whenever any person other than a Federal employee discloses return or nonreturn information in violation of section 6103, the taxpayer may bring a civil action directly against such person.	The change shifts liability for damages for damages for authorized disclosure in the case of a Federal employee from the individual employee to the Government.

THE WHITE HOUSE,
Washington, D.C., September 9, 1980.

Hon. SAM NUNN,
Chairman, Permanent Subcommittee on Investigations, Committee on Government Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of August 19 and the attached revisions to the tax information disclosure bills which you and Senator Chiles have introduced. If enacted, these bills will substantially assist law enforcement efforts while protecting legitimate taxpayer privacy interests.

I greatly appreciate the efforts you and your staff have made to accommodate our concerns regarding your original bills. Your revisions strike a balance between law enforcement needs and privacy protections. However, I still have reservations about the advisability of making federal tax information available to state law enforcement authorities. We recognize that your bills contain several restrictions on the redisclosure of tax information. Nevertheless, we remain concerned that wider dissemination of this information could result in its misuse and substantial infringement of taxpayers' privacy.

In my 1977 Message to the Congress on Drug Abuse, I stated that I would support legislation eliminating the impediments to law enforcement created by the Tax Reform Act of 1976 if we could at the same time protect legitimate privacy interests. In fulfillment of that commitment, and with the one reservation I have expressed, I wholeheartedly support your tax disclosure bills as revised, and recommend their passage.

Sincerely,

JIMMY CARTER.

● Mr. CHILES. Mr. President, I am very pleased to join Senator NUNN in introducing this legislation which seeks to return the Internal Revenue Service to its former role as a full-fledged partner in the Federal law enforcement effort. If we are serious about fighting organized crime, particularly the sophisticated and well-financed narcotics traffickers, it is essential that the IRS actively and aggressively participate. In recent years this has not been the case. Part of the reason for IRS' noninvolvement is the disclosure provisions enacted in the Tax Reform Act of 1976. The measure we are proposing today aims to remove the statutory restrictions that have hamstrung the IRS, while maintaining adequate safeguards to protect the privacy of individual tax returns.

The failure of the IRS to join in nontax law enforcement efforts and the crippling effects of this nonparticipation were graphically illustrated in a series of hearings by the Permanent Subcommittee on Investigations concerning illegal narcotics profits and in a hearing on the IRS which I chaired for the Appropriations Subcommittee on Treasury, Postal Service, and General Government. As we examined the illegal drug trade and its unchecked growth, it was apparent the resources of the IRS are sorely missed. Equally apparent was the unique and indispensable function the IRS can perform in identifying and immobilizing narcotics traffickers.

I am vitally concerned that the staggering growth in the drug trade be stopped. I am alarmed just as any citizen should be, but the problem takes on

a special significance for me since my State is on the cutting edge in the drug war. Florida is where the smugglers land and the murders occur and the illicit dollars buy everything in sight. Florida is now where the TV news shows go to portray the violence and huge profits of organized crime. Florida is now the subject of magazine articles with titles like, "Miami's Murderous Drug War." My State has been invaded by the traffickers, the hoodlums and the hired killers and I do not like it one bit.

The locale may be Florida but the problem is a truly national one. If the flow of narcotics is not stopped and the drug-smuggling rings are not smashed then no one in this country is safe from the specter of illicit drugs in their community and even in their family. For as the drugs flood this country in ever greater amounts, there is no segment of society, no income level, no age group that is immune. If we do not step out of complacency and commit every resource to this battle, then each of us must be ready to face the price of defeat.

It is difficult to look at the immense scope of the drug trade and the formidable task of containing it and then attempt to talk of a solution. Obviously there is no one solution. There is no single step we can take that will assure success. Rather the point is we should be taking every step possible that promises to improve our drug law enforcement capacity. Getting the IRS, with its unique capability to pierce the financial transactions of the bigtime drug dealers, back into the act is one action we should take right away. To accomplish this we must undo those restrictions which have prevented the IRS from playing an effective role in drug law enforcement.

In the Tax Reform Act of 1976, Congress took necessary steps, in light of the Watergate disclosures, to insure the privacy of tax returns. However, the unintended effect of these provisions has been to severely limit the cooperation of the IRS with the Justice Department and thus greatly hamper Federal narcotics investigative efforts. The General Accounting Office has pointed out that the financial expertise and knowledge of money flow, which only IRS possesses, is vital in pursuing major narcotics traffickers. Former Attorney General Benjamin Civiletti, in delivering the Alfred P. Murrah lecture on the administration of justice, "Post-Watergate Legislation in Retrospect," stated:

> Before the Tax Reform Act of 1976, financial information in the possession of the Internal Revenue Service—information filed by taxpayers as well as information collected by the Service in the course of its audits and investigations—was an important resource for criminal investigators and prosecutors in the Justice Department. Money is the medium in which most crimes are transacted, and this is especially true of the federal crimes that merit the greater part of our investigatory effort—organized crime, and white collar crime and narcotics trafficking. Before the Tax Reform Act of 1976, financial information in the possession of the Internal Revenue Service helped us to piece together and prove in court the paper trails—the illicit financial transactions—that are characteristic of these crimes. Moreover, the skilled personnel of the Internal Revenue Service were and still are the best and most numerous financial investigators in the Federal Government, and before the Tax Reform Act of 1976 we relied upon them heavily to unravel the complex transactions that conceal both tax and nontax crime. But the disclosure restrictions imposed by the Tax Reform Act of 1976 have limited our access both to the financial information in the possession of the IRS and to the assistance of these experts.

The task of pursuing and prosecuting the drug smuggler is difficult enough without first having to face the challenge of penetrating what General Civiletti characterized as the "wall of secrecy" between the IRS and the Department of Justice.

As a result of the Tax Reform Act and its implementation by the Internal Revenue Service, a number of negative effects from an enforcement standpoint have developed:

The IRS is now unable to adequately advise other Federal agencies of the cases it is working on, thus precluding close coordination and encouraging needless duplication of effort.

It has become unreasonably difficult for prosecutors and investigators from other agencies to obtain financial information held by the IRS that would significantly assist in the prosecution of major criminals.

It is extremely difficult for the IRS to provide to prosecutors or other Federal investigative agencies evidence concerning nontax criminal violations which the Service obtains in the normal course of its investigations.

In those relatively few instances when other agencies are able to work with the IRS, the time delays involved often undermine the benefits to be derived.

Perhaps the ludicrousness of the entire situation is best summed up by GAO's report that the IRS had literally a file drawer full of evidence of serious Federal nontax crimes which the Service had uncovered but which the statute prevents from being transmitted to Justice for investigation and prosecution.

The thrust of the legislation we are introducing is to remove the unnecessary impediments to effective law enforcement while protecting legitimate taxpayer privacy interests. This measure, similar to legislation we proposed in the previous Congress, has been refined and clarified, taking into account testimony received in both House and Senate hearings and input from the Carter administration. Our approach fully recognizes the primary function of the IRS, namely, to collect taxes, and the need of the American citizen to be assured of the confidentiality of his or her tax return.

This bill will allow the Justice Department access to tax information if such information is material to a lawful investigation. It will continue the important protection that a judge or magistrate review the legitimacy of such requests but will eliminate the current catch 22 situation in which the only way the Justice Department can gain access to such information is to prove that they already know what the information will show.

The bill provides that disclosure of information will be done in a timely fashion so as to end the delays that in the past have jeopardized criminal trials.

It mandates that the Internal Revenue Service has an affirmative duty to report to law enforcement agencies evidence of crime derived from information falling within one of the nonprotected categories.

Finally, the bill makes it clear that the IRS is free to work jointly with other Government agencies in combating crime.

If the growth of drug trafficking is such a threat to this Nation, as I am convinced it is, and if we are to reverse our current failure to contain the drug trade, there can be no higher priority than insuring that the full resources of the Federal Government are dedicated to combating this problem. With its unique capabilities and information, it is vital that the IRS be a full partner in the drug law enforcement effort. Redirecting the IRS to this task is something we can do right now that will materially improve our ability to fight the bigtime drug operators.

I would hope that Congress will act quickly on this legislation. I shall continue to do all I can to press not only for expeditious action on this bill but for a renewed commitment against the narcotics traffickers by the Federal law enforcement structure.●

● Mr. COHEN. Mr. President, I have joined my distinguished colleague Senator NUNN and other cosponsors in introducing legislation designed to correct a legitimate problem in our law enforcement system.

As the hearings which the Senate Permanent Subcommittee on Investigations held documented, the Internal Revenue Service, once an abundant source of information in legitimate investigations of criminal behavior, no longer cooperates to the best of its ability in lawful Government efforts to gather evidence of organized or white-collar criminal activity.

To a certain extent, the problem reflects an attitude within the IRS that that agency should concern itself only with tax collection and not be involved in assisting general law enforcement. There is nothing which Congress can do directly to change this in-house attitude, except highlight the deleterious effect it has upon the fight against organized and white-collar crime.

What Congress can do is amend the Tax Reform Act of 1976 and other laws which govern the flow of information between IRS and law enforcement agencies. These laws have failed to resolve the tension between effective exercise of Federal investigatory power and protection against invasion of privacy through illegitimate use of information held by the Government.

Clearly, there must be checks on the flow of information from IRS to other agencies. The 1976 act attempted to provide such controls by requiring a court order for the release of any information submitted voluntarily to IRS by or on behalf of a taxpayer. Moreover, any tax or other information acquired through independent IRS investigations may be turned over upon written request of an Assistant Attorney General.

The 1976 act was a significant effort at reform. However, the problem of distinguishing between the two categories of tax information has proved insurmountable in practice, resulting in nearly every law enforcement request taking the form of an ex parte order.

Another disturbing feature of the 1976 act is that it has resulted in a "catch-22" situation for Department of Justice attorneys: The existing standards require the Department of Justice to describe with specificity in their ex parte order applications tax information which its attorneys have never seen. Moreover, through no direct fault of the act itself, there has been a marked failure of the IRS to volunteer clear evidence of nontax criminal activities to jurisdictional agencies. The power to do so was explicitly granted in the act. But, because of severe penalties for unintentional, improper disclosures, IRS agents have been reluctant to disclose any information, regardless of its probative value in future criminal prosecutions.

The Constitution's silence on the issue of interagency disclosure of sensitive information has complicated the necessary tasks of achieving a workable balance of ofttimes competing interests. Our fundamental law values both privacy and effective law enforcement, but, in this instance, it is up to us to accommodate these interests through the legislative process. Experience has shown us that a number of changes in the present law are necessary to achieve this delicate balance.

The amendments to the 1976 act which I cosponsor today will alleviate the difficulty which law enforcement agencies have experienced in their attempts to obtain IRS information for legitimate investigations. The amendments clarify ambiguous definitions of the existing law by adopting a workable two-part definitional structure. Under this scheme, "return information" would be afforded a high degree of privacy by being available to the Department of Justice only upon issue of an ex parte order, while the IRS could disclose "nonreturn information," for example, corporate books and records, upon written request of selected investigative officials. This distinction reflects the greater privacy rights and fifth amendment privilege against self-incrimination which natural persons enjoy above corporations and other legal entities.

In addition, the amendments would require the IRS to disclose to relevant law enforcement officials nonreturn information indicating nontax criminal activity. Finally, they would restructure penalties for improper disclosure of tax information by establishing a "good faith" defense in criminal actions, and by conforming civil remedies to the structure of the Federal Torts Claims Act.

All these are welcome reforms. I have some concerns that the proposed amendments still leave room for differences in interpretation of what constitutes "information by or on behalf of the individual taxpayer" and "nonreturn information," and hope that a committee report and legislative history on the bill will provide guidance to those who must implement its provisions. Additionally, I believe that the bill should more clearly state that IRS' duty to reveal nonreturn information is within the context of administering the tax laws and reviewing files pursuant to Department of Justice request, so that the IRS' duty remains one of cooperation with law enforcement, not active initiation of investigations.

Recognizing these concerns, however, I believe that the bill we propose today is necessary to reaffirm our commitments to the goals of effective law enforcement, maximum protection of privacy rights, and confidentiality of tax information. By its controlled disclosure provisions and criminal sanctions for knowingly improper disclosure, this proposal insures the highest degree of protection of the public safety, while safeguarding legitimate privacy interests as well.●

By Mr. BAUCUS:

S. 733. A bill to establish a field office of the U.S. Customs Service and the Immigration and Naturalization Service at Glacier International Airport; to the Committee on the Judiciary.

DESIGNATION OF GLACIER INTERNATIONAL AIRPORT, MONTANA, AS AN INTERNATIONAL PORT OF ENTRY

● Mr. BAUCUS. Mr. President, I am presenting a bill today designating Glacier Park International Airport in Kalispell, Mont., as a port of entry. It is an appropriate place for the Customs Service and the Immigration and Naturalization Service to open new facilities in that area. I believe such a post could be filled by reassigning personnel; at most only one or two new people might have to be hired.

We are faced with a typical chicken-or-egg situation in Kalispell. Customs and Immigration says that service cannot be provided because there are not enough tourists and other travelers entering at Glacier Park Airport. Airlines and other air carriers do not land at the airport because there are no reliable customs and immigration services.

However, the log jam has now been broken. The city of Kalispell has obtained a firm commitment from a Canadian airline to offer scheduled service into the airport as soon as customs and immigration services are offered there. Now it is up to the Services to respond. If the private sector is correct, there will be enough traffic to warrant such action.

This is a modest proposal, but I think it is key to so many things we are doing in trying to promote tourism and trade, particularly with Canada. It is axiomatic that you get what you pay for. You want less tourism, you provide fewer services; you want more tourism, you have to provide better services. The returns, I believe, are great. Tourism is an enormous contributor to our balance of trade and Canada is a natural friend and our primary source of tourism and trade. Kalispell and that beautiful part of our country are ready, willing and eager to contribute to the growth of tourism in America. It has Canadians interested in coming down to visit and the private sector interested and committed to providing services. It is the Government's turn to do its share.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 733

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, Glacier International Airport in Kalispell, Montana, is designated an international airport of entry. The Commissioner of Customs, in conjunction with the Commissioner of the Immigration and Naturalization Service, shall establish a field office at Glacier International Airport and shall staff such office, to the extent feasible, by reassigning employees of the United States Customs Service or the Immigration and Naturalization Service.

(b) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.●

By Mr. WEICKER (for himself, Mr. PACKWOOD, Mr. HATCH, Mr. HAYAKAWA, Mr. BOSCHWITZ, Mr. GORTON, Mr. NICKLES, Mr. RUDMAN, Mr. D'AMATO, Mr. NUNN, Mr. HUDDLESTON, Mr. BUMPERS, Mr. SASSER, Mr. BAUCUS, Mr. LEVIN, Mr. TSONGAS, and Mr. DIXON):

S.J. Res. 47. Joint resolution to authorize and request the President to issue a proclamation designating the week beginning May 10, 1981, as "National Small Business Week"; to the Committee on the Judiciary.

NATIONAL SMALL BUSINESS WEEK

● Mr. WEICKER. Mr. President, today I am introducing along with all the members of the Select Committee on Small Business a Senate joint resolution asking the President to proclaim the week of May 10–16, "National Small Business Week."

The Nation is now beginning the tremendously complex and difficult task of establishing a course of economic recovery. This effort requires the participation and contribution of all our people.

Small businesses, though burdened by regulations, racked by inflation, and severely hampered by a discriminatory tax policy, are doing their part.

The goals of any successful economic recovery program must be to improve productivity, encourage innovation, and spur increased employment. In spite of the economic problems they face, small businesses have consistently been the leaders in those areas. Small business regularly accounts for about half of U.S. total output, virtually all new private sector jobs, and nearly half of all innovation.

These outstanding small business people are the embodiment of the entrepreneurial spirit that has made our free market system grow.

There is every indication that that spirit and that tradition of contribution will continue to thrive. Given the proper incentives and relieved of existing economic roadblocks, small business has the greatest potential for reaching the desired objectives of our economic recovery.

The small business machine shops, the

local realtor, the grocer or the druggist, the high-tech firm working out the answers to tomorrow's problems may, taken alone, seem an insignificant piece of our Nation's economic recovery. Taken together, as the small business economy, they are the key to our economic future. Indeed, the health of our economy depends on the health of small business.

I am not here today to ask for congressional initiatives to keep small business healthy. That work has already begun. Through capital cost recovery measures, tax reforms, and incentives, S. 360, which I introduced here last month, seeks to alleviate some of the pressing problems and inequities currently stifling small business.

No, today I am here to ask that we give small business support of a different kind. Now more than ever, I believe it is important that we as a nation demonstrate our recognition and appreciation, not only of the contributions small business has made in the past, but of those it will make in the crucial years ahead.

By proclaiming the week of May 10–16, "National Small Business Week," we can focus our attention on those contributions, and recognize the even more outstanding accomplishments of small business men and women to our economy, to our communities, and to our lives.●

SMALL BUSINESS WEEK RESOLUTION

● Mr. NUNN. Mr. President, I am pleased to join Chairman WEICKER and the other members of the Small Business Committee in sponsoring the resolution proclaiming "National Small Business Week." Through this resolution, Congress is recognizing the contributions of the small business sector to the American economy, and reaffirming their importance to the free enterprise system, and society.

We, on the Small Business Committee, are dedicated to these goals, and are determined to do everything we can to carry these initiatives forward. We will continue to work to make small business and entrepreneurship, and consequently our country, flourish during the remaining years of this century.

During the past year, there is no question that small business has received more attention than at any time during the past generation.

A primary cause has been the rapid growth of all types of small business organizations.

Another reason was the initiatives of the Senate Small Business Committee.

A third factor in the new prominence of small business has been the White House Conference on Small Business.

Last year, based on the recommendations of the White House Conference, Congress recognized some particular needs of small business and approved legislation providing fundamental reforms in basic Government operations which strengthened the climate for them. Among these bills are:

A requirement that Federal paperwork be cut by 25 percent within 3 years (Public Law 96–511);

Tight new constraints on the issuance of Federal regulations, including the requirement of a separate tier of less onerous standards for small businesses (Public Law 96–354);

Increased strength of the Office of SBA Advocacy to give small firms a greater voice in Washington decision-making (Public Law 96–302);

Providing for the payment of legal expenses for firms which successfully contest Federal regulations in court (Public Law 96–481);

The most extensive securities deregulation bill in 40 years, to make it easier to raise venture capital for small business (Public Law 96–477);

A patent reform bill permitting small firms to retain discoveries made in the course of Government contracts (Public Law 96–517); and,

A strong program of export assistance to encourage small business entry into world markets (Public Law 96–477).

Much more remains to be done, however. The Nation's two major economic problems of high inflation and gyrating interest rates, like a two-headed monster, are eating away at the economic foundation of many small businesses. The Congress must work hard to alleviate the unique economic problems they face. As the ranking Democrat on the Senate Small Business Committee, I pledge to continue my efforts on behalf of small business in the 97th Congress. Adoption of this resolution can be another step in the process.●

Mr. BAUCUS. Mr. President, today a number of Senators and I are introducing a joint resolution proclaiming the week of May 10, 1981, as "National Small Business Week."

I am pleased to cosponsor this joint resolution since I believe very strongly that the small business community is the backbone of our economy and deserves recognition as such. I know that is certainly the case in Montana where most of the population is engaged in small business enterprise. This is particularly true if farmers and ranchers are included in the small business community.

I want to take this occasion to comment a little further about the small business community. It is timely that we introduce this joint resolution at this moment because in the Small Business Committee we also have been reviewing the administration's budget estimates for the Small Business Administration. A resolution gives us many nice words about support and appreciation toward small business, but it is in legislation that we see how sentiments are transformed into action.

We are in an era of cutting and balancing budgets. I fully support those efforts and have often indicated my desire to make sure the cuts are fair. In other words, all sectors of our society have to be dealt with equally and fairly and that includes the small business community. There is no doubt that it has received benefits from the Government and if we are cutting all benefits those will have to be cut, too.

I want to take this opportunity now to have printed in the RECORD the administration's revised fiscal year 1982 budget as recently given to us in the Small Business Committee. I believe this proposal reflects a real desire to cut budgets and not to spare any sector including the small business sector. Nonetheless, I am concerned by some of the decisions taken by the administration.

My first area of concern is disaster loans. Many, many Americans have been saved from economic ruin through the Small Business Administration's disaster loan program. It is a very successful program and one which actually pays for itself.

In my view, a disaster is never fair. It never strikes evenly. And that is where Government can come in to help. It reacts sympathetically to disaster to help those who have been badly hurt regain their economic foothold. That makes it possible for them to compete fairly. I am therefore, not happy with the administration's proposal to raise interest rates on all Federal disaster loans to the cost of money. I fail to see how this is fair.

There are a few other programs that I think should not be treated quite so harshly not only for the sake of fairness, but also because the returns are so great. The small business community is clearly acknowledged as being the source of most innovation and modern technology in our country. Yet assistance for innovation and technology has been literally knocked out entirely from the budget. In other words, help that a small businessman might have received to market and test his invention is no longer there.

So I think we have to deal with the small business community with more than just words. The community has to take its fair share of reductions. But let us be sensible and let us not knock out or seriously handicap programs that have proved their worth. That is the best way we can commemorate Small Business Week.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Budget Estimate—Fiscal Year 1982 (Revised)]

SMALL BUSINESS ADMINISTRATION

(Revised FY 1982 Budget—Congressional Submission Budget Overview)

INTRODUCTION

The Small Business Administration's FY 1982 budget request has been revised as part of the Administration's effort to reduce overall Federal spending. Reductions in the Business Lending program are consistent with the Administration efforts to control the expansion of Federal credit programs and to reduce dependence on the Federal Government as a supplier of credit. This revised budget also recommends policy changes related to the Small Business Development Center, Women's Business Enterprise and Disaster Lending programs. In addition, reductions have been recommended in other program and operating expenses as a part of the President's Economic Recovery Program.

GUARANTEED LENDING

The guaranteed lending program authority has been reduced 25 percent, from $4.2 billion to $3.2 billion in FY 1982:

[Billions]

Actual fiscal year 1980	Fiscal year 1981		Fiscal year 1982	
	Original	Revised	Original	Revised
$3.2	$4.2	$3.4	$4.2	$3.2

The reductions in guaranteed lending program authority will restrict the previously anticipated expansion of this program. However, SBA will develop a strategy to target the

guaranteed lending so as to optimize it's impact on the small business community.

SBA's policy was to expand vigorously the guaranteed lending program to provide the maximum financial assistance to all small businesses. SBA now proposes, as part of its revised FY 1982 budget submission, a selective expansion of the guaranteed lending program.

DIRECT LENDING

No major change in policy is proposed in SBA's direct lending program. Direct lending will still be targeted toward priority groups and markets, and a contingent fund will be used to supplement any shortfalls in meeting total lending goals to these priorities. Proposals to consolidate the different lending programs, and increase the direct loan interest rate to a rate comparable to the guaranty rate are being recommended.

	Actual fiscal year 1980	Fiscal year 1981		Fiscal year 1982	
		Original	Revised	Original	Revised
Disadvantaged	$172	$194	$169	$153	$102
Women	83	70	60	60	40
Handicapped	20	20	20	18	15
Other	85				
Priority markets		20	20	18	18
Contingent fund				50	50
SBIC	32	42	35	47	35
Total	392	346	304	346	260

The total direct lending program has been reduced from $346 to $260 million in FY 1982 to reflect the anticipated decrease in demand due to increased interest rates.

The budget effects of the FY 1981 direct and guaranteed lending reductions are reflected in the President's special message on rescissions and deferrals. This will reduce the FY 1982 Budget Authority Request and is an integral component of the Administration's comprehensive economic plan to constrain Federal credit and reduce overall spending.

SMALL BUSINESS DEVELOPMENT CENTERS

SBA's policy has been revised to retain the academic community as one of the resources available to provide management assistance to small businesses, but not to be the focal point for the future delivery of SBA's management assistance programs. Accordingly, funding for the SBDC program has been eliminated in the revised FY 1982 budget request. Continued funding of the SBI program delivered through colleges and universities is still recommended in the revised FY 1982 budget.

WOMEN'S BUSINESS ENTERPRISE

The revised budget has reduced contractual assistance funding for this program in FY 1981 and in FY 1982 from $3.1 million to $.9 million and $5.5 million to $.7 million respectively. Instead, SBA will integrate the Women's Program with ongoing Agency Programs and continue to assist the small businesses owned by women. A reduced Central Office staff will monitor and promote the effectiveness of SBA's existing programs in addressing the specific needs of women business owners.

DISASTER LENDING

The FY 1982 budget had included $50 million to fund the nonphysical disaster lending program, which includes businesses that suffer economic injury as the result of an adverse action precipitated by an act of Congress or Government regulation.

The revised FY 1982 budget proposes to eliminate the funding of the nonphysical disaster lending programs starting in the second half of FY 1981. However, small businesses which suffer these economic injuries are still eligible to receive assistance through SBA's regular business lending program. Legislation will be submitted to eliminate these programs.

In addition, the FY 1981 Disaster supplemental appropriation request has been withdrawn. Plans and policies are being formulated to ensure that the Disaster Loan Fund operates within its current budgetary resources for the remainder of FY 1981.

OTHER BUDGET REVISIONS

As part of the Small Business Administration's efforts in reducing Government spending the revised FY 1982 Congressional Submission recommends other reductions to our original submission. The following overview will highlight these reductions.

SALARIES AND EXPENSES

	Fiscal year 1981		Fiscal year 1982	
	Original	Revised	Original	Revised
In thousands of dollars:				
Compensation and benefits	$126,479	$125,032	$128,067	$121,203

By Mr. THURMOND:

S.J. Res. 48. Joint resolution to provide for the erection of an appropriate statue or other memorial in the Arlington National Cemetery to honor individuals who were combat glider pilots during World War II; to the Committee on Veterans' Affairs

MEMORIAL TO WORLD WAR II GLIDER PILOTS

Mr. THURMOND. Mr. President, I rise to introduce a joint resolution to provide for the erection of an appropriate statue or other memorial in the Arlington National Cemetery to honor individuals who were combat glider pilots during World War II. Today there are approximately 1,500 survivors of the 6,000 combat glider pilots trained for action during World War II.

Gliders were used to land men and material behind enemy lines during the airborne invasions of Sicily, Burma, Normandy, southern France, Holland, Luzon, and Wessel, Germany. Gliders were also used to resupply the surrounded 101st Airborne Division during that division's gallant defense of Bastogne. The casualty rate among these glider pilots was approximately 35 percent. The use of gliders in the Bastogne operation was one of the best kept secrets of World War II.

Therefore, I think it is appropriate that a memorial of some type be established along the approach of the Arlington National Cemetery.

The design, plans, and location of the statue or other memorial authorized shall be subject to the approval of the American Battle Monuments Commission and the National Commission on Fine Arts.

The maintenance and care of the memorial erected under the provisions of this joint resolution shall be the responsibility of the Secretary of the Army.

Mr. President, I urge that the Senate give this resolution early consideration.

ADDITIONAL COSPONSORS

S. 75

At the request of Mr. WALLOP, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of S. 75, a bill to amend the Internal Revenue Code of 1954 to encourage capital investment by individuals and corporations.

S. 155

At the request of Mr. SCHMITT, the Senator from Idaho (Mr. SYMMS) and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of S. 155, a bill to amend the Internal Revenue Code of 1954 to make additional interest from savings eligible for exclusion.

S. 181

At the request of Mr. CRANSTON, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 181, a bill to provide for the extension of the authorization of appropriations for the Head Start program.

S. 255

At the request of Mr. MATHIAS, the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 255, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

S. 395

At the request of Mr. WALLOP, the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 395, a bill to

amend the Internal Revenue Code of 1954 to provide estate and gift tax equity for family enterprises, and for other purposes.

S. 398

At the request of Mr. ARMSTRONG, the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 398, a bill to amend the Walsh-Healey Act and the Contract Work Hours Standards Act to permit certain employees to work a 10-hour day in the case of a 4-day workweek, and for other purposes.

S. 417

At the request of Mr. CRANSTON, the Senator from Wisconsin (Mr. PROXMIRE) and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 417, a bill to amend title 38, United States Code, to provide a new educational assistance program for persons who enter the Armed Forces after June 30, 1981, to modify the December 31, 1989, termination date for the Vietnam-era GI bill, and for other purposes.

S. 458

At the request of Mr. CRANSTON, the Senator from Maine (Mr. MITCHELL) and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 458, a bill to amend title 38, United States Code, to extend the period of eligibility for certain Vietnam-era veterans to request readjustment counseling, to extend the program of veterans readjustment appointments in the Federal Government, and to extend the educational assistance and rehabilitation program delimiting periods for Vietnam-era and service-connected disabled veterans, respectively, under certain circumstances.

S. 491

At the request of Mr. GLENN, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 491, a bill to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes.

S. 509

At the request of Mr. HELMS, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 509, a bill to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

S. 566

At the request of Mr. WALLOP, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 566, a bill to amend the Internal Revenue Code of 1954 to retain the oil percentage depletion rate at 22 percent.

S. 613

At the request of Mr. THURMOND, the Senator from North Carolina (Mr. HELMS) and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 613, a bill to amend section 1951 of the United States Code, and for other purposes.

S. 636

At the request of Mr. CRANSTON, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 636, a bill to clarify the Veterans' Administration's authority to recover certain health care costs, to extend the period of availability of funds committed under the Veterans' Administration program of assistance to new State medical schools, to authorize expansion of the scope of and epidemiological study regarding veterans exposed to agent orange, and for other purposes.

S. 650

At the request of Mr. MATHIAS, the Senator from Ohio (Mr. METZENBAUM) and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 650, a bill to require the Law Enforcement Assistance Administration to provide funds, as authorized to be appropriated under this act, to the mayor of the city of Atlanta, Ga., for extraordinary investigation expenses relating to the recent murders of children in that city.

S. 695

At the request of Mr. LUGAR, the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 695, a bill to amend the formula used for reapportionment.

SENATE JOINT RESOLUTION 20

At the request of Mr. SASSER, the Senator from New Jersey (Mr. WILLIAMS), the Senator from Mississippi (Mr. COCHRAN), the Senator from New Mexico (Mr. SCHMITT), the Senator from Rhode Island (Mr. PELL), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Carolina (Mr. HELMS), the Senator from Utah (Mr. HATCH), the Senator from Iowa (Mr. GRASSLEY), the Senator from South Carolina (Mr. THURMOND), the Senator from Tennessee (Mr. BAKER), the Senator from North Carolina (Mr. EAST), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of Senate Joint Resolution 20, a joint resolution to designate the month of April 1981 as "Gospel Music Month."

SENATE RESOLUTION 97—RESOLUTION RELATING TO NUMBER OF FULL-TIME EMPLOYEES AND CONSTRUCTION OF ADDITIONAL FACILITIES FOR THE SENATE

Mr. PROXMIRE (for himself and Mr. DECONCINI) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 97

Resolved, That after the date on which this resolution is adopted, the total number of full-time officers and employees of the Senate of the United States and full-time officers and employees in the Office of the Architect of the Capitol who are assigned to the Senate shall not exceed 7372. The Committee on Rules and Administration shall establish rules and regulations for the equitable allocation among the offices and committees of the Senate and the Office of the Architect of the Capitol of the total number of full-time officers and employees established by the preceding sentence.

SEC. 2. After the date of adoption of this resolution, no office building shall be constructed for the Senate, and no plans drawings, architectural engineering work, design work, or site preparation or acquisition for such an office building shall be initiated or implemented. The preceding sentence does not apply to the construction and completion of the Philip A. Hart Senate Office Building.

(The remarks of Mr. PROXMIRE on this resolution appear earlier in today's RECORD.)

SENATE RESOLUTION 98—RESOLUTION DESIGNATING "AMERICAN HISTORY MONTH"

Mr. BENTSEN submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 98

Whereas the study of history not only enlivens appreciation of the past but also illuminates the present and gives perspective to our hopes for the future;

Whereas the study of American history leads to a greater understanding of our national heritage; and

Whereas it is appropriate to encourage a deeper awareness of the great events which have shaped America, and a renewed dedication to the ideals and principles we hold in trust: Now, therefore, be it

Resolved, That February of each year is designated as "American History Month," and the President is authorized and requested to issue annually a proclamation to call upon Federal, State, and local government agencies, and the people of the United States to observe with appropriate programs, ceremonies, and activities.

AMERICAN HISTORY MONTH

Mr. BENTSEN. Mr. President, I am submitting a resolution today which would designate February of each year as American History Month.

During the Bicentennial, Americans everywhere experienced a renewed interest in the events and ideals which created this Nation. Born out of a love of freedom and dedication to the resistence of tyranny, the United States has successfully withstood all adversities to achieve a place of leadership and respect among the nations of the world. The contributions of hundreds of ethnic groups have built the society we cherish today as Americans. Without the leadership of the millions of citizens who used their creative abilities for the good of all, the record of our history would have been very different.

As we enter the decade of the 1980's, we sense a renewal of dedication to the spirit of freedom and individual rights. What better way to preserve that dedication than to set aside a special time to commemorate the history that has nurtured those American ideals over the centuries? The designation of February as American History Month would provide a time for study, celebration, and renewal of the concepts that have shaped this democracy and would assure that the contributions of generations who have gone before will be remembered.

The concept of an American History Month is by no means a new one. The Society of the Daughters of the American Revolution has been promoting American history essay contests in our schools since the 1920's. I am pleased that the Texas Society of the DAR, the largest in the country, involved nearly 4,200 students from 256 Texas schools in such essay contests last year. Congress has also recog-

nized the value of this proposal, and has enacted resolutions for an American History Month in the past. It is my hope that the Senate will adopt this resolution so as permanently to designate February as American History Month.

SENATE RESOLUTION 99—RESOLUTION RELATING TO THE SISTER CITIES PROGRAM

Mr. PERCY submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 99

Whereas, President Dwight D. Eisenhower launched the Sister Cities concept on September 11, 1956 at the White House to let the people themselves give expression of their common desire for friendship and cooperation for all and this vital international program will observe its 25th Anniversary during 1981; and

Whereas, the Sister Cities Program is committed to the process of providing an active role in international relations to all communities and its citizens for the ultimate goal of world peace; and

Whereas, over 700 U.S. cities, towns and villages representing more than 86 million Americans are currently linked with over 900 communities in 78 nations of the world, now, therefore, be it

Resolved, That the 760 U.S. communities currently involved in this great Sister Cities Program and its organization Sister Cities International be commended for the vital role they are playing in increasing understanding and bringing the people of all nations together in bonds of mutual trust, friendship and cooperation.

SISTER CITIES PROGRAM

Mr. PERCY. Mr. President, nearly two centuries ago, that great statesman Benjamin Franklin observed:

God grant not only that the love of liberty, but a thorough knowledge of the rights of man pervade all the nations of the earth so that a philosopher may set his foot anywhere on its surface and say, "this is my country."

If he were alive today, I think Mr. Franklin would have been highly impressed by the efforts of a national program, which will be celebrating its 25th anniversary this year to achieve this noble and lofty goal.

That program is sister cities, which has brought together hundreds of America's cities, towns, and villages and millions of our fellow citizens dedicated to improving our relations with counterpart communities and people all over the world.

Since our Nation began two centuries ago, many organizations, foundations and individuals have contributed much to the foreign relations of the United States, but the emergence of the American city as a "partner in diplomacy" is a comparatively recent development. Affiliations between cities here and abroad began shortly after 1945, but no real national focus was realized until 1956 when the late President Dwight D. Eisenhower initiated the people-to-people program at the White House. Out of this grew Sister Cities International, which has assisted more than 700 American cities to establish links with over 900 communities in 78 other nations of the world. The combined population of the U.S. cities involved is more than 86 million Americans, a tremendous "force for peace."

President Eisenhower's objective was to stimulate the citizens of this country, representing the great strength of the United States, to work for the improvement of America's international image by furthering understanding of our country abroad. His concept involved tens of thousands of people at all levels of our society in "personal diplomacy." The sister city program was not regarded then, nor is it today, as a messianic movement to proselytize others with the democratic principles that Americans cherish. It was, and is, rather, a program to fulfill the desire of millions of Americans to learn about the people of other countries and their customs, to learn of similarities as well as differences and hence to chart a better road to understanding of the world. It is essentially a program of sharing interests across borders; it is the opportunity for every member of an American community to express themselves in the "community of nations."

The significance of the sister city program to American foreign relations was best expressed in President Eisenhower's own words:

Two deeply held convictions unite us in common purpose today. First is our belief in effective, responsive local government as a principal bulwark of freedom. Second is our faith in the great promise of people-to-people and sister city affiliations in helping build the solid structure of world peace.

He said that we now use many methods in pursuit of greater international understanding, including student and teacher exchange, organizational and institutional exchanges.

He observed—

Yet none can be more effective than direct, close and abiding communications between cities, where indeed most of our people now live.

What has this program accomplished in the 25 years of its existence? What are its goals as it enters the difficult years of the 1980's?

First, the sister city program offers the efficient framework through which individual Americans can tell the real story of America to the people of other lands. But the sister city program is not a one-way street. Its purpose is true friendship, which requires our understanding of other people.

Today, more than ever, we need to understand the character, the mood, and the aspirations of the people of other nations. We need to know more deeply and thoroughly that millions of human beings in the vast developing regions of the Earth are struggling for a new life of freedom and opportunity.

We can read about human needs and learn that many of the world's people are underfed, illiterate, sick, or poorly housed.

But we do not truly understand, and we are not ready for effective action, until we become compassionately aware of the character and needs, the joys, and sufferings of individual human beings in other lands.

Here, sister cities offer the means by which individuals in America can learn from individuals in other nations.

Today millions of Americans are extending that hand of friendship to people in other countries. More than 700 U.S. cities are involved in affiliations with cities in other parts of the world. The American cities in the program represent every section of the country and every size.

These sister city programs have gone far beyond ceremonial functions.

Hundreds of thousands of schoolchildren in American communities now correspond regularly with children in their sister cities overseas.

Thousands of student and teacher exchanges have been arranged.

Businessmen, doctors, lawyers, union leaders, and others have exchanged knowledge, advice, and information with their counterparts in foreign cities.

Special classes have been organized to teach local citizens the language and culture of their sister city.

Because countries and cities around the world encounter the same problems and have to face similar urban population and environmental problems, many sister cities are learning how interdependent the world's nations really are. sister city affiliations, in many cases, are helping to reach solutions. Exchange programs are resulting in significant advances against common urban problems. A civil engineer from Rochester, N.Y., spent part of the summer in Bamako, Mali, as a consultant to provide knowledge for the completion of sanitary projects. Nurses in Atlanta, Ga., are helping to develop a health care planning project which is now entering its second year in Montego Bay, Jamaica. Oakland, Calif., technicians traveled to Sekondi-Takoradi, Ghana, to determine what vocational training services or job creation activities would be required to meet the skilled labor needs of that area, and how existing government and private agencies might provide training opportunities to handicapped and nonhandicapped youth.

But the program is two way. Kyoto, Japan, sent an entire artisan's house to Boston, Mass., where it was reconstructed in Boston's famed Children's Museum by Kyoto craftsmen. The house is open today for thousands of young and old in the Boston area to learn about Japanese culture and customs.

Travel, tourism, and exchanges flourish between sister cities; it is a natural development. And the numbers keep growing. The cumulative effect of these exchanges is building for future relationships.

Projects developed by sister cities are as varied and unique as the thousands of volunteers involved. Exchanges are numerous—books, art, gardens, monuments, artifacts, ceremonial fetes, technicians—the list is almost endless. They represent a vast wealth of human energy devoted solely to increasing greater understanding and rapport with the people of other lands. Is this not the essence of diplomacy?

Seven hundred affiliations are not enough. One thousand affiliations are not enough. We need 3,000 or even 5,000

sister city affiliations to approach the magnificent potential of American communities joining in friendship and understanding with communities in other nations.

Our ideal should not be limited. Our approach should not be timid. We should hope for the day when every single American community has joined as a working neighbor with a foreign community.

Such an expansion of the sister city movement can come only through the initiative and effort of citizens and leaders in our communities. The sister city program must be sustained as a true and spontaneous effort.

As the sister city program celebrates its 25th anniversary during 1981, I, for one, intend to do all I can to help promote the concept and practices of the sister city program in communities in the United States, and I hope each of my colleagues will exert every effort to encourage communities in their own States to develop sister city affiliations.

AMENDMENTS SUBMITTED FOR PRINTING

AMENDMENT NO. 8

(Ordered to be printed.)

Mr. MELCHER (for himself, Mr. LEAHY, Mr. PRESSLER, Mr. KASTEN, Mr. ZORINSKY, Mr. BOREN, Mr. PRYOR, Mr. ANDREWS, Mr. PROXMIRE, Mr. BOSCHWITZ, Mr. BAUCUS, Mr. ABDNOR, Mr. FORD, Mr. BURDICK, Mr. HATCH, Mr. BENTSEN, and Mr. HUDDLESTON) proposed an amendment to the bill (S. 509) to amend section 201 of the Agricultural Act of 1949 as amended, to delete the requirement that the support price of milk be adjusted semiannually.

AMENDMENT NO. 9

(Ordered to be printed.)

Mr. ZORINSKY (for himself, Mr. MELCHER, Mr. ANDREWS, Mr. BURDICK, Mr. BAUCUS, Mr. EXON, Mr. BOREN, and Mr. PRESSLER) submitted an amendment was ordered to be printed in the bill, S. 509, supra.

● Mr. ZORINSKY. Mr. President, I submit for printing an amendment to S. 509 and ask unanimous consent that the text of the amendment be printed in the RECORD.●

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 1, immediately after line 5, insert the following:

"SEC. 2. (a) Notwithstanding any other provision of law, effective April 30, 1981, the restrictions on the exportation of agricultural products to the Union of Soviet Socialist Republics imposed on January 7, 1980, shall expire unless, prior to such expiration date, the President certifies to Congress that—

"(1) the continuation of such restrictions is necessary to further significantly the national security and foreign policy interests of the United States; and

"(2) the continuation of such restrictions will not have an undue adverse effect nor unfairly impose a discriminatory burden on the agricultural economy and the farmers of the United States.

"(b) If the President does not make the certifications provided for in subsection (a) of this section, the President may, nonetheless, delay for a reasonable time the date of expiration of the restrictions and resumption of normal grain trade with the Union of Soviet Socialist Republics by certifying to Congress, prior to April 30, 1981, that the President intends to negotiate a new bilateral grains agreement with the Union of Soviet Socialist Republics to replace the agreement that expires September 30, 1981.".

NOTICES OF HEARINGS

SUBCOMMITTEE ON SECURITIES

Mr. D'AMATO. Mr. President, the Subcommittee on Securities of the Committee on Banking, Housing, and Urban Affairs will hold a hearing on S. 289, a bill to amend the Securities Exchange Act of 1934 to provide margin requirements in transactions involving the acquisition of securities of certain U.S. corporations by non-U.S. persons where such acquisitions are financed by non-U.S. lenders. The hearing will be held on Tuesday, March 31, 1981, at 9:30 a.m. in room 5302 of the Dirksen Senate Office Building.

Persons who desire to appear at the hearing or to submit written views should contact John Daniels, counsel to the subcommittee, at 224–7391.

SUBCOMMITTEE ON WATER AND POWER

Mr. MURKOWSKI. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Water and Power of the Committee on Energy and Natural Resources.

The subcommittee will hold a hearing on the fiscal year 1982 Department of Energy authorization for the Power Marketing Administrations on Thursday, March 26, at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

The subcommittee will hold a hearing on S. 306 which authorizes the Secretary of the Interior to construct, operate, and maintain hydroelectric powerplants at various existing water projects, on Wednesday, April 8, at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Water and Power, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the hearing, you may wish to contact Mr. Russ Brown at 224–5726.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Energy and Mineral Resources.

Oversight hearings on the strategic petroleum reserve have been scheduled for Monday, March 30 at 9:30 a.m. and Friday, April 3, at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Oversight hearings on the strategic minerals and materials policy of the United States have been scheduled for Tuesday, March 31; Tuesday, April 7; and Thursday, April 9 at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the strategic petroleum reserve hearing, please contact Mr. Roger Sindelar at 224–4236; and regarding the strategic minerals hearing, please contact Mr. Bob Terrell at 224–3086.

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Energy Conservation and Supply on the 1982 Department of Energy Authorization for programs which fall within this subcommittee's jurisdiction.

The hearing will be held on Monday, April 6, 1981, at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Conservation and Supply, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding the hearing, you may wish to contact Mr. Gary Barbour at 224–0613.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Select Committee on Indian Affairs for the purpose of reviewing the budget submissions of the Department of the Interior as it pertains to programs of the Bureau of Indian Affairs; the Department of Health and Human Services as it pertains to programs of the Indian Health Service; the Department of Education as it pertains to programs of the Office of Education; and the Department of Housing and Urban Development as it pertains to programs for Indian housing.

The hearing is scheduled for March 23, 1981, at 10 a.m., in room 1202 Dirksen Senate Office Building. For further information regarding the hearings, you may contact Timothy Woodcock, Staff Director, or Peter Taylor, general counsel, at 224–2251. Those wishing to submit a written statement for the hearing record should write to the Select Committee on Indian Affairs, U.S. Senate, Washington, D.C. 20510.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, March 19, 1981, to consider President Reagan's budget proposals in Energy and Natural Resource areas.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SALUTING THE IRISH

● Mr. D'AMATO. Mr. President, allow me to take this opportunity to wish all a very happy St. Patrick's Day. This is a day when we are all Irish and salute the contribution that the Irish people have made.

As we celebrate St. Patrick's Day this year, let us not forget the thousands of people in Northern Ireland who must endure the continuing heartbreak and sorrow of a country wracked by violence, terror, and civil unrest.

Today we are all brothers and sisters, and let us pray that a peaceful solution to end the bloodshed and hatred can be found. Let us also pray that forceful and responsible leadership will prevail and offer religious liberty and economic freedom to all people in that embattled land. And let us hope that artificial manmade borders can come tumbling down reuniting a proud people in peace and harmony. Let there be peace and freedom in Northern Ireland and may an end to the violence that pits neighbor against neighbor come soon.

Mr. President, I know I speak for my colleagues today in wishing the best for the Irish people and in saluting a fine country, a fine heritage, and a fine people.●

PEGGY SIMPSON CURRY, FIRST POET LAUREATE OF WYOMING

● Mr. WALLOP. Mr. President, it is with great honor that I bring to your attention Mrs. Peggy Simpson Curry of Casper, Wyo., who was recently named the first Poet Laureate of Wyoming.

When Governor Ed Herschler of Wyoming asked for nominations to fill this post, the response was, almost without exception, one name, that of Peggy Curry. She is a renowned author who has brought honor to her State as being one of only two women in the world to win two Spur awards from Western Writers of America and the only author to receive two Emmie Mygatt awards from Wyoming Writers, Inc. She is also the same writer and poet who found time to organize and establish the poetry in school program which became a model for other States.

Mrs. Curry has written a text book, "Creating Fiction From Experience," and teaches writing at Casper College. She finds time to visit schools across the State of Wyoming encouraging young people to write. She reads to the blind, visits State institutions and conducts workshops in many small Wyoming towns. Many lives have been enriched by the generous gifts of this warm and caring woman.

Her published novels include: Fire in the Water", So Far From Spring", "The Oil Patch", and "A Shield of Clover." She is published in many national journals, drawing upon her western background. Her warmth, humor, and love of the West are the trade marks of her talent. Peggy Simpson Curry is truly Wyoming's Poet Laureate, and I join with all the citizens of the State of Wyoming in paying her due tribute and honor.

I wish to share with my colleagues a sample of her poetry, taken from her book entitled "Red Wind of Wyoming."

FEBRUARY THAW

Where wind has worked and gone away,
Gun-metal water moves in sinuous flow
Between the hooded banks of sculptured snow
And red-gold willows stand with dreaming roots
In pools of spring, in promises of green
As real as anything my eyes have seen.
I pause and feel impassioned splendor stir
In deep and shadowed vowels of water sound
Murmuring across the frozen ground.

Old hills to westward, gather in your pines
This day—this singing fugitive from cold;
Rock in the cradles of remembered birds
The dream too transient for the heart to hold.●

RESOLUTION OF ARIZONA STATE LEGISLATURE CONCERNING SOVIET EMIGRATION POLICIES

● Mr. GOLDWATER. Mr. President, recently the House of Representatives of the 35th Legislature of the State of Arizona passed a resolution urging the President of our country to influence the Soviet Union to abandon its restricted emigration policies and allow freer emigration of religious groups. This has been forwarded to me by our exceedingly fine Secretary of State, Rose Mofford.

I ask that the resolution be printed in the RECORD.

The resolution follows:

HOUSE RESOLUTION 2003

Whereas, the Union of Soviet Socialist Republics is a signatory of the Universal Declaration of Human Rights which declares that "everyone shall be free to leave any country including his own"; and

Whereas, the Union of Soviet Socialist Republics is a signatory of the Helsinki Final Act of 1975, which declares that the "participating states will deal in a positive and humanitarian spirit with the applications of persons who wish to be reunited with members of their families"; and

Whereas, the Soviet Union initiated new restrictions on the emigration of Jewish persons residing in the Ukraine in May of 1979, by denying applications if the required letter of invitation from a family member in Israel was from a relative more distant than a parent, spouse, child or sibling; and

Whereas, the new restrictions severely curtailed Jewish emigration from the Soviet Union, with fewer exit visas being granted in 1980 than in 1979; and

Whereas, the trend of decreasing Jewish emigration is growing dramatically in 1980, from 3,049 in March; to 2,469 in April; to 1,976 in May; to 1,620 in June; to 1,204 in July; and to only 327 for the first half of August; and

Whereas, acts of anti-Semitism, including harassment, arrests and discrimination in education and employment have increased in recent months; and

Whereas, the combination of new emigration policies and increased harassment has directly affected the willingness of Jews residing in the Soviet Union to solicit letters of invitation from relatives in Israel, resulting in a decrease in requests for letters of invitation from an average of 10,750 per month in 1979 to 4,250 per month for the first four months of 1980; and

Whereas, many emigration offices in the Soviet Union allegedly closed temporarily during the Summer Olympics have not yet reopened.

Therefore, be it resolved by the House of Representatives of the State of Arizona:

1. That the members of the House of Representatives respectfully request that the President of the United States endeavor to influence the Soviet Union to abandon its restrictive emigration policies and allow the freer emigration of all members of religious groups from the Soviet Union.

2. That the Secretary of State of the State of Arizona is requested to transmit copies of this resolution to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States and to each Member of the Arizona Congressional Delegation.●

WINNIE MANDELA: A POLITICAL PRISONER IN SOUTH AFRICA

● Mr. TSONGAS. Mr. President, last year the Congressional Ad Hoc Monitoring Group on Southern Africa launched a political prisoner adoption program. Congressman TOM DOWNEY organized the effort and each member of the Monitoring Group was asked to adopt a political prisoner in South Africa.

I adopted Winnie Mandela. I am happy to report that she is in excellent spirits despite the rigid limits imposed on her freedom by a government banning order. Winnie Mandela, the wife of a nationalist leader Nelson Mandela, is only one of the many such banned or detained individuals in South Africa, but I think that her particular brand of courage is remarkable and inspiring.

Joseph Lelyveld's article in today's New York Times portrays Ms. Mandela's circumstances accurately and objectively. It is an excellent primer on the mechanisms of racial discrimination in South Africa today. I request that the article be printed in the RECORD.

The article follows:

[From the New York Times, Mar. 17, 1981]

"BANISHED" IN SOUTH AFRICA, SHE VOWS TO OVERCOME

(By Joseph Lelyveld)

BRANDFORT, SOUTH AFRICA, March 12.—A white woman called from across the street as Winnie Mandela got out of her car in a front of the post office here today. She hadn't seen her in a while, the woman said in a friendly voice, and hoped that didn't mean Mrs. Mandela was cross with her.

The start of a brief exchange of small-town pleasantries, it was an exceptional moment of civility in the life of officially decreed hardship and monotony Mrs. Mandela has had to lead here since she was ordered nearly four years ago to reside in the nameless black township on the edge of this staunchly conservative Afrikaner farming community in the Orange Free State. The banished wife of an imprisoned black leader would not expect to make white friends here. Whites prepared to extend even minimal courtesy have also been few.

"There are only three I am able to speak to here and she's one of the three," Mrs. Mandela said later, breaking into a bright peal of laughter that canceled any hint of self-pity. In the 18 years since the arrest of Nelson Mandela the leader of the outlawed African National Congress, his wife has become a political figure in her own right, threatening enough for the authorities to feel they could not let her live in

Soweto, Johannesberg's black annex, even under partial house arrest and a "banning" order that gagged her politically and barred her from gatherings.

The authorities never explained why they selected Brandfort as Mrs. Mandela's Elba but she has her own explanation. "Here is really a living grave," she said. "One is subjected to such crude conditions. The whole thing was calculated to break one's spirit." Mrs. Mandela's rich laughter, which punctuates her conversation, said it was a miscalculation.

SEPARATE ENTRANCES IN SHOPS

Until she was deposited here by the security police in May 1977, Brandfort was best known as the town that shaped the Afrikaner identity of Hendrik F. Verwoerd, the Dutch-born Prime Minister who turned South Africa's traditional patterns of racial separation into a system and an ideology. There are still white and black entrances to the shops here but Mrs. Mandela has consistently disdained the signs and no white has challenged her. In the single supermarket, her example helped promote an end to segregated service.

The contrast between the outwardly drab town and the vivid, self-assured woman whose small shopping expeditions become a daily challenge to its racial customs has given rise to resentment among local whites. "I'm no longer wanted here by the white community," Mrs. Mandela said. "I think they've just had enough."

The banning order that restricts her to Brandfort expires at the end of this year and the authorities will then have to decide whether to move her. In the meantime, she will have to appear in court on May 25, as she does almost annually, on charges of violating her ban. These were lodged by a security police sergeant named Gert Prinsloo who has been her official chaperon and nemesis here since the day she arrived. Conviction could result in a jail sentence.

"What difference does it still make?" she asked cheerfully. "The only difference is between being in prison and this outside prison. My country is a prison in itself." The words sound almost too brave but official harassment has helped shape a role for Mrs. Mandela in which she now seems entirely at ease.

HUSBAND WRITES TWICE A MONTH

The post office where she was encountered is only half a block from the police station but it was lunch time and Sergeant Prinsloo was nowhere in sight. She never knows, she said, when he will turn up. Just last night he was parked outside her tiny semidetached house, which has neither plumbing nor electricity, when she stepped into the yard at about 9:30 to throw her bath water out.

If she had then set a foot out of the yard, she would have been violating her ban, which places her under house arrest in the evenings and on weekends. It would have been a violation now to invite a visitor back to her house, where she can receive only relatives, or to meet him in the presence of a third person.

So the conversation today took place in the visitor's car, parked under a gum tree beside the post office, while Mrs. Mandela's daughter, Zindzi, waited in her mother's Volkswagen rereading one of the two letters her father is allowed to write each month, which had just arrived.

Mrs. Mandela was moved to Brandfort a week before Andrew Young, then the new American representative at the United Nations, was due to visit Soweto. There were some who speculated that the authorities meant to insure they would not meet. Now there is a new Administration in Washington and a new attitude. Mrs. Mandela was asked whether she had seen President Reagan's remark that the United States should be "helpful" to South Africa because positive efforts to bring change are under way here.

"WE WILL TAKE OVER"

"He couldn't have insulted us more," she said. Again there was a peal of laughter. "One doesn't expect anything much but one doesn't expect a man in his position to really go out of his way and pronounce himself as our enemy. Because we are there, a reality, and we will take over this country whatever Reagan says."

The years in Brandfort have not left Mrs. Mandela with a sense of isolation. Others in "the struggle" are suffering more, she insisted, while Brandfort has given her a chance to draw close to blacks who have had "no other life than in the backyard of the white man" and who now "are even angrier than those in the urban areas because they are so deprived."

Every other month, under constant police surveillance, Mrs. Mandela flies to Cape Town and then to Robin Island to spend 30 minutes with her husband, who is serving a life sentence. They sit facing each other with heavy soundproof glass in between so that they have to talk on the telephone although they are separated by only a couple of feet.

Guards sit on both sides with them, listening in on extension phones to insure that no political intelligence is exchanged. "We can only talk about cats and dogs, children, families, that's all," she said. "Each time for all these years, these 18 years, some senior officer comes to me and reminds me: 'I hope you remember Mrs. Mandela that you are not to discuss anything else outside your family. We don't want to cut your visit but should you mention even a name we don't know, we shall cut your visit.' They actually say that."

HUSBAND "ABSOLUTELY FINE"

The last private moment the Mandelas had, she said, was a hurried meeting in August 1962 two days before her husband was captured. Yet she is never more assured than when she describes him. "Oh he's absolutely fine," she said. "He's just on holiday. There's our Prime Minister on holiday, that's all. He's in fantastic spirits."

Her own spirits are sustained, in part by the visits of the Rev. John Ruston, an Anglican priest in Bloemfontein, about 30 miles to the south, who comes every two weeks to give her communion.

"He can't get into my house," she related, "so when he gets there he hoots outside my cells—that's what the house is, just a combination of three cells put together—and I run out and we pray outside his car and he gives me holy communion outside his car, and when it's raining we sit inside the car, and that's how I get my communion."

Asked if she had ever applied for permission to worship in the cathedral in Bloemfontein, she answered firmly: "No, I will never do that. I don't believe I should apply to a human being to go to church. I think I would be giving them a power they don't have. That would be honoring them too much."●

CAPITAL GAINS TAX CUTS ARE CHEAP AND EFFECTIVE

● Mr. WALLOP. Mr. President, if I came to you with an investment proposal that would yield a 44-percent return after 1 year, you would probably say that it was too good to be true. Well, it is not. In fact, Congress made just such an investment with the Revenue Act of 1978 by lowering the maximum effective capital gains tax rate from 49 percent to 28 percent for individuals and corporations. At a cost of $100 million in decreased revenues from capital gains taxes, the Government induced additional individual capital gains of $20.5 billion in 1979—a rise of 44 percent over 1978. In other words, the lower capital gains tax rates gave investors the incentive to cash in on their capital gains and, as a result, the total amount of capital gains increased by 44 percent. Preliminary figures from the Treasury Department indicate that the capital gains tax reduction resulted in a net revenue loss to the Government of only $0.1 billion, compared with the original estimate by Treasury of a revenue loss of $1.7 billion. The net loss was so minimal because the increase in capital gains realizations was so large; investors reported more capital gains, so the Government had more capital gains to tax. The 1978 capital gains tax cut was clearly a wise investment.

The decrease in capital gains tax rates prompted investors to sell or unlock many of their old investments. This unlocking caused more investors to realize capital gains, and these increased capital gains tax realizations boosted tax receipts to the Treasury beyond all expectations. Even at lower capital gains tax rates, tax receipts were increased by $2.5 billion rather than the Treasury Department's original estimate of $0.9 billion of induced capital gains realizations. Consequently, the static revenue loss of $2.6 billion was offset by a feedback of $2.5 billion, leaving a net revenue loss of just $0.1 billion.

These figures indicate that the higher realizations offset nearly all of the revenue loss caused by the cut in capital gains rates. The 1978 capital gains tax reduction is a classic example of supply-side economics, demonstrating that tax cuts can stimulate new and increased economic activity, which in the end, will boost tax receipts.

Mr. President, we should not confine our appreciation of the 1978 capital gains tax cut to the initial revenue effects of this legislation. The capital gains tax cut caused higher equity values, more seed money for small companies seeking venture capital, and much higher levels of total stock offerings from 1979–80. The increase in economic activity stimulated by the capital gains tax reduction has helped foster new companies, increased investments and more jobs, all of which contribute to the health of our economy and increased tax revenues.

The Investment Incentive Act of 1981, S. 75, gives us a chance to repeat the successes of the Revenue Act of 1978 by further reducing the maximum effective tax rate on capital gains for individuals and corporations. Further reductions are necessary because, of 11 industrialized countries, the United States still has the highest rate for taxing long- and short-term capital gains. Four countries do not even have a tax on capital gains, including Japan, and those countries that do usually do not distinguish between a long- and a short-term gain. The result has been to bias consumption over saving; a person is liable for a greater amount of tax if he invests his income than if he spends all of it and borrows to spend more. Over consumption has produced high inflation and slow economic growth. Growth has been so slow that

our productivity increases have been surpassed by all other industrialized countries except Canada.

The question may arise: How does a capital gains tax reduction lead to an increase in productivity? The answer is through an involved, but not arcane, process. Since the tax cut increases his after-tax return on investment, the investor has more money and more incentive to invest. With his will intensified and his wallet enlarged, the investor rushes into the market demanding stocks—an action that inevitably leads to a boost in their prices. These two premises are borne out by the fact that since the 1978 tax cut, an 18-percent increase in the number of investors has produced a 160-percent jump in the AMEX market index, a rise of 49.2 percent in the Standard & Poor's 500, and an increase of 24.3 percent in the Dow Jones Industrial Average, in spite of rampaging inflation and skyrocketing interest rates. As stock prices rise, equity financing becomes cheaper. In other words, a company is able to raise the same amount of money as before without having to float as many shares of stock.

Companies are thus able to raise funds more easily through the stock market, providing an alternative to debt financing. Less corporate borrowing helps to relieve the upward pressure on interest rates, which helps bring down inflation. Referring once again to the effects of the 1978 tax cut, new capital raised through initial public offerings has quadrupled and the amount of venture capital raised has doubled since the passage of that legislation. The sale of new stock makes it possible to replace worn out or inefficient equipment and to purchase the additional plant and equipment required to expand production capacity. With more capacity comes the need for more workers, so employment rises. Research and development efforts, which result in new technology superseding outdated technology, are also financed through money raised from new stock issues. More and new plant and equipment, additional employment, less debt financing, and better technology all combine to effect significant increases in productivity—increases that lessen inflationary pressures.

Mr. President, as the 97th Congress begins to examine tax legislation the question arises over the best means of achieving a capital gains tax cut. Clearly, the best approach is to combine a cut in income tax rates, as called for in the President's tax program, with an increase in the capital gains tax exclusion.

A reduction in income tax rates has the effect of reducing capital gains taxes, but at the same time it reduces tax rates on dividends. An increase in the capital gains tax exclusion has the effect of lowering tax rates applied to long-term capital gains, without changing the tax rate on dividend income. There are two advantages to this approach.

First, the increased exclusion applies across the board, which means that it also benefits the less wealthy taxpayers who are not affected by a decrease in the higher-bracket rates.

Second, increasing the capital gains exclusion gives the investor an incentive to put his money into growth stocks, that allow him to take out his investment income in the form of capital gains, rather than dividends. What does this do to corporations intent upon raising investment funds? It creates a market incentive to reinvest profits in new plant and equipment and R. & D. so that they become attractive to investors as growth companies. In other words, increasing the capital gains tax exclusion not only provides the incentive for private individuals to invest, but it also shifts resources in corporations toward long-term investment and growth opportunities.

Another attractive feature of the Investment Incentive Act of 1981 is that it extends the same effective capital gains tax rate to both individuals and corporations, maintaining the traditional parity between corporate and individual capital gains tax rates. The importance of maintaining parity between the corporate and individual capital gains tax rate stems from the objective of maintaining neutrality in tax policy. Unless corporate capital gains are accorded similar treatment to that offered to individuals, tax policy will penalize taxpayers who use the corporate form of ownership rather than owning assets in partnerships, proprietorships, or in other noncorporate ownership forms. In the absence of parity between the corporate and individual capital gains rates, there would be an incentive to shift ownership from corporate to individual form.

For a long period prior to 1969, the corporate capital gains tax rate was 25 percent, the same as the maximum rate for individuals. Between 1969 and 1978, the corporate rate was increased from 25 percent to 30 percent, and capital gains tax rates were increased even more sharply for individuals. Fortunately, the Revenue Act of 1978 cut the top rate for individuals and corporations to 28 percent, restoring parity. There is a need to insure that future adjustments in the capital gains tax rates maintain corporate capital gains tax parity.

The Investment Incentive Act of 1981 seeks to increase capital gains tax exclusion from 60 percent to 75 percent. Under the current tax rates, the increased exclusion would lower the maximum effective tax rate to 17.5 percent. However, if the 75-percent exclusion was combined with the lower tax rates called for in the President's program, then the maximum effective capital gains tax rate would be 12.5 percent. In my opinion, this would be a positive development in tax policy; one that would spur a new era of increased investment.

For too long, high taxes have been a disincentive to work, savings, and investment and a cause of stagnation in our economy. Realizing this, Congress finally took steps to stimulate capital formation with the Revenue Act of 1978 and lowered the maximum capital gains tax rate for the first time in 40 years. The Investment Incentive Act of 1981 takes the next step in the process of tax reductions begun by the 1978 legislation.

Mr. President, I look forward to working with the administration and my colleagues over the next year in developing a tax package that provides the most dynamic stimulus to investment and savings.

I submit an editorial of the Wall Street Journal of March 11, 1981, which relates to this subject.

The editorial is as follows:

CONGRESS APPEARS CERTAIN TO SLASH TAXES ON LONG-TERM CAPITAL GAINS

(By Robert W. Merry)

WASHINGTON.—Whatever Congress does to President Reagan's tax proposals, the final package almost certainly will include a deep tax cut for long-term capital gains.

No visible opposition of consequence has arisen so far to proposals for a reduction in the tax on these gains, which are realized on the sale of securities, real estate or other capital assets held at least one year. That's in sharp contrast to 1978, when that year's reduction sparked a controversy over its effect on the nation's economy.

This year's outlook reflects a change in thinking about tax policy. Those committed to cutting taxes—including taxes paid by the wealthy—have more clout than ever before. And so Congress will probably enact the second capital-gains tax reduction in fewer than three years, perhaps dropping the top rate to 20 percent from the current 28 percent. The 1978 law brought it down from 49 percent.

STRONG FEELINGS FOR CUT

"The pressures are so strong that some further reduction is almost inevitable," says Cliff Massa, tax lobbyists for the National Association of Manufacturers. An aide for Congress's joint tax committee calls a tax cut "most likely."

Generally, a person determines his capital-gains tax by excluding 60 percent of his gains from taxation, and then applying his normal income-tax rate to the remaining 40 percent. Thus, a person in the top tax bracket, which is 70 percent, would pay a capital-gains rate of 28 percent—or 70 percent of the taxable 40 percent of capital gains.

President Reagan would reduce capital gains taxes for everyone by cutting income-tax rates 10 percent across the board in each of three successive years. Meanwhile, the top rate of 70 percent, which applies only to "unearned," or investment, income, would drop to 50 percent. Thus the top capital-gains tax rate would fall over those three years to 20 percent—or 50 percent of the taxable 40 percent.

But the President's call for the 30 percent cut in individual income-tax rates is the most controversial part of his tax proposals, and it may not survive in Congress. If lawmakers scale back the rate cuts or eliminate the second and third years of the Reagan plan, the reduction in capital-gains taxes would be scaled back, too.

However, it's possible that, no matter what happens to the President's rate-cut proposal, Congress may drop the top income tax rate on unearned income to 50 percent from 70 percent in a single stroke. Like the President's plan, that would drop the top capital-gains rate to 20 percent from 28 percent, but in one year rather than over three years. Even some liberal economists concede there are persuasive arguments for such a cut.

The rationale is that the high tax rates on unearned income—and the differential between tax rates on unearned and earned income—have encouraged many wealthy people to dump their money into tax-avoidance schemes and other nonproductive investments. "If you narrow the gap between unearned and earned income," says a Senate Finance Committee aide, "there's less incentive to invest in tax shelters."

CONGRESSMAN SEES TROUBLE

But this approach riles liberal Democrats who don't like giving so much tax relief to upper-income individuals. "If I voted for that," says Rep. Thomas Downey of New

York, a Democrat on the House Ways and Means Committee, "I'd be lynched in my district."

The result is that some legislators are looking at another method of reducing capital-gains taxes: expanding the portion of gains excluded from taxation. That was part of the approach used in 1978, when Congress increased the exclusion to the current 60 percent from 50 percent.

Leading advocates of expanding the exclusion in the Senate are Malcolm Wallop (R., Wyo.) and Daniel Moynihan (D., N.Y.). Their bill would expand the portions of capital gains excluded from taxation to 75 percent. Thus, even if the top income-tax rate stayed at 70 percent, the top capital-gains rate would drop to 17.5 percent—or 70 percent of the taxable 25 percent of capital gains. A similar measure in the House would increase the exclusion to 70 percent, thus dropping the top tax rate on capital gains to 21 percent.

This method is more politically acceptable to many in Congress; unlike the reduction in the top rate on unearned income. It would provide tax relief to less wealthy taxpayers with capital-gains income. Some also like it because it would provide tax relief on capital gains in a single year, rather than over three.

BENEFITS ARE TOUTED

There is some debate in Congress over which is the better method, but there seems to be no debate about whether further reductions are a good idea. While opponents of the 1978 bill are silent, proponents stress their view that it was a huge success in infusing needed capital into new enterprises, especially in the burgeoning high-technology field. They cite price appreciation for stocks of companies with little capital, a surge in initial stock offerings by small companies and a big increase in venture-capital investments.

Of greater political consequence, though, is the effect of the 1978 capital-gains cut on federal revenues, a subject of much debate before the law was enacted. The Carter Treasury Department, which opposed the 1978 reduction, projected that the cut would cost the government $1.7 billion in 1979 tax revenue. The Treasury's Office of Tax Analysis estimated the basic amount of the tax cut at $2.6 billion, but it added that the reduction would induce people holding capital assets to sell them and pay the lower tax bill on the gains. This "unlocking effect," the office said, would reduce the Treasury's revenue loss by about $900 million—to $1.7 billion.

Those estimates proved far off the mark. The tax analysis office now says the 1979 revenue loss actually was only $100 million because the unlocking effect actually brought in $2.5 billion in new revenues. In other words, so many people sold their capital assets to take advantage of the tax reduction that the cut nearly paid for itself, as some proponents predicted it would.

ARE FIGURES UNDERSTATED?

But some experts say even those figures understate the effects. Although the Treasury had suggested that 1979 capital-gains receipts would drop to $6.4 billion from $7.2 billion in 1978, receipts actually rose to $8.3 billion in 1979. Thus, these people argue that the 1978 tax cut actually increased federal revenues by at least $1.1 billion. The tax analysis office attributes the $1.1 billion increase to other factors.

But some economists say further reductions wouldn't necessarily contribute to further capital-gains unlocking—and thus wouldn't necessarily boost federal revenues. They contend that pent-up capital gains have already been cashed in. Others dispute the view that the 1978 tax cut was the main contributor to the growth of smaller-capitalized companies. "The available evidence indicates that the effect is modest and is grossly exaggerated," says Joseph Pechman of the Brookings Institution.

But Reagan administration officials and others say that the 1978 capital-gains tax reduction not only induced holders of assets to sell them but also influenced others to buy. They argue that this new wave of investment will continue to prop the economy and provide added tax revenues for years.●

SUPPORT FOR ESTONIAN INDEPENDENCE DAY

● Mr. D'AMATO. Mr. President, February 24, marked the proclamation of Estonian Independence from the Soviet Union by the Estonian Council of Independence of this Baltic nation in 1918. Recently, Estonian-Americans in New York City gathered to commemorate this day, and to renew their pledge to work toward freeing this Nation from the totalitarian grip of the Soviet Union.

Mr. President, the Estonian-American present at that meeting drafted and sent to President Reagan a letter of their support of his policies to defend human rights.

I ask that this letter be printed in the RECORD. I join with these Estonian-Americans in support of our country's policy of non-recognition of the Soviet Union's illegal domination of this nation.

The letter follows:

MR. PRESIDENT,
The White House,
Washington, D.C.

MR. PRESIDENT: We, the Americans of Estonian descent from New York metropolitan area, assembled in solemn meeting to commemorate the 63rd anniversary of Declaration of Independence of the Republic of Estonia, send you our heartfelt greetings and best wishes for success in leading the United States in these troubled times.

We pledge you our support in all your endeavors to raise the military power of the United States to superiority, in order to defend our country against Communist aggression and to safeguard the interests and positions of the United States as the world power everywhere.

No burden is too heavy to bear and no sacrifice too big for this purpose.

We also ask you to continue the traditional United States policy for defending the human rights and freedoms for all nations, as there cannot be true freedom for individuals without the right for self-determination and independence of all peoples.

In this respect we single out the country of our ancestry, Estonia, which still is under the illegal occupation of Soviet Russia, and where the subjugated people are waiting for restoration of their freedom and independence.

We also ask you to continue the policy of recognition of the independence of the Republic of Estonia, and its diplomatic and consular representations in the United States.

God bless you and your work, Mr. President.●

THE HELSINKI WATCH COMMITTEE

● Mr. TSONGAS. Mr. President, on March 18, I plan to cohost a luncheon in cooperation with the Helsinki Watch Committee. Our topic for discussion at this luncheon will be human rights, the Soviets, and foreign policy.

Recent events in El Salvador and Poland have served to heighten interest in human rights and foreign policy. One organization that watches this subject with considerable interest and expertise is the Helsinki Watch Committee which was established in 1979 with a grant from the Ford Foundation. Mr. Robert L. Bernstein, the president of Random House, is chairman of the Helsinki Watch.

The chief objective of the watch has been to monitor domestic and international compliance with human rights provisions of the Helsinki accords, with particular emphasis on Soviet compliance. Last week the watch issued a press release entitled "Kuron Under Investigation; Seven Other Poles in Prison," in an effort to call attention to the questioning and investigation of Jacek Kuron, a leading Polish rights activist.

Mr. President, I ask that the aforementioned article be printed in the RECORD.

The article follows:

[News from Helsinki Watch]

KURON UNDER INVESTIGATION; SEVEN OTHER POLES IN PRISON

NEW YORK, March 6, 1981.—The U.S. Helsinki Watch, at its annual meeting yesterday, expressed serious concern over news of the ongoing investigation of Jacek Kuron, a leading rights spokesman of Poland's Self-Defense Committee-KOR. The Helsinki Watch has asked its Vice-Chairman, Orville H. Schell, now at the Madrid review conference, to make inquiries to the Polish delegation on Mr. Kuron's behalf.

Authorities held Mr. Kuron yesterday for seven hours of questioning and informed him that he was under investigation for "slandering the Polish state" (Article 270 of the Polish Criminal Code). Kuron has recently been the target of repeated attacks in the Soviet press. He is an adviser to Solidarity, the independent trade-union organization, which is expected to take actions on his behalf.

Solidarity has already called attention to seven other detained Polish activists in the first appeal of its special Committee for the Defense of Prisoners of Conscience, formed on December 10, 1980 and composed of at least 23 members, including Solidarity members Lech Walesa and Kazimierz Switon (a former adopted prisoner of Amnesty International), KOR Helsinki Group members Edward Lipinski and Aniela Steinsbergowa, and filmmaker Andrzej Wajda. The appeal was issued on December 10 and called for the release of Leszek Moczulski and Wojciech Ziembinski, members of ROPCIO (the Movement for the Defense of Human and Civil Rights), and Zygmunt Golacki and Tadeusz Stanski, members of the Conferdation of Independent Poland (KPN), each of whom had been arrested that fall.

Ten days later, on Dec. 20, 1980, the Committee added three newly-arrested members of KPN to its list of prisoners of conscience: Tadeusz Jancisek (Wroclaw), Krzysztof Bzdyl (Cracow), and Jerzy Sychut (Szczecin). Since that time, the Committee has collected over a million signatures on a petition calling for the release of the seven.

The Helsinki Watch learned this week that Mr. Golacki, whose investigation ended this week, has been on a hunger strike for 80 days. Another prisoner, Wojciech Ziembinski, recently ended his protracted hunger strike after becoming quite ill.

The Helsinki Watch has sent a letter to Prime Minister Jaruzelski in support of the call for the release of the seven activists.

The U.S. Helsinki Watch Committee is a non-governmental organization which seeks to monitor compliance with the human rights provisions of the Helsinki Final Act.●

FREE LEGAL SERVICES FOR ILLEGAL ALIENS

● Mr. HUDDLESTON. Mr. President, last week we learned that the new administration will move to eliminate all funding for the Legal Services Corporation. Although this corporation has provided much needed legal services for the Nation's poor, it has also chosen to expend its efforts and money in some questionable areas of law.

An example of this unnecessary activity can be seen in a pamphlet which, recently came to my attention. El Otro Lado (The Other Side) is a pamphlet written in Spanish which is designed to assist and encourage aliens to enter the United States illegally and to remain here without being apprehended by the INS. One section of this handbook for illegal entry deals with legal services and lists 39 legal aid offices which will help the illegal alien at no charge.

With millions of illegal aliens in this country, it is reasonable to assume their demand for free legal aid will mean loss of legal services for needy citizens and lawful residents.

I ask that the section of El Otro Lado dealing with legal services be printed in the RECORD.

The section follows:

LEGAL SERVICES

The undocumented have legal problems and many are abused and exploited because they are afraid to use their rights. In the U.S. there are lawyers who help the undocumented. Private lawyers usually cost a lot, but a lawyer from Legal Aid can help you at no charge. There are Legal Aid offices throughout the U.S. Most cities have more than one office. Some are noted here. You can find the addresses of Legal Aid by looking through all of the letter "L" in your telephone directory.

INDUSTRIAL PREPAREDNESS—A VITAL ELEMENT IN OUR NATIONAL DEFENSE

● Mr. GOLDWATER. Mr. President, during the numerous hearings the Tactical Warfare Subcommittee, of which I am chairman, has held to listen to the reports of the various branches of the military, one or two things keep coming through loud and clear. One is a deep conviction that we are so short of strategic metals that this fact alone can prevent adequate rearming or the purchase of adequate spares.

Another factor, and this disturbs me, is that there is doubt whether that which was once a giant, our industrial segment, is up to producing the number of weapons that we will have to have to even approach catching the Soviets. The Association of the U.S. Army has prepared a very short paper on this and I ask that it be printed in the RECORD.

The material follows:

INDUSTRIAL PREPAREDNESS—A VITAL ELEMENT IN OUR NATIONAL DEFENSE

There is much more to national defense than having good people who are well-trained and are equipped with the best possible weapons. We must be assured, for instance, that once our elected leaders have committed our forces to combat there are adequate sources of manpower, supplies and equipment to keep our forces going until the fighting achieves the desired conclusion. The extended debate over the ability of our present Selective Service System to provide mobilization manpower in a timely manner is one manifestation of these additional needs. Another can be found in the report of the House Armed Services Committee special panel which, in December, 1980, found many alarming flaws in the ability of our nations industries to react swiftly to the need for increased defense production.

This inability to react highlights the weaknesses in the Army's sustainability—its readiness to go to war and keep going until the full force of American industry and the American people can be brought to bear. The Army is almost entirely lacking a reservoir of equipment that could be used to replace combat losses. Indeed, many of the active Army's combat elements stationed in the United States have had to relinquish equipment to be stockpiled in Germany for possible use in a NATO emergency. The units of the Army National Guard and Army Reserve, whose readiness is crucial to the fighting capabilities of the Total Army, are either drastically short of equipment, have obsolescent gear, or both. The supply of the most critical item, ammunition, is also short.

Of course, there is a government-owned production base for ammunition, but most of its capacity is "laid away" and inactive because the Army has not been able to procure enough ammunition to justify keeping its capacity "warm." The Army estimates that across the broad spectrum of its mobilization hardware needs only about 25 percent could be "surged" to full production within the first six months of a military emergency. As long as two years would be required to convert existing civilian production facilities or build new ones that could fill all the gaps in the supply flow. In the meantime, of course, a mere trickle of supplies would be reaching the combat forces.

The reasons for this predicament are many and varied. but the constrained defense budgets of the last ten years are largely responsible. Constant adjustments in what should have been reliable, long-term programs have forced many civilian manufacturers away from defense production because there were too many uncertainties. Stultifying government regulations superimposed on every aspect of defense contracting have driven away suppliers who can easily find lucrative markets elsewhere.

Our government-owned industrial base must be enlivened and a new package of incentives must be offered civilian industry to draw them back into defense production. None of this can be accomplished, however,

without an underlying commitment of spending for readiness.●

REGULATORY FLEXIBILITY

● Mr. HUDDLESTON. Mr. President, there is a great deal of talk these days about bringing Government regulation under control. I agree completely with the need to eliminate unnecessary Federal regulation, however, I do not think that we should let the mistaken impression stand that this is a new initiative. Congress has been working on this problem for a long time and we have made significant progress. An example of this progress is the Regulatory Flexibility Act which became public law on September 19, 1980. As a cosponsor of S. 299, from which this new law was created, I was especially pleased to see it enacted.

Mr. Milton Stewart wrote an excellent article for the January, 1981 American Bar Association Journal which details the importance of this landmark piece of legislation. Mr. Stewart was the chief counsel for advocacy of the Small Business Administration and is well qualified to write on this subject. He has been a tenacious and articulate spokesman for small business interests for years. I highly commend him for his outstanding work.

I ask that Mr. Stewart's article be printed in the RECORD.

The article follows:

THE NEW REGULATORY FLEXIBILITY ACT

(By Milton D. Stewart)

The Regulatory Flexibility Act (P.L. 96–354) is a straightforward piece of legislation that represents a landmark determination to alter fundamentally the manner in which the bureaucracy behaves toward small business and other "small entities." It amends the Administrative Procedure Act, adding a new Chapter VI. Congress thus sent a message to the entire administrative law community, both in and out of government, that this action is to be treated as a major government-wide regulatory reform. Most provisions went into effect on January 1, 1981.

Perhaps the use of the word "landmark" here will turn out, in the long reach of time, to be an exaggeration, but support for it is provided by these elements:

The conscious imposition of a substantial burden on regulators expressly to lighten the regulatory burden, from both present and future rules, of a vast class of regulated—the "small entities." Consideration of alternative ways of adjusting regulations is now an express duty of all regulators.

A clarification of the meaning of our traditional standard of "equal justice under the law" in administrative process. Now that mandate is clarified to mean "equal treatment of the regulated of approximately the same size" or "equal treatment with due regard for the difference in the capacities of the regulated to bear the direct and indirect costs of regulations."

Additional imperatives to regulators to: (1) try harder to achieve actual notice of proposed regulations to small entities prospectively subject to them, beyond the traditional *Federal Register* notices; and (2) try harder to achieve actual participation of regulated small entities in the development and consideration of alternative and fairer means of achieving the regulatory purpose.

The new development of the statutory concept of "small entities" to include not only the traditional "small business" as requiring special treatment but also small governmental units and small voluntary associations. This is a broader conceptual response than we have seen yet to the problem of both governmental and private sector bigness and concentration.

The designation of a single federal officer—the chief counsel for advocacy in the Small Business Administration—to monitor government-wide performance of agencies in regulating "small entities" of all three kinds.

In passing this far-reaching new law, the Senate acted first, by adding Chapter VI to the Administrative Procedure Act on August 6, 1980. The signal the Senate intended to send to the agencies is clear from the Judiciary Committee's report (No. 96–878) on the original bill: "The committee believes that meaningful regulatory reform must be government-wide, enforceable, and coordinated with the legislative framework for the agencies. . . . The A.P.A. is the fundamental legislation upon which federal rulemaking is based and, together with the case law that has grown up around it, provides the foundation for nearly all significant agency actions. This is where regulatory reform must be focused."

The House emphasized its concurrence by passing the measure on September 9, 1980. President Carter signed the bill on September 19, 1980.

Both houses built, in a number of hearings over ten years, a conclusive record of disillusionment and discontent among the regulated. Small businesses and small entities repeatedly claimed that uniform application of the same regulations to them and to larger entities produced economic injustice.

These economic arguments were articulated by Milton Kafoglis, then a member of the President's Council on Wage and Price Stability, in testimony before the Senate Subcommittee on Administrative Practice and Procedure. He told the subcommittee: "There seem to be clear economies of scale imposed by most regulatory endeavors. Uniform application of regulatory requirements thus seems to increase the size firm that can effectively compete. . . . As a result, industrial concentration will have increased. It suggests that the 'small business' problem goes beyond mere sympathy for the small businessman but strikes at the heart of the established national policy of maintaining competition and mitigating monopoly."

The S.B.A. Office of Advocacy has some preliminary data which appear to support this view. In 1963 the small business share of the gross national product was 43 percent. By 1976 that share had dropped to 39 percent, according to a study by the Joel Popkin Company, indicating that business size is generally increasing.

While the new act breaks new ground in a number of areas, its mechanics are fairly simple.

A definition of "rule" is set forth that basically corresponds with rules required to be proposed under Section 553(b) of the A.P.A. or other laws with some specified exceptions and inclusions. The coverage of the act extends to every agency that engages in proposed rulemaking.

Federal agencies are directed to publish in April, 1981, a regulatory agenda. They must list all rules for which they are likely to publish a notice of proposed rulemaking in the *Federal Register*. They are to revise and republish the list in October, 1981, and every April and October thereafter. Rules to be included in the regulatory agenda are those which, in the judgment of the agency, are likely to have "a significant economic impact on a substantial number of small entities."

For each rule for which it publishes a general notice of proposed rulemaking after January 1, 1981, an agency must prepare and make available for public comment an initial regulatory flexibility analysis, which is to be published at the time of the publication of the general notice of proposed rulemaking in the *Federal Register*.

It must contain (1) a rationale for the agency's action; (2) the objective and legal basis for the proposed rule; (3) a detailed estimate and description of the reporting, recordkeeping, and compliance requirements anticipated; (4) an identification of relevant federal rules which may conflict, duplicate, or overlap the proposed rule; (5) specific discussion of alternatives to the rule that could accomplish the same objectives, such as different standards for large and small entities (multitiering), simplification, performance standards, or exemption of small entities.

Spokespersons for consumers and environmentalists were concerned about a possible erosion of the substantive principles of the statutes of most concern to them. The new act specifically states that alternatives must be "consistent with the stated objective of applicable statutes." There is no intention to undercut substantive law.

When the agency promulgates a final rule, it must issue a final regulatory flexibility analysis. Generally, the final analysis is to include information on how the agency handled issues brought up in the initial analysis. It also must respond to public comments. These analyses can be either qualitative or quantitative. The initial analysis may be waived or delayed only. A rule is void after 180 days without a final analysis.

An agency may avoid the preparation of an initial or final analysis with respect to a particular rule. It must certify that the rule will not exert, if promulgated, a significant economic impact on a substantial number of small entities. A copy of the certification must be sent to the chief counsel for advocacy of the S.B.A. for comment.

Agencies have to ensure participation of small affected parties in development of rules through use of several special techniques:

Statement in the advance notice that the rule may affect small entities;

Publication of the notice in publications of small entities and their groups;

A direct notification of affected parties;

Conferences or public hearings; and

Modification of their own agency procedures for obtaining input from small entities.

The agencies also are required to review systematically within ten years all of their existing and outstanding rules with respect to small entities. In reviewing a rule, an agency must take into consideration the continued need for the rule, public complaints regarding the rule, its complexity, and the extent to which it overlaps, duplicates, or conflicts with other federal or state rules.

Each agency must publish annually in the Federal Register a list of the rules it intends to review during the next year. Within 180 days after January 1, 1981, each agency must publish in the Federal Register a ten-year plan for a review of its rules that affect small entities. It is reasonable to expect that agencies will review their most significant and burdensome regulations first.

In an attempt to prevent the litigious experiences of other reform laws, such as the National Environmental Policy Act, Congress cut off judicial review of all agency actions under regulatory flexibility provisions during the promulgation process, including the regulatory flexibility analyses. However, the initial and final regulatory flexibility analyses are subject to judicial review as constituting "part of the whole record of agency action in connection with the review" of a final rule.

The chief counsel for advocacy of the S.B.A. is given over-all responsibility for monitoring agency compliance with the act. The president and the Judiciary and Small Business committees of both houses of Congress are to receive annual reports from him. It is anticipated from informal expressions of in-

terest that the authorizing and appropriating congressional subcommittees for each agency also will be interested in this source of oversight information. This is supported by the legislative debate, in which congressional oversight, based on these annual reports, was treated as a vital part of the compliance strategy.

The chief counsel also is authorized to appear amicus curiae in any action to review a final rule. A tightly worded directive is given to the courts to grant his applications for appearance in those actions. The legislative history makes it clear that Congress expects the chief counsel to exercise this authority independently. There is no requirement that he support or not support any particular party or view.

The new act incorporates the Small Business Administration definitions of "small business." Generally, for each manufacturing industry, the size standard ceiling is expressed as a specific number of employees. For service, wholesale, retail and other nonmanufacturing businesses, the size standard is set forth in S.B.A. regulations by a specific volume of business expressed in dollars. Other standards exist for specific programs and purposes.

Congress did recognize that S.B.A. definitions will not fit every regulatory situation. For example, the Environmental Protection Agency uses discharge volumes on a substance-by-substance basis as a size standard for effluent regulations. For regulation of effluent discharge, that standard makes more sense to E.P.A. than either employee size or gross sales.

Under the new act, agencies seeking to establish their own standards must consult with the S.B.A. Office of Advocacy and publish in the Federal Register the size standard proposed to be used. In that regard, it should be noted that the White House Conference on Small Business, held in January of 1980 and consisting largely of small business people, proposed its own "uniform" standard specifically "to facilitate flexible regulations by government." This was, of course, before the passage of the Regulatory Flexibility Act. The definition proposed is limited to 500 employees, each of whom works 1,800 or more hours per year. Subclasses of 0 to 9 employees, 10 to 49 employees, 50 to 249, and 250 to 499 also were recommended for possible differential treatment.

The term "small entities" includes not-for-profit, independently owned and operated enterprises. Cities, counties, towns, townships, villages, school districts, or special districts of less than 50,000 population also are included. The protections and benefits of the act thus reach far beyond small business. Despite its locus in the S.B.A., the Office of Advocacy is to monitor compliance on behalf of these additional "small entities."

Significant economic impact on a substantial number of small entities is made the touchstone of the new act's applicability. Rules with impacts are to be included in the regulatory agenda. The agency head may certify, in the alternative, that a rule is not subject to regulatory flexibility and no initial or final analysis is required.

Serious questions will arise immediately concerning the term "significant economic impact on a substantial number of small entities." That criterion is the test for inclusion of rules in the regulatory agenda and will be the reverse test for certification by an agency head that a rule is not subject to regulatory flexibility.

It is obvious from the legislative record that Congress does not want this test to be reduced to an absolute number. For instance, existing protections provided by Executive Order 12044 were triggered only if the total impact of the proposed regulation was estimated to be $100 million or more. Legislative intent clearly indicates that no such arbitrary numbers are to be developed for general applicability. The House Report (No. 96-519) specifically advocates the case-by-case approach as the best way to decide the matter and states in an example that the number of firms affected could be as low as 15 or even fewer and still trigger the act.

The criteria the S.B.A. Office of Advocacy probably will apply in its review of agency compliance, while still under extended study, may be forecast, based on our experience with parallel problems. Assessment of the overall impact of a regulation or rule would address ideally several characteristics of the affected firms and their industries. The assessment should begin with an "overview" description of impact, itemizing demographic factors. This should be followed by a detailed cost enumeration and an evaluation of probable effects on competition. Then these cost and competitive factors should be aggregated to show the total impact upon firms and industries.

No other issue gave rise to as much lively congressional debate as the issue of the scope of judicial review. The act as finally passed tries to strike a balance between minimizing opportunities for stalling the regulatory process and still assuring judicial pressure for agency compliance.

No separate review is provided for agency certifications that the act applies or does not apply to a given rule. Intermediate review of any regulatory flexibility action is barred expressly. Some judicial review is made possible by these words: "When an action for judicial review of a rule is instituted, any regulatory flexibility analysis for such rule shall constitute part of the whole record of agency action in connection with the review."

The question might be asked whether the new act contemplates judicial review of an otherwise reasonable rule when the initial regulatory flexibility analyses performed were inadequate, sloppy, or incomplete. A descriptive analysis submitted by Senator Culver on the Senate floor during the August 6 debate of the bill stated that the defective analysis should be considered as evidence of the unreasonableness of the rule. But in the House debate on the subject on September 8, in a colloquy between Representatives Broomfield and McDade, the latter implied that a court could give definitive weight to agency flexibility analysis in assessing the validity of an otherwise reasonable rule.

Is it constitutional under the equal protection clause of the 14th Amendment to create a classification in the law based solely on the size of regulated entities? Legal precedents indicate that the answer is yes, if they are reasonable.

In deliberating on the question of whether a classification is justified, the Supreme Court must decide whether the classification has a valid public purpose underlying it.

In several cases laws have been upheld that expressly exempted small businesses from certain regulations. The Court upheld an Arkansas law that exempted mining companies with ten or fewer employees from a complex process linking the amount of coal mined to a determination of miner's wages. *McLean* v. *Arkansas*, 211 U.S. 539 (1909). The Court later also upheld a state unemployment compensation act that exempted certain classes of small employers. *Carmichael* v. *Southern Coal Company*, 301 U.S. 495 (1937). In numerous instances in the past the Court has had opportunities to find size of business an unconstitutional classification but it has not done so.

The new act is a remarkably faithful implementation of Recommendation 44 of the White House Conference: "All federal agencies should have the power to implement a tiered system of regulation."

A regulatory flexibility task force has been established to assist the Office of Advocacy in making the new law as helpful as we know it can be for small entities. The task force ultimately will have 100 or more members, representatives of small business, economists, accountants, and others active in small entities protected by this act.

Two weeks after President Carter signed the act into law, yet another related White House Conference recommendation was passed by both houses of Congress. It was signed in October by the president. It was a response to the same perceived injustice of spurious regulatory equality. This time it was the specific inequality of the ability to pay for legal services. Title II of H.R. 5612, formerly S. 265, the Equal Access to Justice Act, responds to Recommendation 42 of the White House Conference and provides for a three-year experiment, beginning in October, 1981, during which individuals and small businesses as defined in the act may sue to recover their legal fees when they prevail in adversary bouts with the federal government on regulatory matters.

Both of these congressional enactments were made despite vigorous opposition from within the federal bureaucracy and from nongovernmental regulation advocates. The president and the Congress were persuaded that small business and other small entities had been hurt badly by inflexible, uniform regulations and overzealous enforcement proceedings aimed at the smallest and most defenseless targets.

Both laws are good and useful tools which can help correct abuses of long standing. However, even good causes are soured by excessive zeal. There must be awareness by small entities that responsible behavior is necessary on their part, too, and required if regulatory flexibility is to work.

Our system of government has endured because it embodies a durable self-righting mechanism that corrects transitory excesses and enthusiasms. There is always the risk, however, that the pendulum will swing too slowly or too late to help those being injured in specific controversies. It now has swung decisively enough, however, to prevent permanent damage to the small business sector, or to other small entities.●

COMMENDATION OF AMBASSADOR AND MRS. PHILIP ALSTON

● Mr. NUNN. Mr. President, on a recent trip to the southwestern Pacific region, I visited Australia to discuss defense and foreign policy matters with both Australian and United States officials. At the time of my trip, Mr. Philip Alston, of Atlanta, Ga., was our Ambassador to Australia.

During their 4-year tenure in Australia, Phil and Elkin Alston won the admiration and respect of everyone with whom they had contact and they served our Nation's interests in superb fashion. I encountered numerous people in Australia, both Americans and Australians, who made a special effort to express their praise for Ambassador Alston's performance.

He worked tirelessly to represent the United States throughout Australia and to improve the already close relations between our two countries. They traveled extensively to promote American interests and to gain a better understanding of our longstanding ally. His efforts were rewarded with the notable success he achieved, especially as they relate to our national security interests.

Based on my personal experiences and the many expressions of support I heard in Australia, I have only the highest praise for Philip Alston's professionalism

and ability as an American diplomat. The United States was well represented during his term in Australia, and his expertise will be missed. Of course, we welcome the Alstons back as leading citizens of our State of Georgia.

I recently received a letter from James F. Lane, president of the American Chamber of Commerce in Australia, citing Ambassador Alston's outstanding record and I ask that this letter be printed in the RECORD.

Mr. President, the Alstons are to be commended for their dedication and superb service to our country.

The letter referred to follows:

AMERICAN CHAMBER OF COMMERCE
IN AUSTRALIA.

Hon. SAM NUNN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR NUNN: On behalf of the 1400 members of the American Chamber of Commerce in Australia, I take great pleasure in recording the Chamber's deep appreciation to Ambassador Philip Alston for his outstanding efforts to enhance the American image in Australia.

During his term of office, he toiled ceaselessly to lay the groundwork for better understanding between the two communities.

His tireless efforts on behalf of American business and industry, his concern to see that resident Americans and Australians were briefed on United States policies, and his herculean travel schedule to carry the U.S. voice to remote corners of Australia have ensured for him a memorable place in United States-Australia relations.

He served his Government and his constituents well.

Sincerely,

JAMES F. LANE,
President.●

THURSDAY, MARCH 19, IS AGRICULTURE DAY 1981

● Mr. METZENBAUM. Mr. President, I wish to join my colleagues in calling the Nation's attention to Agriculture Day 1981.

In my view, too few people realize the tremendous job that American agriculture does in feeding our own people and those of the rest of the world.

In a time of tragically rising costs, we often fail to reckon with the efficient way in which our farmers put to use our finite land, water, and energy resources.

Let me point out a few facts that are surprising to many of us, and unknown to a great many thoughtful people.

For example, agriculture assets total $927 billion; equal to 88 percent of the capital assets of all manufacturing corporations in the United States, making it the Nation's leading industry.

It is also the Nation's No. 1 employer. More than 15 million people work in some phase of agriculture—from growing food and fiber to selling it at the supermarket. Farming itself uses 4.4 million workers—as many as the combined payrolls of the transportation, steel, and the automobile industries. Services of an approximate 8 to 10 million people are required to store, transport, process, and merchandize the output of the Nation's farms. In all, agriculture accounts for one out of every five jobs in private enterprise.

Agriculture is the No. 1 fighter against inflation. Productivity growth was five times greater than nonfarm industry over the past 5 years. One farmworker supplies enough food and fiber for 68 people; only 20 years ago he was producing enough for 28. American farmers produce over 54 percent more in crop output—on 3 percent fewer acres—than their fathers. And U.S. farm productivity is unparalleled in the world: Asia's farmworkers produce an average of 4,400 pounds of food crops each year; Russia's farmworkers—33,000 pounds; Europe's farmworkers—35,000 pounds; compared to the U.S. farmworker's 375,000 pounds.

It is the No. 1 exporter of American goods. Agriculture exports totaled a record $40 billion in 1980—by far the leading positive factor in the U.S. balance of trade. These exports provide employment for 1.3 million U.S. workers, and generate more than $82 billion in domestic economic activity. America's 2.4 million farms provide enough food and fiber for our domestic population as well as exporting more than any other nation in the world. With less than 7 percent of the world's land, the U.S. produces 43 percent of the world's corn and about 60 percent of the world's soybeans. We supply 44 percent of the world's total wheat exports and 71 percent of the world's coarse grain exports. All these exports make it possible for us to pay for our major foreign imports like oil, automobiles, and electronics.

Clearly food prices have increased dramatically in the past few years, but it is equally clear that our income buys considerably more food today than in 1950. For example, an average U.S. factory worker could buy with 1 hour's pay: 10.1 pounds of white bread in 1950, but 15.8 pounds in 1979; 2.4 pounds of frying chicken then and 9.8 pounds in 1979; 7.5 quarts of milk in 1950 and 13.5 quarts now; 2 pounds of butter then, 4.1 now; about three times as many eggs and almost three times as much pork in 1979 as 1950.

This Senator wishes to take this opportunity to applaud the farmers of our Nation and to the state that we all would be in one terrible fix without their devotion to hard work and their intelligence in creating and applying new technologies daily.●

ASIA

● Mr. GLENN. Mr. President, I call my colleagues attention to a recent article in the Wall Street Journal by former Assistant Secretary of State for East Asian and Pacific Affairs, Richard Holbrooke. For the past 4 years, as chairman of the East Asian Subcommittee, I have had occasion to work closely with Secretary Holbrooke and came to appreciate his perceptive understanding of Asian affairs. In this article the former Assistant Secretary succinctly describes the growing danger of Soviet presence and influence in Asia, a concern which I have long shared.

Mr. President, I ask that the full text of the article by Mr. Holbrooke be included in the RECORD.

The article follows:

[From the Wall Street Journal, Mar. 9, 1981]

FAVORABLE TRENDS AND PRESENT DANGER IN THE PACIFIC

(By Richard Holbrooke)

The re-affirmation by President Reagan, during the visit to Washington of South Korean President Chun, that the Pacific nations "will have our continued support as our European allies have" is precisely what our friends and allies in Asia want and need to hear. Let us hope that policy substance lies behind the rhetoric, for it is vital that our search for a stable global balance of power proceed from an explicit recognition of the strategic equivalence of the Atlantic and the Pacific.

The good news from East Asia today is that the balance of forces in that huge region stretching from Hawaii west to Burma and from Korea and Japan all the way to Australia and New Zealand is more favorable to the United States than at any time in over a generation. American presence and prestige have been restored in the area, even in that most fragile quadrant of it, Southeast Asia, beyond what anyone, hawk or dove, thought possible at the end of our Indochina tragedy.

For the first time in over 50 years, we have good relations with both Japan and China, and they have good relations with each other. U.S.-Japanese co-operation in the strategic and political fields has been strengthened despite growing trade frictions. A 1979 base agreement with the Philippines has assured us continued access to our two huge bases there until at least 1991. Our policy of support, begun in 1977-78, for the Association of Southeast Asian Nations (Indonesia, Thailand, Singapore, Malaysia, and the Philippines), is a vital ingredient in regional stability. The massive American-led relief and resettlement effort for Indochinese refugees has contributed greatly to avoiding political instability in Thailand and Malaysia.

Our Korean commitment, after some difficult times, partly self-inflicted, has been re-affirmed. And perhaps most important, we have entered into a new phase of our relationship with China, one which could offer great opportunities.

Internally, the region still faces major problems—above all, the triple scourge of the underdeveloped world, overpopulation, underemployment and food shortages. But self-confidence and economic prosperity, if not universal, are widespread and growing in most East Asian capitals. Trade is booming despite severe pressures caused by oil price increases. For the United States, the Pacific Basin is now a trading area equal or exceeding in size Western Europe, with two-way trade last year topping $90 billion.

But none of the above should be cause for complacency or neglect. The favorable balance of forces in East Asia is under pressure from predictable quarters, primarily Moscow and Hanoi.

In Southeast Asia, the still unfulfilled irredentist ambitions of the Vietnamese in Cambodia have created enormous pressures on ASEAN's frontline state, Thailand. Last year we rushed a small amount of additional military equipment to Bangkok to meet one flurry of Vietnamese activity just inside the Thai border; more support is needed, and can be expected. That Hanoi will not cease its military efforts nor reduce its dependency on the Soviet Union until it has achieved its longstanding aims in Cambodia is clear. The continuation of our security commitment to Thailand—once so controversial, fortunately much more widely accepted today—is therefore essential.

The present Chinese-Vietnamese hostility offers ASEAN some breathing room, but it is another source of potential long-range instability in the region. And it is important to note that while Chinese and American ob-

jectives in the region are often parallel, they are not identical, nor could they be, given the great historic and ethnic differences between us.

The most troublesome potentially destabilizing factor in the East Asian equation is the Soviet Union. Ironically, it is Moscow's recent political failures that have made it all the more a security threat. Politically, the last five years have seen almost continuous setbacks for the Russians in the Pacific. Their hopes for gains in Southeast Asia have been thwarted by an emerging ASEAN. Moscow's diplomacy with Japan is a classic of bungling. China has emerged into the world system.

To this record of diplomatic and political setbacks the Soviets' response has been almost purely military. They have maintained and strengthened the 45 divisions stationed on the Chinese border—about one-quarter of their entire military strength. They have built up their forces on the Northern Islands, in an unsuccessful effort to frighten Japan away from its growing ties with China. Their reconnaissance flights, which once operated out of Vladivostok and could reach only as far south as the Philippines, now stage out of Da Nang, with a new ability to stay aloft for extended periods in the entire region. They can range as far south now as the southern coast of Australia. Most ominously, they have used their one friend in the area, Vietnam, as a base from which to try to change the balance of power through a naval buildup which is clearly not justified by either their own history or their strategic interests.

This threat to the present stability and favorable trends in East Asia and the Pacific is the central strategic challenge that we face in the next few years. We are well positioned to deal with it, provided we are prepared to commit the necessary resources and show the political will and leadership required. If we fail to construct a coherent and successful policy to deal with this problem, we may find the costs far higher later. Underinvolvement, neglect or misunderstanding may have led to overinvolvement later. It's worth remembering that our last three wars began in the Pacific region.●

AN ALTERNATIVE FEDERAL ENERGY BUDGET

● Mr. WILLIAMS. Mr. President, I bring to my colleagues attention an interesting report released by the Consumer Energy Council of America on an energy budget alternative to the proposed Reagan administration budget. This report culminates an intensive effort on the part of the council to devise a realistic budget proposal for our Nation's energy programs. The council represents a broad-based coalition which includes almost every segment of our society. The CECA alternate budget for energy programs proposes an approach which will benefit all Americans while not sacrificing any particular program.

The budget targets established by the council's report maintains the same total level of energy funding as the Reagan budget but distributes budget reductions evenly, across the spectrum of energy technologies. If the CECA figures are used in place of those recommended by the President, the many valuable and proven renewable energy and conservation programs which have been established over the years would be retained at adequate funding levels. Our national energy program would then continue to be multifaceted. This proposal attempts to arrive at equitable sacrifices which best serve the Nation's energy needs. The President has called for realistic alternatives to his budget proposals if they could be found. The council has done just that. With ever-increasing energy prices continuing to threaten the Nation's economic viability and strategic security, the CECA approach offers a realistic alternative for a diversified program of energy research, development, and assistance which will provide the best security for the American people. All energy sources are important to a healthy economy and secure Nation; this proposal embraces this type of balanced approach.

While we may not all agree entirely with the specifics of the council's budget recommendations, I believe we can agree this is an approach well worthy of consideration. We cannot in good faith throw out programs which will prove the most valuable in reducing our reliance on finite and foreign sources of energy. The council provides the Congress with a valuable opportunity, a workable alternative which meets the President's economic goals as well as the diverse energy requirements of the country. It is incumbent upon us to carefully evaluate these and other similar proposals as the budget process proceeds. As we attempt to balance the Federal budget, we must not reduce or eliminate easily achievable and reasonably priced solutions to our continuing energy problems.

I sincerely congratulate the Consumer Energy Council and especially their director, Ellen Berman, for their outstanding work on this very important issue as well as their diligent efforts over the past several years to help in the development of a comprehensive and sensible energy policy for our Nation.

Mr. President, I ask to have the council's explanatory statement on their study and a copy of their alternative budget proposal printed in the RECORD at this time.

The material follows:

CONSUMER GROUP RELEASES: ALTERNATIVE FEDERAL ENERGY BUDGET

The Consumer Energy Council of America (CECA) today released an alternative federal energy budget which maintains the same total level of energy funding as the Reagan budget but distributes budget cuts evenly across all energy technologies.

"The President's budget plan will dramatically slash federal funding for investment and research in all forms of energy, except fossil fuels and nuclear power, and will create an excessive, dangerous, and unnecessary dependence on a few sources of energy," said Ellen Berman, Executive Director. "It cuts funding for conservation and alternative energy sources for FY81 and FY82 by 45 percent, but conventional energy sources by only 15 percent."

The CECA alternative represents a more even-handed approach by applying a rigorous set of budget cutting rules to all energy technologies, according to Berman. "When our formula is applied, the CECA FY81 and FY82 budget will save approximately $3 billion within DOE and about $6 billion for all federal energy programs," Berman said. "Our approach is to establish priorities for the various types of federal energy activities and then apply a uniform budget-allocation formula to each of the energy technologies. The CECA alternative budget creates a balanced energy supply mix, which is vital to our national security.

"Our formula is quite straightforward," said Berman. "Given the urgent need to increase our energy supply, we recommend 100 percent funding for programs which directly increase energy availability, either through production or increased efficiency. We also fund the social safety net programs—low income energy assistance—at 100 percent.

"Our approach funds R & D, strategic planning, and departmental administration at 80 percent of the base budget; risk sharing and general planning at 60 percent; information gathering and dissemination at 40 percent; and program-specific regulation at 0 percent. This formula is applied across the board to all energy technologies," said Berman.

"CECA's balanced approach is a vast improvement over the President's. It will better serve the President's own national policy goals—enhanced national security, revitalization of the economy, maintenance of the social safety net, and fiscal responsibility," Berman concluded.

The Consumer Energy Council of America is a broad-based coalition of major national consumer, labor, farm, public power, rural electric cooperative, senior citizen, urban, low income, and minority organizations.

AN ALTERNATIVE FEDERAL ENERGY BUDGET

(Presented by the Consumer Energy Council of America)

This is the second installment of CECA's running energy budget dialogue (monologue?) with the new Administration. This budget is organized according to the functional categories utilized in President Reagan's Program for Economic Recovery. With the submission of the final budget, the Administration changed these categories. The next installment of CECA's alternative federal energy budget will reconcile the functional breakdown with the divisional breakdown used in the most recent Reagan budget.

AN OVERVIEW OF CECA'S ALTERNATIVE FEDERAL ENERGY BUDGET

In his economic message to the nation, the President called on those who disagree with his approach to offer alternatives which would meet a specific set of national goals. The basic goals he defined are: enhancing the national security, revitalizing the economy, maintaining the social safety net and exercising the fiscal restraint. The Consumer Energy Council of America, a broad-based coalition of major national consumer, labor, farm, public power, senior citizen and minority groups, offers the attached energy budget as such an alternative, one which we believe meets those goals better than the President's energy budget. CECA's budget is based on two general principles—a balanced approach to America's energy future and a rational, consistent approach to budget setting.

CECA's budget maintains approximately the same level of federal funding for energy production, research and development as the Reagan budget. In FY 81–82, it will save about $3 billion within the Department of Energy and about $6 billion for all federal energy programs. However, it distributes the cuts much more evenly across the various energy technologies. Full funding is maintained for programs that directly increase energy availability—either through production or conservation programs—and programs that maintain the social safety net. All other activities are reduced in an evenhanded approach. The net effect compared to the Reagan budget is to reallocate about ¾ of a billion dollars from general science and nu-

clear research to conservation and alternative technologies.

GENERAL PRINCIPLES

The President's budget will not only dramatically slash federal funding for investment and research in all forms of energy *except* fossil fuels and nuclear power, but the administration's policy of price decontrol will also transfer huge sums of money to the fossil fuel industry. We believe that the result will be an excessive, dangerous and unnecessary dependence on a few sources of energy.

In contrast, we believe that an effective energy policy must draw on all of the major sources of energy. In addition to fossil fuels and nuclear energy, we must benefit from conservation through maximum increases in the efficiency with which we use available energy and we must expand the contribution of alternative sources of energy, such as solar and biomass.

Conservation and alternative sources of energy diversify our sources of supply and increase the energy available to us, thereby reducing our vulnerability to foreign manipulation or supply interruptions. Conservation and alternative sources of energy are generally cheaper, more labor intensive and geographically more widespread than conventional energy sources. Therefore, they stimulate a more balanced pattern of economic growth and are more anti-inflationary than conventional energy sources.

The above observations are entirely consistent with the basic goals that the President outlined—enhancing national security, revitalizing the economy by fighting inflation and maintaining the social safety net. Further, we believe that a balanced energy policy such as that proposed by CECA will better meet these goals. For these reasons, CECA believes that each of the sources of energy is of extreme importance to the nation's energy and economic future and that they should be given relatively equal consideration in the allocation of scarce federal resources.

SYSTEMATIC BUDGET-CUTTING

In addition to enhancing national security, revitalizing the economy and maintaining the social safety net, we also accept the President's fourth goal, exercising fiscal restraint. We do recognize that federal resources are scarce and that budget cutting will have to occur. However, in contrast to the Administration's approach, which simply singles out one or two technologies and removes almost all federal support on the basis of shallow and frequently inconsistent analysis, we have established a rigorous set of rules for budget cutting and applied them to all energy technologies on an even-handed, unbiased basis.

Our approach is to establish priorities for each of the activities that the federal government conducts in regard to energy supply and demand and then apply these priorities to each of the energy technologies. For example, given the pressing need to increase energy supply in the immediate future, we recommend full funding for those programs which directly make more energy available. This applies equally to the uranium enrichment program and the naval petroleum reserve—both of which produce energy—as well as to the federal building retrofit program, the schools and hospital retrofit program and the low income weatherization program—all of which directly conserve energy by improving the energy efficiency of the nation's building stock.

Similarly, research and development are sufficiently important to the nation's energy future that we recommend these programs be funded at 80% of the base budget. This applies across the board. The Administration's arguments in favor of its net technology, nuclear research and development, are, in fact, equally valid for research and development in building sciences, photovoltaics or other forms of alternative energy. To slash research for some technologies while increasing it for one or two others results in a pure, irrational bias that dangerously limits and forecloses our future energy options at the very moment we should be expanding them. An even-handed approach will produce a more secure energy future.

We suggest a large number of areas in which federal funding can be cut much more dramatically than 20%, such as information gathering and regulation. The list of our budget-cutting principles is presented in Exhibit 1. We recognize that any set of priorities is essentially arbitrary. However, we believe that these priorities, coupled with the general principle that all energy sources need to be developed and all options need to be kept open in a balanced approach, will produce the best energy policy for the nation. It is certainly preferable to the slap-dash, inconsistent and irrational approach which the Administration has taken.

EXHIBIT 1

CECA PRINCIPLES FOR BUDGET SETTING

1. All energy sources are of extreme importance to a healthy economy and a secure energy future. Therefore, all sources deserve relatively equal consideration in the allocation of scarce federal resources.

2. The activities of the federal government in energy production, conservation and research should be evaluated on the basis of their contribution to a more secure future. We suggest the following formula for funding programs according to CECA's priorities.

Activity	*Level of baseline budget funding (percent)*
Direct production	100
Research and development	80
Strategic Planning	80
Departmental Administration	80
Risk Sharing	60
General Planning	60
Information Gathering	40
Information Dissemination	40
Program Specific Regulation	0

3. Uniformly apply the priorities to each of the energy technologies.

CONSUMER ENERGY COUNCIL OF AMERICA ALTERNATIVE ENERGY BUDGET

FISCAL YEAR 1981, FISCAL YEAR 1982 SUMMARY

[In millions of dollars]

NON-DEFENSE ITEMS	Budget base (Carter budget)		Reagan		CECA (Uniform budget)	
	1981	1982	1981	1982	1981	1982
DOE programs:						
Production, research and development:						
Solar	577.0	584.0	503.7	193.3	452.2	408.3
Conservation	755.1	874.1	578.5	195.0	626.4	725.8
Energy supply program	662.5	551.3	463.5	338.3	492.1	412.0
Fossil fuels	1,329.0	1,710.0	1,035.3	666.3	1,102.8	1,413.2
General science	504.4	607.0	504.4	567.5	402.4	485.9
Nuclear R. & D	1,364.2	1,439.7	1,517.3	1,697.1	1,091.4	1,151.8
Supporting R. & D	294.9	396.4	284.9	333.4	235.9	317.1
Uranium supply	31.8	568.9	31.7	164.4	31.7	164.4
Power marketing	178.6	379.8	179.0	380.0	178.6	379.8
Subtotal	5,697.5	7,111.2	5,968.3	4,535.3	4,613.5	5,758.3
Regulation	331.6	270.0	218.1	110.7	198.9	111.5
Information and administration	388.9	528.9	355.5	353.0	340.2	397.7
Total DOE	6,918.4	7,910.1	5,651.9	4,999.0	5,743.7	5,936.5
Fiscal year 1981, 1982 combined totals	14,328.1		10,640.9		11,710.2	
Non-DOE programs:

OIL SPILL LIABILITY AND COMPENSATION BILL—S. 681

● Mr. CANNON. Mr. President, the Commerce Committee has a long-standing involvement in oil pollution issues, including bills in previous Congresses concerning oil spill superfunds. I am pleased today to join my colleagues in cosponsoring this bill on oil spill liability and compensation, because it has major implications for the transportation and insurance industries, among others, and needs to be examined carefully by the Commerce Committee.●

IS OUR AVIATION INDUSTRY GOING THE WAY OF "DETROIT"?

● Mr. SCHMITT. Mr. President, on March 10, 1981, the Senate Subcommittee on Science, Technology, and Space began authorization hearings on the fiscal year 1982 budget for the National Aeronautics and Space Administration. Quite appropriately, the first hearing focused on NASA's aeronautical research and development program.

Mr. President, I say "quite appropriately," because the aerospace industry has now surpassed agriculture as contributing most to net exports of the United States, with a trade surplus of over $10 billion. In addition, the aerospace industry currently employs over 1 million people. However, we must not feel false confidence in these statistics. There is some consensus that these numbers represent a peak.

Recent studies have shown that commercial aircraft manufacturers have lost 20 percent of their market over the past few years.

In rotocraft transport, component production, and high performance military aircraft, the same trend can be seen.

Some of our aircraft are now dependent on imports of foreign-manufactured components.

Several foreign nations have included aircraft development and production as part of their national industrial plans. Their target being to displace the United States from its leadership position.

Mr. President, the hearings pointed out that these are clearly indications of the threat to what has been a strong American industry. A March 15, 1981, Washington Post article amplified this concern. The source of this concern: a new competitor: Brazil.

It should be clear that in order to sustain our economic security, we need to support a research and development program that will allow our industry to compete with the rest of the world.

I ask that this article be printed in the RECORD.

The article follows:

BRAZIL'S FLEDGLING AVIATION INDUSTRY FLYING HIGH

(By Jim Brooke)

SAO JOSE DOS CAMPOS, BRAZIL.—From Togo to France to the Fiji Islands, Brazilian-made jets and passenger planes are leaving marks from Amazonian rubber on the landing strips of five continents.

Starting from scratch only 10 years ago, Brazil's state-controlled airplane company Embraer is now the world's sixth largest general airplane manufacturer, and the only non-American among the top 10.

The jackrabbit growth of Brazil's aircraft industry is part of a silent, decade-long industrial surge that last year brought Brazil's

manufactured exports over the level of primary exports a traditional indicator of development.

Although Embraer is forced to import an average of 65 percent of parts for each plane—engines, propellers, electrical components and aluminum sheets—its planes remain competitive worldwide because Embraer's 5,300 workers receive low wages. Line workers earn $150–$225 a month, less than their American counterparts make in a week.

Last month Americans felt the bite when Embraer elbowed aside Cessna aircraft and Beech aircraft to win a $50 million contract to sell 41 Brazilian-designed Xingus to the French military.

Based in this industrial city one hour outside Sao Paulo, Embraer last year turned out 418 planes, ranging from a Brazilian-designed crop duster to an Italian-designed jet trainer.

Brazilian planes now fly in 20 countries, including the United States, where 12 commuter lines fly the 19-seat "Bandeirante." In one of Embraer's cavernous hangars here, the finishing touches recently were being put on Bandeirantes marked "Cascade," "Midsouth" and "Tennessee."

Nicknamed the "bandit" by American pilots, the turboprop Bandeirante began rolling off assembly lines at a time when skyrocketing oil prices started forcing local commuter operators to abandon jets.

"We were lucky," admitted Embraer spokesman Mario Leme Galvao recently. "The Bandeirante arrived on the market at just the right time," since Turboprops use 30 to 40 percent less fuel than jets.

Aiming for a larger slice of the commuter market, Embraer is betting on a sleek, needle-nosed plane baptized the "Brasilia." Designed to handle four 100-mile hops without refueling, this 30-passenger turboprop is to go on sale in 1984.

Critics says this will be the moment of truth for the Brazilian airplane industry. The Canadian De Havilland, the Swedish Saab and the French Aeropatiale have all unveiled plans for similar-sized turboprops for the mid-1980s.

The Brazilians predict fierce international competition, but already have 116 signed options to buy the Brasilia—50 from American companies. And, keeping their assembly line running 20 hours a day, they are plunging ahead with other models.

Next year, Embraer plans to put on sale a $900,000 bubble-topped military trainer, the first turboprop with ejectable seats. Called the T27, the plane will be at the Paris Air Show this June.

Last month, the Brazilian and Italian governments established a joint research program for the mutual production of a $10 million air combat and ground attack jet capable of doing 700 miles an hour.

Called the AMX, Brazilians see this jet as another step toward independence for their air force. Today, only three years after breaking a long-standing military supply accord with the United States, 65 percent of the planes patrolling Brazil's airspace bear the label "Made in Brazil."

Brazil is to provide 30 percent of the capital for the AMX, and with this deal they hope through the Italians to win access to the NATO market.

With an eye to the lucrative European civilian aircraft market, Brazilian and Portuguese officials signed a "protocol of intentions" last month that calls for using cheap Portuguese labor to assemble Brazilian planes in Portugal for sale to Common Market countries.

With Latin America's only significant airplane industry, and helped by cheap delivery costs and easy government loans, Brazilians also have found a natural market for their planes on their own continent. Helibras, Brazil's infant helicopter company, has sold a third of its recent production to Latin American buyers.

With isolated ranches and towns sprinkled through the interior high plains and the Amazonian jungle, Brazil—the fifth largest country in the world—itself has enormous potential for small commuter and executive aircraft.

When burned last month on the French deal, U.S. general aviation companies still were smarting over the closing of the Brazilian internal market five years ago.

But the doors to imports effectively slammed shut in 1974 when Piper aircraft won a licensing competition to make light planes at the Embraer plant. Today, two-thirds of the Embraer production consists of Piper models.●

SOME GOOD NEWS FROM ARGENTINA'S PRESIDENT-DESIGNATE VIOLA

● Mr. PELL. Mr. President, I am delighted that at a Senate coffee today for members of the visiting Argentine delegation, President-designate Viola stated that his Government will publish a listing of all those known by the Government to have disappeared and to have died over Argentina's past several years of internal turmoil. Such a listing is a critical step in determining the fate of thousands who have disappeared in Argentina. This list is earnestly desired by the families of those who are missing, as I learned on my recent visit to Argentina.

General Viola seemed intent on improving Argentina's image in the field of human rights. He also confirmed the provisional release of two prominent Argentine human rights spokesmen, Mr. Emilio Mignone and Mr. Augusto Conde McDonnel who were recently detained.

The Argentine Government's willingness to move in this direction sends a significant signal to members of the international community and human rights advocates everywhere.

General Viola's statements today are directly responsive to two letters that I recently sent to him. One of those letters was cosigned by Senator WILLIAMS, and the other by Senators WILLIAMS and PRESSLER. The letters, which I ask unanimous consent to insert in the RECORD following these remarks, came out of conversations that several of us had with the President-designate during our February visit to Argentina.

At that time—and again this morning—I was struck by the vehemence of General Viola's expressed desire to work closely with the United States in many areas of mutual concern and to improve his country's human rights record.

These latest announcements confirm to me that, even before he takes office, Argentina's new President is off to a good and promising start.

The letters are as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., March 3, 1981.

His Excellency ROBERTO VIOLA,
President-Designate of the Argentine Republic.

DEAR PRESIDENT-DESIGNATE VIOLA: As individual members of the Senate delegation who met with you during our recent visit to Argentina, we would appreciate clarification of your statement on the matter of the disappearances. All members came away with the clear impression that under your Administration there will be a very real and genuine improvement of the human rights situation. However, there seems to be varying impressions with regard to your response on the disappearances. We know that your country has been through a difficult period. We understand from our own history that some violations can occur in times of turmoil. However, we also appreciate the new efforts you are making.

Our understanding of your statement as interpreted was that your government would publish a list of those it acknowledged has disappeared as the result of political turmoil in your country. We would appreciate if you would clarify your position on this issue. We await your response eagerly because we feel that it will be an important indicator of the further opening of the Argentine political system.

Again, we would like to thank you for the opportunity of the frank and open exchange and express our hopes for a warm U.S.-Argentine relationship during your presidency.

With best wishes,
Ever sincerely,

HARRISON WILLIAMS.
CLAIBORNE PELL.
LARRY PRESSLER.

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., March 3, 1981.

His Excellency ROBERTO VIOLA,
President-Designate of the Argentine Republic.

DEAR PRESIDENT-DESIGNATE VIOLA: We were very honored and glad to be received by you when we were in Buenos Aires. May we add, too, how much we appreciated your frankness and your concern that the international image of your country be improved. In this regard we were disturbed to see that Mr. Emilio Mignone and Mr. Agusto Conde McDonnel had recently been arrested. We had the privilege of talking with these two gentlemen for an hour on the day of our arrival in Buenos Aires and only afterwards learned that each of them had had a child who had disappeared. Yet, Messrs, Mignone and Conde McDonnel spoke to us in very measured terms but with very real optimism and words of praise for the human rights conditions as they were developing. Their arrests naturally disturb us. Moreover, we hope that their meeting with us and their arrest is in no way retribution for their visit with us. We would hope that you would look into their arrest and ask you to let us know what their prospects are.

With very real regard and respect, we are
Ever sincerely,

HARRISON WILLIAMS.
CLAIBORNE PELL.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I might inquire of the distinguished minority leader if he is in a position to consider the items appearing on today's Executive Calendar.

Mr. ROBERT C. BYRD. Mr. President, the minority has no objection to proceeding to the items on the Executive Calendar.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the five nominations appearing on the first and second pages of the Executive Calendar of this date.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF AGRICULTURE

The legislative clerk read the nomination of C. W. McMillan, of Virginia, to be an Assistant Secretary of Agriculture.

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF THE TREASURY

The legislative clerk read the nomination of Angela M. Buchanan, of the District of Columbia, to be Treasurer of the United States.

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The legislative clerk read the nomination of David G. Swoap, of Virginia, to be Under Secretary of Health and Human Services.

Mr. DOLE. Mr. President, on March 12, 1981, the Committee on Finance held a hearing on the nomination of David B. Swoap to be Under Secretary of Health and Human Services and unanimously reported his nomination.

I am pleased with the bipartisan support that Dave received from Finance Committee members. As a former professional staff member of our committee, Dave Swoap's talent, ability, and integrity are widely respected and personally known by most of the senators currently serving on the committee.

Dave will bring to the important job of Under Secretary many years of experience in the legislative and executive branches of Federal and State government. He comes to the Department at a time when far-reaching changes are being made in the administration of our public programs. I have every confidence that Dave will provide the kind of quality leadership and program expertise necessary to help bring about these changes.

In his appearance before the committee, Dave indicated his commitment to make the HHS Inspector General's office more effective. The Finance Committee has an active interest in eliminating fraud and abuse in our public programs. We had great expectations that the committee's Medicare-Medicaid Anti-Fraud and Abuse Amendments of 1977 as well as the committee-initiated legislation which established the HHS Inspector General, would sharply reduce fraud and abuse. We have been disappointed.

I applaud Dave's commitment to improve the effectiveness of the HHS IG office. I know that his commitment reflects the concern of President Reagan, Secretary Schweiker, and the Finance Committee in eliminating fraud and abuse and I would hope that we will see a crackdown by the HHS Inspector General on such practices.

Mr. President, I am particularly pleased today to report the committee's decision to recommend to the Senate a former able Senate Finance Committee professional staff member as Undersecretary of the Department of Health and Human Services and ask that Dave Swoap's nomination be confirmed.

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

The legislative clerk read the nomination of Ricardo M. Urbina, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia.

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF LABOR

The legislative clerk read the nomination of Thorne G. Auchter, of Florida, to be an Assistant Secretary of Labor.

● Mr. HATCH. Mr. President, as chairman of the Labor and Human Resources Committee, I am very pleased to report favorably the nomination of Thorne G. Auchter for Assistant Secretary of Labor for Occupational Safety and Health.

Mr. Auchter brings a wealth of experience and expertise to the position of Assistant Secretary. He became involved with the Occupational Safety and Health Act at its inception, when he was appointed to the Florida task force on OSHA, to determine whether that State should exercise an option to administer its own program. Since that time he has served on various other task forces on OSHA, and he has participated in a number of seminars and labor-management programs. Throughout the decade, Mr. Auchter has become a recognized spokesman in his native State on a broad range of occupational safety and health issues. But one should not think that Mr. Auchter's involvement with OSHA is academic.

Indeed, from his early youth, he has served in various capacities in his family construction business, from carpenter apprentice, to field engineer, to superintendent, and until recently executive vice president. During this time, he was instrumental in creating an OSHA compliance program for his company, which he has continuously supervised and implemented to the present. Thus, his experience as a laborer has given him a perspective of the hazards that can pervade the workplace and of a worker's responsibility to promote safety. His managerial experience has given him an appreciation of what methods of operation and what compliance programs do efficiently promote safety and health. And his active participation in professional and educational programs has given him the technical skills and knowledge to formulate and implement this Nation's safety and health policies.

Mr. Auchter comes well equipped to lead OSHA in a new direction, which emphasizes cooperation between labor, management, and the Government—which improves targeting of enforcement resources—and which places less reliance on burdensome and expensive standards and regulations whose efficacy is often questionable. I strongly recommend that his nomination be overwhelmingly approved.●

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS BETWEEN 9 A.M. AND 3 P.M. ON WEDNESDAY, MARCH 18, 1981

Mr. BAKER. I ask unanimous consent that all committees be authorized to file reports between the hours of 9 a.m. and 3 p.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOSEPH ROSENTHAL—SENATE RESOLUTION 100

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the Senate pro-

ceed to the immediate consideration of a resolution I have introduced, along with my colleague, Senator CRANSTON.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 100) to honor Joseph Rosenthal for his contributions as a photographer.

Mr. ROBERT C. BYRD. Mr. President, the resolution has been cleared on this side of the aisle. Mr. BIDEN has approved the consideration of it. Therefore, no objection is interposed.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. HAYAKAWA. Mr. President, this resolution honors a constituent of mine, Mr. Joe Rosenthal. It was Mr. Rosenthal who took the Pulitzer-Prize-winning photograph of the flag raising on Iwo Jima on February 23, 1945. At the time, he was a combat correspondent with the Associated Press. Ironically enough, Mr. Rosenthal had been rejected from military service during World War II because of poor eyesight, but he ultimately saw as much combat as any veteran. When Mr. Rosenthal and the Marines fought their way to the top of Mount Suribachi, he realized to his dismay that a small American flag had already been planted. It was then, however, that five Marines and a Navy corpsman raised the larger flag that could be seen all over the tiny island. It was at this moment in time that he captured for all humanity. Although small, the island of Iwo Jima was of primary strategic importance and almost 7,000 Americans gave their lives for it.

As we all know, Mr. Rosenthal's picture has become the most famous of all war photographs. This immortalized moment in history has come to symbolize the indomitable spirit and patriotism of the American people. Had Mr. Rosenthal not been with camera in hand at that place in time, we would have been deprived of remembering one of our finest moments in history.

This Thursday, Mr. Rosenthal's friends and associates will be honoring him for his years of service to the public and his contribution to our history. For the past 35 years, he has been an aggressive and artistic news photographer for the San Francisco Chronicle. I think it would be particularly fitting if the Senate could join with Californians and all Americans in paying tribute to this man.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 100) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 100

Whereas, Joseph Rosenthal, as a photographer, has made incomparable contributions to the candid recording and preservation of events in United States history for over thirty-five years;

Whereas, Joseph Rosenthal photographed American military personnel raising the flag of the United States on Mount Suribachi on February 23, 1945, during the World War II battle for Iwo Jima;

Whereas, Joseph Rosenthal has given the world, by that photograph, a symbol of the indomitable spirit of the American people;

Whereas, Joseph Rosenthal has honored his country by being awarded the Pulitzer Prize for the photograph of American fighting personnel; and

Whereas, Joseph Rosenthal is now on the eve of his retirement from a long and glorious service: Now, therefore, be it

Resolved, That the Senate honors and pays tribute to Joseph Rosenthal for his revered contributions to the American people and to the world during a long and distinguished career as a photographer.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to Joseph Rosenthal.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT THE SECRETARY BE AUTHORIZED TO RECEIVE NOMINATIONS BY THE PRESIDENT OF THE UNITED STATES UNTIL 6:30 P.M. TODAY

Mr. BAKER. Mr. President, in a few moments I am going to move that the Senate stand in recess until Thursday. Before I do that, I understand there are certain nominations by the President of the United States that require consideration and confirmation of the Senate which are in transit from the White House to the Senate. They have not yet been received.

I have discussed that matter with the distinguished minority leader. I believe the request I am about to propound is agreeable.

Mr. President, I ask unanimous consent that it be in order for the Secretary to receive nominations by the President of the United States until 6:30 p.m. today and that the nominations be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL THURSDAY, MARCH 19, 1981, AT 11 A.M.

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 a.m. on Thursday the 19th of March.

The motion was agreed to; and, at 5:44 p.m., the Senate recessed until Thursday, March 19, 1981, at 11 a.m.

NOMINATIONS

Executive nomination received by the Secretary of the Senate March 16, 1981, under authority of the order of the Senate of March 12, 1981:

EXECUTIVE OFFICE OF THE PRESIDENT

Lenore Annenberg, of Pennsylvania, for the rank of Ambassador during her tenure of service as Chief of Protocol for the White House.

Executive nominations received by the Senate March 17, 1981:

Sharp, Jane E.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 17, 1981:

DEPARTMENT OF AGRICULTURE

C. W. McMillan, of Virginia, to be an Assistant Secretary of Agriculture.

DEPARTMENT OF THE TREASURY

Angela M. Buchanan, of the District of Columbia, to be Treasurer of the United States.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

David B. Swoap, of Virginia, to be Under Secretary of Health and Human Services.

DEPARTMENT OF LABOR

Thorne G. Auchter, of Florida, to be an Assistant Secretary of Labor.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

Ricardo M. Urbina, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for a term of 15 years.

EXTENSIONS OF REMARKS

OUR IMMIGRATION POLICY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. STARK. Mr. Speaker, recently, with the release of a report by the Select Commission on Immigration and Refugee Policy, we have once again been reminded of the severe problems that exist within our Nation's immigration system. Of particular concern to many of us is the problem of illegal aliens in this country. I recently found an article pertaining to this very issue in the Federalist, an AFL-CIO publication, that I found especially intriguing. The concern of the labor movement with this critical issue I found encouraging. I would, therefore, like to include here excerpts from that article for my colleagues to read.

The following article follows:

IMMIGRATION POLICY: DRIFTING TOWARD DISASTER

(By J. F. Otero)

As Citizens of a nation of immigrants, and as representatives of workers who build unions as the means to escape exploitation and indignity, we in the AFL-CIO deeply sympathize with those who seek a better life in our country.

For its first 100 years, the nation generally held to George Washington's dictum that "America is open to receive not only the opulent and respectful stranger, but also the oppressed and persecuted of all nations and religions."

But in 1882, the principle of "selection" was introduced into U.S. immigration policy, with immigrants required to meet certain physical, mental, moral and economic criteria. Soon thereafter, massive infusions of Chinese and Japanese prompted "exclusionary" policies for the first time late in the 19th century. It wasn't until the 1940s that these racist policies began to be repealed.

Today, our immigration laws appear hopelessly out of date. The immigration and nationality act, passed in 1952 and amended several times since, is obsolete, unenforceable, arbitrary and inflexible. The increasing number of illegal immigrants entering the United States and the recent massive influx of refugees—including those expelled from Cuba—demand that a comprehensive policy be developed before the problem is completely out of control.

A Census Bureau report estimates 3.5 to 6 million illegal aliens or undocumented workers are living in the United States at any one time. Some argue this figure is highly inflated; others place the number somewhere between 4 million and 12 million.

If nothing is done to stem the present flow of illegal immigration, the nation will be faced, in some 10 to 20 years, with a substantial underclass of illegal aliens, probably in the range of 20 to 30 million. The social and political implications of such an illegal subculture are something we cannot condone or ignore, even at the risk of being misunderstood or attacked. We are not impressed by the argument that illegal immigration is not harmful and thus nothing should be done about it.

Organized labor fully recognizes that the overwhelming majority of illegal immigrants come to America to support themselves and to take a responsible role in society. However, too often, unscrupulous employers prey upon these newcomers, able to impose low wages and substandard conditions on them because of an atmosphere of abuse and fear.

These problems are of acute concern to the labor movement, which insists on safeguarding its hard-won standards of life and work. Unfortunately, these illegal workers are highly vulnerable because they are denied the basic legal rights enjoyed by citizens and legal resident aliens.

Concern is not limited to labor. National awareness of the illegal immigration problem is rising at a time of increasing scarcity, when large numbers of people in this country are hard-pressed to find jobs, pay their bills, or maintain their standard of living.

Few Americans today feel that this nation offers anyone the overflowing abundance of resources and opportunities that once led our ancestors to risk their lives and meager possessions to come to America looking for freedom and economic advancement. People rarely feel generous when their resources and opportunities are diminishing and many Americans believe that the prospects for improvement are poor.

These fears also occur during a time in which we are admitting very large numbers of refugees, both anticipated and unanticipated

Though issues of race and xenophobic reaction should have no place in U.S. immigration policy or practices, such issues must be sharply distinguished from feelings of economic insecurity and of concern for one's own welfare. Historically, the United States has been the world's only free nation to welcome political and economic refugees in such volume and with such good will. This compassion has marked, since 1820, the arrival of 48 million immigrants, an achievement with no parallel anywhere in the world.

Yet, in those same years, important standards such as child labor laws, minimum hours of work, minimum wages, safety and health were developed through the struggle and blood of Americans of all nationalities and religions—and these standards of decency are now threatened by potential exploitation of millions of undocumented workers with low wages and substandard conditions.

Millions of unemployed American workers of all races—but particularly blacks, Asians and Hispanics—feel today that they are the victims of reverse discrimination because employers prefer to hire the undocumented worker who will work for less, who is ignorant of the labor laws and who can be easily intimidated with threats of deportation.

The problem will no doubt worsen with increased population pressures in nations supplying the illegal immigrants. For example, Mexico, Central and South America, the Philippines and Korea are projected to have a combined population of about 1.7 billion in the year 2000, yet those nations had only about 500 million population in the 1970s.

Illegal immigration is the result of wide international disparities in wages and employment opportunities, which unfortunately will endure for many years to come. A push-pull links the desires of aspiring Third World workers for higher wages with the desires of U.S. employers for cheap and readily available labor.

Unquestionably, there are economic benefits in this large pool of Third World workers—benefits to U.S. employers who hire them, to consumers who use their goods and services and to a society that dosen't have to provide for them or for their families. The benefits of illegal immigration to the undocumented workers are also clear—except when judged by this nation's standard of living.

But these benefits must be weighed against their human, economic, social and political costs. And those costs are sizable, including:

Widespread exploitation of the millions of foreign nationals illegally here.

Increased job competition and depressed wages and working conditions for low-skill and low-wage U.S. workers.

Increasing income inequality between advantaged and disadvantaged persons in the United States.

Mounting political and ethnic tensions in many parts of this country.

Strained bilateral relations with sending nations, especially Mexico.

Increasing pressure on the integrity of our immigration and labor laws.

Obviously, these illegal immigrants represent a labor pool that is more docile and more profitable than the American workforce. Whether these undocumented illegal workers compete with American workers is a much debated question—but it's undisputable that they have a pernicious effect on American workers.

Contrary to popular belief, illegals do not concentrate in the agricultural sector. Today, they can be found everywhere in the country, particularly in the urban areas since large cities afford better cover from detection. We at the AFL-CIO have found that American workers do face adverse employment effects from undocumented workers especially in service and light industries in the food and beverage sector.

Canneries, food processing plants, meat packaging plants, hotels, restaurants, bars, bakeries and grocery stores accounted for one-fifth of the jobs held by illegals found in a sample analyzed by researcher David North in 1976. Illegals are also found in low-skilled manufacturing and in construction and transportation. District of Columbia immigration director Joseph Mongiello says "there isn't a single restaurant in the city that hasn't used illegal aliens."

Any modern-day immigration policy should foster re-unification of families and haven for refugees from persecution, while taking a realistic view of the job opportunities and the needs of U.S. workers, by providing enhanced protection for the U.S. labor market.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

An immigration policy for the 1980s must also deal effectively and fairly with the problem of illegal immigration, and address itself to the orderly and controlled admission of refugees.

To achieve these goals, the American labor movement would support legislation along the following lines:

Effective penalties for employers who knowingly hire illegal aliens, including criminal sanctions and injunctions to prevent repeated violations.

An employment eligibility program based on a system of identification for work purposes but with two fundamental safeguards: (1) a requirement that no person eligible under the law be denied documentation; (2) a further requirement that no documentation can be revoked if issued according to the law.

Because it is recognized, familiar and already required in job applications, the Social Security card could be used if improved and made counterfeit-proof. To be protective of individual civil liberties the eligibility cards would be uniformly applied to all persons seeking employment and to all employers. By law, eligibility cards could not be asked for outside the employment setting and persons would not be required to carry these cards. Thus, it would not become a national identifier.

Until such a card is developed, other evidence could be used. The alternatives could include a birth certificate, naturalization certificate, alien registration card, voter registration, U.S. passport, or immigration or registration document. The employer should certify with a checkmark on a regular form, such as the W-4, that such identification has been examined.

A generous legalization program, including adjustment of status for illegal aliens with a demonstrated attachment to the community, to allow the illegal resident to become legal. While the length of time an alien has lived in the United States is one factor to be taken into consideration, subjective values, including compassion for the families involved, are also of great importance. American labor would reject any mass deportations.

Adequate funding to strengthen border control inspection capabilities and antismuggling activities to stop illegal entry. There must also be more effective enforcement of the Farm Labor Contractor Registration Act, Fair Labor Standards Act, OSHA, workers' compensation, Social Security Act and other federal laws. Also expedited handling of all applications of those seeking to enter legally as well as prompt clearing of current backlogs. There are now more than 1 million such applications pending.

Title VII of the Civil Rights Act and other existing anti-discrimination laws must be rigidly enforced to eliminate any possibility that employers may discriminate against U.S. citizens or resident aliens with Spanish surnames and other minorities who look "foreign." Increased funding for such enforcement should be provided by Congress.

Steps should be taken to strengthen and improve the structure and efficiency of the Immigration and Naturalization Service. Administration and employee morale would be enhanced by improving benefits, training, by resolution of long-standing labor-management problems and the long-overdue appointment of a Commissioner. Increased human and financial resources, use of new technology for border enforcement and better control over the issuance and use of visitors' visas to the United States should be provided. Corruption and abuses of power should be stamped out.

The U.S. Department of Labor should step up enforcement of labor standards legislation in areas and industries where significant numbers of illegal aliens are employed. Stiff fines and speedy prosecutions should be used against repeat offenders, with measures taken to insure that INS activities do not impinge upon the rights of all workers to engage in collective bargaining—regardless of resident legal status.

Any type of so-called guest workers program would be strongly opposed by U.S. unions. A bracero program by any other name is a bracero program.

A generous increase in legal immigration and other changes should permit speedier reunification of families.

A general review of the standards and levels for legal immigration is needed. Such review should examine immigration policies and programs in relation to this nation's unemployment, labor force size, labormarket needs and problems, social needs and problems. This review should include a more efficient labor certification procedure to enhance the protection of the U.S. labor market.

We support an expanded program for economic development of the countries from which illegal aliens come. Only when the "push" factor of no jobs and low income in these countries is effectively dealt with can the illegal alien problem be finally resolved. Any program must, of course, make certain that U.S. jobs are not undercut by any such foreign aid or investment program.

The Refugee Act of 1980 should be fully and efficiently implemented since it gives the President the authority and flexibility to increase or decrease refugee visa numbers as circumstances dictate.

However, the AFL-CIO favors the concept of internationalizing the problem of admitting and resettlement of refugees. While the U.S. should continue to provide haven for refugees from political persecution, we cannot and should not be expected to take in the more than 15 million refugees now floating around this world.

Though other reform efforts have stalled and withered, Congress would be more receptive to a "package concept" instead of our piecemeal and patch-up approaches of the past. The Select Commission on Immigration and Refugee Policy, which was writing its final report in early 1981, could make a contribution to such a comprehensive approach.

In a broader sense, the United States has its own complex overlay of employment problems, which are linked to ethnic communities in our urban centers and are particularly critical among young people and minority groups. So the nation simply can't afford to persist in lax application of anachronistic immigration policies. We are the only industrial nation on earth that does not require a minimal identification document as a prerequisite for employment. Even with an ID system as stringent as the one imposed in West Germany in its guest worker program, there was still a 10 percent illegal rate among their guest work forces.

The fact is that the civil rights of U.S. citizens and legal immigrants to the United States are violated by the presence here of millions of illegal or undocumented workers. Thus, it is irrelevant to argue—on Constitutional or civil rights grounds—against one small piece of immutable ID as a way to establish workplace eligibility.

The steps outlined in labor's legislative program are the beginning of a humane, practical U.S. immigration policy.●

OTTINGER SOVIET PRISONER OF CONSCIENCE RELEASED

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. OTTINGER. Mr. Speaker, I am delighted to announce that Mr. Moisey Tonkonogy, a Soviet Jew who I adopted as a prisoner of conscience, has received an early release from a 1-year prison sentence. Mr. Tonkonogy's release follows countless protest letters and telegrams I sent to Russian officials as part of the prisoner of conscience program.

Mr. Tonkonogy was serving his sentence on charges of parasitism following his application to emigrate to Israel in 1973. Although his parents were permitted to leave the Soviet Union, Mr. Tonkonogy himself was denied permission on the grounds of access to State secrets during his brief service in the Russian Army in 1971. As is the case with most Soviet Jews who express their desire to emigrate, Mr. Tonkonogy was subject to continual harassment following his application. He was fired from various jobs and then charged with parasitism. In Israel, his parents valiantly attempted to mobilize support for Tonkonogy only to learn that Soviet authorities told their son that he would regret it if his parents' activities did not cease. Last year, Tonkonogy's plight reached its crisis point with his arrest and imprisonment.

Moisey Tonkonogy's early release shows that the prisoner of conscience program is an effective way to pressure the Soviets to adhere to human rights principles. Our efforts not only pressure the Russians, but also attract worldwide attention to the plight of Soviet Jews. I have had the opportunity to meet several former prisoners of conscience, who have told me that they perceived an improvement in their treatment while in prison as the Congress continued to write letters of protest to the Kremlin. Therefore, I believe it is urgent that we maintain our unwavering commitment to work actively to insure the freedom of these people.

Mr. Tonkonogy's release is heartening, but his plight still requires our attention. I understand that he will reapply to emigrate to Israel. Moisey Tonkonogy should be free to reunite with his parents in Israel, and I will do everything in my power to continue to pressure the Soviets to grant his freedom. I encourage my colleagues to join me in this endeavor.●

CORRECTING IMMIGRATION AND NATIONALITY ACT

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. SHELBY. Mr. Speaker, I have not forgotten the deplorable course of events that occurred in Iran during the 96th Congress or the subsequent reprehensible actions of many Iranians present in the United States. While Iranian students in Tehran were holding American citizens hostage and demanding revolutionary justice, Iranian students in the United States were echoing their demands and in sympathy with their actions. When President Carter initiated a program to locate and register nonimmigrant Iranian national aliens and deport those not in compliance with their visas, the implementing regulations were attacked judicially with the result being that few, if any, of the aliens were ever deported. In order to prevent the reoccurrence of such an embarrassing situation, I, along with the other members of the Alabama delegation, Congressmen BILL NICHOLS, BILL DICKINSON, JACK EDWARDS, TOM BEVILL, RONNIE FLIPPO, and ALBERT LEE SMITH, have introduced a bill to prevent unwelcome disruptive agitators from using dilatory tactics provided by our judicial system to avoid expulsion.

Specifically, the legislation would amend the Immigration and Nationality Act to provide the following:

First, upon a finding by the President that an act of terrorism or other hostile act has been committed against a national, corporation or other entity of the United States by or with the assistance of a foreign government or in a foreign state and with the acquiescence of that government and that it is in the national interest to limit the entry into the United States of nonimmigrant aliens of that state, aliens who are nationals of the foreign state shall be excluded from admission into the United States.

Second, upon such a finding by the President, aliens from the foreign state who are already present in the United States as nonimmigrants shall be deported by action of the Attorney General.

Discretion is retained by the President to modify the order should the circumstances so dictate. To prevent time-consuming judicial and administrative review, as well as collateral court attacks, the time frame for the applicable administrative and judicial procedures and processes has been compressed considerably. Also, some of the steps in the chain of review have been eliminated to further expedite the proceedings.

Although the bill has been drafted to comply with all constitutional safeguards, the Congress has broad constitutional authority, as interpreted by the U.S. Supreme Court, to determine what aliens shall be permitted entry into the United States, the period they may remain, and the regulation of their conduct once so admitted.

Visiting aliens in our country should not be permitted to remain when it is contrary to our national interest. I believe this bill provides the degree of protection necessary to insulate our Government and our citizens from another Iranian situation.●

A TRIBUTE TO DARLING-DELAWARE CO.

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROSTENKOWSKI. Mr. Speaker, next year will mark the 100th anniversary of Darling-Delaware Co., Inc.

From its founding in 1882 near Chicago's old Union Stockyards, Darling-Delaware has grown to one of the major rendering organizations in the United States.

In a time when our Nation has been concerned with its trade balance, Darling-Delaware has become a major exporter to countries around the world and has thus contributed to our balance of payments. Further, by its very nature, the rendering industry utilizes virtually every portion of a stock animal and thus contributes to the environmental improvement of our cities and farms. To say the least, Darling-Delaware has served as a vital force in both agriculture and industry.

I would like to offer special praise to Mr. Edward M. Bakwin, who serves as chairman of the board of directors of Darling-Delaware. Through his careful guidance, he has maintained the standard of excellence which has characterized this corporation for its nearly 100 years of existence.●

HUMAN RIGHTS—RECENT DISAPPEARANCES AND REPRESSION IN ARGENTINA

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BONKER. Mr. Speaker, the Reagan administration has announced its intention to ask Congress to lift the prohibition against sales of military equipment to Argentina. This approach is in line with numerous statements of this administration that American foreign policy priorities are being reversed—human rights being demoted and antiterrorism being promoted. The danger in that course of action is that we will be perceived as good friends and allies with prorepressive regimes everywhere; for example, Chile, South Africa, Argentina, and South Korea.

I will oppose any policy that alines the United States with regimes that practice, aid, and abet state terrorism. If Reagan administration officials had read the report on Argentina in the State Department's country report on human rights practices; if they had read the reports on Argentina by the Nobel prize winning organization Amnesty International; if they had read the report of the United Nations Human Rights Commission working group on disappearances; if they had read the reports on Argentina by the Organization of American States Inter-American Commission on Human Rights; and if they had read the reports on Argentina by the International Commission of Jurists; they would not be making silly statements that:

> We want good relations with Argentina. Any abnormality in relations is due to a large extent to the public position this country took regarding human rights practices in that country.

Very little has changed in Argentina to warrant a change in our relationship. Disappearances continue; tortures continue; harassment of human rights activists continue; repressive acts against legitimate dissent and peaceful assembly continue; and state supported terrorist activities against exiles and dissidents in complicity with other intelligence services continues.

The Reagan administration which has identified terrorism as a major problem in the world today, is once again alining the United States with a regime that practices terrorism against its own people.

If Reagan administration officials are really concerned about terrorism, they should not be giving support to a regime which engages in that activity. Double talk and double standards are no substitute for lack of policy.

I would like to commend to the attention of my distinguished colleagues a press release from Amnesty International which details the most recent disappearance and repressive acts of the Argentine regime. I learned today that Mr. Pinon has been released but only after having been tortured by electric shock. Also an editorial which appeared in the New York Times of March 13, 1981, entitled "Words Count."

The press release and the editorial follow:

AMNESTY INTERNATIONAL USA CALLS ON GENERAL VIOLA TO ACCOUNT FOR WHEREABOUTS OF MEN ABDUCTED ON EVE OF HIS VISIT TO WASHINGTON

Amnesty International USA today (March 16, 1981) called on Argentine President-Des-

ignate, General Roberto Viola, to clarify the whereabouts and guarantee the safety of two men abducted in Argentina on the eve of his visit to Washington, the latest of thousands of Argentine men, women and children to "disappear" since the military took power in 1976.

General Viola, scheduled to become President of Argentina on March 29, is in Washington for meetings with President Reagan and congressional leaders.

Amnesty International has learned that on March 11, armed men in civilian clothing entered the home of Jorge Magrino, a factory worker in the province of Buenos Aires, placed a hood on his head and took him away. On March 12, the home of Mr. Magrino's mother-in-law was entered and searched. On March 13, armed men abducted Hector Orlando Pinon, a tannery worker in the same province, after failing to find his brother at home. Police have refused to register complaints by the families who witnessed the abductions.

Amnesty International USA said these disappearances were only the latest in a series of repressive acts during recent weeks. On February 27, six human rights leaders were arrested following a raid on the offices of a human rights organization in Buenos Aires (center for social and legal studies). The six were held for a week before being released for lack of sufficient evidence and are still facing charges.

On March 12, security forces detained more than 45 of 200 mothers of the Plaza de Mayo who were protesting the disappearances of their children and grandchildren. The mothers were held for several hours before being released. In a cable to General Viola, Amnesty International USA renewed the call for an accounting of all the men, women and children who have disappeared in Argentina, estimated by the Organization of American States as between 5,000 and 20,000 since 1975, and the release of 900 persons being held without charges or whose sentences have already been served. Amnesty International USA also appealed for a review by a federal civilian court of all cases of prisoners sentenced by military courts and a fair trial for all persons who have been charged.

[From the New York Times, Mar. 13, 1981]

WORDS COUNT

On what is called "conditional liberty," Argentina has wisely released six human rights defenders after days of detention and isolation. Officials of the Reagan Administration say this vindicates their policy of withholding public criticism of such a brazen crackdown. But the evidence suggests quite the reverse: Argentines responded to vehement worldwide protest—including a fervent one by New York's Senator Moynihan, who has never been mistaken for a mushy-headed liberal.

Soon after the arrests, Mr. Moynihan made up for the tongue-tied silence of an Administration that had just taken the softest possible line on human rights violations in Argentina and Chile. He warned in the Senate that Argentina was undermining a scheduled visit by its President-designate, Roberto Viola. "Absent a postive response to the concern that has been expressed in this Chamber and in our nation to the recent arrests," he warned, "the President's visit will be marred by objections in this body and elsewhere."

The Senator also used the occasion to dispute the views of Ernest Lefever, the Administration's choice to head the State Department human rights bureau. Mr. Lefever, he said, was "hardly correct" in asserting that "we and other states have no legitimate interest in the fortune of liberty elsewhere."

When he was President Ford's delegate to the United Nations, Mr. Moynihan made plain his abhorrence of double talk about human rights in the Soviet bloc and among third-world nations. His speech last week as a salutary early warning that the Reagan team's indifference to human rights is an embarrassment even to those who applaud its stern approach to the same nations.●

PAY FOR TOP FEDERAL OFFICIALS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 12, 1981

● Mr. DERWINSKI. Mr. Speaker, the action of the House in disapproving increases for top officials of the Government was both timely and practical.

These are not ordinary times. Inflation remains at double-digit figures, interest rates are near record levels, and the rate of unemployment in our country is unacceptable. To combat these severe economic problems, President Reagan has offered a program of recovery which includes deep budget cuts coupled with decreases in personal and corporate taxes. We must give this comprehensive program a fair chance to work.

I share the President's concern over the question of pay which was expressed in his budget revisions:

* * * increases in Federal salaries proposed in the January budget should be deferred because current economic conditions require that substantial budget reductions be achieved. However, the President is deeply concerned about the diminishing ability of the Federal Government to attract and retain high caliber executives.

Mr. Speaker, the House, in rejecting this pay raise, has demonstrated fiscal responsibility.●

NATIONAL HISPANIC ORGANIZATION CRITICAL OF REAGAN BUDGET

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROYBAL. Mr. Speaker, I wish to share with my colleagues this statement released by the National Association of Latino Elected and Appointed Officials on the administration's fiscal year 1982 budget proposal. I am sure that my colleagues will find the points raised most interesting and will keep them in mind as we consider the budget for the upcoming year.

NALEO CRITICAL OF REAGAN BUDGET

The National Association of Latino Elected and Appointed Officials (NALEO) today sharply criticized the Reagan Administration's posture toward the Hispanic community. NALEO National Director Edward J. Avila, in a Washington D.C., press conference today, said, "The Reagan Administration has failed to consider the concerns of the Hispanic community in both its economic program and in its appointment of key officials. Major aspects of the Administration's economic plan will adversely affect this Hispanic community. Yet, we have not had any significant involvement in the development of that plan.

"Early in this Administration, we were led to believe that Hispanic appointments to high-level offices were forthcoming. We met with the President and received repeated promises that Hispanics would be involved in the development of major budget and program decisions. These same promises were made to Congressional leaders and state officials," said Avila. While waiting for the promises to materialize, however, the Hispanic community and its leadership have watched as key policy and administrative offical positions in federal agencies have been filled. Program and policy decisions affecting reductions, terminations and structural changes in all areas of federal activity have been made in Reagan's budget revisions for the next two years. To date, however, out of a population of 18 million, the Administration has only nominated two Hispanics to serve in policy positions. The Reagan Administration has up to now completely ignored the largest-growing minority in the United States.

The President's economic program clearly reflects the Administration's lack of recognition and insensitivity to the condition of America's low-income, ethnic communities. "This Administration's budget is simplistic. While simplicity and fiscal restraint are objectives we all share, the Administration's approach to government programs will have catastrophic effects on sizeable segments of our population," Avila continued. "The assumption that the private sector will provide an ever-increasing number of jobs; training and economic development opportunities is fallacious and will result in disastrous effects on the nation's most needy." Citing the Administration's proposal to cut federal funding and restore state responsibility for social service programs, NALEO's Director noted that the Administration's proposals ignore years of state neglect in social, education and economic areas for our nation's minorities. Avila continued, "What is the Administation going to do to insure that state and localities carry out their responsibilities to low-income and underrepresented communities?"

Avila said that NALEO, after a preliminary review of the budget proposals, found examples of insensitivity to the unique needs of the Hispanic community:

Student Financial Assistance—the mandatory requirement for a $750 self-contribution, regardless of income, will be a severe handicap for low-income Hispanic students. Hispanic students constitute up to 22% of the college-age population in such states as California and Texas.

Minority Business Development—there is a complete absence of commitment to minority business development by this Administration. Moreover, there are massive budget cuts for the Small Business Administration, Economic Development Administration, HUD's Community Development Grants, and loan subsidy programs in both the Departments of Agriculture and Energy.

Civil Rights Enforcement in Block Grants—the Administration transfers responsibility to the states but remains strangely silent on civil rights enforcement.

Bilingual Education—the fiscal year 1982 budget cut of $42 million will mean that 90,000 children will not be served, most of whom are Hispanic.

Legal Services Corporation—one million poor people utilize these services annually. Proposed elimination of this program will eradicate this segment of the population's major vehicle to equal access to our nation's legal system.

Migrant Health and Education—how will states be able to allocate Block Grant funds for the education and health needs of a population which travels from state-to-state? Only 2,300 out of 16,000 school districts have migrant education programs. How can a Block Grant be targeted on this population?

Aid to Families with Dependent Children—proposed requirement to count the income of all members of a household toward eligibility will disproportionately affect "extended families," commonly found in Hispanic households. This proposal is basically anti-family and encourages family breakdowns.

It is NALEO's position that many of these budget cuts which so disproportionately will affect our community, would have been minimized if the Administration had kept its pledge to involve Hispanics and all minorities in significant phases of decision-making. We are aware that there are highly qualified Hispanics that have been proposed to the Administration for key posts. NALEO therefore urges President Reagan to assert his leadership by placing Hispanics at all levels of his Administration. NALEO stands fully committed to assist the President in achieving this goal.

In the upcoming months, NALEO will be lobbying Congress and the Administration to redress the inequities of the present budget cuts on the Hispanic and other minority communities.●

REPEALING THE OFFSET OF UI AGAIN

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. DOWNEY. Mr. Speaker, last year Congress made many attempts to rescue older Americans from the ravages of Public Law 94-566, a hasty and ill-conceived piece of legislation.

After much debate and haggling what finally was agreed upon was a compromise which allowed States to pay up to half of earned unemployment insurance benefits to people receiving social security or railroad retirement checks. Previously all retirees were prevented from collecting these unemployment funds. An amendment to the pension bill gave out-of-work checks back to all but those who are most dependent on them.

Once again, Congress looked to the elderly of this Nation to save some money. In my district, retirees, most of whom are exclusively dependent on social security benefits, live on approximately $500 a month. In a survey taken last year we discovered that with living costs what they are, $500 a month is just barely surviving money. It certainly cannot cover extras like clothing, transportation, eye glasses, or even the pleasure of an occasional movie.

Why single out a group of people industrious enough to find employment to supplement their small retirement checks? Withholding these benefits may even be deemed unlawful if suits brought before the courts are successful. After all, older Americans work just as hard as their younger coworkers for the same benefits. Unemployment insurance paid by their employers for their protection is not earmarked for younger workers only.

Traditionally, we have rewarded those citizens who have worked hard to help themselves—in this case the partial repeal of this onerous measure is a travesty. My bill, H.R. 1902, would restore the rights of senior citizens to receive money that they have earned. I urge my colleagues to think hard about their position on this issue.●

THE EXPORT OF HAZARDOUS GOODS MUST STOP

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BARNES. Mr. Speaker, I continue to be very concerned that this country has no policy to control the export of hazardous goods. Last week I reintroduced a bill, H.R. 2439, which would restrict these exports and resolve this problem. The House Foreign Affairs Subcommittee on International Economic Policy and Trade held a hearing on this issue last week and I had the opportunity to discuss this matter with the subcommittee. So that my colleagues may have the opportunity to see my rationale, the text of my statement and the bill follow:

STATEMENT OF HON. MICHAEL BARNES ON THE EXPORT OF HAZARDOUS GOODS BEFORE THE SUBCOMMITTEE ON INTERNATIONAL ECONOMIC POLICY AND TRADE

Mr. Chairman, it is a great pleasure to be with this subcommittee to continue its important work on the need to establish a federal policy to control the export of hazardous goods, and I appreciate your courtesy in allowing me to participate today.

At the same time, let me tell you that I am a little sad that we need to be holding this hearing today. Throughout the last Congress, the members of this subcommittee have joined me in working with the Administration in an effort to resolve this problem. We intentionally held the legislation in abeyence to allow for the completion of the Administration's approach under the Export Administration Act of 1979. When President Carter issued his Executive Order to establish a Hazardous Substances Export Policy, I had hoped we had finally reached a compromise position that almost everyone could live with. Unfortunately, President Reagan disagreed. In withdrawing the Executive Order, President Reagan sent a message to the developing world that we do not care about the health of our peoples. To Mr. Reagan I respectfully say: you are wrong. Wrong because it is totally unacceptable that this country fails to enact a federal policy controlling the export of hazardous goods.

Wrong because there is no reason to allow the uncontrolled exports of products which we have determined are dangerous to the citizens of the United States.

Wrong because it is in our own national interest. It is politically and economically wise for our trading partners to know that the United States is concerned about the health of their citizens as well as our own. It is in the interest of every businessman and businesswoman and manufacturer in the country to have the consumers world-over know for a fact that the label "made in the USA" means "This product is safe."

Finally, the withdrawal of this needed policy is wrong because we are dealing with the lives, health and safety of millions of persons who are potential victims of products we have banned. Products such as banned pesticides, toxic substances, contaminated food, defective contraceptive devices, known carcinogens and other products we have decided are just too dangerous to be sold in this country.

I, for one, do not know how the current Administration can say to children in the less developed world who are wearing Tris-treated sleepwear, cancer causing sleepwear, that the control of such products is "excessive regulation."

Yesterday, Mr. Chairman, I re-introduced the legislation which would ban the export of hazardous goods. I did so because we need to correct the current maze of laws applying to individual product categories. We need a strong, durable policy mechanism for controlling dangerous exports and allowing these exports only when an exception is justified by the country receiving the product. In addition, we need to continue the process this subcommittee initiated during the 96th Congress, and this bill serves as an effective vehicle for maintaining continuity with those efforts.

As you have pointed out, Mr. Chairman, this hearing is intended to explore the current situation which resulted from the withdrawal of the Executive Order. I had hoped we would have an Administration witness to explain why they acted before they had completed their own interagency review of the regulatory burden on U.S. industry. I share the Chairman's desire to learn the progress of that review and to learn if the new Administration has a better solution to this problem.

Nevertheless, I am very pleased that we have two such expert and distinguished witnesses today, Esther Peterson and Jacob Scherr, and I look forward to receiving the benefit of their experience, advice and counsel.

H.R. 2439

A bill to amend the Export Administration Act of 1979 to restrict the export of goods which have been found to be hazardous to the public health

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) certain goods, the sale of which has been prohibited or restricted under the laws of the United States for reasons relating to the public health and safety or the health and safety of the individual consumer, have been exported for sale or distribution in foreign countries where such goods have not been subject to prohibition or restriction;

(2) certain goods, which might be subjected to prohibition or restriction under the laws of the United States, but because of such expectation have not been submitted for licensing or approval, have been exported for sale or distribution in foreign countries;

(3) the sale or distribution of such goods in foreign countries has often resulted in injury to the public health and safety, or the health and safety of individual consumers; and

(4) except in such cases as the use of such goods may outweigh the risks and damages to the health and safety of the general public or individual consumers, the export of such goods from the United States is injurious to the foreign policy of the United States and to the reputation and credibility of the United States as a responsible and moral partner in the community of nations.

SEC. 2. Section 6 of the Export Administration Act of 1979 (Public Law 96-72; 50 U.S.C. 2405) is amended by adding at the end thereof the following new subsection:

"(l) EXPORT OF HAZARDOUS GOODS.—(1) Unless the conditions set forth in paragraph (3) are met, no good the sale of which is regulated under any of the laws set forth in paragraph (6) may be exported unless the sale of that good in the United States is permitted under that law.

"(2) Unless the conditions set forth in paragraph (3) are met, no good may be exported if the sale of that good in the United States is subject to registration, licensing, or use requirements or similar restrictions which are imposed under any of the laws set forth in paragraph (6).

"(3) The Secretary may issue a validated license or a qualified general license permitting an export prohibited by paragraph (1) or (2) to a country if, in addition to any other requirements for the export of such good imposed under any other provision of law, the Secretary and the head of the agency regulating the sale of such good in the United States under any of the laws set forth in paragraph (6) concur, on the basis of documentation submitted by the applicant for such license and any other appropriate factors—

"(A)(i) that the government of such country has requested that such good be exported,

"(ii) that the applicant has fully informed such government and the consignee of any restrictions on the sale of such good in the United States and of the possible hazards posed by the good to the public health (or safety) or to the environment, and

"(iii) that the potential benefits of the intended use of the good outweigh those possible hazards; or

"(B) in the case of a good described in paragraph (2), that the sale of the good in that country would be subject to requirements or restrictions comparable to those referred to in paragraph (2).

"(4) Notwithstanding the provisions of paragraph (3), no good may be exported which does not contain all warnings, instructions for use, or any other information required under any of the laws set forth in paragraph (6) to be included in the packaging of such good for sale or with respect to which the Secretary determines that such warnings, instructions, or other information is likley to be ineffective in the country to which the good would be exported on account of a lack of adequate translation or illustration or any marketing or distribution practice in that country.

"(5) No good may be exported for the purpose of using that good in the manufacture of another good the export of which is prohibited by this subsection.

"(6) The laws referred to in paragraphs (1), (2), and (4) are the Toxic Substances Control Act, the Federal Food, Drug, and Cosmetic Act, the Federal Hazardous Substances Act, the Fair Packaging and Labeling Act, the Poison Prevention Packaging Act, the Flammable Fabrics Act, the Consumer Product Safety Act, the Federal Caustic Poison Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Controlled Substances Act, the Lead-Based Paint Poisoning Prevention Act, and any other law designated by the Secretary, the major purpose of which is to protect public health and safety from the hazards of drugs, medicines, medical devices, including contraceptives; pesticides; carcinogens; toxic substances; contaminated foods; and similar hazards to health and safety.

"(7) No law enacted after the date of the enactment of this subsection shall supersede this subsection unless it does so in specific terms, referring to this Act and declaring that the new law supersedes the provisions of this subsection.".●

ZONTA INTERNATIONAL CHARTER INSTALLATION CEREMONY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ANDERSON. Mr. Speaker, on March 18, 1981, the South Bay Area Club of Zonta International, a service organization of executive women in business and professions, will conduct its charter installation ceremony.

"Zonta" is a Sioux Indian word meaning honest or trustworthy. The objectives of Zonta International are to improve the legal, political, economic, and professional status of women; to increase the service and value of Zonta clubs to their communities and countries, and to work for the advancement of understanding and peace through a world of fellowship of executive women in business and professions. These women and these objectives are united under the ideal of making the world a more trustworthy place.

Zonta International was founded in 1919. Currently there are 750 Zonta clubs in 47 countries with a total membership of 30,000.

In furtherance of its high ideals, this organization has established the Amelia Earhart Fellowship Award in honor of one of its most celebrated members. This award goes to 25 women annually for advanced study and research in aerospace-related science and engineering. A total of 253 such awards have been made to deserving women from 22 countries. The amount of this award currently stands at $5,000.

But, Mr. Speaker, this particular commitment to excellence is but one of a list of projects that Zonta has undertaken. Its Columbian urban slum project cooperated with UNICEF to provide day care, medical assistance, and sanitation instruction for the women and children living in the slums of Columbia. Additionally, Zonta lends support to the peaceful and progressive aspirations of the United Nations by maintaining permanent U.N. observers in New York, Geneva, and Paris. And many Zontians have represented their countries on the U.N. Commission on the Status of Women and several have served as chairpersons.

The South Bay Club will include several cities within its charter. The cities of Carson, El Segundo, Gardena, Harbor City, Hawthorne, Hermosa Beach, Lomita, Manhattan Beach, Torrance, and Wilmington will be joining forces to serve the educational, health, cultural, and civic needs of the South Bay.

Mr. Speaker, it is with the highest enthusiasm that I welcome Zonta International's Charter Club and its laudable goals into the South Bay area.●

GEORGE MONTGOMERY

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BRODHEAD. Mr. Speaker, my good friend and former colleague, George Montgomery, recently passed away after having served the people of Michigan for 24 years in the State legislature. His tremendous contributions to the State as chairman of the House Taxation Committee and his dedication to the improvement of Michigan schools have earned him a lasting place in the hearts of his fellow citizens. I would like to share with my colleagues, editorial tributes which recently appeared in the Detroit Free Press and the Detroit News.

[From the Detroit Free Press]

MONTGOMERY: HIS WIT AND IRASCIBILITY MADE HIM SOMETHING SPECIAL

Democrats and Republicans in the Michigan Legislature who are more accustomed to firing shots at each other joined in harmonious praise of George Montgomery this week. The Detroit Democrat died at 72 in Florida, only three months after retiring from the Michigan House.

The House Republican leader, William Bryant of Grosse Pointe Farms, said "the love he gave us and allowed us to give him will live as a lasting memorial to a great man." We have no doubt the love was there,

but "lovable" was not usually the first word that sprang to mind during Rep. Montgomery's 24 years in the House.

Whenever "Papa George" came out mad or just feeling creative, he could reel off prose that would stun, titillate, shame, enrage or otherwise awaken the rest of the House. His targets occasionally included an ally who had incurred his displeasure, as when he sarcastically called Coleman Young "the lord mayor" of Detroit.

"Wit" and "irascibility" are the words that have been most bandied about by Mr. Montgomery's admirers, and they fit better than "lovable." He often seemed to be guided by his heart, but his mind fashioned legislative solutions and victories that have greatly benefited the state.

A former Detroit school teacher, he fought many battles for the schools. He was instrumental in passage of a minimum wage for teachers when they sorely needed it. He became a tax expert, he claimed, because his colleagues decided that while he was making off with the money for schools he also ought to be finding ways to pay all the state's bills. For more than a decade he was chairman of the House Taxation Committee.

It was a measure of the respect Mr. Montgomery commanded that in 1976 and 1978, after his northwest Detroit district had become predominantly black, his constituents returned this older, white, professional politician to the House. Some political observers had said he could not win.

In a rare tribute, his colleagues honored his request that he lie in state in the Capitol after his death. It was fitting that he came back to Michigan for that, and for burial in the state he had served so well.

[From the Detroit News]

GEORGE MONTGOMERY

George Montgomery, who died Tuesday in his Florida retirement home at 72, served 24 years in the Michigan House of Representative. Eleven of those two-year terms were consecutive, beginning in 1958.

He was, of course, a fixture in Lansing, but longevity is not the reason the senior Democrat will be remembered.

A former civics teacher representing a predominantly black northwest Detroit district, he was a champion of education in general and the Detroit Public Schools in particular.

He became the Legislature's leading tax expert—not a self-styled economics theorist, but a genuine nuts-and-bolts authority. A man like that is good to have around when the issues are complex and some lawmakers do not do their homework.

Mr. Montgomery's body is lying in state today in the Capitol rotunda in Lansing—the first official so honored since 1949. To say he earned that distinction is to understate the case.●

AMERICA'S NO. 1 FUEL

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MURTHA. Mr. Speaker, 4 years ago, a new President of the United States was stressing energy as vigorously as President Reagan is now focusing on the economy. President Carter told us on February 2, 1977, that "We must face the fact that the energy shortage is permanent. There is no way we can solve it quickly." He outlined the beginnings of his energy plan calling for the Nation's first national energy policy and promising as part of it to "stress development of our rich coal reserves in an environmentally sound way."

In those 4 years Congress made significant progress. In 1978 we did pass the first National Energy Act in America's history. We also approved several conservation plans, billions more dollars in energy research, and started a major synthetic fuels program. But as President Carter said, the energy problem was not temporary. It remains with us.

One of the promises from 4 years ago that still needs to be filled is the full use of America's coal reserves. We are, truly, the Saudi Arabia of coal, and we have yet to tap completely that resource. In the next few paragraphs I want to outline some of the major steps I believe we need to take in 1981 to promote coal use.

SYNTHETIC FUELS

The groundwork for this program is underway, and I congratulate President Reagan and Energy Secretary Edwards for realizing the synfuels potential and canceling many originally planned rescissions on synfuels projects. In addition, I believe we need to go forward with an additional $300 million in round two feasibility study money, and I will oppose that rescission. The synthetic fuels potential is still our greatest hope for full coal use by decade's end, and it should be stressed.

UTILITY CONVERSION

I have joined with Coal Group cochairman NICK RAHALL in sponsoring the Coal Utilization Incentives Act of 1981. This is an updated version of last year's effort to promote the conversion of utility boilers from oil to coal. This year's plan relies more on tax incentives rather than subsidies. It already has the backing of the National Coal Association, United Mine Workers, Mining and Reclamation Council, and the American Mining Congress.

The key points of the bill would:

First, provide faster tax writeoff of coal use property;

Second, allow utilities to use the 15-percent energy tax credit;

Third, allow municipalities to issue industrial development bonds to aid converting utilities; and

Fourth, under the Clean Air Act, voluntarily converting units would be eligible for delayed compliance orders, and voluntarily converting units would not be classified as a modification, thereby exempting them from the new source performance standards.

COAL ROADS

I have also again cosponsored the proposal to provide Federal assistance to upgrading roads used in heavy coal traffic. As numerous reports have indicated, we face a potential problem of creating the demand for coal, yet simply not having the transportation system to move that coal. The roads of coal-hauling areas have already been ravaged by increasingly large coal trucks, and this system must be kept in repair. This bill provides $1.5 billion spread over a 4-year period to get this program underway.

COAL PORTS

Along that same transportation line, we have not upgraded exports as fully as we should because of problems at our existing ports. I have personally toured the Philadelphia Port and worked with Conrail to improve facilities there.

But we cannot succeed if we attack this problem on a port-by-port basis. Therefore, we need to take these steps:

First, I will be contacting the Reagan administration to suggest first that the President appoint a coal export official with the broad responsibility of increasing U.S. coal exports, and second, that he direct Federal agencies to streamline permitting procedures so that coal export development project permit applications can be processed without delay.

Second, I endorse legislation introduced by Representative BOGGS and Senator WARNER which would provide for an expedited process for dredging projects, quicker environmental reviews, quicker congressional review of such projects, expedited judicial review of claims filed against such projects, and advanced engineering and design moneys when available for such projects.

Third, the appropriate congressional committees should develop and publish a coal port development master plan.

We have yet to tap the full potential for coal exports. Foreign countries are reluctant to sign contracts because our transportation system cannot always guarantee delivery. These steps would help erase that problem.

ENVIRONMENT

I was extremely pleased recently when environmental groups and the steel industry reached agreement on key elements of the Clean Air Act. We need a similar effort on the Clean Air Act and coal. I do not plan in these remarks to propose a magic solution to this problem, but as cochairman I do offer the staff and members of the House Coal Group as a means to bring all sides together in this debate. If we enter a protracted, emotional debate with one side championing no change in the law and the other asking for a complete rewrite we will find no answers, no solutions, and find only further delay that prevents the reasonably increased use of coal.

Because of our energy problems we will have to burn more coal in this country, but we can do it within the best possible environmental guidelines and that is the type of policy we need.

REGULATIONS

Appearing before the Interior Appropriations Subcommittee, Interior Secretary James Watt spoke of his concern about the national strip mining law and other regulations and laws affecting coal development.

In this area, we need a commonsense approach. I supported the national strip mine law and we need it, but we need it to work in harmony with State laws such as Pennsylvania's, and we need it to work sensibly, again as Pennsylvania's has. Pennsylvania's strip mine law is one of the best and strongest in the Nation, yet under its reasonable guidelines, coal production and jobs in the industry steadily increased.

The last bill I mention may at first glance seem less important than some of these other issues. It is sponsored by Congressman APPLEGATE and it calls for a national commitment to coal use. In fact, it is extremely important. As long as OPEC holds a price and supply sword over our head, as long as energy prices continue to soar, as long as the Soviet Union continues its probing in the Middle East, then energy policy is vital to our Nation. It is in response to those steps that we must use America's coal. It is in response to those problems that we must make a firm, national commitment to coal. The Government must make the way clear for coal, and the steps in this plan outlined here will take the key steps to reach such a goal.●

REACT INTERNATIONAL SUPPORTS H.R. 2203, THE FCC VOLUNTEERS BILL

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. DANNEMEYER. Mr. Speaker, on February 26, 1981, I introduced H.R. 2203, to permit the Federal Communications Commission to use volunteers and voluntary organizations in the monitoring of Citizens Band and amateur radio transmissions.

As I pointed out upon introduction, this legislation grew out of meetings with CB and amateur radio leaders who expressed concern over the lack of effective enforcement and indicated their willingness to strengthen the FCC's enforcement efforts by monitoring station transmissions. It is important to point out that the bill would in no way transfer formal enforcement power or sanctions away from the FCC. Rather, it would increase the eyes and ears of the Commission by allowing the establishment of a volunteer program in which the information gathered could be legally shared with the FCC. In addition, local volunteer committees could greatly expand the education of newcomers to the radio field who are unaware of rules, regulations, and customs. In short, the closer relationship between the FCC and the voluntary groups permitted by H.R. 2203 would be a substantial improvement over the status quo.

REACT International represents 32,000 volunteers in all 50 States and in several foreign countries who monitor the channel 9 emergency frequency on CB radios. REACT stands for Radio Emergency Associated Citizens Teams.

I am in receipt of a letter from Mr. Gerald H. Reese, executive director of REACT, in which he outlines their support for H.R. 2203. The letter specifically touches upon the problem of illegal operators interfering with life-saving emergency messages and how H.R. 2203 could be of help in overcoming this problem. Mr. Speaker, I ask unanimous consent that the full text of the REACT letter be inserted in the RECORD at this point:

REACT INTERNATIONAL, INC.,
Chicago, Ill., March 10, 1981.

Congressman WILLIAM E. DANNEMEYER,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN DANNEMEYER: We are very pleased to support legislation you have introduced known as the FCC Volunteers Bill, H.R. 2203.

The 32,000 members of REACT International work hard as volunteers to support their local communities. They dedicate themselves to volunteer monitoring of the official CB Emergency Channel 9 with a goal of 24 hour coverage. Annually, they receive millions of requests from motorists for assistance, accident reports and other vital communications affecting safety on the nation's highways. Very often during these times and in times of local disaster, interference by illegal operators prevents the completion of life-saving emergency messages.

Individuals who intentionally interfere with vital life saving messages must be dealt with severely through official enforcement procedures. They do not cooperate voluntarily with other licensees requesting their cooperation and consideration even during emergencies.

Enactment of H.R. 2203 will permit the FCC to utilize our 1,500 local REACT Teams and other CB licensees, to assist in locating and identifying these violators.

Our members look forward to the opportunity to cooperate with FCC officials to help implement enforcement of FCC rules for Citizens Band Radio.

We hope that this legislation may be speedily enacted so that the ability of the Commission to enforce its regulations will be multiplied many times through the efforts of REACT members and other qualified volunteers who wish to assist in this vital effort.

Sincerely,

GERALD H. REESE,
Executive Director.●

HUMAN RIGHTS AND FREEDOM OF SPEECH

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BONKER. Mr. Speaker, freedom of speech, one of the most significant and cherished rights of Americans, is more than the power of the press to write or broadcast openly. It is a fundamental human right. The freedom to write or broadcast, to teach or speak or believe as one wishes without threat of censorship, harassment, or even death is something prized by people everywhere.

But in too many nations, freedom of expression, as exemplified in our first amendment, is only a dream—a dream for which men and women continue to risk their personal security and even their lives.

In only about 20 countries, according to the International Press Institute, are print journalists and broadcasters really free to objectively report the news.

When freedom of the press is threatened, freedom of other forms of expression—of belief, of assembly, of personal speech—do not survive long either.

Too often, in too many places, newspaper journalists, radio and TV reporters, producers, editors, free-lance correspondents, columnists, and others have been intimidated, warned, and in some cases killed for exercising the basic human right to address themselves freely to issues and to serve their publics through the media.

The threat touches not only foreign journalists but even Americans and others from the Western media working overseas. An American is missing in El Salvador. French reporters were jailed and mistreated in Afghanistan last year. Reporters were imprisoned in Haiti, an editor was jailed in Turkey, and news outlets in South Korea and South Africa were closed by the government. In the Soviet bloc nations, the communications systems continue to be used and abused through government control.

But Americans, since the days of such patriots as James Madison, have fought for and upheld the importance of freedom of expression and the press. As Madison wrote, "Knowledge will forever govern ignorance." The press has played a paramount role in informing U.S. citizens, thus helping Americans to protect and build upon their rights as members of a free, democratic society. Justice Cardozo once called freedom of expression "the indispensable condition of nearly every form of freedom." I could not say it better.

As chairman of the Human Rights and International Organizations Subcommittee of the House Foreign Affairs Committee, I am honored to cosponsor House Joint Resolution 83, joining my colleague HENRY REUSS and others.

The resolution emphasizes the importance of free expression and a free press by commemorating National Freedom of Information Day, March 16, James Madison's birthday.

National Freedom of Information Day is sponsored by the Society of Professional Journalists, Sigma Delta Chi, and I am very pleased indeed to support America's journalists in fostering greater respect for our first amendment. I hope all my distinguished colleagues will join in cosponsoring this noteworthy resolution.●

LAKE COUNTY ALCOHOLISM CONFERENCE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. McCLORY. Mr. Speaker, the problem of alcoholism in our Nation appears today to be more pervasive than ever before in our Nation's history.

An estimated 10 million Americans are reported to be alcoholics or have alcohol-related problems, creating problems affecting virtually every aspect of American life.

Recently, my colleague, Congressman MIKE BARNES of Maryland, and I brought to your attention and the attention of the Members of this House and the citizens of our Nation the fact that more than 250,000 Americans lost their lives in alcohol-related automobile crashes during the past 10 years.

We also pointed out that an estimated 26,000 citizens are killed in drunk driving accidents annually.

Almost 70 Americans are killed each day by drunken drivers, at an estimated economic cost of over $5 billion yearly.

In addition to the problems created when alcohol is mixed with driving of an automobile, the excessive use of alcohol is a major cause of divorce in our Nation and is a principal reason for bankruptcy and other financial problems which Americans experience in their individual lives.

Mr. Speaker, alcohol as an addictive drug is regarded by many observers as the principal form of drug addiction among teenagers and, when mixed with other drugs, leads to immoral and degrading conduct, which, in turn, induces criminal behavior and other acute social problems.

Mr. Speaker, divorce and broken homes are only a part of the tragedy which excessive use of alcohol creates. The plight of battered wives and abused children is fast becoming a special problem requiring extraordinary remedies at every level of government.

Mr. Speaker, the Lake County Council on Alcoholism, established in 1966, and supported primarily through private and local sources, is endeavoring through its limited means to meet the problems of an estimated 23,000 alcoholics in Lake County, affecting the lives of almost one-fourth of the residents of that area.

Losses to business and industry from alcoholism are estimated at $52 million per year. In addition, the courts and State's attorney's office attribute a high precentage of criminal activity, domestic disturbance, and other untoward incidents to the excessive use of alcohol.

Mr. Speaker, may I add that in my view the substantial accomplishments of the Lake County Council on Alcoholism are complimentary to the work of the Select Committee on Narcotics Abuse and Control, created by the Congress, and which includes within its purview the problems of alcohol as an addictive drug, particularly as alcohol and drugs are used together.

Mr. Speaker, the Lake County Council on Alcoholism is holding its third annual conference on Thursday, May 21, 1981, at the Holiday Inn in Illinois Beach State Park near Zion in my congressional district. As a member of the council's board of advisers, I am most anxious that this conference can help stimulate support for the Lake County Council and to promote its objective of reducing the number of alcoholics in our area and alleviating the consequences attributable to alcoholism.

Employing the slogan, "make a miracle happen," the Lake County Council, under the leadership of its executive director, Lester Mordhorst, and its education director, Judy Fried, are planning this year's annual conference on the subject of child abuse and alcoholism. I will be cooperating with them and with the chairman of the board of directors, Irenne Gable, who is devoting her exceptional talents to the success of this conference.

This year's annual conference, scheduled to begin at 9 a.m., will continue throughout the day with representatives from religious, medical, legal, educational, and public sectors on hand to participate in and contribute to these programs.

The public is warmly invited to participate in the work of this conference and to promote any and all activities which can reduce the incidence of alcoholism in our area and, thereby, to prevent many of the dire consequences which alcoholism produces.●

FASTEST GROWING CRIME IN AMERICA TAKES ANOTHER VICTIM

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MOAKLEY. Mr. Speaker, each year arson causes just under $6 billion in property damage and places thousands of firefighter's and resident's lives in jeopardy. We know the tremendous toll which arson takes on declining neighborhoods, but we are just beginning to realize the destruction which our built heritage is facing.

Jonathan Walters, in the March-April issue of Historic Preservation has written an excellent article describing the national tragedy of arson in historic buildings. The present state of the economy leaves no room for waste by either the Government or the private sector. Mr. Walters describes not only the destruction of our heritage but the enormous burden which this crime places on our economy. For example, 45 percent of the property insurance premium increases, over the last 10 years, have resulted from arson, 20 percent of today's premiums go "directly to paying off arson-related claims."

I urge my colleagues to read this article and give serious consideration to what this Congress can do to develop a coordinated Federal role in the prevention and detection of arson and in initiating new incentives to preserve our historic buildings.

The article follows:

ARSON—A HERITAGE IN FLAMES

De Give's Grand Opera House, where "Gone With the Wind" premiered 40 years ago, was a fixture in downtown Atlanta. Although it was listed in the National Register in 1977, its survival was by no means assured. New construction was transforming Atlanta, and the theater was taking up valuable space. Just as citizens were mounting a drive to save De Give's, a raging fire spared them the trouble. Officials listed the blaze simply as "suspicious."

With its large Victorian houses and Colonial Revival bungalows, East Chestnut Street was once an exclusive address in Santa Ana, Calif. Today vacancies and absentee ownership mark the pattern of decay that the Santa Ana, Historic Survey is trying to stem. Last April it notified the owner of a handsome Victorian house on East Chestnut that the vacant property might be eligible for the Register. The group outlined the economic incentives to restoration and the disincentives to demolition that accompany a Register listing—and they warned of fire. Three blazes in the past year had claimed houses in the neighborhood.

Ten days after the letter went out, the house went up. It was arson, fire officials say.

Park County, Ind., claims more covered bridges than any county in the United States. Beeson Bridge, one of 30, had been closed for safety reasons, and residents

wanted a new one. Three times, while officials were deliberating its fate, someone tried to burn it down. The bridge was finally moved.

There have been no arrests and no convictions in any of these fires. Arson is hard to prove a*** BAD MAG TAPE ***nd har'er po prosecute, say experts. But Richard Strother, associate administrator of the U.S. Fire Administration's Office of Education and Planning, doubts that the fires were coincidental. "We're becoming aware of arson fires in historic buildings across the country," he says.

Just how extensive the problem is, no one really knows. Good statistics on arson are hard to come by. Statistics on arson in historic buildings are virtually nonexistent. Arson is the fastest-growing crime in America though, experts agree, increasing at an annual rate of 25 percent, while the conviction rate for arson nationwide, according to the Law Enforcement Assistance Administration (LEAA), is a dismal one percent.

But preservationists are becoming alarmed at the frequency with which historic buildings are being burned.

Juvenile arson is a severe problem, says Strother. Old or abandoned buildings offer an attractive target as to buildings that symbolize authority, such as schools and churches. In areas where arson is a problem to begin with, historic buildings burn with the rest. But in many cases, preservationists fear it may be the historic designation itself that is making the buildings so vulnerable.

Under the Tax Reform Act of 1976, a developer cannot demolish a National Register-listed property (or one within a historic district) without incurring tax penalties, including the loss of both the standard tax write-offs for demolition costs and the accelerated depreciation normally allowed on new structures. A National Register listing also allows preservationists to throw up a number of procedural roadblocks to the demolition of a property.

In many cases, these disincentives and other economic factors can make a plot of land occupied by a historic structure more valuable without it—essentially the reason historic designations are so bitterly fought at times. Fire neatly negates the tax sanctions, according to IRS officials, and procedural roadblocks to demolition obviously go up in smoke with the structure.

In Santa Ana, preservationists fear that the liberal zoning laws (for high-rise condominiums) make the old single-family and duplex houses there especially vulnerable.

In October 1979, in Cambridge, Mass., a 130-year-old Queen Anne-style church burned to the ground just months after going in the Register. An assessor had determined that the land was worth more without the church. The building had been the object of a heated battle between preservationists and the church's congregation, which wanted to sell it and the land to developers.

Owner consent, which passed as part of the National Historic Preservation Act Amendments of 1980, gives the building owner veto power over a Register listing and will likely have some effect on the arson problem. The new law doesn't eliminate the standard review procedures in the case of development projects involving federal funds. So while the controversy that has surrounded so many nominations will be eliminated in some cases, thousands of buildings will still fall within preservationists' protective purview.

As alarming as the frequency of arson in historic buildings is the apparent lack of awareness of the scope of the problem nationwide, says the Fire Administration's Strother. "Most people look on fire as an everyday event that you just live with."

In 1977-78, the last year for which statistics have been compiled, the USFA estimates that there were 160,000 fires either set or of "suspicious origin" in the United States, causing 850 deaths and 3,000 injuries. The fires accounted for $1 billion in property losses, according to USFA figures. Experts agree, however, that that figure is probably a gross underestimate. "Property loss due to arson in more likely $4.5 billion a year," says John Barracato, former deputy chief fire marshal of New York City, now manager of Aetna Life & Casualty's Fraud and Arson Unit. "When you figure in jobs lost, loss of tax base and what it costs to take care of arson victims, the figure is probably closer to $20 billion." One arson fire alone, in 1975, in a sponge-rubber plant in Shelton, Conn., wiped out 850 jobs in one night.

Arson, according to the USFA, is "any intentionally set fire." Experts have identified 24 kinds, from arson for revenge to vandal arson to arson for profit. There are even cases of tenants burning themselves out of their own building to collect welfare benefits and move higher on the lists of those waiting for public housing.

Last September, the Hartford Architecture Conservancy lost an 1840 Greek Revival-style house that they were restoring to "the fastest fire" one firefighter said he'd seen in 30 years on the force, says Toni Gold, executive director of the Connecticut group. Officials suspect the house was burned as part of a gang initiation rite.

Fires to clear tenants out of a building are another kind of arson, says Strother. Some are set to dislodge low-income residents so that the property might be improved with an increase in rent. Others are designed to clear a building before the next large fire to demolish it; these are called two-stage fires.

And there are times when it's hard to tell who is on whose side.

In Halifax County, N.C., the local agricultural extension office recently cosponsored a contest among 10 counties to see whose fire department could burn off the most "dilapidated farm structures."

"If someone was thinking of destroying a building, we'd try to get someone from the local historical association to come out and look at the structure," says Clyde Peedin, chairman of Halifax County Agricultural Extension. "I know of one building the historical people wanted to save, but they just didn't have the funds, and the owner was afraid it was going to fall on someone." Halifax County won the contest. They burned down 109 old structures.

While unique in many respects, arson in historic buildings is generally regarded as part of the larger arson problem sweeping the country. For that reason it is valuable for preservationists to learn more about arson and what has worked to control it in the past.

Arson is most effectively fought at the local level, say experts. But traditionally, localities have lacked training in both arson detection and prosecution. Laboratory facilities have been scarce and anti-arson efforts fragmented or nonexistent. In the mid-1970s, however, government officials and officials in the insurance industry became increasingly alarmed as arson spread.

Burning a building for the insurance money is the basic arson-for-profit scam. Insurance companies estimate that roughly 45 percent of all increases in property-insurance premiums over the last 10 years are due to arson and that 20 percent of today's premiums go directly to paying off arson-related claims. In an area such as the South Bronx, citizens saw entire neighborhoods wiped out.

As a result, arson programs slowly began to materialize nationwide during the late 1970s (though a few did exist before then). But a successful program, say experts, requires lockstep coordination between two groups not generally noted for their ability to work together—namely police and fire departments—and that rivalry continues to hamper anti-arson efforts. The insurance industry and the federal government must also work closely together, but antagonism between them still exists, especially in the wake of a 1977 Senate Governmental Affairs Subcommittee report charging the industry itself with making arson profitable and with failing to deal adequately with the problem.

There are pockets of unqualified success, however, and Seattle, Wash., is one of them.

In 1974, according to retired fire chief Frank Hansen, arson in Seattle was getting out of control. Each year marked another huge leap in property losses to fire. "We had a serious arson problem" says Hansen, "and we weren't working together to fight it."

"We really had to get going as a team," says then-mayor Wes Uhlman. "The police were excluded from arson investigation, the Fire Department had no one trained in criminal investigation, and the prosecuting attorney had no arson expertise at all."

Uhlman put two of the city's top detectives at the Fire Department's disposal. "Some noses got out of joint at first," says Uhlman. "There is a tremendous turf issue that you have to overcome right off." He also appointed a special prosecutor with arson experience.

The city set up an arson-training program to teach firefighters law enforcement, criminal investigation and advanced arson detection. Local insurance companies joined in, pooling resources to fund an arson "hot line" offering rewards for tips on fires. Meanwhile, the state passed legislation making insurance companies and fire departments immune from libel suits for sharing information on clients.

With the new legislation insurance firms became more vigorous in denying claims. A system was also set up to facilitate information sharing between Seattle and surrounding localities to help detect fire patterns. An arson counseling program for juveniles was started, and the insurance industry and the city launched ambitious public-awareness programs. At the same time local media began to cooperate by giving greater attention to arson cases. Media attention is crucial, according to experts. Not only does it serve to heighten awareness, but in some cases it has also helped crack arson rings. In Boston and Detroit, major arson arrests were made following media coverage.

While arson continues to spread nationwide, it is down by more than 40 percent in Seattle. All it takes, says Chief Hansen, is a strong chief executive and the commitment of resources and people.

Boston also has achieved some success fighting arson. There, a series of suspicious fires in and around the same neighborhood roused residents to action and eventually led to the largest arson arrest in the U.S. Convinced that the fires on and around Symphony Road were not the random work

of vandals, the Symphony Tenants Organizing Project (STOP) decided to investigate.

It wasn't long before they were predicting with uncanny accuracy which buildings in the neighborhood would burn next. To do that, they researched, then analyzed, data on burned buildings and compared it to data on buildings still untouched. They found that tax delinquency, building-code violations, rapid resale of property to inflate its "paper value" and the fire history of a building or its owner were all strong indicators of a building's vulnerability. The paper trail they followed eventually led to an arson-for-profit ring and the indictment of 33 people, including two former fire captains, lawyers, contractors, property owners and even a detective in the state fire marshall's office.

The discovery that arson is predictable has prompted a number of cities to implement early-warning systems. In New Haven, Conn., the city's Arson Warning and Prevention Strategy collects information on older buildings. When one is found that falls into all four categories, the property is placed on the fire department's "at risk" list, surveillance of the property is increased, the owner is contacted by housing officials and steps for repairing, securing or demolishing the property are proposed.

The insurance industry, which has become more active in fighting arson since the Senate study, is compiling a data bank of its own. The Property Insurance Loss Register is a computerized pool of all fire-loss claims filed with insurance companies across the country. Run by the American Insurance Association, the Loss Register will allow companies to uncover undisclosed duplicate-insurance cases, loss history of a given location, loss history of an individual and loss history of a combination of individuals. Doug Burdick, a claims consultant for the association, says that the Loss Register could turn out to be the industry's most valuable tool for uncovering fraud and pinpointing arson-prone clients.

At the same time, individual insurance companies are becoming more aggressive in denying fire-related claims. Working with a budget of $223,000 in 1979, John Barracato says Aetna successfully challenged $7 million in claims and is currently investigating another $6 million worth. Aetna denied $5 million in claims in 1978, the first year of the program.

The insurance industry is still being criticized for pressuring agents to sell large amounts of property insurance, however, and for not compensating adjusters adequately. Arson rings have been identified where both agents and adjustors were involved in defrauding their own companies. Industry officials say they are looking into steps, both at the legislative and corporate level, to remedy the problem.

While different localities are implementing antiarson programs, and the insurance industry is becoming more active in the fight, the help of the federal government, individuals at all levels agree, is crucial.

Unfortunately, the federal government's "major new attack" on arson, as announced by then Vice President Walter Mondale in December 1979, is fizzling. Ambitious antiarson programs implemented by the Bureau of Alcohol, Tobacco and Firearms and the USFA are in danger of extinction because funding for the LEAA grants that made them possible is being eliminated by Congress (which just a year ago admonished the LEAA for failing to dispense money to arson training programs). "It's really kind of sad," says J. Michael Sheehan, director of the LEAA's arson program. "We were just getting police and fire departments cooperating. Federal money gives local agencies that normally have to compete for funds that kind of flexibility."

Congress failed to pass legislation this year that would have coordinated federal activity on arson, made arson a permanent Class One crime (meaning that the FBI would keep vital, detailed statistics on it) and authorized $5 million for the USFA's antiarson program in 1981. Sen. John Glenn (D–Ohio), a chief sponsor of arson legislation in Congress, says the lack of support for arson legislation on Capitol Hill directly reflects "the lack of public awareness of the arson problem and the fact that arson has been perceived as essentially a local problem" and a problem of the poor.

How long it will take before Congress recognizes arson as a serious problem is uncertain. "Every time another person is killed we get another worker on our side," says U.S. Rep. Joe Moakley (D-Mass.), who is also a chief sponsor of arson legislation on the Hill. "It's a slow process."

In the meantime, the USFA has commissioned a study on arson in historic buildings. And included in the recently passed Preservation Act Amendments in a provision sponsored by Moakley requiring the Secretary of the Interior to report on arson in historic buildings.

As substantial as many of the fire losses have been, preservationists stress that fire does not necessarily mean the end of a building. "The initial tendency of the fire department may be to recommend tearing the building down," says Stephen Dennis, associate chief counsel for landmarks and preservation law at the National Trust. "But often a disaster like a fire can really pull people together to save a structure."

In Baltimore, fire swept through two 1868 Second Empire-style apartment buildings on Bolton Hill. One building was gutted and the other extensively damaged by smoke and water. While involved in a court battle to prevent the owner from demolishing the buildings, citizens came up with a plan to salvage them: Conversion of the buildings into 55 luxury condominiums is now nearly complete.

And in Turlock, Calif., preservationists are trying to save an old school building hit by arsonists. "We have the start of something good," says Betsy Unruh, who is heading the drive to save the school. "The fire drew a great deal of attention and a great deal of support for saving the school. The key now is proving that there is sound financial basis for restoration." A National Trust Preservation Services grant is helping to fund the study.

While preservationists may occasionally have cause to be hopeful in the wake of a fire, arson in general continues to get further out of hand. Says Aetna's Barracato: "As long as government keeps passing the buck, the private sector keeps blaming the fire department, the fire department keeps blaming the police department, all the way up and down the line, the United States will continue to burn."●

FOOD STAMPS BENEFITS ABUSE

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. HUBBARD. Mr. Speaker, while still in the early days of the 97th Congress and a new administration, I would like to share with my colleagues a letter from my constituent, Mrs. Karen Cox, Madisonville, Ky., regarding abuse in the food stamp program. I certainly share my constituent's sentiments and trust that my colleagues will follow the lead of the new administration in scrutinizing the waste in the food stamp program. Mr. Speaker, I submit the following:

I have written to you once before, in December of 1980, concerning the misuse of change received from food stamp dollars. I would once again like to bring your attention to the misuse of food stamps.

I am a cashier at a grocery store. It was my turn to work Sunday, Jan. 25, which was Super Bowl Sunday. During the day we had several men come in to buy snacks for "Super Bowl Parties." I checked out several of these orders of soft drinks, drink "mixers," potato chips, nuts, cookies, and candy that were paid for with Food Stamps.

It is bad enough to check out orders every day with junk foods, but for a grown adult man to misuse a gift like food stamps really upset me. I would think that most mothers would want to buy nutritous, health foods for their children, and I'd think that any man would have more pride than to use the food stamps, given to his family for necessary food, on junk party foods.

I understand that some families need Food Stamps to have a well balanced diet. However, I believe the food stamp program should be more like the WIC program. Certain foods should be off limits. My husband and I cannot afford things such as ice cream, cookies, or potato chips every week, depending on which necessary foods we need. We live on a strict budget, without food stamps. It upsets me that people on food stamps buy items that I have to pass up. I believe items such as cakes, cake mixes and frostings, soft drinks, Kool-Aid, candy, cookies, potato chips, pizza, chewing gum, and some expensive things such as shrimp should not be bought with food stamps.

Some people who use food stamps feed their children more junk food than those who do not have food stamps. It seems to me that this defeats one of the purposes of food stamps. These kids are not getting a balanced diet.

I would also think that these people would need things like bread, milk, cheese, vegetables, and meat, rather than spend money on junk food. I realize that most people do enjoy junk food, but I believe these foods should be classified as luxuries, along with cigarettes and pet foods.

President Reagan has said he will tighten the welfare and food stamp programs. I am behind him 100%. I also believe people on food stamps should show proof that they are looking for employment, or if they have a job, better employment. Anyone who is unemployed has plenty of free time to go job hunting. I have a job now, but I've been looking for a better job since September, so I realize how hard it is to find a job. But I

do not think these people should sit on their behinds and take a handout with(out) having to work for it.

Thank you very much for giving me a chance to tell you how I feel. I appreciate the fact that you actually read the letters from the people you represent. You have my full support.

Thank you,

KAREN COX.●

A HUMANE POLICY TOWARD THE THIRD WORLD NATIONS

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. WEBER of Minnesota. Mr. Speaker, I have been deluged by my constituents who insist that this Nation adopt a humane policy on our conduct toward the Third World. I certainly agree with them. For if we are ever to be triumphant over the forces of repression and enslavement, we must have a foreign policy which provides political and economic freedom to the people of Third World countries. It is for this reason that I submit an editorial from the Wall Street Journal, written on March 3, 1981, into the CONGRESSIONAL RECORD today. I think it clearly explains what America needs to do, and what we have been doing, since President Reagan's selection of Michael Novak to the U.N. Commission on Human Rights.

The editorial follows:

LIBERTY AND BREAD

Those who are worried the Reagan administration lacks an appreciation for Third World issues—and such worries have been widely voiced—would do well to consider the speech delivered in Geneva last week by America's new representative to the United Nations Commission on Human Rights. The topic is development, on which the Western initiatives in the past generation have been: a World Bank-sponsored drive toward income transfers and official state planning; a litany of complaints about the alleged rapaciousness of big corporations; and a constant harangue about the dangers of too many people being born.

Now into the midst of this debate comes Mr. Reagan's representative, Michael Novak, uttering the one word that America seemed to have all but abandoned—capitalism. Not "anticommunism," But capitalism. C-a-p-i-t-a-l-i-s-m. This is the system that allows individuals to invest their capital and labor and reap for themselves the wealth it produces, a system that provides that one man's good fortune is another's as well. Mr. Novak's use of this word in the midst of a Third World forum is no small matter, and we can only hope that it is an opening chord in what will become a broader initiative by the new administration.

It is, after all, both an irony and a tragedy that America should have allowed itself in recent years to be put on the defensive in the debate on development. It is an irony simply because America is the most developed nation and also the most free, a combination that has captured Third World imaginations even while America seems to be shying away from the ideas on which its own success was built. It is a tragedy because the anti-capitalist concepts that have taken hold during the period have produced incalculable setbacks in nations as diverse as Tanzania and China, Jamaica and Burma, Poland and India.

The recognition that capitalism might have something to offer the Third World has been growing throughout the Third World of late, however. It has been stirring, moreover, in some remarkable places, not merely in such capitals as Peking and Warsaw, but even in such redoubts, we would venture, as Pyongyang. And no opportunity could be riper than the one the Reagan administration is seizing to explicate some of the basic ideas on which America was developed.

The key principle Mr. Novak put well. It is that wealth can be created. Wealth isn't a limited quantity to be transferred from the rich nations to the poor. It is created by the application of human muscle and brain. This in turn means that having a lot of people (widely, but erroneously viewed as a Third World "problem") creates an opportunity to have more wealth. And people apply their muscle and brain to create wealth when they are given the incentive of being able to keep what they earn and the freedom to use their wealth for their material and spiritual fulfillment, as they please.

This is another key point. Freedom is an integral part of capitalism. Totalitarian states that deny this freedom deny the incentive to develop, and this is why they have been so roundly outpaced. President Carter seemed to understand this link between freedom and development; he stated explicitly in his first big foreign policy speech at Notre Dame in 1977 that the great democracies of the world aren't free because they're rich, but are rich because they're free. But then he pressed a human rights campaign that talked a lot about freedom of speech, of assembly, of religion, but all too little about a co-equal freedom—the freedom of enterprise.

Here you need the freedom to set up corporations to handle jobs too big for the individual proprietor and a system of law individuals and corporations can trust. For decades a school of thought has been attacking one variety of corporation, the multi-national, for allegedly "obscene" profits. But now America has sent Mr. Novak into these debates asking: "Are we to understand that losses are virtuous?"

Another school of thought holds that capitalism can't address the real problem of the Third World—poverty among agricultural peasants. This is a canard, nowhere more thoroughly demolished than in an important, if little known, book called "Wealth of Nations in Crisis," whose author, Ronald Nairn, sets out a capitalist ethic for peasant farming. He takes you from the plains of America, to the pastures of New Zealand, to the mushroom farms of Taiwan and the paddies of Thailand and Japan to demonstrate the sort of productivity that can be unleashed by freeing Third World farmers from government and bureaucratic inhibitions.

Freedom is, in the end, the enormous attraction of this whole idea of capitalism. Communism, as Mr. Novak points out, has been forcing much of the Third World to choose between bread and liberty, producing meagerly even of bread. That liberty and bread can be grown together—and, ultimately, only together—is precisely what America has been all about. We can think of no more relevant or timely idea for America to be pressing in the so-called North-South dialog than this, and it is heartening to see the administration making such an eloquent beginning as Mr. Novak has done in Geneva.●

WHO ARE THOSE WITH TRUE NEED

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. FORD of Michigan. Mr. Speaker, in outlining his program for economic recovery, President Reagan promised us that all those with true need could rest assured that the programs they depend on would be exempt from any cut. It seems that something has gotten lost in translating the President's message into budget proposals. Using just one Department of Labor program as an example, the administration not only seems to be confused about the concept of true need, but has developed a scheme which appears irreconcilable with other components of the program.

The administration proposes to phase out, by the end of fiscal year 1981, two CETA public service jobs programs, adding an additional 300,000 people to the unemployment rolls and eventually the welfare rolls. Simultaneously, the administration is proposing a work incentive program for welfare recipients, meaning recipients must work at some type of job to receive benefits. But, that is what the CETA public service jobs program is all about—last resort jobs for the poor and disadvantaged who otherwise would be on welfare.

The administration appears to be proposing nothing more than a shifting of people—those presently holding CETA jobs will be pushed out to make room for welfare recipients who must work to receive benefits. But, where are the resources to hire these new workfare people when block grant funding for these types of programs will be reduced by $1.2 billion. What happens to the thousands of former CETA employees who, under another administration scheme, will be eligible for unemployment benefits for only a short period of time.

Mr. Speaker, this is just one example which seems to indicate the administration has drawn an outline of an economic recovery puzzle and has hurriedly inserted ill-fitting pieces.●

DEATH OF FORMER MASSACHUSETTS STATE SENATOR, ALFRED CENEDELLA, JR.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. CONTE. Mr. Speaker, on March 24, the Commonwealth of Massachusetts suffered the loss of one of her most outstanding public servants. Alfred Cenedella, Jr., a native of Milford, a decorated veteran, and devoted husband and father, passed away suddenly in Antigua on vacation.

I had the pleasure of serving in the State senate with Alfred Cenedella from 1952 to 1956, and was impressed with his conscientious work and legislative insights. I would like to insert the following article from the Boston Herald American from February 28, 1981, in his memory:

ALFRED CENEDELLA JR., AT 63, LAWYER, EX-STATE SENATOR

MILFORD.—A Mass for attorney Alfred B. Cenedella Jr., 63, a former state senator, will be celebrated on Monday at 10 at Sacred Heart of Jesus Church. Burial will be in St. Mary's Cemetery.

He died Tuesday in Antigua while on a Caribbean cruise.

A native of Milford, he was graduated from Milford High School, Worcester Academy, Brown University in 1940 and Boston University Law School in 1947. He also did graduate work at Harvard.

Cenedella was a naval aviator in World War II in the Pacific and was the recipient of the distinguished Flying Cross, two Air Medals and nine battle stars. He remained in the Naval Reserve and later became a director of the USS Massachusetts Memorial Committee in Fall River, returning to work at the battleship on which he had served during the war.

Cenedella was an assistant secretary to Massachusetts Gov. Robert F. Bradford from 1947 to 1948 and director of the division of law enforcement in the Massachusetts Department of Natural Resources from 1949 to 1952. He was elected to the Senate in 1952 and served four years before becoming legislative counsel for the Massachusetts Teachers Association.

He was a former chairman of the Milford School Committee and a member of the Milford School Building Committee, the Republican Town Committee and the Massachusetts Bar Association. In addition, he was a director of the Milford Chamber of Commerce, Milford Elks Lodge, Sgt. John W. Powers Post, American Legion; Valencia Council, Knights of Columbus, of which he was a past grand knight and Fourth Degree knight.

Cenedella was the son of the late Alfred B. Cenedella and the late Florence (Trudell) Cenedella.

He is survived by his wife, Jeanne C. (Finn) Cenedella; two sons, attorney Alfred B. Cenedella, 3rd and Edward P. Cenedella, both of Milford; two daughters, Mrs. Ann Bodio and Mrs. Florence Trotta, also of Milford; and one sister, Mrs. Florence Magruder of Sun River, Ore.

Arrangements by the Edwards Memorial Funeral Home, Milford.●

HONORING MARIE GONZALEZ

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. RODINO. Mr. Speaker, an extraordinary lady will be honored this Friday, March 20, in my congressional district. Marie Gonzalez is known to the citizens of Newark for the many roles she has played in the Newark community for more than 40 years.

To some she is president of the Ladies Guild at Immaculate Heart of Mary Church, where she helps people solve problems dealing with immigration, social security, housing, and other social services.

To others she is an outspoken member of the Newark Human Rights Commission, where she has served as Puerto Rican and Spanish affairs coordinator, community relations specialist, and administrative analyst. Since 1963, Marie Gonzalez has worked on the commission to guarantee the right of equal opportunity to all Newark's residents. She has fought against all forms of discrimination and has won numerous battles that have benefited thousands.

To still others, Marie is one of the driving forces behind the Puerto Rican statewide parade in Newark. Each year she helps put together the most prestigious event in the State honoring Americans of Puerto Rican descent.

The extent of Marie Gonzalez's involvement in the community does not stop there, however. Born in Puerto Rico, Marie came to Newark where she and her husband raised a family of three children, while she contributed countless hours to improving the living conditions in her Ironbound neighborhood.

She was a cofounder of the Lafayette Street School Parent-Teachers Association; shop stewart and activist in the Brushmakers Union; member of the Urban League, the Executive Women's Forum, and the Business and Industrial Coordinating Council, which helps train minorities for job opportunities in local industries. She does volunteer work for the Division on Youth and Family Services, helping to place homeless children. Marie also is a member of the church council and she sits on the Board of Human and Civil Rights Association of New Jersey.

Hundreds of people will attend Friday's special dinner in Newark honoring Marie Gonzalez as she retires from the Newark Human Rights Commission. Marie has been a good friend to me for many years, and she has helped me often in my efforts to assist Newark's residents. She knows the people of Newark because she has been out in the community doing so much for them for such a long time.

Marie Gonzalez symbolizes the highest goals of community involvement and devotion to her city, and I am proud to honor her.●

LETTER FROM HOME

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. AuCOIN. Mr. Speaker, like many of my colleagues, I make a practice of polling my constituents on issues every year. My annual questionnaire never fails to elicit thousands of responses, along with many hundreds of personal letters and telephone calls elaborating on issues of national concern.

Last year, more than 28,000 Oregonians in the First Congressional District responded to my questionnaire. To judge by the flow of returns so far this year, I am delighted to say that the response to the 1981 questionnaire will be even greater. In recent days, the average volume of personal letters to my office has climbed from 100 a day to more than 300 a day.

Among these letters was one from Mr. John Plummer of Tillamook, Oreg. Mr. Speaker, when a citizen takes the time to respond to a questionnaire, it is much to his or her credit. But when a citizen like Mr. Plummer takes the time to respond in such a comprehensive and thoughtful way, it is a particularly encouraging and heartening lesson in citizenship, and I submit it to be included in the CONGRESSIONAL RECORD. The letter follows:

FEBRUARY 16, 1981.

HON. LES AUCOIN,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN AUCOIN: As a thinking citizen I am unable to use the answer stub attached to the referenced questionnaire because the answers provided would not truly reflect my opinion on the questions asked. Per your request I shall use this letter to inform you of my opinions.

ECONOMIC POLICY

A small personal tax cut would be welcomed by most of the taxpayers with whom I have conversed. Most of them express the opinion that there should also be a moderate cut in taxes to business interests, with this cut to be based on a sliding scale with primary dependence and importance placed upon "re-investment" of capital to expand the business (or upgrade the equipment used in the business) so that more jobs are created and thus providing more security of employment for those already employed by the individual business entity thus credited.

Application of this cut should be made to the particular Division or Company thus qualifying, and definitely not spread throughout the complex structure of some of the large Corporations because this would allow the use of "loopholes" for the purpose of absorbing the tax cut or credit without generating any additional benefit to

the Division or Company which actually earned it.

TRADE POLICY

Using the Auto industry as a general example (I include the entire industry; new vehicles through the spectrum of accessories and "after sales markets" items), I believe that an immediate tariff should be placed upon every vehicle and every part for these vehicles which are now imported in such vast quantities. The tariff should be equal to the total economic impact of that vehicle or part upon the American economy. As an example: An imported car has a landed cost of $5,000.00; To have produced the same vehicle in America would have cost $6,500.00; The $1,500.00 difference would have been due to wages, higher production costs, etc., but the total economic impact would be the $6,500.00 figure. Thus the vehicle would have to sell for $11,500.00 plus whatever profits the Importers and Distributors may make. The $6,500.00 tariff imposed should be distributed as follows: First, divide among the American Manufacturers of the respective competitive vehicle or part a prorated share that would be equal to the profits they have lost through the sale of this imported item. Secondly, divide among the producers (American only) of the raw materials and finished products associated with the manufacture of a competitive vehicle or part those profits lost by this import. Thirdly, apply the excess directly to balancing the federal budget and to the improvement of our balance of payments abroad for those items that we must import (excluding petrochemical products wherein the ultimate beneficiary would be members of OPEC), and also to be disbursed to those individual States which were directly affected by the imported item, with such disbursements directed towards their education, highway and environmental quality efforts.

This action would stimulate the "re-birth" of our American Automobile industry (could well be applied in principle to Logging, Fishing, etc. as well), and would serve to immediately stabilize our balance of trade payment deficits.

TUITION TAX CREDITS

Private and parochial schools are just that; private and/or parochial. As private business entities they should receive no support from the federal or local governments. Our Constitution guarantees full and complete separation of Church and State. If the Church chooses to run a school for its membership then it must be ready to support it fully. If a private group chooses to run a school, then the tuitions and fees charged must be able to support it. We, as a Country, claim to have the finest education system in the world within our Public Schools, and it's about time that we started living up to our boasts.

Curriculum for every Public School should be subjected to constant scrutiny by a cognizant agency within the Department of Education and those schools who persist in maintaining vast budgets for "elective" course subjects as senseless as Pigeon Training, Basket Weaving and other nonsense of equal unimportance should have all support withdrawn until the basic "3 R's" are once again brought up to an acceptable standard. It is a disgrace to have university graduates who verge on illiteracy as an end product of our school systems.

BUSING

I do not now have children in school. After having invested my life in the service of my country as I did, if I should have children in school and if I were told that my children would have to be bused twenty miles across town to attend a school when there was a perfectly good school (perhaps even a school that had caused me to buy a home nearby so that my children would be able to attend a particular school) my answer would be very negative. I would absolutely refuse to abide by such ruling because I feel that it violates any realm of applied reasoning and additionally it would violate my Constitutional rights as an American citizen. (In this respect I quote Article IX; I quote Article X; I quote Article XIV, Sect. 1; I quote, most important of all, Article I . . . the right to free assembly . . . because, after all is said and done, a school is an assembly financed by and for the people of these United States.)

NUCLEAR POWER

Through previous correspondence with your office you should be aware that I am very ill from exposure to radiation because of my service to my country. From this exposure I have a first-hand knowledge of what pain and other associated "after-effects" one must endure as a result of this exposure. As a country we need adequate electrical energy to survive and to support our industrial base. What we do not need is for a committee composed of individuals whose only service to their country is the fact that they accept inflationary wages for rendering opinions about a subject they know nothing of.

We do need nuclear powered generating stations if (and only if) the construction of all plants is brought up to an acceptable standard to insure the safety of the citizenery. The present plants do not have that standard, and further, there is no presently acceptable means for disposing of the highly active fuel residue generated from their operation.

I point out to you that the "half-life" of Alpha contamination is considered to be 56,000 years. And, considering that many half-lives (perhaps as many as 50, must pass before the Alpha contamination would be sufficiently decayed so as to present no hazard) it is within reason to say that there is never going to be a safe way to dispose of this contamination.

Further, the bulk number of these plants are being constructed by private business whose sole concern is to generate revenue by means of profit for the owners, and therefore they are very unlikely to be overly concerned with the safety of individuals when such safety standards carry such an exhorbitant price tag as would be generated by the requirement that they institute a perpetually monitored disposal site for the residues.

Generation of power by means of wind and solar means should receive top priority by both government and private enterprise.

RADIOACTIVE WASTES

If an acceptable means of disposal can be found by our scientific community, then the States in which such sites would be located should be required to place the question in referendum before its voters prior to activation of such sites.

ENVIRONMENTAL REGULATIONS

Should industries be required to control pollution even if it means higher prices for goods and services?

Within moderation and the acceptability of costs involved, Yes. If acceptable standards cannot be met within the cost/profit structure, then there should be grants to cover development of alternative products and sources of products. Such grants to be made at low or no interest thereby stimulating growth of economy and stabilization of our work force.

DEFENSE READINESS

We are suffering a tragic loss of our enlisted technicians due to inadequate pay (when related to pay for an equally technical position in civilian life which imposes none of the restrictions on family life suffered by service in the military), especially in the middle grades. I recommend that there be a very large pay raise (at least 20%) to be made in an inverse scale as follows: E-1, none. E-2, none. E-3, none. E-4, 10%. E-5, 15%. E-6, 20% (from personal experience I tell you that full 90% of all technical operations are performed at the E-5 and E-6 levels). E-7, 12%. E-8, 8%. E-9, 5%. All Warrant Grades, 5%. O-1, none. O-2, 10%. O-3, 12%. All succeding grades to remain static as they do not provide the needed Technical Skills that we are losing. This would provide for immediate retention of those persons whose skills are needed to maintain a strong military force.

Conventional weapons should be upgraded, but not through such fiascos as are presently employed (I cite the mess that Chrysler Company has made of delivering the vaunted Super Tank . . . it didn't work when they tried to show it, and it still doesn't work, and the bureaucrats involved in this stupid selection are pouring still more money down that "rat-hole" trying to salvage some face-saving value from it).

The B-1 Bomber (is there really such a device?) is nothing more than a slice of the same pie as above. When coupled with such a device as the MX Missile system, we should be able to whip the world with a fly swatter while they are in state of incapacitation from laughing so hard at such a Laurel and Hardy act.

We have the technology at hand to place MRV's in orbit and service them continually with our about to be finally launched Space Shuttle. To use this magnificent piece of costly merchandise for lesser purposes is bordering on the unforgivable. When compared with the costs of such programs as the MX and B-1, it could be accomplished for peanuts, and still leave enough funds for the pay raises proposed for retention of technicians.

The overall result would be an incredibly strong defense posture created for less investment than is indicated by released (and admittedly conservative) estimates of cost for MX and B-1.

DRAFT REGISTRATION

When qualified by the statement that it should be tied directly to ERA (require that eligible females be registered as well) and that the draft should be implemented as per the defense posture assumed by Israel, should that become necessary to provide sufficient numbers of personnel through other than purely voluntary means.

SUBMINIMUM WAGE

How do you feel abut allowing teenagers to be paid less than the minimum wage?

I strongly favor this move, as it would most probably increase the number of jobs for willing workers and would provide an incentive for more teenagers to seek employment and thus develop the habit of work which they might well follow in later life.

Additionally I would like for you to work towards preparing legislation for the express purpose of helping those veterans like myself who have given of themselves to the

service of their country, only to find that they are now denied the benefits which were promised as a viable part of the re-enlistment contracts which were signed in good faith.

Particularly involved are those, who like myself, involved in the atmospheric testing of weapons and other nuclear devices. Correspondence with your offices in this matter have borne no fruit.

Correspondence with the Department of the Navy, the Defense Nuclear Agency, Senator Hatfield's offices and other departments, agencies or bureaus have likewise been futile. Legislation would be a benefit to us, though I fear that it may come too late to offer me any direct help, and to the families left behind after we are gone.

Thank you for the opportunity to express my views in this manner, and thank God that I am an American, privileged to have a voice in my government through you.

Sincerely and Respectfully,

JOHN PLUMMER.●

THE ADMINISTRATION'S ARBITRARY BUDGET AX

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. FORD of Michigan. Mr. Speaker, President Reagan has led us to believe that his economic recovery program is aimed at Government waste, fraud, and duplication. If this is true, why has he targeted for extinction one of the most efficient and cost-effective Government programs. I refer, of course, to the Legal Services Corporation.

This exemplary program has provided poor people access to legal counsel they otherwise could not afford. In 335 legal service programs across the Nation, dedicated, talented attorneys and paralegals, working for salaries far below the norm, help poor people with their most basic needs, such as decent housing and health care. Legal service professionals have protected the poor from exploitive slum landlords and arbitrary utility cutoffs. They have helped the poor slice through Government redtape and, as a result, have enabled agencies to become more efficient and responsive to their clients.

The majority of the Corporation's Board of Directors is composed of distinguished members of the legal profession. From its inception the Corporation has had the support of the American Bar Association and the National Legal Aid and Defender Association, as well as bipartisan congressional support.

The overwhelming support of the Legal Services Corporation has been justified. The Corporation has overseen delivery of legal services to the poor with fiscal restraint. It is one of the few organizations in Washington that, despite inflation, has kept its administrative costs to a declining portion of its total budget. This worthy program should not be subjected to the administration's arbitrary budget cutting.●

CIVIC LEADER, TEACHER, ISAIAH SAVAGE DIES

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. JONES of Tennessee. Mr. Speaker, last week I lost a valuable member of my staff, Mr. Isaiah Savage, Jr., of Jackson, Tenn. Mr. Savage had been a part-time employee in my district office for 6 years and his death was untimely and a deep shock to all of us who knew him.

Isaiah was a man who represented to all of us the things we hold dear: Church, family, and a lending hand to the poor and downtrodden. He was a very active man participating in the political process to its fullest, serving on many agency boards of directors, and working hard for his church and family.

The loss of Mr. Savage is a great loss to me personally. He was a credit to the Congress, and he was a credit to the work I try to do on behalf of my constituents. Moreover, his untimely death was a great loss to his community and his race. His leadership will be greatly missed by all of us.

I am hopeful that all of us who knew and counted him among our closest friends will continue to carry out our sacred duties as Government officials in the same way Isaiah would have and did. Though he was constantly busy with one endeavor or another, he was never too busy to offer guidance to those who sought it from him, and he was never too busy to offer his own resources to assist the people who needed it.

I join his family in their sorrow and their grief. I will forever share in their cherished memories of our beloved Isaiah Savage.

Isaiah W. Savage, Jr., longtime educator, politician and civic leader, died Tuesday at Meharry Medical College Hospital in Nashville after a long illness.

Mr. Savage, 60, a native Jacksonian, taught auto mechanics for more than 30 years, first at the old Merry High School and continuing at Jackson Central-Merry High School. His students nicknamed him "Chief."

He worked as a part-time field representative for the local office of U.S. Rep. Ed Jones, D-Tenn. He also served on several city, Madison County and state boards.

Mr. Savage was active as a civil rights leader, serving several years as second vice president for the local chapter of the National Association for the Advancement of Colored People.

Jones said this morning that the "loss of Isaiah Savage is a great personal loss to me because of the fine work he did as a part-time member of my staff.

"More importantly than that, his passing is a great loss to Jackson and Madison County because of the many civic activities in which he was involved.

"Isaiah Savage was a man who truly sought to make a contribution to his fellow man, his race and his community. He will be missed by all of us."

County Executive Walter Baker Harris said he had "personally lost a very good friend" after hearing of Mr. Savage's death. "The community has lost a fine leader. And he was a very fine and keen politican in Democratic Circles."

Mayor Bob Conger said Mr. Savage was "very active in the community over a long period of time," and he will be missed.

Dr. Robert G. Owens, NAACP president, said Mr. Savage served as chairman of the chapter's veterans affairs committee as well as being second vice president for many years.

"He made a great contribution," Owens said. "I thought his contributions to politics were tremendous in a very positive way. His advice was invaluable.

"We've lost a staunch member of the NAACP and one who has contributed a great deal to people, both black and white."

Mr. Savage, who lived at 550 S. Royal St., served as chairman of the Jackson Housing Authority and treasurer for the West Tennessee Health Improvement Association board.

He also was on the boards of Jackson-Madison County General Hospital, Jackson Boys Club, and Southwest Tennessee Development District, and a member of the county's Affirmative Action Committee.

A veteran of World War II, Mr. Savage was active in the U.S. Army Reserve. He served as chairman of the budget committee for Berean Missionary Baptist Church, where he was also a trustee, deacon and Sunday school teacher in a class for women 60 and over.

In a 1979 interview with The Sun, Mr. Savage said he was fond of politics. "I like politics and I like my party," he said.

Arrangements are incomplete with Stephenson and Shaw Funeral Home in charge.●

LIVING MONUMENT TO WELDON HOWITT

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. CARMAN. Mr. Speaker, when Weldon Howitt died the other day, Long Island and the Nation lost a great educator, a good neighbor and a friend. He was a shy person who overcame his shyness and exhibited a sense of warmth and caring for the community that was enhanced by a wonderful sense of humor.

Before moving to Long Island in 1919, Mr. Howitt was a school principal in Brushton, N.Y. After arriving in our community, he served as principal and science teacher at the Farmingdale Public School. When he retired as the supervising principal of the Farmingdale School District in 1945, he embarked on a career of public service

that continued until the day he left us. He was a founder and vice chairman of the board of directors of Sunrise Federal Savings Bank. He was also the secretary of the Farmingdale Free Library, village director of civil defense, president of the Farmingdale Rotary, village trustee for 6 years, acting mayor, and, a leader in the Farmingdale Methodist Church for some 50 years.

In 1953, the Farmingdale School District named a high school—now a junior high—after Mr. Howitt. It will continue to serve as a living monument to the life of service that was Weldon Howitt. His community and friends will miss him very much.●

NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY AMENDMENTS OF 1981

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. WAMPLER. Mr. Speaker, on January 5 of this year I introduced H.R. 23, a bill to amend and extend that title XIV of the 1977 farm bill. That title established the National Agricultural Research, Extension, and Teaching Policy Act of 1977.

Its main purpose was to increase research, extension, and teaching in the food and agricultural sciences during the period 1977–82; a 5-year program. For a decade prior to the enactment of title XIV, the National Academy of Sciences, various special boards and commissions of the Department of Agriculture, hearings before the Congress had painted a picture of neglect in these vital functions of the Department of Agriculture. Moreover, the traditional share previously allotted to these programs in the Federal budget had fallen from approximately 39 percent in 1940 to less than 2 percent in the 1975 budget. This would have been all right if our agricultural production had kept increasing, as it did in decades previous when we reaped a cornucopia of agricultural products from previous research. However, the evidence earlier cited showed we would encounter an explosion of demand for agricultural products beginning in the eighties increasing annually to the point rather rapidly when demand would outstrip our ability to produce, unless we were suddenly able to produce two shafts of wheat or two stalks of corn where only one grew before. Thus the sages said, and rightly so, I believe, we must have more agricultural research.

Though title XIV was able to project this need and in a way begin to accomplish what some called a turn around, I regret to say we have fallen way below our goal. We have halted the decline, yes. We have initiated a few new programs, but our efforts have hardly kept pace with inflation. Most disappointingly, we have overcentralized planning and coordinating functions in the Department of Agriculture, not intended by the Congress to the point we are about to destroy the Federal/State partnership our forefathers so carefully developed and nurtured over the past century.

During the last several months the land grant colleges and universities having a demonstrable capacity in the food and agricultural science, various commodity groups, State institutions and individuals have reviewed H.R. 23 and offered me a number of detailed recommendations for improving that legislation. The bill I intend to introduce today, jointly sponsored with the chairman of our Subcommittee on Department Operations, Research, and Foreign Agriculture, Mr. BROWN of California, contains the bulk of these changes recommended to meet the need to improve our agricultural research, extension and teaching capabilities.

On Thursday and Friday, March 19 and 20, Chairman BROWN has scheduled hearings on agricultural research, extension and teaching and the amendments needed to title XIV of the 1977 farm bill. During the course of these hearings we will receive testimony for other changes. I certainly am not locked in concrete with this proposal and only seek the best possible legislation.

I attach a section-by-section analysis of the bill Chairman BROWN and I are introducing today.

The section-by-section analysis follows:

SECTION-BY-SECTION ANALYSIS OF THE NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY AMENDMENTS OF 1981

Preamble: To increase by five years the period during which activities may be carried out under the Agricultural Research, Extension and Teaching Policy Act of 1977, to expand the scope of activities authorized in such Act, and for other purposes.

Section 2: Section 1403 of the Act of 1977—Purposes are amended to more clearly define the partnership arrangement existing between the Federal Government and the States as consummated in legislation and cooperative agreements in the food and agricultural research, extension and teaching systems to meet changes in: agricultural productivity; development of new food, fiber and energy sources; agricultural energy use and production; national resources; promotion of health and welfare of the American people and contribution to the family farm system; human nutrition and international food and agriculture. These purposes are to be improved by improving and strengthening the Federal-State partnership; reducing unnecessary and pernicious regulations; and improving the cooperation among all who are involved in the food and agricultural sciences.

Section 3: Section 1404, Definitions, of the Act of 1977 is amended to more clearly define the terms: agricultural research; food and agricultural sciences; cooperating forestry schools; teaching; and state cooperative institutions and state cooperative agents as they relate to the various basic Acts covered in this bill.

Section 4: Section 1405(6) reports (as a part of USDA's annual budget submissions) by the Secretary of Agriculture to Congressional Committees to add "proposals" by the USERS Advisory Board.

Section 5: Amends Section 1407(a) of the Act by extending the term of the Joint Council on Food and Agricultural Sciences from five to ten years.

Amends Section 1407(b) by: fixing the composition of the Joint Council to not fewer than twenty-five members from organizations who conduct or assist in conducting research, extension and teaching in the food and agricultural and forestry sciences from the land grant colleges and universities, those other colleges and universities having a demonstrable capacity to conduct such programs, USDA agencies having significant responsibilities and other Federal determined by the Secretary to be appropriate. Members to the Joint Council are appointed by the Secretary for three years which are staggered. To ensure that regional differences are considered at least one-half of the membership of the Joint Council shall consist of distinguished persons engaged in agricultural research, extension and teaching programs at land-grant colleges and universities and State Agricultural Experiment Stations. Additionally, the Secretary shall appoint two members from among distinguished representatives of other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension and teaching.

Amends Section 1407(d)(1) of the Act to redirect the primary purpose of the Joint Council from that of coordinating programs to that of bringing about more effective research, extension and teaching in the food and agricultural sciences by improving planning and coordination and related budget development and program management of these processes.

Amends Section 1407(d)(2)(E) which allowed the establishment of a national and regional planning system and require that such planning and coordination systems utilize existing state cooperative institutions.

Amends Section 1407(d)(2)(G) to require the Joint Council to submit its reports to the Secretary on June 30 instead of December 31, and also changing the nature of the report to more clearly recommend priorities, suggested areas of responsibilities and specifying financial levels for such research, extension and teaching programs.

Amends Section 1407 to preclude the Joint Council from having to comply with the Federal Advisory Committee Act and to require that the Joint Council to meet at least once every three months, one meeting of which shall be a joint meeting with the USERS Advisory Board.

Section 6: Amends Section 1408(a) and extends the authority of the National Agricultural Research and Extension USERS Advisory Board from five to ten years.

Section 1408(b) is amended to increase the board's membership from twenty-one to twenty-five, allowing an additional four producer members from various geographic areas to be appointed to the Board; and it allows all terms of Board Members to be staggered.

Section 1408(f)(2) changes the Board's recommendation to the Secretary from "October 31" to "July 1," and its report to Congress from "March 1" to "February 20."

Section 7: Establishes a whole new Section 1409 in the Act on the State-Federal partnership and coordination. This new section enumerates the primary acts that effect this arrangement; removes contracts, grants, and cooperative agreements made by the Secretary to further Federal/State partnership from Section 3648 or the Revised Statutes (31 U.S.C. 529) and Sections 3709 of the Revised Statutes (41 U.S.C. 5); allows the Secretary to establish human nutrition centers at State cooperative institutions having a demonstrable capacity to carry out human nutrition and education; allows the Secretary to begin new initiatives in home economics and related disciplines; better utilize the land grant colleges and universities and other colleges and universities to develop linkages among these institutions, the Federal Government, International Research Centers to serve developed and underdeveloped countries to improve food and agricultural progress world-wide; and to provide a reimbursable system for such technical assistance to such American institutions carrying out these activities.

Section 8: Amends Section 1410 of the Act to require the Secretary to submit his report earlier to the President and Congress on "January 1" instead of "February 1."

Section 9: Amends Section 1412(a) to require the executive director and the staff of the Joint Council and the USERS Board to be more responsive to the Council and the Board and less responsive to USDA.

Section 10: Amends Section 1413 to state that the President shall appoint an Assistant Secretary of Agriculture to carry out the agricultural research, extension and teaching responsibilities of this Act.

Section 11: Amends section 2(b) of the Act of August 4, 1965 (79 Stat. 431; 7 U.S.C. 450i) to more clearly establish the meaning of high priority research and the specific fields of agriculture set forth in Committee reports and to extend the same authorization targets for Competitive Research Grants from fiscal year 1983 through fiscal year 1987 that were in the previous years (the effect of this action is to stretch the program from five to ten years).

Amends section 1414(c) by including the term "research foundations established by land grant colleges."

Amends section 1414(d) by changing the emphasis of facilities grants to "purchase equipment, supplies and land" to that of grants to renovate, refurbish or retrofit existing buildings and spaces, and further to include cooperative forestry schools and 1890 colleges in these facilities grants.

Section 12: Amends section 1416 of the Act (which amends section 4(a) of the Research Facilities Act of July 22, 1963 by extending its targeted authorizations for another five years (from fiscal year 1983 to fiscal year 1987).

Section 13: Amends section 1417(a) by: Requires the Secretary of Agriculture to promote and develop a higher education program in the food and agricultural sciences and it also requires the Secretary of Education to relinquish the remainder of his responsibilities under the Bankhead-Jones Act not transferred in the 1977 Farm Bill to the Secretary of Agriculture.

Amends section 1417(b) to revise the currently prescribed program of predoctoral and post-doctoral programs and it retargets authorizations for these programs by extending the program for five more years until fiscal year 1987.

Section 14: Amends and transfers the Morrill-Nelson Act Agricultural Teaching funds and the accompanying functions from the Secretary of Education to the Secretary of Agriculture.

Section 15: Amends further the Act of August 30, 1890 (26 Stat. 417; 7 U.S.C. 322) to remove the broad teaching requirement and require only teaching in the food and agricultural sciences.

Section 16: Extends Section 1419, allowing research grants in the production and marketing of Gasahol and industrial hydrocarbons from agricultural products for another five years and increases the amount of funds an eligible institution can receive over the full ten-year period from $3 million to $5 million.

Section 17: Amends section 1434(a) by increasing the authorization from $15 million annually to $35 million. Section 1434(b) is amended to establish a more rational allocation of these funds.

Section 18: Amends Section 1444(a) beginning with the fiscal year ending September 30, 1983, by increasing the amount made available for extension at the 1890 land grant institutions from four to seven percent of the amount previously made available under the Smith-Lever Act.

Amends Section 1444(e) and (d) to require that extension activities and plans at the 1890 institutions be more closely coordinated with the State Extension system.

Section 19: Amends section 1463(a) targeting authorizations for all agricultural research, except those contained in subtitle H and sections 1416, 1417, 1419, and 1420 and 1414 and the Hatch Act of March 2, 1887 by increasing the targeting each fiscal year from fiscal year 1983 to fiscal year 1987, by $20 million annually.

Amends Section 1463(b) for Agricultural research at the state Agricultural experiment stations under the Hatch Act of March 2, 1887, by extending and increasing the annual targeted authorization by $25 million from fiscal year 1983 to 1987.

Further, Section 1463 is amended by setting forth the following: "Of the total funds appropriated to the Secretary in any fiscal year to conduct agricultural research at Federal, State, or local levels of government or to make grants to institutions or individuals to conduct research; not less than 25 per centum of such total funds appropriated shall be appropriated for agricultural research at State agricultural experiment stations under the Hatch Act."

Section 20: Section 1464. Extends the targeting authorizations for extension programs by increasing the targeting $20 million annually for the period fiscal year 1983 to fiscal year 1987.

Section 21: Section 1471 is added to restrict the treatment of indirect costs of funds made available in the Federal-State partnership arrangements. Effected are the Hatch Act, the McIntire-Stennis Act, Appropriations for veterinary research on animal Health and Disease (sections 1433 and 1434 of the Act), and subsections (e)(2) and subsection (d) section 2 of the Act of August 4, 1965 (7 U.S.C. 450i).

Section 22: Section 1475 sets up a new Subtitle L—"AQUACULTURE," setting a new Aquacultural Research and Extension program to include grants to land grant colleges and universities, state agricultural experiment stations and colleges, universities and Federal laboratories having a demonstrable capacity to conduct aquacultural research, to encourage and improve productivity in aquaculture. The subtitle establishes an Aquacultural Advisory Board and authorizes the Secretary of Agriculture $7,500,000 annually to develop these programs.

Section 23: Amends the McIntire-Stennis Act of 1962 to bring it under this Title to administer Cooperative State Forestry programs to include authorization of a Forestry Council of not fewer than 16 members to advise the Secretary in administering this program.

Section 24: Amends Section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c), Customs duties on Agricultural products, to make these funds available to support agricultural research, extension and teaching programs.

Section 25: Amends the Federal Property and Administrative Services Act to allow state officials and institutions involved in Federal/State research, extension and teaching programs rights to excess Federal equipment.

Section 26: These amendments shall take effect on October 1, 1981.●

SISTERS OF ST. JOHN THE BAPTIST

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. RODINO. Mr. Speaker, this Sunday, March 22, in my home city of Newark the parishioners of St. Lucy's Church will gather at Mass to celebrate the 75th anniversary of the Sisters of St. John the Baptist in the United States.

The first Sisters of St. John the Baptist in America arrived in Newark from Italy in 1906. They came with several orphan girls, and the parish of St. Lucy's Church welcomed them. Since then, the Sisters have tended to the needs of the Newark community with saint-like dedication. I am a lifetime member of St. Lucy's parish, and I can remember as a boy benefiting from the Sisters' personal acts of kindness.

For over three generations, the Sisters have provided friendship to the lonely and hope to the despondent. They have sheltered the homeless, taught in our schools, nursed our sick, comforted those in prison, helped the elderly and the handicapped, and assisted immigrants in adapting to American life.

The Sisters run St. Lucy's Grammar School and St. John's Girls Residence in Newark. They are among 160 Sisters serving in 16 communities in America.

The history of the Sisters of St. John the Baptist dates back to 1878 in the small town of Angri in southern Italy where a group of religious women and a local priest pooled their resources to buy a horse stable and converted it into an orphanage. The Sisters of St. John the Baptist have

continued to support and operate the orphanage ever since. Right now, the orphanage is providing vital help to children left homeless by the recent earthquake.

This constant service to God and mankind is exemplified by the Sisters at St. Lucy's parish in Newark. Their record of dedication was recognized in 1978 when a lifetime member of St. Lucy's parish, Sister Alberta Stango, was chosen Mother General for the entire order of the Sisters of St. John the Baptist. Sister Alberta Stango is now stationed in Rome, but the other Sisters who have meant so much to the Newark community continue to serve at St. Lucy's Church. Sister Vincent is 80 years old and has been at St. Lucy's for 60 years; Sister Clement has spent over 40 years helping children at St. Lucy's; and Sister Francis Marie, who is principal at St. Lucy's School, is carrying on this tradition of caring and commitment to young people.

On Sunday I will join the other parishioners of St. Lucy's to pay tribute to this tradition. Father Joseph Granato, pastor of St. Lucy's, will concelebrate Sunday's Mass with Bishop Pechillo, vicar for Hudson County who is representing Archbishop Gerety; Bishop Marconi, vicar for Union County; Bishop Pernicone, retired auxiliary bishop to Cardinal Cooke in New York; and Father Joseph Nativo of St. Lucy's Church.

It will be a time to give thanks for all that the Sisters of St. John the Baptist have meant to the families of Newark. I join with the countless others who have been blessed by their kindness, and I am thankful for their continued role in our community.●

TRIBUTE TO TOM IORIO

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. FASCELL. Mr. Speaker, I am grateful to our colleague JOE ADDABBO for providing us with the opportunity to honor Tom Iorio. The loss of this good friend and devoted servant of the Congress saddens us all. I have difficulty imagining the House without him. It will take time for all of us to accustom ourselves to the lack of Tom's daily presence, his willing ear, his ready help. He eased the way for generations of Members through his insights into how and why the system works. The political sensitivity he acquired and shared so readily was outstanding.

But besides the admiration I had for his ability to facilitate the legislative process, I liked him as a person. Tom Iorio was a man you had to like. He was a proud person, proud of his heritage, his family, the job he did. He made others proud, too. We were proud to know him and proud to share the work we love here with such a good, kind man.

My heart goes out to Tom's family. I hope they will find consolation in the respect with which we will always remember him here.●

CHIEF JUSTICE BURGER SPEAKS OUT ON CRIME

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROUSSELOT. Mr. Speaker, while the administration and the Congress prepare to come to terms with the inflation which has hampered our country's economic performance, we were reminded of another type of inflation. In his annual state of the judiciary address to the American Bar Association, Chief Justice Warren E. Burger spoke of the "double-digit crime inflation," currently affecting more than a quarter of all households at least once a year.

The Chief Justice pointed out that it is our weakened deterrent effect against crime, diminished in our "search for perfect justice," which has been a major contributing factor to the worsening crime rate. Mr. Burger noted that presently our judicial system leaves an advantage to the accused, in an almost endless appeals process, while providing few protections for the victims.

Several valuable observations were made on the crime epidemic sweeping the Nation from the perspective of the highest justice in the land. It is for this reason that I share excerpts of Chief Justice Burger's speech with my colleagues in the U.S. House of Representatives.

The excerpts follow:

ANNUAL REPORT TO THE AMERICAN BAR ASSOCIATION BY THE CHIEF JUSTICE OF THE UNITED STATES

Today, for the twelfth time, you allow me this forum to lay before you problems concerning the administration of justice as I see them from my chair.

Today I will focus on a single subject, although one of large content. Some might label it "Crime and Punishment." Crime and the fear of crime have permeated the fabric of American life. Damaging the poor and minorities even more than the affluent. A recent poll indicates forty-six percent of women and forty-eight percent of Negroes are "significantly frightened" by pervasive crime in America.

When I speak of "Crime and Punishment" I embrace the entire spectrum beginning with an individual's first contact with police authority through the stages of arrest, investigation, adjudication and corrective punishment. At every stage the system cries out for change, and I do not exclude the adjudicatory stage. At each step in this process a primary goal, for both the individual and society, is protection and security. This theme runs throughout all history.

Today, the proud American boast that we are the most civilized, most prosperous, most peace-loving people leaves a bitter taste. We have prospered. True we are, and have been, peace-loving in our relations with other nations. Like it or not, today we are approaching the status of an impotent society—whose capability of maintaining elementary security on the streets, in schools, and for the homes of our people is in doubt.

Possibly some of this problem of behavior stems from the fact that we have virtually eliminated from public schools and higher education any effort to teach values of integrity, truth, personal accountability, respect for others' rights.

Perhaps this is not irrelevant to what gives most Americans such deep concern in terms of behavior in America today.

I have pondered long before deciding to concentrate on this sensitive subject and I begin by reminding ourselves that under the enlightened constitution and bill of rights, whose bicentennials we will soon celebrate, we have established a system of criminal justice that provides more protection, more safeguards, more guarantees for those accused of crime than any other nation in all history. The protective armor we give to each individual when the state brings a charge is indeed great. This protection was instituted—and it has expanded steadily for nearly two centuries—because of our profound fear of the power of kings and states developed by an elite class to protect the status quo—their status above all else—and it was done at the expense of the great masses of ordinary people.

Two hundred years ago we changed that—drastically. Some now question whether the changes have produced a dangerous imbalance.

I put to you this question: Is a society redeemed if it provides massive safeguards for accused persons including pretrial freedom for most crimes, defense lawyers at public expense, trials, and appeals, re-trials and more appeals—almost without end—and yet fails to provide elementary protection for its decent, law-abiding citizens? I ask you to ponder this question.

Time does not allow—nor does my case require—me to burden you with masses of detailed statistics—I assure you, the statistics are not merely grim, they are frightening. Let me begin near home: Washington, D.C., the capital of our enlightened country, in 1980 had more criminal homicides than Sweden and Denmark combined with an aggregate population of over twelve million as against 650,000 for Washington, D.C. and Washington is not unique. From New York City, to Los Angeles, to Miami the story on increase in violent crime from 1979 to 1980 is much the same. New York City with the same population as Sweden has 20 times as many homicides. The United States has one hundred times the rate of burglary of Japan. Overall violent crime increased from 1979 to 1980, continuing a double-digit rate. More than one quarter of all the households in this country are victimized by some kind of criminal activity at least once each year.

The New York Times recently reported that one documented study estimated that the chances of any person arrested for a felony in New York City of being punished in any way—apart from the arrest record—were 108 to 1. And it is clear that thousands of felonies go unreported in that city as in all others.

For at least ten years many of our national leaders and those of other countries, have spoken of international terrorism, but our rate or casual, day-by-day terrorism is almost any large city exceeds the casualties of all the reported "international terrorists" in any given year.

Why do we show such indignation over alien terrorists and such tolerance for the domestic variety?

Are we not hostages within the borders of our own self-styled enlightened, civilized country? Accurate figures on the cost of home burglar alarms, of three locks on each door—and sadly, of handgun sales for householders—are not available but they run into hundreds of millions of dollars. All this in a "civilized", "enlightened" society.

I have spoken now of crime and the criminal but for each crime there are victims. The criminals often seem to engage the attention of the mass media more than the victims—unless the victim happens to be a celebrity.

What people want is that crime and criminals be brought under control so that we can be safe on the streets and in our homes and for our children to be safe in schools and at play.

It needs no more recital of the frightening facts and statistics to focus attention on the problem—a problem easier to define than to correct. We talk of having criminals make restitution or have the state compensate the victims. The first is unrealistic, the second is unlikely. Neither meets the central problem. Nothing will bring about swift changes in the terror that stalks our streets and endangers our homes, but I will make a few suggestions.

To do this I must go back over some history which may help explain our dilemma.

For a quarter of a century I regularly spent my vacations visiting courts and prisons in other countries, chiefly western Europe. My mentors in this educational process were two of the outstanding penologists of our time: The late James V. Bennett, Director of the United States Bureau of Prisons and the late Torsten Ericksson, his counterpart in Sweden, where crime rates were then low, poverty was nonexistent, correctional systems enlightened and humane. Each was a vigorous advocate of using prisons as educational and vocational training.

I shared and still share with them the belief that poverty and unemployment are reflected in crime rates—chiefly crimes against property. But if poverty were the principal cause of crime as was the easy explanation given for so many years, crime would have been almost nonexistent in affluent Sweden and very high in Spain and Portugal. But the hard facts simply did not and do not support the easy claims that poverty is the controlling factor; it is just one factor. The crime rate today exceeds our crime rate during the Great Depression.

We must not be misled by cliches and slogans that if we but abolish poverty crime will also disappear. A far greater factor is the deterrent effect of swift and certain consequences: swift arrest, prompt trial, certain penalty, and—at some point—finality of judgment.

To speak of crime in America and not mention the drugs and drug-related crime would be an oversight of large dimension. The destruction of lives by drugs is more frightening than all the homicides we suffer. The victims are not just the young who become addicts. Their families and, in turn, their victims and all of society suffer over a lifetime. I am not wise enough to venture a solution. Until we effectively seal our many thousands of miles of borders—which would require five or ten times the present border guard personnel and vastly enlarge the internal drug enforcement staffs—there is little else we can do. Our fourth and fifth amendments give the same broad protection to drug pushers as they give to you and me and judges are oath bound to apply those commands.

It is clear that there is a startling amount of crime committed by persons on release awaiting trial, on parole, and on probation release. It is not uncommon for an accused finally to be brought to trial with two, three or more charges pending. Overburdened prosecutors and courts tend to drop other pending charges when one conviction is obtained. Should we be surprised if the word gets around in the "criminal community" that you can commit two or three crimes for the price of only one?

Deterrence is the primary core of any response to the reign of terror in American cities. Deterrence means speedly action by society, but that process runs up against the reality that many large cities have either reduced their police forces or failed to keep them in balance with double-digit crime inflation.

A first step to achieve deterrence is to have larger forces of better trained officers. Thanks to the FBI academy we have the pattern for such training.

A second step is to re-examine statutes on pre-trial release at every level along the lines suggested. This requires that there be a sufficient number of investigators, prosecutors and defenders—and judges—to bring defendants to trial swiftly. Any study of the statistics will reveal that "bail crime" reflects a great hole in the fabric of speedy law enforcement and the consequent deterrence.

To change this melancholy picture will call for spending more money than we have ever before devoted to law enforcement, and even this will be for naught if we do not reexamine our judicial process and philosophy with respect to finality of judgments. The search for perfect justice has led us on a course found nowhere else in the world. A true miscarriage of justice, whether 20- 30- or 40-years-old, should always be open to review, but the judicial process becomes a mockery of justice if it is forever open to appeals and retrials for errors in the arrest, the search, or the trial.

At this point judicial discretion and judicial restraint require me to stop and simply to repeat that governments were instituted and exist chiefly to protect people. If governments fail in this basic duty they are not excused or redeemed by showing that they have established the most perfect systems to protect the claims of defendants in criminal proceedings. A government that fails to protect both the rights of accused persons and also all other people has failed in its mission. I leave it to you whether the balance has been fairly struck.

Let me place this in perspective: (1) The bail reform statutes of recent years, especially as to non-violent crimes, were desirable and overdue; (2) the provisions for a lawyer for every defendant were desirable and overdue; (3) statutes to insure speedy trials were desirable if the same legislation provides the means to accomplish the objective.

Many enlightened countries succeed in holding criminal trials within four to eight weeks after arrest. First offenders are generally placed on probation, free to return to a gainful occupation under close supervision. I hardly need remind this audience that our criminal process often goes on 2, 3, 4 or more years before the accused runs out all the options. Even after sentence and confinement, the warfare continues with endless streams of petitions for writs, suits against parole boards, wardens and judges.

So we see a paradox—even while we struggle toward correction, education and rehabilitation, our system encourages prisoners to continue warfare with society. The result is that whatever may have been the defendant's hostility toward the police, the witnesses, the prosecutor, the judge and jurors—and the public defender who failed to win his case—those hostilities are kept alive. How much chance do you think there is of changing or rehabilitating a person who is encouraged to keep up years of constant warfare with society?

The dismal failure of our system to stem the flood of crime repeaters is reflected in part in the massive number of those who go in and out of prisons. In a nation that has been thought to be the world leader in so many areas of human activity our system of justice—not simply the prisons—produces the world's highest rate of "recall" for those who are processed through it. How long can we tolerate this rate of recall and the devastation it produces?

What I suggest now—and this association with its hundreds of State and local affiliates can be a powerful force—is to "survey the wreckage" and begin a damage control program. It will be long; it will be painful; it will be costly—but less costly than the billions in dollars and thousands of blighted lives now hostage to crime. It is as much a part of our national defense as the Pentagon budget.

Sometimes we speak glibly of a "war on crime." A war is being waged by a small segment of society against the whole of society. It will not be won simply by harsher sentences; not by harsh mandatory minimum sentence statutes; not by abandoning the historic guarantees of the Bill of Rights. And perhaps, above all, it will not be accomplished by roving, self-appointed armed citizen police patrols. At age 200, this country has outgrown the idea of private law and vigilantes. Volunteer community watchman services are quite another matter.

Now let me present the ultimate paradox: After society has spent years and often a modest fortune to put a single person behind bars, we become bored. The media loses interest and the individual is forgotten. Our humanitarian concern evaporates. In all but a minority of the States we confine the person in an overcrowded, understaffed institution with little or no library facilities, little if any educational program or vocational training. I have visited American prisons built more than 100 years ago for 800 prisoners, but with two thousand crowded today inside their ancient walls.

Should you look at the records you will find that the 300,000 persons now confined in penal institutions are heavily weighted with offenders under age thirty. A majority of them cannot meet minimum standards of reading, writing, and arithmetic. Plainly this goes back to our school systems. A sample of this was reflected in a study of pupils in a large city where one-half of those completing the third grade could not meet minimum reading standards. This should not surprise us, for today we find some high school graduates who cannot

read or write well enough to hold simple jobs.

Here are a few steps which ought to be considered immediately:

(1) Restore to all bail release laws the crucial element of future dangerousness based on a combination of the particular crime and past record, to deter crime-while-on-bail;

(2) Provide for trial within weeks of arrest, except for extraordinary cause shown;

(3) Priority for review on Appeal within eight weeks of final judgement;

(4) Following appellate review, confine all subsequent judicial review to claims of miscarriage of justice; and finally:

A. We must accept the reality that to confine offenders behind walls without trying to change them is an expensive folly with short term benefits—a "winning of battles while losing the war";

B. Reexamining treatment of first nonviolent offenders—intensive supervision and counselling and swift revocation if probation terms are violated;

C. A broad scale physical rehabilitation of all prisons (perhaps on a federally-funded matching grant basis) to provide a decent setting for educational and vocational programs;

D. Make all vocational and educational programs mandatory with credit against the sentence for educational progress—literally a program to "learn the way out of prison," so that no prisoner leaves without at least being able to read, write and do basic arithmetic;

E. Generous family visitation in decent surroundings to maintain family ties, with rigid security to exclude drugs or weapons;

F. Counselling services after release paralleling the "after-care" services in Sweden, Holland, Denmark. All this should be aimed at developing respect for self, respect for others, accountability for conduct, appreciation of the value of work, of thrift, of family.

G. Encourage religious groups to give counsel on ethical behavior and occupational adjustment.

The two men I spoke of as my mentors beginning twenty-five years ago—James V. Bennett and Torsten Eriksson of Sweden, were sadly disappointed at the end of their careers, on their great hopes for rehabilitation of offenders. Have we reached the stage where we must now accept the harsh truth that there may be some incorrigible human beings? Are there people who cannot be changed except by God's own mercy to that one person? We cannot yet be certain and in our own interest—in the interest of billions in dollars lost to crime and blighted if not destroyed lives—we must try to deter and try to cure.

This will be costly in the short run and the short run will not be brief. This illness our society suffers has been generations in developing, but we should begin at once to divert the next generation from the dismal paths of the past and try to make homes and schools and streets safe for all.●

THE EFFECT OF BUDGETARY RESTRAINT ON AMERICA'S EDUCATION RESOURCES

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. LEACH of Iowa. Mr. Speaker, last week, Dr. William G. Bowen, president of Princeton University, delivered a thought-provoking address about the effects of proposed budgetary restraint on basic research and student assistance. I am taking the liberty to insert below the full text of President Bowen's remarks, but would like to emphasize two points: First, that basic research is a resource of vital importance to our national defense, as the experience of World War II dramatized so vividly; second, that the limiting of middle class access to borrowed capital can lead to a polarization of education where only the very rich and the very poor are provided means to send their sons and daughters to a full array of colleges and universities.

An overwhelming consensus has emerged on the need to restrain the growth of Federal spending, but selective judgment must be applied to budgetary decisionmaking to insure that the development of human resources are not eclipsed by the placement of a disproportionate emphasis on the production of military hardware and the rebuilding of corporate plants and equipment.

REMARKS BY WILLIAM G. BOWEN, PRESIDENT, PRINCETON UNIVERSITY

I am very pleased to be here today and to have this opportunity to join with so many of our alumni in honoring those Princetonians who serve this nation so well as members of the Congress.

These are interesting—challenging—times for all of us, and certainly for those with direct and immediate responsibility for determining national priorities.

We meet today—through no prior arrangement on my part, needless to say—in the immediate aftermath of an announcement of the most sweeping budget-cutting intentions ever placed before the Congress. Some of the issues raised are so important for higher education, for the purposes Princeton serves, that I hope you will allow me to comment on two areas of particular concern: research and student aid. It has not been my practice to use these occasions to discuss pending legislative issues, but I depart from past practice today in the hope of encouraging all of us to think together about longer-term objectives held in common by universities, the government, and the society.

Reducing the rate of inflation and improving the overall performance of the economy are plainly important goals for the universities as well as for the society at large. Indeed, given their "handicraft" nature (with the emphasis at Princeton, for example, on the senior thesis, precepts, and supervised independent work at graduate and undergraduate levels), universities have been especially vulnerable to the inflationary pressures of recent years; thus, they have a direct institutional stake in the success of efforts to reduce the rate at which prices rise. Of course, there will continue to be lively debate among economists as to the right set of fiscal and monetary policies. (A distinguished economist, now himself out of favor, once said: "Only one man in a thousand understands the currency question, and I meet him every day.") There is, nonetheless, widespread agreement that reductions in Federal expenditures can help, and if a major effort is to be made to reduce spending, it seems clear to me that there should be no sacred cows: programs affecting every sector, including higher education, should be scrutinized carefully. It will not do to say: "Leave us alone; cut everyone but us."

As many of you know, we have worked hard, and successfully, at Princeton to balance our own budget, and I know from our experience both how painful it is to achieve reductions and how important it is to be prepared to cut selectively.

In Washington, as at Princeton, it is necessary to make the most careful choices in deciding which programs to terminate or cut back. It seems to me essential that immediate pressures for instant savings not lead inadvertently to the sacrifice of long-term goals critical to both the material and spiritual health of our society.

In the area of research, for example, it is important to understand the integral role that science and technology play in increasing productivity and the extent to which so many questions facing our society have scientific dimensions. For these reasons, among others, there is much to be said for having an eminently qualified science adviser in the White House. We should also remind ourselves of the contributions that can be made by scholars and advanced students in the humanities, the arts, and the social sciences. While economic circumstances may well require reductions in federal spending in these areas (and I believe that there are savings to be achieved), the ways in which this is done will matter greatly.

Within science and engineering, and in the spirit of being clear about priorities and being willing to make choices, let me stress the importance of distinguishing between basic and applied research—and then recognizing the more fundamental role of government in supporting the former. I believe it makes good sense to rely heavily on private companies to finance research at the applied end of the spectrum. In my view, lagging productivity has been—is—a major part of this country's economic problem; accordingly, new ideas and the capital expenditures needed to translate ideas into improving living standards should be encouraged within the private sector.

Of course, applied research grows from the seeds planted by basic research. And individual companies and industries, however generously motivated, cannot be expected to pay fully for research which by its nature can lead in unpredictable directions and which, if successful, almost certainly will bestow benefits so widely that no one firm or group of firms can capture them entirely for private uses. This simple rationale—the presence of what the economist calls "spillover benefits"—means that profit-making enterprises cannot be expected to replace government as sources of support for most research at the "basic" end of the spectrum. Our future welfare depends critically on the ever-changing base of knowledge created, as

it were, for its own sake, and here government must continue to be an important partner in the national effort.

Unfortunately, the environment for basic research in universities has been weakened by inadequate support for, among other things, facilities and equipment. Thus, I am particularly distressed by one of the smallest "savings" included in the most recent budget proposals—namely deferral of a $75 million program within the National Science Foundation for the upgrading of major research laboratories. These laboratories have fallen far behind the state-of-the-art, and one recent study showed that equipment in university laboratories is now, on average, twice as old as equipment in industrial laboratories. I do not believe that failure to spend relatively modest amounts of money here is a real "saving" at all: on the contrary, I think the result will be futher damage to research and training efforts vital to long-term increases in productivity.

One of the great benefits of conducting research in the university environment is that advanced students can simultaneously receive training and contribute their own fresh perspectives to the research enterprise. For almost 30 years, a major expression of this nation's commitment to future scientific leadership has been the merit-based, portable fellowship program of the National Science Foundation that has attracted—and then supported—some of the best young scientific talent in the world. This does not seem to me to be the place, among all places within the educational sector, in which it is wise to seek dramatic economies; thus, I hope the Congress will think hard about the implications of terminating this most successful program before acting on the request of the Administration that no new NSF Fellowships be awarded.

A less obvious, but perhaps significant, observation is that the community of basic research scholars constitutes a vital national resource for purposes of defense, as the experience of World War II dramatized so vividly. With the memory of radar and other war-time contributions fresh in mind, much support of basic research in the post-war period was clearly meant to conserve and strengthen this national resource. In current discussions of defense, these considerations seem to have faded somewhat; they should not. Nor can we afford, as a nation, to neglect teaching and scholarship in such fields as Near Eastern and East Asian studies.

Much as the United States has benefited historically from an educational system unmatched anywhere, our future will depend even more on creativity and trained intelligence. The fields of communications, electronics, and computers offer one particularly dramatic illustration of this point, as Dr. William O. Baker, '39, a Trustee of Princeton and former President of Bell Laboratories, testified before a Congressional committee:

"Talent is the basis for our whole national treasure here. Although materials are vital for the structure of some of the machines, in general the work is characterized by its complete dependence on human talent. There are no oil wells, there are no grainfields, and there are no mineral resources in this field. It is a creation of human imagination and human vision."

If basic research represents a long-term investment in new ideas, student aid is a long-term investment in the human capital of the country—in the individuals who in their turn will provide the leadership, and the citizenship, on which the country must always depend. Current discussion focuses, understandably, on specific program elements. Each component of financial aid should be seen, however, as part of an integrated whole that has been built carefully, with bi-partisan support in successive administrations and successive Congresses, to achieve what are truly national objectives. As we seek to address weaknesses in elements of this financial aid structure, to set sharper priorities, and to correct abuses, we must remember why these programs of student assistance came into being in the first place.

The present combination of Pell Grants (named appropriately in honor of our distinguished alumnus who has done so much to build these programs), Supplementary Grants (which aid needy students at more expensive institutions), work-study programs, federal loan programs, State scholarship programs, and substantial programs of financial aid provided by individual colleges and universities, has been designed to assist students at various income levels to obtain access to educational opportunities that otherwise would be beyond their reach financially—to make it feasible for students from all economic backgrounds to attend the full array of private and public colleges and universities, including the more expensive ones. One result has been the achievement of a diversity of student backgrounds and perspectives that has been extremely valuable educationally as well as consistent with basic principles of equal opportunity—principles that must be given expression within the educational sector if they are to have meaning elsewhere in American society.

It would be short-sighted in the extreme to waste our most precious resources by in effect denying educational opportunity to talented young people who ask only the chance to develop their full potential. It would be contrary to the national interest to begin re-segregating major universities on the basis of financial means. And it would be very unwise, in my judgment, to disturb a rather careful balance that has been created between the complementary needs of the private and public sectors—especially as we move through a 15-year period when demographic trends are almost certain to create serious new stresses within all of higher education.

Fortunately, there seems to be broad agreement on these general propositions. I hope we shall have the wisdom—and the will—to translate them into sound legislative and administration decisions.

With regard to specific programs, let me begin by noting one area in which I believe savings can be achieved, consistent with basic principles of equity. Consideration should be given, in my view, to elimination of the educational benefits provided to college students under Social Security. These benefits are provided irrespective of financial need, and thus in some cases are provided to students otherwise able to meet their college costs. In many other cases, of course, these benefits are meeting real needs, but those needs can continue to be met through reaffirmation and extension of the government's commitment to need-based grant, loan, and work-study programs.

On my own scale of priorities, some of the changes in the Pell Grants suggested thus far, such as requiring a self-help contribution and looking afresh at the formula for determining the parental contribution, also seem less damaging to long-term objectives than other kinds of cut-backs one might envision in this extremely valuable program. It should be recognized, however, that if the full range of proposals were adopted, some 600,000 currently eligible students could be removed from the program next year. Of even more immediate concern is the fact that a substantial supplemental appropriation will be necessary this year if the maximum grant under this program is not to decline precipitously from its intended level of $1,800 to something in the range of $1,200.

The loan programs, and the changes proposed in them, raise more complex questions that cannot be discussed in full detail in the time we have together today. But I do want to suggest some priorities and principles for consideration.

The Guaranteed Student Loan program (GSL) is very important. If we are to expect each student to contribute to his or her own educational costs, it is essential that well conceived and well administered loan programs be available.

There is a compelling reason for governmental involvement in this particular type of loan program, in contrast with many other situations in which the government guarantees loans for commodities or business purposes of one kind or another. Put simply, when students seek loans for educational purposes, they have no collateral to offer; it is their human capital that is being augmented, but we do not, for excellent reasons, allow individuals to sell themselves or enter indentured servant status. This basic characteristic, so fundamental that it is often overlooked, explains why private capital markets cannot be expected to provide the requisite loan funds for students.

It does seem justifiable, however, to have different terms for different groups of borrowers. On the one hand, it seems proper—indeed important, from the standpoint of assisting needy students to borrow—that students with demonstrated need who simply must incur debt to meet educational costs not be asked to pay interest or accumulate interest obligations while in school. (To illustrate the importance of this provision, without the in-school subsidy the total cost of a Princeton undergraduate education would be increased by some $2,700 for a needy student borrowing under the GSL program, and this would be on top of an already substantial loan burden and an obligation to contribute both term-time and summer earnings. The impact on graduate students would be even greater.)

But considerable savings could be achieved if the in-school subsidy were restricted to need and eliminated for others who borrow to solve problems of liquidity or to extend payments into their working lifetimes. This latter group of students could be called upon to assume responsibility for interest charges incurred while in college. And it may well be right to allow interest charges for this group of borrowers, as well as for parents, to be set at some reasonable approximation of the market rate. I agree that it is hard to justify allowing individuals with adequate incomes to borrow at artificially low rates—especially when money markets make it possible for some to reinvest the loan proceeds so as to profit personally. There is no way to know how many students are in fact abusing the current program; certainly in our experience most students borrow reluctantly and for entirely legitimate purposes. In any event, allowing interest rates for borrowers above the strictly defined need level to reflect the cost of money more accurately would remove the

possibility of abuse and also reduce considerably the cost of the program.

It is essential, however, that access to capital, under nonsubsidized terms, be maintained for students and parents (including those who have incomes well above normal notions of "need") who simply must borrow if they are to spread the costs of educational investments over reasonable periods of time. I know students at Princeton whose families simply could not meet expected family contributions without access to Guaranteed Student Loan programs, including some who have one or two brothers or sisters simultaneously going to college. It is difficult for me to believe that we want to discourage this form of investment.

I have been asked repeatedly if the Princeton student body will not become polarized between the very rich and those whose incomes are low enough to qualify for financial aid. So far, this has not happened. Students from families at all income levels are well represented at Princeton, but this has been possible—and will continue to be possible—only through access to loan programs that allow middle income families to invest in the education of their children—and that allow those students whose parents cannot or will not help them (for whatever reasons) to invest in themselves.

Why do those of us at Princeton care so much about all of this? Because of our conviction that the education we offer, and the research done by our faculty, make a difference—a most significant difference—to the life of this country. As Marvin Bressler, Professor of Sociology at Princeton has observed, Princeton has always believed that education is both a private treasure and a public resource. This year, eight seniors at Princeton won either a Rhodes or a Marshall Scholarship to study in England—out of a total of only 62 such awards nationwide. All eight have been receiving scholarships or financial aid in some form at Princeton—and I have no doubt that all eight will repay those investments many times over. It is up to all of us, both individually and through our government, to see that future generations of young people have the same opportunities. And it is up to us, too, to see that the universities in this country, including Princeton, continue to be the home of ideas—that Val Fitch, in our Physics Department, who won the Nobel Prize this year, will be but one more in a continuing stream of faculty whose insights and vision deepen our understanding of the world and our place within it.

To the many practical arguments for the support of research and education, let me add, in closing, what I believe to be a still more fundamental proposition. I shall use the words of this year's winner of the Woodrow Wilson Prize, Lewis Thomas '33, Chancellor of the Memorial Sloan-Kettering Cancer Center in New York. Dr. Thomas observed:

"* * * As long as we are bewildered by the mystery of ourselves, and confused by the strangeness of our uncomfortable connection to all the rest of life, and dumb-founded by the inscrutability of our own minds, we cannot be said to be healthy animals in today's world

"We need to know more * * * not for [the sake of] technology, not for leisure, not even for health or longevity, but for the hope of wisdom which our kind of culture must acquire for its survival."

It is this conception of the role of learning that speaks to many of us at deeper levels. For me, at least, it is compelling.●

HUMAN RIGHTS AND NORTHERN IRELAND

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. FAUNTROY. Mr. Speaker, a few days ago on March 12, my distinguished colleage from New York, Mr. GILMAN, who is always in the forefront in addressing human rights issues, convened a special order on the tragedy inflicting itself on the people of Northern Ireland.

The violence, discrimination, and deterioration of the conditions under which the Catholic minority is being forced to live is exacting a terrible cost on the oppressed as well as the oppressor.

The litany of inadequate living conditions of the Catholic minority in terms of substandard housing, menial jobs, and little or no access to educational opportunities is a situation with which I and all too many of my constituents can concretely identify.

This is the cause of unrest and violence and the situation cries out for reconciliation and a nonviolent resolution of the underlying political, social, and economic causes.

I, like my colleague from New York, am concerned about our Nation's policy toward Northern Ireland and call upon the President to make the strongest representation to Great Britain to allow the Irish to determine their future.

I am also grateful to my colleague for bringing to our attention the manner in which economic subsidies to U.S. corporations doing business in Northern Ireland contribute to the injustice and conflict. U.S. corporations have been encouraged to locate in the British-Protestant section of the North, thus depriving the Catholic minority of economic opportunity.

The call of the gentleman from New York for hearings on this matter is warranted and I will be most interested to learn the extent of American complicity in the all too familiar cycle of discrimination in Northern Ireland.

This is still another instance that demonstrates the requirement for our Nation to examine ourselves and live up to the ideals which we so often espouse but all too often fail to live up to.●

OLIN "TIGER" TEAGUE: A POETIC REMEMBRANCE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 27, 1981

● Mr. DORNAN of California. Mr. Speaker, I would like to share with my friends and colleagues a very special tribute to the late Olin "Tiger" Teague. I had the good fortune of working with Tiger on the House Committee on Science and Technology, where he served as chairman. The late Congressman Teague played a major role in landing the first man on the Moon.

In 1977, I made a trip with Tiger to Europe. We visited the site of his battalion headquarters during World War II, and I was able to relive with him some of the incredible experiences that he had during the war. His stories were inspiring. I found myself in awe of a man who was completely devoted to his country and his ideals; a man whose wartime and peacetime accomplishments constitute a monument to his memory.

The following poem, written by 1st Lt. Arch B. Hoge, Company B, 314th Infantry, 1st Battalion, 79th Division, which was commanded by Lieutenant Colonel Teague, illustrates the extent to which Olin "Tiger" Teague was loved and respected by his men. I share it with you in honor of a late, modern-day hero; one that will inspire and encourage the lives of Americans for years to come.

TIGER'S MEN

The Tiger's Men, that's what they dubbed us from the start
Commanded by a guy, little and tough, but with a heart.
From the North, the South, out of the West, they came
To the Battalion, to bring it credit and glorious fame.
The Tiger's Men.

We trained in Virginia, Florida and Tennessee
Then West to see what we could see.
Into Arizona and its desert land
Went our bunch, that famous clan
The Tiger's Men.

Rolling across Texas, the Lone Star State
We guys Col. Teague did hate.
For the Col. we would tell
"Texas"—two feet to water, one foot to Hell.
The Tiger's Men.

From the heat and sweat to Kansas and its snow
On another train, did our Battalion go.
Tactics, hikes—train, train, train
No let up for us, come snow or rain
The Tiger's Men.

Soon time to head up to the POE
Get ready—ready to sail across the sea
We'd had our downs—we'd had our ups
Even little Cassie had had her pups.
The Tiger's Men.

On the Cristobal the Battalion set sail
Some turned green, some turned pale
Pitching their cookies into the sea
Just as sick as sick could be.
The Tiger's Men.

At Liverpool, England, the Battalion did land
Ah, what joy, "Dixie" being played by the band.
Soon again on another train
Thru England—mist, fog and rain
The Tiger's Men.

Yep, in the Battalion did work and play

Even to sipping tea the British way
Work, train, on the double we had to hit it
Jolly 'Ole England, its "You cawn't miss it"
The Tiger's Men.

Sgt. Fisher and his extra special super staff
Lovable, pudgy Father Healy and all his gaff
Truly there couldn't have ever been
A crazier, a greater bunch of men
The Tiger's Men.

June of '44 into France the 1st Battalion went
The killing of Germans its energy to be spent
Into Combat where the going was rough
Every guy ready, willing to do his stuff.
The Tiger's Men.

On to Cherbourg, pray, cuss, dig, and fight
Double summertime and the short, short night
The screaming mimi, burp guns, the 88
Sound's we'll well remember and always hate
The Tiger's Men.

Cherbourg had fallen, on to La Haye
No time for rest, no time for play
Inch by Inch, hedge by hedge
Into their lines we drove our wedge
The Tiger's Men.

On across France the Battalion did roll
The Boche were retreating, great was their toll
On, on—up to the river Seine
The guys who wore the Cross of Lorraine
The Tiger's Men.

The officer the Krauts thought looked funny and wacky
Who was he—Ole Flannery—Lord Sir Shacky
There was Hoge and his Confederate Flag
So the South could sit and brag
The Tiger's Men.

There were Otto, and Halligan with wit so rare
There were Renzulli and Musie and their bill of fare
There were big Mullaney and Lover Jung
Food and supplies Mulaney always "brung"
The Tiger's Men.

There was a crew always on call
The Big 3 Harper, Balter and Depaul
It was Able, Baker, Charlie and Dog on the go
Four better companies you'll never know
The Tiger's Men.

The Aid men, the Medics and Doc Moore
From these guys we couldn't ask more
The F.O.'s and their artillery Red
Freeman and Grant as good as they said
The Tiger's Men.

On and on we fought the Boche into the damned Forrest of Parroy
Tired, weary, cold—there was no let up—no joy
When, when do we get a rest?
Hasn't the Battalion already given it's best
The Tiger's Men.

At long last that promised rest
Spruce up—shave—look our best
Sleep, a bath, a dance in store
Steaks, wine, and gals galore
The Tiger's Men.

The rest is over, we're on our way
We attack the Boche at break of day
"B" Company took its objective—that snowy day
Mission accomplished, we've pave the way
The Tiger's Men.

On and on thru the cold, the sleet, the snow and rain
Thru town after town, across the plain
Chasing the Krauts from hole to hole
The German Bastard, God Damn his soul
The Tiger's Men.

And so it came, the Boche were beaten, they were down
The once mighty Hitler had lost his crown
We'd won the fight, we'd cleared the way
For that great occasion—Victory Day
The Tiger's Men.

Now at last our fighting is done
The peace is here, we've finally won
Lots of our guys gave their all
So many names, it's hard to recall
The Tiger's Men.

Now today, wherever we may be
Safe at home or buried O'er the sea
Someday, somewhere, we'll meet again
Together, forever, the Tiger's Men.●

ST. PATRICK'S DAY PEACE WISHES FOR NORTHERN IRELAND

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROE. Mr. Speaker, I rise today on the celebration of St. Patrick's Day to call attention to the seemingly endless suffering that continues to plague the residents of Northern Ireland.

We must not let the gaiety of this day diminish the fact that at this moment in Belfast and the small villages and hamlets that make up Northern Ireland, children are afraid to play in the streets and women fear for their lives while going shopping because of the violent drama that has engulfed their lives these many years.

I have long sought a peaceful and diplomatic solution to the violence in Northern Ireland. Soon after President Reagan took office, I communicated with him to express my feelings on this highly important matter.

It is most heartening to note that a letter I recently received from Max Friedersdorf, special assistant to President Reagan, noted that the administration has no plans to change a 19-month embargo on the U.S. arms sales to the Royal Ulster Constabulary, the major British police force in Northern Ireland.

I have gone on record many times in this chamber outlining the terrible record of the Royal Ulster forces. I have been the sponsor of many bills that would forbid the sale of arms to those British forces, who have even been chastized by the British Government.

As a member of the House Ad Hoc Congressional Committee for Irish Affairs, I strongly favor a peaceful and diplomatic solution to the violence in Northern Ireland that has taken the lives of scores of innocent people.

I urge this Congress and the leadership of this Nation to use its influence to make peace in Northern Ireland a reality.●

QUESTIONS AND ANSWERS ABOUT REAGAN'S PROGRAM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. GINGRICH. Mr. Speaker, many folks have raised questions about President Reagan's economic program. Frank Gregorsky, a columnist for the Douglas County Sentinel, in Douglasville, Ga., has put together a series of answers to the most commonly asked questions about President Reagan's program. I would like to share Mr. Gregorsky's columns with my colleagues.

QUESTIONS AND ANSWERS ABOUT REAGAN'S PROGRAM

(By Frank Gregorsky)

Q: Reagan's people say their tax program is a break with the past. Yet they try to calm people's fears by saying that all past tax cuts helped the economy and we shouldn't worry about this one. Isn't this a glaring contradiction?

A: Yes. The Reagan people alter between wanting to appear bold and daring versus seeming traditional and safe, so their rhetorical lines get crossed. Actually, the Reagan tax program is a lot like some past tax cuts and very different from others.

These proposed cuts are wide in scope but simple in concept. All of the brackets in the Federal personal income tax are to be cut by 30 percent, 10 percent a year for three years. The top tax rate would go from 70 to 50 percent, the bottom one from 14 to 10 percent, and all the ones in the middle accordingly. This is to encourage an across-the-board increase in savings, work incentives and consumer spending, all of which should lead to higher economic growth.

Also, business taxes will be lowered via the "10-5-3" accelerated depreciation formula. Companies would write off, or stop paying taxes on, new buildings after 10 years, new machinery after five, and new vehicles after three. This is a blanket tax break for all businesses that go out and invest in plant expansion and modernization, and the aim is to encourage productivity and our export performance.

In terms of what's new and what's been tried, the cuts in all the income tax rates were tried in 1922, 1924, 1948, and 1964-65. That last series of tax reductions, under Kennedy and Johnson, is very similar to what Reagan proposes, because at that time we cut over a period of years all the income tax rates by almost the exact same proportions. The 10-5-3 scheme has the same goals as did the Investment Tax Credits of 1962 and 1971, and the corporate income tax cuts of 1964 and 1978.

But the Reagan tax cuts are totally unlike the tax cuts we had in 1969, 1971, 1975, 1976, and 1977. Those tax cuts were mistakes. They took poor people off the tax rolls by the millions while giving no tax relief to the middle and upper classes. They raised inheritance and capital gains taxes, discouraging economic activity and investment. They were liberal, Keynesian-type tax cuts: punish the so-called rich, flood the economy with money that will be quickly spent, make things harder on business. We can't afford any more tax cuts of that kind.

Q: Why not just cut taxes for those who save, instead of cutting all taxes? If people spend most of their tax savings, that will make inflation worse. Isn't that what worries the Democrats?

A: First of all, it's not true that people will spend all of their tax savings. During 1964 and 1965, a period when all income tax rates were being sharply cut, the dollar amount of savings by individuals (i.e. households, personal trust funds, nonprofit institutions, and farms) rose from $45.2 billion to $63.8 billion. That's a 41 percent rise in two years, the biggest such increase in personal savings during the last thirty years! The lesson of recent history is that everybody saves more when you make large cuts in everybody's tax rates.

Q: But the tax cut still means more inflationary consumer spending.

A: It means more spending, but it might not be inflationary. Consumer spending can be good or bad or neutral. If it stopped today, we'd soon have a depression. Since Reagan will be cutting government spending—and therefore the spending of people getting income from transfer payments, it might be a good thing to balance that by a rise in the spending of other people in the private sector.

Some Keynesian teachings still hold water. Sharp cuts in federal spending tend, in the short run, to drive up unemployment and therefore cut consumer spending. Conversely, a rise in consumer spending leads to some job creation as businesses expand to meet the new demand. A cut in government spending without more private spending might raise unemployment dramatically. This Reagan cannot accept. And if the Democrats succeed in cutting spending while only cutting taxes for those who save, there'll be an imbalance in the economy and another recession. That's why Reagan is for cutting personal taxes: increased savings will fight inflation, and more private spending will absorb the short-term recessionary impact of the cuts in government spending.

Q: Okay, but why do the personal income tax cuts three years in advance? We can't tell what things will be like in 1984. Why can't Reagan promise future cuts and deliver them one year at a time?

A: Because of expectations. Consumers and businessmen aren't stupid. They've heard promises of tax and spending cuts, but taxes and government spending are at record levels. That's why the President is focusing on the 1982 and 1983 budgets, and wants a multi-year tax cut voted on by this summer. We have to have assurances that the cuts are coming, and be able to plan and act accordingly. A three-year tax cut in the hand is worth a ton of political promises behind the bush.

Q: I don't understand how President Reagan can make big tax cuts and still move toward a balanced budget. Why don't we cut spending, let taxes keep on going up, and balance the budget right away?

A: We've tried that for fifteen years. It doesn't work. From 1976 through the current fiscal year, the total taxes sent to Washington by individuals and corporations will DOUBLE. Washington raked in $314 billion in fiscal 1976 and will get well over $600 billion in fiscal 1981. Yet our budget deficits are higher than ever.

That's because taxes are the biggest single item driving up prices. And when the price level goes up, increases in all sorts of inflation-indexed government spending are triggered. Also, with the tax burden as high as it now is, it's hard for businesses to expand and it's not as worthwhile for people to work hard and earn higher salaries. As a result, there's more unemployment, idle factories, and people spending their time doing unproductive things or working in the so-called "underground economy." All of this tends to shrink our economic growth rates and push the budget out of control.

Q: The logic of that is that we have to cut tax rates in order to balance the budget. But that sounds crazy!

A: Is it crazy when a small businessman cuts his prices, sells more goods at a lower price, and ends up with higher profits? You can cut prices or tax rates, and if the volume of business or economic activity rises enough, your business or government comes out ahead, just as do your customers or taxpayers.

Q: Nice rhetoric, but when has a tax cut actually increased the level of revenues coming in?

A: Glad you asked. During calendar years 1963–64, when the Kennedy tax cuts were talked about or just beginning to take effect, federal revenues rose by $8.7 billion. But during 1965–66, when the full force of those rate cuts had been felt and the economy was expanding, federal revenues rose by $26.9 billion.

Q: Impressive, but explain the reasoning once more.

A: The tax rate reductions stimulated all kinds of economic activity. Everybody did more of everything. Even though all Americans payed less per capita in taxes to Washington, Americans were doing so much to produce so much more wealth that Washington found itself receiving bigger annual hikes in tax revenues than it did with the old, high tax rates.

Q: Still sounds a bit like a free lunch.

A: When the garden gets bigger there's more food for everybody. An intelligent tax policy will promote the biggest possible economy. If tax rates are too high the economy will be too small. Just as when the businessman has prices too high he edges close to bankruptcy.

Q: Let's look at the budget cuts. Won't they hurt the poor more than the rich?

A: We muddy up the discussion by talking about just rich and poor. Four-fifths of Americans call themselves middle-class, and most of the subsidies and programs in the budget were put there to buy middle class votes. Therefore, most of the budget cuts will inconvenience the middle-class, and that's right and natural.

Q: You maintain that no truly needy person will be hurt?

A: Some will, but aged, blind, and disabled people will feel little or no pinch. As for the able-bodied poor, their benefits should be cut. It's in their own and the nation's interest. There are so many social welfare benefits going to people theoretically in the poverty brackets that the incentive to work has vanished. Most people are human, so they will not work to buy what we give them for free.

There's a wisecrack that says the solution to poverty is money. But that misses the point. The solution to poverty is work, and work experience, and the work ethic. You don't get that by welfare. You don't even get that by CETA, a program that may teach disrespect for work.

Combatting poverty requires us to 1) cut the incentives not to work by reducing government pay and in-kind benefits to the able-bodied poor; 2) increase the jobs available to these people by expanding the private economy. Reagan's budget cuts do number one and his tax cuts do number two. So I think his program in the long run will be the best thing that ever happened to those Americans who really want to stop being poor.

Q: A ten percent tax cut means a lot more in dollars to a wealthy family than it does for a low-income one. Why is such a policy fair?

A: If you think the current system is fair, then a bill that gives all tax brackets proportionately equal savings leaves the system as fair as it started out. If you think the current system is unfair, this bill doesn't make it any more so. You've got to look at broad-scale results.

When President Kennedy pushed to cut the top income tax rates from 91 to 70 percent a few liberals screamed that this was a bonanza for the wealthy. But unless you want a communist economy you have to give upper-income groups a reason to take their idle cash out of tax-free municipal bonds and overseas real estate and put it into American savings banks, where it will do all of us some good.

Democrats who complain that Reagan's tax cuts give too much to the wealthy while failing to stimulate savings are economic illiterates. History shows that you can dramatically stimulate savings by cutting the top income tax rates because, like it or not, wealthy Americans have most of the idle cash and can do most of the saving. And all of us, whatever we're earning, want that idle cash in our banks—not fleeing the country or the I.R.S. to avoid tax rates that threaten to steal seven out of ten of those dollars.●

TOO SACRED A COW?

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. FINDLEY. Mr. Speaker, I would like to bring to the attention of my colleagues two editorials regarding milk price supports, more specifically the issue of skipping the scheduled April 1 support increase, a move that would cut Treasury costs by $147 million. That is the sole intent of my bill, H.R. 1986, an objective recommended in the following editorials:

[From the Washington Star, Mar. 7, 1981]

MILKING PRICE SUPPORTS

Between now and April 1 President Reagan will have won or lost what might be his First Battle of the Marne, an engagement that would dramatically affect the administration's budget-reduction war. The battle will be to end the twice-a-year adjustments in price supports for the dairy industry.

The 14-2 vote Wednesday by the Senate Agriculture Committee to end the two-a-year dairy adjustments—"a scandal," in the judgment of the president's budget-biter, David Stockman—was distinctly encouraging. But that was only half, and perhaps the easier half, of this set-to. In the House, the tight three-week deadline to skim off some of the milk-price cream offers a wonderful opportunity for the Democratic opposition. Indeed, the chairman of the House Agriculture subcommittee that will handle the matter, Rep. Tom Harkin of Iowa, is mur-

muring that it will be "very difficult" for his lads to act on milk-price supports before April 1.

The federal Commodity Credit Corporation ended 1980 in custody of 274 million pounds of surplus butter, twice the amount in 1979, and more than 184 million pounds of cheese, against 20 million the previous year—the largest surplus in 20 years. The cost to the federal government for the dairy price-support program will be an estimated $2 billion in this fiscal year, compared to $1.3 billion last year.

The crux of the problem represented by those figures is not farm price supports themselves—which, by various formulas, cover food and fiber from corn to flax. The case for building a government floor under commodity prices to provide market stability and assure farmers a decent return is graved in governmental stone.

But the dairy industry, which knows its way around the political pasture, has been particularly successful in keeping its price-support levels elevated. In 1977, the dairymen persuaded Congress that twice-a-year adjustments would be dandy. This has encouraged dairy farmers to increase herds and expand production even further beyond market requirements, knowing that the feds will buy however much they produce. The farmers argue that even favorable dairy support levels have not permitted them to stay even with inflation. But a General Accounting Office study recently found that dairy farm income between 1977 and 1979 rose 46 per cent, after inflation.

So far, the dairy industry says it might be willing to accept modifications in the price-support structure—but only if those changes do not result in fewer dollars-and-cents than the old levels. Or, put another way, heads we win, tails you lose. And the industry is not budging on the sanctity of twice-a-year adjustments.

That won't do. Mr. Reagan is right on this issue—and it is incumbent that the House stir itself to keep the higher price adjustment from automatically taking effect on April 1.

[From the New York Times, Mar. 6, 1981]

LASSOING THE SACRED DAIRY COW

President Reagan and the public won a big economic battle when the Senate Agriculture Committee voted to suspend an automatic increase in dairy price supports next month. But this one success will not win the war to purge dairy subsidies from the Federal budget. Unless the House moves quickly, the Senate committee's brave stand against a heretofore invincible lobby will have been in vain.

Rarely is a public policy issue so clear-cut. Federal law now requires the Government to buy all the milk and butter that farmers want to sell and at a fixed price—a price raised each spring and fall to reflect increases in the rural cost of living. At the present support level consumers won't buy all the industry's production.

So, since 1978 Uncle Sam has had to be the buyer of last resort, accumulating millions of tons in surpluses. This year's direct Government subsidy to dairy farmers will be about $1.7 billion; the figure could reach $3.2 billion by 1986.

Big Milk says it needs guaranteed high prices to assure adequate supplies for hungry children. And it is true that without Government intervention, the quantity and price of dairy products might fluctuate more from year to year, like the price of meat or coffee. But even if one believed the public had a strong stake in preventing such market swings—not an easy case to make—that hardly justifies having the Government steadily accumulate surpluses.

In any case, few believe that Congress takes seriously the industry's alarms about a butter and cream shortage. The power of the dairy lobby, like that of many special interests, comes not from logic but from its ability to muster votes and campaign contributions. When you remember that milk producers have handed out $146,000 to members of the Senate Agriculture Committee since 1976, you understand the courage in the committee's 14-2 vote to cut off the next automatic increase in price supports.

That vote virtually guarantees a favorable vote on the Senate floor. But the House is going to be tough to move by an opposition President and by April 1, when the support increase is scheduled to take effect. That puts the burden squarely on the House's Democratic majority. It should remember that Democrats, too, drink milk—and pay taxes.●

INTRODUCTION OF H.R. 2568

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. GIBBONS. Mr. Speaker, I am introducing today legislation which would transfer social security and medicare administrative costs from the payroll tax to general revenues. The bill provides that the administrative expenses which are currently paid out of the Federal old-age and survivors insurance trust fund, the Federal disability insurance trust fund, or the Federal hospital insurance trust fund will be paid—beginning with fiscal year 1982—out of funds appropriated for each fiscal year from general revenues.

I am aware that there are some problems with departing from the longstanding principle that the social security program should pay for itself out of payroll tax revenues, and that it would expose social security administrative costs to the Federal budget-cutting process. However, because of the problems that the social security system is experiencing at the present time, I think we should look at this approach as an option.

Mr. Speaker, I insert the text of the legislation I am introducing in the RECORD, along with a summary of the bill:

H.R. 2568

A bill to provide that certain administrative expenses incurred in carrying out the Social Security Act will be paid from general revenue funds rather than from the trust funds established in title II and part A of title XVIII of the Social Security Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) paragraphs (1) and (4) of section 201(g) of the Social Security Act are repealed.

(2) Section 8(f) of Public Law 94-202 is repealed.

(b) Section 201(g)(3) of the Social Security Act is amended—

(1) by striking out "(1) or" in the first sentence; and

(2) by striking out "either" in the second sentence.

(c) Section 201(j) of such Act is repealed.

(d) Section 201(k) of such Act is amended by inserting the following before the period at the end thereof: "; except that expenditures for administrative expenses may be made only from funds appropriated pursuant to section 709".

(e) Section 217(g) of such Act is amended by adding the following new paragraph at the end thereof:

"(5) With respect to fiscal years beginning on and after October 1, 1981, the amounts authorized to be appropriated under this subsection shall not include amounts needed to pay for administrative costs incurred in carrying out this section in any such fiscal year."

(f)(1) Section 221(e) of such Act is amended to read as follows:

"(e) Each State which is making disability determinations under subsection (a)(1) shall be paid (out of funds appropriated pursuant to section 709), in advance or by way of reimbursement, as determined by the Secretary, the cost to the State of making such determinations."

(2) Section 221(f) of such Act is amended by striking out "for deposit in the Trust Funds".

(g) Section 222(d) of such Act is amended—

(1) by striking out "(including (i) services during their waiting periods, and (ii) so much of the expenditures for the administration of any State plan as is attributable to carrying out this subsection)" in the first sentence of paragrph (1) and inserting in lieu thereof "(including services during their waiting period, but excluding so much of the expenditures for the administration of any State plan as is attributable to carrying out this subsection)"; and

(2) by adding the following new paragraph at the end thereof:

"(7) All costs for administrative expenses incurred in the administration of a State plan as is attributable to this subsection and all other administrative costs attributable to this subsection shall be paid from funds appropriated pursuant to section 709.".

(h) Section 228(g) of such Act is amended—

(1) by inserting "and" at the end of paragraph (1);

(2) by striking out paragraph (2);

(3) by redesignating paragraph (3) as paragraph (2); and

(4) by striking out "and expenses" in paragraph (2) as redesignated.

(i) Section 229(b) of such Act is amended by striking out ", (2)" and all that follows through "(3)" and inserting in lieu thereof "and (2)".

(j) Section 231(c) of such Act is amended by inserting after "such sums" the following: "(other than sums authorized to be appropriated for administrative expenses pursuant to section 709)".

(k) Section 1106(b) of such Act is amended by striking out the parenthetical material in the second sentence and inserting in lieu thereof "(including authorizations to make expenditures from the Federal Supplementary Medical Insurance Trust Fund)".

(l) Section 1110(b) of such Act is amended by inserting the following before the period at the end of the third sentence thereof: "; except that administrative costs of such

projects carried out in connnection with title II or part A of title XVIII shall be paid out of funds appropriated pursuant to section 709".

(m) Section 1122(c) of such Act is amended by striking out "the Federal Hospital Insurance Trust Fund" and inserting in lieu thereof "amounts appropriated pursuant to section 709".

(n) Section 1131(b) of such Act is amended to read as follows:

"(b) There are authorized to be appropriated for each fiscal year beginning on and after October 1, 1981, such sums as the Secretary deems necessary on account of additional administrative expenses resulting from the enactment of the provisions of subsection (a).".

(o) Section 1168 of such Act is amended by striking out the first and second sentences and inserting in lieu thereof the following: "Expenses incurred in the administration of this part shall be payable from funds appropriated to carry out the health care provisions of this Act."

(p) Section 1817(h) of such Act is amended by striking out ", and the payments" and all that follows through "(l)".

(q) Section 1817(i) of such Act is repealed.

(r) Section 1841(g) of such Act is amended by striking out ", and the payments" and all that follows through "(l)" and inserting in lieu thereof "and payments for administrative expenses incurred in carrying out this part".

(s) Section 1864(b) of such Act is amended—

(1) by inserting "(out of funds appropriated pursuant to section 709)" after "The Secretary shall pay"; and

(2) by striking out "the Federal Hospital Insurance Trust Fund's fair share of".

(t) Section 1876(a)(4) of such Act is amended by inserting the following before the period at the end of the third sentence: "; except that payments made for administrative expenses incurred with respect to benefits paid from such trust fund shall be paid only from funds appropriated pursuant to section 709".

(u) Section 103(c) of Public Law 89-97 is amended—

(1) by inserting "and" at the end of paragraph (1);

(2) by striking out paragraph (2); and

(3) by redesignating paragraph (3) as paragraph (2).

(v) Section 111(d) of Public Law 89-97 is amended—

(1) by inserting "and" at the end of paragraph (1);

(2) by striking out paragraph (2); and

(3) by redesignating paragraph (3) as paragraph (2).

(w) Payments for administrative expenses incurred by the Department of Health and Human Services in carrying out demonstration or pilot projects, experiments, and studies conducted in connection with title II or XVI or part A of title XVIII of the Social Security Act shall be made available only from funds appropriated pursuant to the authorization described in section 709 of such Act.

(x) Title VII of the Social Security Act is amended by adding the following new section at the end thereof:

"AUTHORIZATION OF APPROPRIATIONS FOR CERTAIN ADMINISTRATIVE EXPENSES

"SEC. 709. There are authorized to be appropriated for each fiscal year such sums as the Secretary determines will be necessary for payment of the following expenses during such fiscal year—

"(1) administrative expenses incurred by the Department of Health and Human Services and the Treasury Department in carrying out titles II and XVI and part A of title XVIII of this Act (including any administrative expenses incurred in carrying out demonstration or pilot projects, experiments, and studies conducted in connection with any such titles or part), sections 1106, 1110(b), and 1122 of this Act, chapters 2 and 21 of the Internal Revenue Code of 1954, and section 103 of Publc Law 89-97 and in making payments described in section 111(d)(1) of such Public Law;

"(2) administrative expenses incurred by the Department of Health and Human Services in carrying out its functions, pursuant to section 232 of this Act, which relate to the administration of provisions of the Internal Revenue Code of 1954 other than those referred to in paragraph (1); and

"(3) travel expenses, either on an actual cost or commuted basis, paid to individuals for travel incident to medical examinations requested by the Secretary in connection with disability determinations under title II, and to parties, their representatives, and all reasonably necessary witnesses for travel within the United States (as defined in section 210(i)) to attend reconsideration interviews and proceedings before administrative law judges with respect to any determination under title II or XVIII (such amounts to be determined in accordance with the limitations described in sections 201(j) and 1817(i) of this Act on September 31, 1981)."

SEC. 2. The provisions of this Act shall become effective on October 1, 1981, except that the Secretary of Health and Human Services may, after such date, make payments, with respect to expenses incurred before such date, in accordance with—

(1) the provisions of section 201(g)(1), subsection (j) or (k) of section 201, section 221(e), 222(d), 1110(b), 1122(c), 1131(b)(1), or 1168, subsection (h) or (i) of section 1817, section 1841(g), 1864(b), or 1876(a)(4) of the Social Security Act as such provisions were in effect on September 30, 1981; or

(2) any provision of law authorizing the payment, out of any trust fund established by title II or XVIII of the Social Security Act, of administrative expenses incurred in connection with the Secretary's carrying out any demonstration or pilot project, experiment, or study in connection with title II, XVI, or XVIII of such Act.

SUMMARY OF THE BILL

The bill provides that the administrative expenses which are currently paid out of the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, or the Federal Hospital Insurance Trust Fund will be paid (beginning with fiscal year 1982) out of funds appropriated for each fiscal year from general revenues.

The first section of the bill amends or repeals existing provisions of law which authorize use of these trust funds to pay administrative expenses or which authorize the appropriation of funds to the trust funds to pay such expenses. In addition, the bill creates a new section at the end of title VII of the Social Security Act which authorizes the appropriation of funds from general revenues for payment of these administrative expenses. As a result, these trust funds will no longer be utilized for the payment of administrative expenses, and such expenses will be paid out of the Treasury from funds appropriated each year for such purpose.

Section 2 of the bill is an effective date and transition provision which provides that October 1, 1981, is the effective date for the bill and that, even in fiscal year 1982, payment for administrative expenses *incurred in fiscal year 1981* may continue to be paid in accordance with the law in effect on September 30, 1981.●

THE YELESTRATOV FAMILY MUST BE ALLOWED TO EMIGRATE

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. McGRATH. Mr. Speaker, my attention has recently been drawn to yet another Soviet violation of human rights, its refusal, since 1972, to allow Victor Yelestratov and his wife, Batsheva, to emigrate to Israel. Simply because of their desire to practice their own religion in a country of their choice, Victor and Batsheva Yelestratov have endured persecution, harassment, and imprisonment.

The plight of the Yelestratovs has been brought to world attention by the International Committee for the Yelestratovs, of Oceanside, N.Y., and most recently by a resolution adopted by the New York State Senate and Assembly, sponsored by Senator Norman Levy and Assemblyman Dean Skelos. I am writing to Soviet Communist Party Secretary General Leonid Brezhnev to express my deep concern for the Yelestratovs, and I urge my colleagues to do the same.

I am inserting in the RECORD a copy of the resolution for the benefit of my colleagues.

RESOLUTION OF THE STATE OF NEW YORK

Legislative resolution recognizing, applauding and commending the International Committee for the Yelestratovs for advancing the cause of freedom of emigration for Russian citizens oppressed by the Soviet Union

Whereas, October nineteenth, nineteen hundred eighty, was declared International Day for the Yelestratovs, serving as further expression of the continuing efforts and determination to secure immigration freedom for Soviet Jews; and

Whereas, In 1972, Victor Yelestratov and his wife, Batsheva, determined to depart from the Soviet Union in order to freely practice the traditions of the Jewish Heritage—and on numerous occasions since that year, have been denied that basic human right of free emigration; and

Whereas, Victor Yelestratov's aspiration to emigrate has resulted in his employment being limited to menial labor by Soviet authorities and the confiscation of his personal belongings and other indignities including the Soviet Police repeatedly invading his home for the purpose of harassment; and

Whereas, Batsheva Yelestratov remains within the Soviet Union, despite the emigration of her son, Alexander Fish, thereby placing Batsheva Yelestratov in the ranks of many Soviet mothers who are unfortunately separated from their children by the design of Soviet Union officials; and

Whereas, Victor and Batsheva Yelestratov have endured the persecution, harassment, imprisonment and family separation simply because of their desire to practice their own religion in a country of their own choice; and

Whereas, Victor Yelestratov, in October of 1976, endeavored to obtain written explanation of his emigration denial from the Presidium of the USSR Supreme Council, and was subsequently beaten and imprisoned by Soviet authorities; and

Whereas, Victor and Batsheva Yelestratov's right to live freely and to be reunited with their families abroad is being denied them and other Soviet Jews, a right affirmed by the Soviet Union's Constitution, the Declaration of Human Rights adopted by the General Assembly of the United Nations and Principle VIII of the Final Act of the Helsinki Accord; and

Whereas, The Soviet Union's continuing persecution of its Jewish citizens and denial of those rights and privileges accorded other recognized religions in the Soviet Union will not succeed in isolating Soviet Jews from their friends in the World so long as those who hold liberty and freedom as the highest ideal continue to speak out on behalf of all beleagured and oppressed people; now, therefore, be it

Resolved, That this Legislative Body pauses in its deliberations to recognize, applaud, and commend the International Committee for the Yelestratovs who, by highlighting the plight of this family is helping the cause of freedom of emigration for others similarly oppressed by the Soviet Union; and be it further

Resolved, That copies of this Resolution, suitably engrossed, be transmitted to the President of the United States, Honorable Hugh L. Carey, Governor of the State of New York, Secretary of State of the United States, and to each member of the Congress of the United States from the State of New York, International Committee for the Yelestratovs, 50 Murray Avenue, Oceanside, New York 11572, Leonid Brezhnev, Secretary General of the Communist Party, The Kremlin, RSPER, USSR, and Oleg Troyanovsky, Ambassador, Soviet Mission to the United Nations, 136 East 67th Street, New York, New York 10021.●

A REVISED CHECKLIST OF ITEMIZED DEDUCTIONS FOR USE IN TAXABLE YEAR 1980 AS COMPILED BY THE SELECT COMMITTEE ON AGING

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROE. Mr. Speaker, each year it has been my practice to distribute to the senior citizens of my district a checklist of itemized deductions for use in filing income tax returns as compiled by the Select Committee on Aging. This year the committee's publication containing this data entitled, "Protecting Older Americans Against Overpayment of Income Taxes," is in short supply.

Mr. Speaker, in order to disseminate this important tax information to our senior citizens, I insert the updated checklist of tax tips for the elderly prepared by the Select Committee on Aging with the assistance of the Senate Committee on Aging, the Joint Committee on Taxation, and the House Ways and Means Committee at this point in our historic Journal of Congress, as follows:

INCOME TAX DEDUCTION CHECKLIST

Medical and Dental Expenses

Medical and dental expenses (unreimbursed by insurance or otherwise) are deductible to the extent that they exceed 3 percent of your adjusted gross income (line 31, Form 1040).

Insurance Premiums

One-half of medical, hospital or health insurance premiums are deductible (up to $150) without regard to the 3 percent limitation for other medical expenses. The remainder of these premiums can be deducted, but is subject to the 3 percent rule.

Drugs and Medicines

Included in medical expenses (subject to 3 percent rule) but only to extent exceeding 1 percent of adjusted gross income (line 31, Form 1040).

Other Medical Expenses

Other allowable medical and dental expenses (subject to 3 percent limitation):

Abdominal supports (prescribed by a doctor).
Acupuncture services.
Ambulance hire.
Anesthetist.
Arch supports (prescribed by a doctor).
Artificial limbs and teeth.
Back supports (prescribed by a doctor).
Braces.
Capital expenditures for medical purposes (e.g., elevator for persons with a heart ailment)—deductible to the extent that the cost of the capital expenditure exceeds the increase in value to your home because of the capital expenditure. You should have an independent appraisal made to reflect clearly the increase in value.
Cardiographs.
Chiropodist.
Chiropractor.
Christian Science practitioner, authorized.
Convalescent home (for medical treatment only).
Crutches.
Dental services (e.g., cleaning, X-ray, filling teeth).
Dentures.
Dermatologist.
Eyeglasses.
Food or beverages specially prescribed by a physician (for treatment of illness, and in addition to, not as substitute for, regular diet; physician's statement needed).
Gynecologist.
Hearing aids and batteries.
Home health services.
Hospital expenses.
Insulin treatment.
Invalid chair.
Lab tests.
Lipreading lessons (designed to overcome a handicap).
Neurologist.
Nursing services for medical care, including nurse's board paid by you.
Occupational therapist.
Ophthalmologist.
Optician.
Optometrist.
Oral surgery.
Osteopath, licensed.
Pediatrician.
Physical examinations.
Physical therapist.
Physician.
Podiatrist.
Psychiatrist.
Psychoanalyst.
Psychologist.
Psychotherapy.
Radium therapy.
Sacroiliac belt (prescribed by a doctor).
Seeing-eye dog and maintenance.
Speech therapist.
Splints.
Supplementary medical insurance (Part B) under medicare.
Surgeon.
Telephone/teletype special communications equipment for the deaf.
Television set if individual has a hearing impairment and the set is specially equipped with a visual display of the audio portion of television programs. Similarly the cost of an adaptor for a conventional television that performs the same function is now considered a medical deductive by the IRS.
Transportation expenses for medical purposes (9¢ per mile, plus parking and tolls or actual fares for taxi, buses, etc.).
Vaccines.
Vitamins prescribed by a doctor (but not taken as a food supplement or to preserve general health).
Wheelchairs.
Whirlpool baths for medical purposes.
X-rays.

Expenses may be deducted only in the year you paid them. If you charge medical expenses on your bank credit card, the expenses are deducted in the year the charge is made regardless of when the bank is repaid.

Taxes

Real estate.
General sales.
State and local income.
Personal property.

If sales tax tables are used in arriving at your deduction, ordinarily you may add to the amount shown in the tax tables the sales tax paid on the purchase of the following items: automobiles, trucks, motorcycles, airplanes, boats, mobile homes, and materials used to build a new home when you are your own contractor.

When using the sales tax tables, add to your adjusted gross income any nontaxable income (e.g., social security, veterans' pensions or compensation payments, railroad retirement annuities, workmen's compensation, untaxed portion of long-term capital gains, dividends untaxed under the dividend exclusion, interest on municipal bonds, unemployment compensation and public assistance payments).

Contributions

In general, contributions may be deducted up to 50 percent of your adjusted gross income (line 31, Form 1040). However, contributions to certain private nonprofit foundations, veterans organizations, or fraternal societies are limited to 20 percent of adjusted gross income.

Cash contributions to qualified organizations for (1) religious, charitable, scientific, literary or educational purposes, (2) prevention of cruelty to children or animals, or (3) Federal, State or local governmental units (tuition for children attending parochial schools is not deductible).

Fair market value of property (e.g., clothing, books, equipment, furniture) for chari-

table purposes. (For gifts of appreciated property, special rules apply. Contact local IRS office.)

Travel expenses (actual or 9¢ per mile plus parking and tolls) for charitable purposes (may not deduct insurance or depreciation in either case).

Cost and upkeep of uniforms used in charitable activities (e.g., scoutmaster).

Purchase of goods or tickets from charitable organizations (excess of amount paid over the fair market value of the goods or services).

Out-of-pocket expenses (e.g., postage, stationery, phone calls) while rendering services for charitable organizations.

Care of unrelated student in your home under a written agreement with a qualifying organization (deduction is limited to $50 per month).

Interest

Home mortgage.

Auto loan.

Installment purchases (television, washer, dryer, etc.).

Bank credit card—can deduct the finance charge as interest if no part is for service charges, loan fees, credit investigation fees, or similar charges.

Other credit cards—you may deduct as interest the finance charges added to your monthly statement, expressed as an annual percentage rate, that are based on the unpaid monthly balance.

Points—deductible as interest by buyer where financing agreement provides that they are to be paid for use of lender's money and only if the charging of points is an established business practice in your area. Not deductible if points represent charges for services rendered by the lending institution (e.g., VA loan points are service charges and are not deductible as interest). Not deductible if paid by seller (are treated as selling expenses and represent a reduction of amount realized).

Penalty for prepayment of a mortgage—deductible as interest.

Revolving charge accounts—may deduct the separately stated "finance charge" expressed as an annual percentage rate.

Casualty or Theft Losses

Casualty (e.g., tornado, flood, storm, fire, or auto accident provided not caused by a willful act or willful negligence) or theft losses—the amount of your casualty loss deduction is generally the lesser of (1) the decrease in fair market value of the property as a result of the casualty, or (2) your adjusted basis in the property. This amount must be further reduced by any insurance or other recovery, and, in the case of property held for personal use, by the $100 limitation. Report your casualty or theft loss on Schedule A. If more than one item was involved in a single casualty or theft, or if you had more than one casualty or theft during the year, you may use Form 4684 for computing your personal casualty loss.

Miscellaneous

Appraisal fees to determine the amount of a casualty loss or to determine the fair market value of charitable contributions.

Union dues.

Cost of preparation of income tax return.

Cost of tools for employee (depreciated over the useful life of the tools).

Dues for chamber of commerce (if as a business expense).

Rental cost of a safe-deposit box used to store income-producing property.

Fees paid to investment counselors.

Subscriptions to business publications.

Telephone and postage in connection with investments.

Uniforms required for employment and not generally wearable off the job.

Maintenance of uniforms required for employment.

Special safety apparel (e.g., steel toe safety shoes or helmets worn by construction workers; special masks worn by welders).

Business entertainment expenses.

Business gift expenses not exceeding $25 per recipient.

Employment agency fees under certain circumstances.

Cost of a periodic physical examination if required by employer.

Cost of installation and maintenance of a telephone required by your employment (deduction based on business use).

Cost of bond if required for employment.

Expenses of an office in your home if used regularly and exclusively for certain business purposes.

Transportation expenses for business purpose (20 cents per mile for the first 15,000 miles, and 11 cents per mile in excess of 15,000 miles, plus parking and tolls or actual fares for taxi, buses, et cetera.)

B. OTHER TAX RETURN INFORMATION ITEMS

Tax Tables

Tax tables have been developed to make it easier for you to find your tax if your income is under certain levels. Even if you itemize deductions, you may be able to use the tax tables to find your tax easier. In addition, you do not have to deduct $1,000 for each exemption because these amounts are also built into the tax table for you.

Multiple Support Agreements

In general, a person may be claimed as a dependent of another taxpayer, provided five tests are met: (1) support; (2) gross income; (3) member of household or relationship; (4) citizenship, and (5) separate return. But in some cases, two or more individuals provide support for an individual, and no one has contributed more than half the person's support. However, it still may be possible for one of the individuals to be entitled to a $1,000 dependency deduction if the following requirements are met for multiple support:

1. Two or more persons—any one of whom could claim the person as a dependent if it were not for the support test—

2. Any one of those who individually contribute more than 10 percent of the mutual dependent's support, but only one of them, may claim the dependency deduction.

3. Each of the others must file a written statement that he will not claim the dependency deduction for that year. The statement must be filed with the income tax return of the person who claims the dependency deduction. Form 2120 (Multiple Support Declaration) may be used for this purpose.

Sale of Personal Residence

You may exclude from your gross income some or all of your gain from the sale of your principal residence, if you meet certain age, ownership, and occupancy requirements at the time of the sale. These requirements, and the amount of gain that may be excluded, differ depending on whether you sold your home before July 27, 1978, or on or after that date. The exclusion is elective, and you may elect to exclude gain only once for sales before July 27, 1978, and only once for sales on or after that date.

If you sold your home before July 27, 1978, and you were age 65 or older before the date of sale, you may elect to exclude the gain attributable to $35,000 of the adjusted sales price if you owned and occupied the residence for 5 of the 8 years ending on the date of sale. If you sold the home after July 26, 1978, and you were age 55 or older before the date of the sale, you may elect to exclude $100,000 of gain on the sale if you owned and occupied the residence for 3 of the 5 years ending on the date of sale (or 5 of 8 years under certain circumstances). Form 2119 (Sale or Exchange of Personal Residence) is helpful in determining what gain, if any, may be excluded.

Additionally, you may elect to defer reporting the gain on the sale of your personal residence if within 18 months before or 18 months after the sale you buy and occupy another residence, the cost of which equals or exceeds the adjusted sales price of the old residence. Additional time is allowed if (1) you construct the new residence; (2) you were on active duty in the U.S. Armed Forces; or (3) your tax home was abroad. Publication 523 (Tax Information on Selling or Purchasing Your Home) may also be helpful.●

AD HOC CONGRESSIONAL COMMITTEE FOR IRISH AFFAIRS

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. FISH. Mr. Speaker, St. Patrick's Day 1981 still finds an Ireland divided and torn with strife and suffering. Unfortunately, the continued division and violence distracts us today from this otherwise joyous occasion.

I do see reasons for optimism however. Certainly one reason for hope is the work of the Ad Hoc Congressional Committee for Irish Affairs and their efforts to bring peace and justice to Ireland. The congressional members who have associated themselves with the committee, and I am pleased to say that I am one of them, have taken every opportunity to keep alive the issues of Northern Ireland by drawing the attention of Members of Congress to the developments which affect the Irish people. The committee has done much to keep the issue in the forefront and before the American people. I know the dedication of the members of the ad hoc committee toward this cause and I know that we will continue to work diligently toward our ultimate goal—to bring peace to all of Ireland; establish democratic principles and ideals; and to bring economic prosperity and stability to the region.●

WOMEN AND CHILDREN LAST

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BINGHAM. Mr. Speaker, in the Washington Post on March 14, Ellen

Goodman argues forcefully that women with children will be most hurt by the Reagan administration's proposed budget cuts in food stamps, aid to families with dependent children, day care, and child nutrition. But even more devastating may be the effect of these cuts on displaced homemakers. Goodman writes:

"Our safety net of programs," insists Reagan, "is intact." But the safety net never caught these women.

There are 4 million to 6 million displaced homemakers in the country; many are caught between AFDC and Social Security. For many of them, displaced-homemaker programs were a road to economic independence. This road is now virtually closed.

At the same time, the subsistence rut of economic dependence is pitted with new, treacherous holes. The proposed cuts in Medicaid, the proposed cuts in benefits to veterans' dependents and the possibility of raising the age of eligibility for Social Security are all directed at older women hanging on by their fingernails. There is no net over this abyss.

Mr. Speaker, we would do well to remember that each of the vast numbers the administration speaks of so casually represents an individual life.

I commend Ms. Goodman's article to my colleagues.

[From the Washington Post, Mar. 14, 1981]

WOMEN AND CHILDREN LAST

(By Ellen Goodman)

FT. MYERS, FLA.—Emma Dunmire is one of those people the president has described as selfish.

She fits his description—selfish member of special-interest group—because she has the egocentric nerve to oppose the budget cuts he has outlined.

The 48-year-old mother has the gall to come to the defense of that group of human beings known as displaced homemakers. These are women who made one terrible economic "mistake." They stayed home to take care of their children.

Here in Ft. Myers, Dunmire has run "Rediscovery," one of the 31 nascent programs across the nation for caretakers who have been left in the lurch by death, divorce, desertion, disease. Once a displaced homemaker with four children of her own, Dunmire has seen 300 women come into the program with little work experience and less self-esteem. She has seen them leave with a decent résumé, a prop of self-worth and a job prospect.

"We are talking here about really getting people back on their feet," she says.

It took four years for people like her to make the term "displaced homemaker" a respectable one, years to set up legislation, years to get programs operating.

Now they see it all going down the drain. The freezing of funds for the Comprehensive Education and Training Act means half of these programs will simply end March 31. It means the "lucky" ones, like Rediscovery, will find their budgets amputated so that they can barely limp along.

So Emma Bunmire, selfish special-interest groupie that she is, now knows what the rest of us had better understand: This administration, which lauds the traditional role for women, is making this choice riskier and riskier every day. There is no single job in America more economically perilous today than that of full-time motherhood.

The proposed budget cuts are aimed deadeye at women who are now, or have been for most of their lives, mothers at home.

Who will be hurt by cuts in food stamps? Women with children.

Who will be hurt by cuts in Aid to Families with Dependent Children? Women with children.

Who will be hurt by cuts in Medicaid, cuts in day care, cuts in child nutrition? Women with children.

This mother is threatened now with the specter of workfare—forced labor at deadend subsistence-level jobs—if she wants to stay at home. She is threatened with slashes in child-care deductions and training programs if she wants to go to work.

The cuts in programs to the poor affect mothers most, because they and their children are the poor. Two-thirds of the households headed by women with children receive welfare benefits. One-third of today's generation of children are likely to live in homes headed by women receiving welfare benefits before they are 18.

An enormous number of the mothers in this country are one man away from welfare.

But the Reagan proposals may have an even more devastating effect on the older women who have spent most of their adult lives taking care of others.

"Our safety net of programs," insists Reagan, "is intact." But the safety net never caught these women.

There are 4 million to 6 million displaced homemakers in the country; many are caught between AFDC and Social Security. For many of them, displaced-homemaker programs were a road to economic independence. This road is now virtually closed.

At the same time, the subsistence rut of economic dependence is pitted with new, treacherous holes. The proposed cuts in Medicaid, the proposed cuts in benefits to veterans' dependents and the possibility of raising the age of eligibility for Social Security are all directed at older women hanging on by their fingernails. There is no net over this abyss.

The older a woman is, the worse the story gets. One out of every two women can expect to be widowed by 65. One-third of all widows live below the poverty line. In 1979, the average income for a woman over 65 was $59 a week.

The plan to cut minimum Social Security will hurt these older, unemployed women alone the most. Only 15 percent of those who receive benefits are "double dippers," living off two pension plans. The bulk of them are women who spent a bare minimum time in the work force and now live off those payments.

These are the true stories, these are the true prospects for the traditional woman's role the Reagan administration so praises. These are the risks for a young woman who wants to be a full-time mother in the brave new world of fiscal responsibility.

Once again protection turns out to be a sham, and the caretakers of our society end up at the bottom of the heap. There, if they sift among the proposed budget cuts, they can find a pretty clear message. Any woman selfish enough to want to take care of her own children had better find a husband who will never leave her, and never get sick—and never, ever, die.●

COMMEMORATING HUNGARY'S WAR OF INDEPENDENCE

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. NELLIGAN. Mr. Speaker, March 15 marked the 133d anniversary of Hungary's War of Independence of 1848. This revolution was led by the great patriot, Lajos Kossuth. Although the revolution led by Kossuth was crushed 18 months later by the Russian and Austrian armies, its plea for freedom remains a symbol for freedom-loving people everywhere. When the people of this heroic nation were overrun, the United States invited Kossuth to come and welcome Americans of Hungarian ancestry. After Kossuth died in 1894, he remained a symbol in Hungary of man's search for liberty and independence. Since then, thousands of Hungarians have come to the United States seeking liberty.

The Hungarian people's desire for freedom was demonstrated during the historic 1956 uprising against Soviet rule. Tragically, the Soviet oppression continues to this day.

We look forward to the time when the Hungarian people will be free from foreign domination and will enjoy real independence.●

SUCCESS STORY IN LINCOLN

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BEREUTER. Mr. Speaker, having only recently completed a tour of the Kawasaki Heavy Industries, Ltd., plant in Lincoln, Nebr., and being very favorably impressed by the management and productivity of the all-American management and labor force in that plant, I was especially pleased to see their success highlighted in the following article and editorial from the Lincoln Journal and the Christian Science Monitor. This success story in mid-America is testimony that the skill and productivity of the American worker is still unsurpassed given the proper environment, management, and incentives.

[From the Lincoln Journal, Mar. 10, 1981]

SUCCESS STORY IN LINCOLN

At a time when U.S. industry is worrying about competition from imports, the Christian Science Monitor, an international newspaper, believes there is a lesson in the experience of the Kawasaki plant in Lincoln. The Monitor featured the Lincoln operation on its front page last week.

The lesson is essentially this: There is nothing inherently inferior about American workmanship. In both productivity and

quality, U.S. workers can do as well as foreigners, including the fabled Japanese.

Kawasaki's Lincoln plant surveyed dealers who sell motorcycles made in both Lincoln and Japan. Almost 80 percent said in overall quality the Lincoln machines were equal to or better than those from Akashi. On the question of mechanical soundness, the comparable figure was above 80 percent. There was a bit less enthusiasm for the quality of the paint finish; yet 59 percent gave the Lincoln product an "as good as or better than rating." In the number of machines turned out per hour of work, Lincoln workers matched their Japanese counterparts.

While the Lincoln venture is owned by the Japanese firm, all its workers and managers are Americans, most of them from Nebraska. Many of the plant's techniques are borrowed from Japan. Not all of them, however, might be transferable to other factories, because the U.S. work force is so varied and attitudes and work practices differ from one part of the country to another.

To a large degree, the success of Kawasaki in Lincoln can be attributed to the industry, intelligence, conscientiousness and pride of Nebraska workers.

Still, the conclusion reached by the Monitor is valid: "The Kawasaki experience suggests that Americans, by combining their own strengths with applicable Japanese techniques, can compete head to head with any workers in the world."

A number of U.S. firms have sent scientists to Japan and other foreign countries in search of the secret of industrial success. They might do better to send them to Lincoln, Nebraska.

[From the Christian Science Monitor, Mar. 6, 1981]

U.S. PRODUCTION, JAPANESE STYLE

(By Harry B. Ellis, staff correspondent)

LINCOLN, NEBR.—On the plains of Nebraska stands living proof that American factory workers can build a product as high in quality as the same thing made in Japan.

Possibly a little bit better, in the case of the Kawasaki motorcycle factory outside Lincoln.

Some time ago, Kawasaki Heavy Industries Ltd.—owner of the Lincoln plant—borrowed 10 American welders to help out temporarily at the main Kawasaki plant at Akashi, Japan.

"The Japanese thought the Americans were so good," says Bob Summers, personnel manager at the Lincoln plant, "that they used them to pace their welding lines at Akashi."

Some 1,500 Kawasaki dealers throughout the United States get their motorcycles from both the Akashi and the Nebraska plants—in other words, cycles made wholly by Japanese and others made by Americans.

Dennis W. Butt, plant manager at Lincoln, surveyed the dealers. Which machines were better?

On overall quality, Mr. Butt says, 79 percent of dealers said the Lincoln product was "as good or better" than the Japanese machine.

On mechanical soundness, the comparable figure was over 80 percent.

Only on the quality of the paint finish did the approval rating drop—to 59 percent.

"You will note," Butt told his American workers, "that our paint quality is still perceived to be marginal by our dealers. Improved paint quality needs to be an objective for 1981."

In productivity, says Summers—that is, the number of machines fabricated, painted, and assembled per hour of work—"we match the Japanese."

The Nebraska facility, opened in 1975 to help supply the growing U.S. market, is wholly owned by a Japanese firm demanding top quality. But in the Lincoln plant, all managers and workers are American.

The result of this mix is success, both for Japanese owners and American workers. Why?

"It hasn't anything to do with the U.S. vs. Japan," says Butt, a cheerful giant of a man who grew up on an Iowa farm, served in the Marines, worked on an assembly line at Davenport, Iowa, and put himself through college nights and weekends.

"You have to define your factory's problem. Then you assess the strengths and weaknesses of your people." Clearly, to Butt, his 650 American workers—average age 26, 95 percent from Nebraska—are a major reason why Kawasaki at Lincoln succeeds. "Productivity and quality," he says, "were not problems with these Nebraskan workers."

But the plant did have a problem with inventory control at a time when soaring interest rates made it prohibitively expensive to build up excess stocks of materials and parts.

"Our problem at Lincoln," he said, "was putting the right part at the right place at the right time."

So, at the beginning of 1980, the Lincoln plant adapted an element from a complex production system developed in Japan by Toyota, called Kanban.

The whole system, according to Butt, has perhaps 15 objectives designed to make production totally efficient—a system which catapulted Toyota, experts claim, into the most productive automaker in the world.

The element of Kanban adapted at the plant relates to inventory control and is called by Toyota "just-in-time." "It means," says the Lincoln plant chief, "that you make only those parts you need, when you need them."

Persuading American suppliers of basic parts and materials to go along with more frequent delivery of small lots took some doing, Butt and Summers concede.

But it was done and now, according to the plant manager, "the inventory problem is solved." Storage, interest, and handling charges have shrunk.

A key to making the system work is quality control all along the line, including parts and materials sold to Kawasaki by U.S. suppliers. Defective materials or parts will shut down the Lincoln line, since inventories are not stockpiled against such contingencies.

This requires, among other things, mutual trust between management and workers on the line—a principle of Kanban, according to the Toyota model.

"We call it vertical enhancing of the job," says personnel manager Summers, "or adding responsibility to the job. We also add quality responsibility—correcting one's own errors."

In a typical American factory, inspection is done in steps along the assembly line. At Kawasaki in Lincoln, parts are inspected as they come in. No further inspection occurs, except by each worker in his own sphere, until the finished motorcycle or snowmobile rolls off the line.

If an error is found, it is traced back to the worker concerned, who corrects it.

The Kawasaki experience suggests that Americans, by combining their own strengths with applicable Japanese techniques, can compete head-to-head with any workers in the world.

But not all aspects of Kanban are easily applied in the U.S. Most Americans, Butt believes, would refuse to give up their individual freedoms in exchange for guaranteed lifetime employment with particular firms.

U.S. labor laws discourage some practices common in Japan, such as workers' circles meeting in their homes to discuss production problems and solutions.

American workers could do this, too, but their employers would be obliged, under American law, to pay them for so doing.

"In Japan," Butt says, "there is homogeneity. In the U.S. there is not. The fact is, we can't do the same things in Lincoln, with Nebraskans, that are done in Chicago or New York.

"Sure, our culture is different from that of Japan. But it is different in New York from Lincoln, Neb. It is just as possible for us to adapt a Japanese system as one from Chicago or New York."

A similar point was made in Washington recently by Akio Morita, chairman of the famed Sony Corporation.

"We Japanese," he said, "are homogeneous. We can understand each other without talking to each other."

When he first visited Sony plants in the U.S. he said, he was astonished by the diversity of workers—different colors of hair, eyes, and skin, as well as varying backgrounds. "We find," he said, "that we have to talk to [American] workers. That is, you need strong leadership to get a uniform response from a diverse work force."

"The bottom line," Butt said, "is that you weigh the strengths and weaknesses of what you have to work with, particularly your people. Then you try to make their strengths productive and their weaknesses irrelevant to the task at hand."●

ST. PATRICK'S DAY—1981

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. HOLLENBECK. Mr. Speaker, it is a pleasure for me to take this opportunity, during the St. Patrick's Day festivities of 1981, to rise and join my colleagues in acknowledging the many contributions of Irish Americans throughout our Nation. I consider it an honor to join my many friends of Irish descent in honoring the spirit and memory of the patron saint of Ireland, Saint Patrick, who epitomizes the very character of Ireland. By persevering against a climate of fear and distrust and by applying the strength of his faith to the land, he made Ireland one of the greatest nations on Earth.

Americans of Irish descent have every reason to be proud of their heritage and of their patron saint. I know that their fellow Americans share in that pride, and I believe it is only appropriate to pay tribute to the many significant contributions by the sons and daughters of Erin in our culture, our politics, and especially in our art. Our Nation, time and time again, has been generously rewarded for opening

her arms to the Irish pilgrims of the last century.

However, like many Irish Americans, I find the joy of this occasion somewhat dampened by the continuing strife in Northern Ireland. As a member of the Ad Hoc Congressional Committee on Irish Affairs, I wish to reiterate my strong opposition to all violence, civilian or official, in Northern Ireland. I pledge that I will work to end the human rights violations which are taking place on a daily basis throughout the region. I, for one, will continue to use all the resources of my office in an effort to ease the plight of those being denied their inalienable rights as human beings.

Finally, it is my hope that the memory of Saint Patrick will help inspire a spirit of compassion and reconciliation to bring justice to all the oppressed in Northern Ireland.●

THE NEEDY NEED LEGAL AID

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. EDWARDS of California. Mr. Speaker, I want to call to the attention of my colleagues a March 10, 1981, editorial which appeared in the San Jose Mercury. The editorial discusses the Reagan administration's proposal to eliminate legal services for poor people.

As the writer points out, the great majority of legal services provided by legal aid groups throughout the country deal with individuals and families. People who could not otherwise obtain legal assistance go to these groups for help with divorce or child custody matters, for assistance in a tenant/landlord dispute, for help in dealing with a government agency or for legal counsel in a problem with an employer. If the Legal Services Corporation is destroyed, where will these people go for legal help?

I encourage my colleagues to read the article which follows. I call their attention in particular to the closing paragraph:

If the administration finds abuses in the program, weed them out by all means. To kill the whole program, though, is to add an unnecessary burden to the poor.

After reading this perceptive editorial, I hope my colleagues will strongly support the legislation introduced by the gentleman from New Jersey and the chairman of the Judiciary Committee (Mr. RODINO) to reauthorize the Legal Services Corporation.

THE NEEDY NEED LEGAL AID

The safety net that budget-cutting President Reagan said he was leaving in place for the needy already shows a gaping hole.

The administration's proposal to eliminate all federal aid—$321 million—for free legal services for the poor could leave the needy unprotected in this lawyers' world we have allowed to grow up around us.

Many legal aid groups are controversial. One of Ronald Reagan's most celebrated battles when he was governor of this state was with California Rural Legal Assistance. The then governor's effort to squash that agency failed, ironically, after President Nixon's Republican administration sided with CRLA. Reagan apparently has a long memory. CRLA is one of many organizations that would be crippled and perhaps killed by his latest edict.

Class action suits brought by legal assistance units leave them open to charges of politics. Some such suits, of course, do push political aims. Others, though, deal with legitimate civil rights and consumer protection issues. As long as the class action suit is part of our system, the poor have every right to make use of it.

In any event, class action litigation is but a small part of the work done by most legal aid groups. CRLA reports about 90 percent of its cases today involve individuals.

That also is pretty much the story with the Community Legal Services-Legal Aid Society of Santa Clara County. In a typical month, the organization handles slightly fewer than 2,000 cases, according to Eugene Flemate, interim directing attorney for the unit. About 30 of those will deal with more than one person, though the number that could be considered class action is smaller than that, he says. The organization has been in the news with actions concerning hiring of bilingual policemen and school desegregation.

The vast bulk of its cases, however, concern an individual or a family—a beef with a landlord or employer, a couple seeking to retain or regain custody of a child, a destitute person trying to get welfare aid, a Social Security disagreement too complicated for the average person to handle himself, an effort to unravel the complexities of Medical regulations.

Legal Services Corp., the conduit for federal funding, is providing $672,000 this year to the Santa Clara County legal aid unit, nearly 90 percent of its budget. New sources might be found to make up part of the loss of federal money, but it is doubtful the organization would be able to operate at anywhere near its present level. That means poor people would be without legal help in many cases important to them.

William Reece Smith Jr., president of the American Bar Association, has joined the chorus protesting the proposed cut.

If the administration finds abuses in the program, weed them out by all means. To kill the whole program, though, is to add an unnecessary burden to the poor.●

THE COMING GLOBAL TRIUMVIRATE: JAPAN, IRELAND, AND THE UNITED STATES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MINETA. Mr. Speaker, years ago when I first decided to enter politics, one of my good friends in San Jose gave me the benefit of his sage, political wisdom that I have used successfully ever since. He told me that I should never put my picture on any campaign advertisement, whether it was a billboard or whatever. His reasoning was that with my name, the Latinos would think I was a member of their community, the Italians would think I was Italian, and the Japanese would know who I was. With that kind of support, who could lose?

While I have been happy to be confused as a member of two of these fine groups and to belong to one, I must confess my regret that no one has ever asked me if I were Irish. And what a fine heritage it would be to have, too. To belong to a nation whose people have contributed so much to literature, the arts, to public service, to science would be such a great thing. I still hold out some hope that someday someone will confuse me with some famous hurling player from Clare, or maybe even a fiddler from Galway.

Until then, I will content myself with wishing my colleagues a happy Saint Patrick's Day and offer this poem in the spirit of this great day.

RETURN OF THE EMMIGRANT

Snugly, among these rough-hewn hills,
The slow train nudges cityward
Rain washing away
Atlantic brine, casual
Droppings from exotic birds.

Homing at last,
Slipping through these familiar
Green fields,
Slow certainties wash
All interims away,
Until we are an Old Master,
Gradually emerging.

All aspects of your face
Have followed me, from Limerick,
Until this, last stop,
(Behind schedule), when Dublin,
Like an old coat,
Shrugs me welcome.

I imagine our first quiet pint
No time or countries
Between us now.
You smile.
In wonder, my fingers
Trace your cheek's curve.

—Patricia Cullen.●

PEACE BEGINS AT HOME

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MICHEL. Mr. Speaker, the Saturday Evening Post has recently published an article by President Ronald Reagan on the subject of peace. I commend this stirring piece to the attention of our colleagues and, indeed, to anyone who wants to understand the vision that inspires President Reagan.

I am inserting in the RECORD the article "Peace Begins at Home" by Ronald Reagan, from the Saturday Evening Post, April 1981.

PEACE BEGINS AT HOME—WORLD PEACE IS CONCEIVED IN THE HEART, IS NURTURED IN THE FAMILY AND REACHES MATURITY IN THE NATION.

(By Ronald Reagan)

As we enter—all of us—four of the most perilous years in American history, our responsibility begins with the "peace the world cannot give," the peace of the spirit that comes only through religious values.

The responsibility of those of us in public life is toward the peace of the world, the kind of peace that demands our readiness to protect and preserve it.

Throughout scripture we see reference to peacemakers who through their actions—not just their words—take the material of this imperfect world and, with hard work and God's help, fashion from that material peace for the world. I am convinced that this understanding of how peace is gained must guide and inspire this nation in the years ahead.

We have to stop thinking of peace as just the absence of war or violence. We have to stop thinking of peace as something that is given, as something that is somehow dependent on what others do. We must be certain that we do not mistake an illusion of peace for genuine peace.

We must realize that what we do—as workers, as members of families, as active and concerned citizens—helps to build peace. Peacemakers exist everywhere, not just in diplomacy or government. In every home, in every classroom, in every factory, on every farm, there is an opportunity to help build peace, if only we will recognize it.

Peace in the world is built by our actions and our prayers, not once and for all, but over and over, each generation making its contribution. It is built by thoughtful action based on our shared values. Together we can contribute to the four kinds of peace the world needs.

First, there must be peace in the human heart. Each individual must strive toward that kind of peace the world cannot give.

Next, there must be peace in the home. American families know that the family structure is under attack from many sides. The message we instill of love and concern for others and of commitment to moral values helps the families to sustain and spread those values in their communities.

Of course, those of us in political life can help in this effort by doing all we can to stop actions that destroy confidence and trust in our institutions. Government can aid family life by reducing federal spending which now causes the dangerous inflations that is ravaging our society. Inflationary interest rates make homes hard to acquire.

Third, there must be peace in our nation. This refers not only to a diminishing of crime or violence but to the support of a view of America that reflects the essential optimism and faith and hope and love of the Judeo-Christian message. That message must emphasize the values that we share rather than momentary questions that may divide us. We must not hesitate to defend those values, and this requires the courage of leadership. And a presidential administration must demonstrate its leadership of the nation, because it is only through the cooperation of all Americans that the kind of domestic peace we want can be achieved—a peace in which creativity, imagination and patriotism can flourish.

Finally, there must be peace in the world. It is the first task of statecraft to preserve peace. Our commitment to peace is fundamental and enduring, and it must remain at the center of our foreign policy. The peace we seek to build must be principled; it must rest on our great strength and our dedication to freedom. That is why I believe the peace we seek must be such that freedom can flourish and justice prevail.

What is done in the State Department and the Defense Department and other parts of the executive branch matters for peace. What is said over the Voice of America and Radio Free Europe and Radio Liberty matters for peace. What happens in the Commerce Department and the Labor Department and the Treasury Department matters for peace.

Last year I was asked what one contribution my campaign for the presidency had tried to make. My answer was that I had attempted, in all I did or said, to show that peace is built by everything we do—not just by our national security measures, but by government attitudes toward the needs of hardworking men and women who pay their taxes and pay their bills. Not just by our commitment to defense, but by our compassion toward the powerless, to the very young and the very old, to all those in need and to all those for whom the works of mercy are a daily blessing.

Government alone, however, cannot make peace in the world. It takes every American family, in the daily duties we are called upon to perform, no matter where—on the job, in the home, at school—to do the work of peace.

Last autumn I had the honor of addressing a meeting of B'nai B'rith. In my remarks, I drew upon a passage from the Psalms. It tells of the vision of the psalmist, a vision of a world where peace reigns.

"May our garners be full, affording every kind of store;
May there be no breach in the walls, no exile, no outcry in our streets.
Happy are the people for whom things are thus. . . ."

That is the vision that we can bring to millions of Americans. It is the vision that must inspire our administration. It is an ideal worth the energy and the dedication and the prayers of all Americans.

With the American people's help and prayers and with God's blessing, we will build peace. We will make peace grow. In all we do we must be truly peacemakers—for ourselves and for our children, for our nation and for the world.●

TRIBUTE TO TOM IORIO

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. ROYBAL. Mr. Speaker, I was deeply sorry to hear of the death of Tom Iorio this past weekend. For 36 years he served the House with a dedication and loyalty that few can match. From his first job on the Hill as a House floor aide, to his latest position as Deputy Sergeant at Arms, Tom demonstrated his extraordinary abilities, his unselfish attitude, and his great integrity. He was a good friend to Members and employees alike, and the many awards he received during his years on the Hill bear witness to the respect he was given by all who came into contact with him. I especially identified with Tom's devotion to worthwhile causes. I know that he was tireless in his efforts to improve relations between the United States and Italy, and for these efforts was decorated by the Italian Government in 1974. There is no doubt that Tom Iorio was an excellent House employee and an outstanding human being. He will be sorely missed by all who knew him. I extend my deepest sympathy to his wife and family.●

OAKLAND WINS ANOTHER TITLE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. STARK. Mr. Speaker, I would like to take this opportunity to pay special tribute to Oakland's Bishop O'Dowd High School's mens basketball team for winning the State basketball championship.

Mr. Speaker, the team has upheld the city's rich tradition of sports champions by winning the first basketball tournament since 1928. I praise these young men and their coach for their fine sportsmanship and their dedication to basketball throughout the season and I am glad to see their commitment was amply rewarded.

I would also like to take this time and offer my congratulations to the Bishop O'Dowd High cheering section. Their support for the team was rewarded by winning the tournament cheering award.

The city of Oakland and the State of California can be especially proud of this high school for they represent the essence of fine team play and school spirit.

Mr. Speaker, at this point I include a summary of the team's championship game victory:

O'DOWD STATE CHAMP, 70 TO 69

(By Scott Strain)

John Shaddle hit two free throws with seven seconds left to give Bishop O'Dowd a 70-69 victory over Castlemont in the boys California Interscholastic Federation 3A State Tournament championship game at the Oakland Coliseum Arena Saturday night.

"We were ready to play," O'Dowd coach Mike Phelps said. "The OAL had taken it (the tournament championship) six years in a row. It was a time for a Catholic team to win it."

The Dragons had to overcome a ferocious Knight comeback in the third quarter which was led by guard Michael Manning, who finished with 32 points.

Marvin Harris had broken a 63-63 tie with two free throws with 2.26 left to give Bishop O'Dowd a 64-63 lead. The Dragons' Tony Jackson hit a layup with 57 seconds to give the Dragons a three-point lead at 66-63.

But Harris was hit with a foul and Richard Ross sank two free throws to cut the margin to one with 33 seconds left.

Castlemont's Chuck Johnson fouled Andre Rivers with 22 seconds left and the Dragon guard converted both shots for a 68-65 lead.

Rivers said he really didn't have too much doubt he would make them.

"A couple of games ago, I missed three free throws. And earlier tonight I missed one. After I made the first free throw I felt good and the second just followed on through. My teammates gave me a lot of encouragement."

Manning streaked down the court and converted a layin with 10 seconds left to cut the margin to one again.

Ross intentionally fouled Rivers with seven seconds left but the Dragon guard converted both foul shots to clinch the victory.

Johnson hit a layup at the buzzer for Castlemont's final points.

The big story in the first half was Castlemont's Lathan Wilson. The Knights' 6'5" senior forward was shadowed by as many as three Bishop O'Dowd players and was ineffective on the offensive end of the floor. It also didn't help when he picked up his third foul with 5:35 left in the second quarter and had to sit out two minutes.

Wilson's free throw touch didn't leave him though—9 of his 11 first-half-points came on the line.

Manning, normally a driver, was content to exploit the holes when the Dragons sagged in on Wilson. Manning kept the Knights in the game with 16 points, most of them coming on soft jump shots.

Phelps also took a gamble when he took Jackson out of the game with 1:17 left in the first quarter.

"He had two fouls," Phelps said, "So I took him out. I always have great confidence in my bench. (Dave) Townsend hit some great shots and (Jay) Jacobs got some big rebounds while Jackson was out."

Jackson had led a 15-6 Dragon run to open the game, scoring 10 points on line-drive jumpers and follow shots.

But the Dragons used their superior depth to keep Castlemont at bay in the first half—shuffling players in and out to offset Jackson's loss.

Dave Townsend contributed eight points off the bench to lead O'Dowd during this period. With O'Dowd up by 10 at 17-7 in the first quarter, Castlemont outscored O'Dowd 12-4 to cut the lead to 21-19 at the quarter mark.

Wilson scored five points all on free throws to lead the Knight charge.

Wilson had his trouble from the field, hitting on only three of 13 shots before fouling out with 6:25 left in the fourth quarter.

Phelps gave a lot of the defensive credit to Harris.

"He has stopped everyone he has guarded all year. Without him, we would've won 10 fewer games. He gave Wilson five inches and spotted him 50 pounds. What can I say? He did a great job.●

CONGRESSIONAL SALUTE TO NATALE AND GREGORY VELARDI OF WAYNE, N.J.—DISTINGUISHED CITIZENS, ESTEEMED PUBLIC SAFETY OFFICERS, AND COMMUNITY LEADERS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. ROE. Mr. Speaker, on Saturday, March 21, the residents of my hometown of Wayne, Eighth Congressional District and State of New Jersey, will join with P.O.L. Fire Company No. 2, Inc., of Wayne, N.J., in testimony to the good works of two distinguished citizens, esteemed public safety officers and community leaders—the Honorable Natale Velardi and the Honorable Gregory (Hank) Velardi, brothers of distinction, whose standards of excellence during the past 25 years in seeking optimum protection from the perils of fire for all of our people have truly enriched our community, State, and Nation.

Mr. Speaker, I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to Nat and Hank Velardi and share the pride of their families—Nat's wife Marie and their three sons, Frank, Anthony, and Michael; and Hank's wife Eleanor and two sons, Frank and Gregory—as they celebrate a milestone of achievements in their family endeavors.

As firemen who daily risk their lives to protect and safeguard the lives and property of our people, Natale and Gregory have served with courage and valor in the vanguard of our fire service brigade in Wayne. Their record of performance during the past quarter of a century—for a total combined service of a half-century—with P.O.L. Fire Company No. 2 is applauded by all of us.

Hank joined P.O.L. Fire Company No. 2 in 1956, held the esteemed office of captain, and has been a member of the fire company's building committee for 12 years. He is presently working diligently with other members of the building committee in their quest to construct a firehouse at a new location. He is an exempt fireman.

Nat also joined P.O.L. Fire Company No. 2 in 1956 and has held the prestigious offices of president for 10 years and vice president for 7 years. He is also a trustee of the Firemen's Relief Association and an exempt fireman.

Mr. Speaker, our people are also most grateful to both brothers for their exemplary service in the armed services of our country.

In 1942, Nat joined the Army and served until 1945. He was stationed for 33 months in Africa and Europe, attaining the rank of sergeant. He is a most active, dedicated member of the American Legion Post No. 174.

Gregory's service in the U.S. Army spanned the years 1951 to 1953.

Mr. Speaker, Natale Velardi was 6 years old when his family moved to Wayne in 1927. After attending Wayne schools, he worked for Mack Molding Co., and received his plumbing license in 1946.

Gregory Velardi was born in Wayne in 1929, attended Wayne schools and Pompton Lakes High School. He is presently employed as a maintenance carpenter with the sports complex in the Meadowlands of New Jersey.

Mr. Speaker, Nat and Hank Velardi have achieved in their lifetime the respect and esteem of all of us who have had the good fortune to know them. It is to their modesty in their achievements, their outstanding expertise in their chosen fields of endeavor, the warmth of their friendship, and sincerity of purpose in the American way of life that I seek this national recognition of their service to our community and fellow man.

We are especially appreciative of their many contributions to the quality of life and well-being of our citizenry in providing optimum public safety to the people of our community, safeguarding and protecting the property and physical beings of all in their unselfish, dedicated leadership efforts with P.O.L. Fire Company No. 2 during the past 25 years. For their personal commitment and lifetime of good deeds in service to our people, we do indeed salute two outstanding gentlemen, good friends, and great Americans—the Honorable Gregory Velardi and the Honorable Natale Velardi of Wayne, N.J. ●

POSTAL INSPECTION SERVICE HONORS CONSUMER REPORTER DAVID HOROWITZ

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. DORNAN of California. Mr. Speaker, too often, people who fight for the underdog or the victim are ignored. That's why I was very pleased to learn that America's leading investigative consumer reporter, David Horowitz, has been honored with the prestigious Chief Postal Inspector's Special Award.

Traditionally presented to prosecutors and law enforcement officials, Mr. Horowitz is the first journalist to receive the Postal Inspection's highest award for excellence in the administration of justice.

Already the recipient of three Emmy Awards, as well as commendations from the State of California, the city

of Los Angeles, and the Daughters of the American Revolution, Mr. Horowitz was specifically cited by Chief Postal Inspector Kenneth H. Fletcher for being instrumental in the success of the Inspection Service's program to prevent mail fraud through consumer awareness. In one case alone, Mr. Horowitz was responsible for keeping many innocent consumers from losing thousands of dollars in a mail-order scheme selling bogus vacation certificates to Las Vegas.

Chief Postal Inspector Fletcher has noted that David Horowitz "began fighting for consumers before it was popular." Postmaster General William F. Bolger has called him "the country's town crier of public ripoffs." Every television market in the United States should either carry Mr. Horowitz's show or create a similar service for the consumer.

It's my pleasure to bring Mr. Horowitz's well-deserved award to my colleagues' attention. Too often, fraudulent schemes are only noticed after the crime is committed. Through investigation and education, David Horowitz prevents their happening. I'm proud to call him a friend.●

A VICTORY WOMEN CAN CHEER

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BEREUTER. Mr. Speaker, the distinguished columnist Dave Broder recently wrote an excellent article about the new executive director of the Republican Congressional Campaign Committee. Nancy Sinnott was the subject of his column, "A Victory Women Can Cheer." It is a victory all of us can cheer.

I have been privileged to be a member of the Congressional Campaign Committee and commend our chairman's action with regard to the appointment of Nancy Sinnott. She has by her own ability and accomplishments affirmed what our chairman has said: "Nancy has earned the right to the job."

My personal congratulations and best wishes go to her in this new position. I have every confidence she will perform exceptionally well.

I submit Mr. Broder's article to be reprinted in the CONGRESSIONAL RECORD.

The article follows:

A VICTORY WOMEN CAN CHEER

(By David S. Broder)

It has not been exactly a banner year for Republican women. The only Cabinet-level job President Reagan handed to a woman went to a Democrat, Jeane Kirkpatrick, the ambassador to the United Nations. Sub-Cabinet and senior White House staff jobs for women have been as scarce as—you should excuse the phrase—hens' teeth.

But last week a Republican woman achieved something unprecedented. Nancy Sinnott, 30, was named executive director of the Republican Congressional Campaign Committee. So far as memory and records show, she is the first woman to fill the top professional staff job in any of the "Big Three" political committees of either party. Sinnott will be running a staff of 40 people and managing a budget of more than $35 million in the two-year effort Republicans will make to end the Democratic majority in the House of Representatives in 1982.

Each party has had a woman national chairman once in its past. Jean Westwood was put in the Democratic chairmanship by George McGovern and Mary Louise Smith was named Republican national chairman by Jerry Ford. While protecting their patrons' interests, they both hired their own pros to manage their shops. Neither the national committee, nor the senatorial compaign committee, nor the congressional committee of either party had previously found a woman it thought fit to fill the top job reserved for a full-time political pro.

In that sense, Sinnott's appointment is another landmark in the slow but certain emergence of women as full partners in the working of the American democracy.

What the committee chairman, Rep. Guy Vander Jagt (R-Mich.), who recommended Sinnott to succeed Steve Stockmeyer, says about her reflects the standards by which all women in politics would like to be judged.

"Nancy earned the right to the job," Vander Jagt said. "She's done her other jobs here so well, she was the only choice." Sinnott has been on the committee payroll for four years, the first two as a field representative in New England and Illinois, the last two as campaign director—the deputy to the retired Stockmeyer.

"Being campaign director is the toughest job in the whole committee." Vander Jagt said. "Every Republican representative and senator is putting pressure on you to back their own favorites, even when the objective evidence indicates the money and resources should go to other races. It takes tremendous strength to say no to all those people, and she is as tough as steel.

"But even when they'd been turned down by her," Vander Jagt added, "they'd say, 'She's quite a lady.' "

Sinnott, whom an old chauvinist like myself would describe, if I dared, as a slim brunette with the looks of the young Joan Bennett, is another kind of rarity in today's Republican capital: an avowed feminist. The child of a Chicago businessman, she went to Wheaton College, in Massachusetts, also taking courses at Williams College.

It was in the liberal tradition of the underdog Massachusetts GOP that she received her political training. While still in college, she worked on the campaign staffs of Gov. Francis Sargent and Lt. Gov. Donald Dwight and then in their offices, assisting in reorganization of the state's sprawling executive agencies into a Cabinet-style government and in the implementation of the school racial-balance decisions.

At the urging of then-Senator Edward W. Brooke (R-Mass.), she ran for vice chairman of the state GOP in 1975 and defeated three opponents for the job. In 1976, she managed Arthur Mason's House campaign against then-representative Robert F. Drinan (D-Mass.). Although Mason lost, his campaign drew more Republican votes than any other race any Republican has ever run in that district.

It was the Mason campaign that brought her to the attention of the Republican Congressional Campaign Committee, a powerhouse political operation that every two years sets new records for its fund-raising and campaign services.

As campaign director and now as executive director, Sinnott has helped recruit and elect Republicans of all varieties, working as hard on the campaign of Clay Shaw, a Florida conservative, as on that of Claudine Schneider, a Rhode Island feminist—both of whom were elected last fall.

When told that one right-wing political action committee director regards her as a libertarian while another describes her as a liberal, Sinnott does what any smart pol would do. She laughs and says, "Well, actually, I'm neither. I'm a Midwesterner like Dave Stockman, and it's easy for people like us to be progressive on foreign policy and civil rights, pragmatic in politics and conservative in the economic area. Fiscal sanity and personal freedom look to me like they go hand in hand, and I don't want the government so out of check that it threatens either one of them."

In a season when they have few victories to cheer, a great many women, including Democrats who have no desire to see Sinnott succeed too well in her job, are offering congratulations to her for getting there.●

HONORED BOY SCOUTS

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MORRISON. Mr. Speaker, I wish to congratulate three outstanding young men in my home district in Washington State. On March 24, 1981, T. J., Todd, and Ty Brewster, three brothers, will stand before a national court of honor to receive the Boy Scouts of America Eagle Award. This must be considered an outstanding accomplishment not only for them, but their parents, friends, and community.

The award of Eagle Scout is the highest achievement possible in the Boy Scouts, and comes only after an effort that takes considerable family teamwork and perseverance. I congratulate these three young men for a job well done.●

ARE ALL THE BUDGET CUTS UNKIND?

HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. DANIEL B. CRANE. Mr. Speaker, the noted syndicated columnist Mike Royko recently wrote an article entitled, "Are All Cuts Unkind?" In the article Mr. Royko discusses the proposed Reagan budget plan. Since Mr. Royko has never been known as a conservative, I was most curious to see what he had to say.

In the column Mr. Royko notes that President Reagan is doing precisely what he said he would do if elected, cut Federal spending. To those who are aghast, I say is not it about time we had someone in our highest elected office who fully intends to follow through on his campaign pledges? It is astonishing to me that there are those today who are now saying, "Good grief, what if Reagan really means it." Well, the news is that he does.

To those special interest groups who say, "cut the other fellow's program but do not dare cut mine," I would only observe that the overwhelming majority of the mail I have been receiving is in favor of the budget cuts. Many have expressed the view that the only problem with the budget cuts is that they still are not deep enough. Mr. Royko has the best explanation for this sentiment when he notes that Congressmen would be wise to keep in mind the fact that, * * * Reagan's economic plan is something most people want. It is their money, after all.

Since Mr. Royko's column eloquently sums the reasons why the Reagan budget package needs to be enacted as a whole, I would like to bring it to the attention of my colleagues. The article, from the February 20, 1981, edition of the Chicago Sun-Times follows:

[From the Chicago Sun-Times, Feb. 20, 1981]

ARE ALL CUTS UNKIND?

(By Mike Royko)

A Democratic politician was on my phone only minutes after President Reagan finished his economic message. He had several hot ideas for ways I could try to shoot holes in some of Reagan's proposals.

There is no sport I enjoy more than target practice on a politician's programs, whether he is a president or an alderman. But not this time. I will have to disappoint anyone who is in the mood for Reagan-sniping. I have two reasons. Maybe more will come to me as I go along.

First, Reagan said nothing that he had not promised during this campaign. And these promises are what led to the huge landslide. If the overwhelming majority of voting Americans thought they were good ideas only three months ago, they probably think they are better ideas now.

So Democrats—especially congressmen—would be wise to keep in mind that Reagan's economic plan is something most people want. It is their money, after all.

And the Democrats in Congress should also remember that they and a Democratic president had four long years to do something about this country's economic mess, and they did nothing but act goofy and make it messier.

Since they could not do anything but bicker, bicker, bicker for four long years, then they should be sporting enough to give somebody else a chance to try something.

Second, I can not really argue with most of Reagan's programs. Not after writing countless columns about the bloated federal bureaucracy, federal programs that only a computer could understand, and Washington crazies running around the country telling everyone how they should live and spend their money.

For example, I can not quarrel with cutting the food stamp program when one of my closest friends—a person who can usually be counted on to say the liberal thing—grinds her teeth every time she goes food shopping and sees someone using food stamps to pay for frozen lobster, while she has been carefully selecting the cheapest cuts of meat.

Should one out of every 10 people really be drawing food stamps, paid for by people who are working hard and barely making ends meet themselves?

And when Reagan talked about the special unemployment benefits that only auto and steel workers receive, I remember a Florida winter vacation I took a few years ago.

I began the vacation at a time when there were widespread layoffs in Detroit because of a temporary fuel crisis. Suddenly, the resort area where I was staying was flooded with campers with Michigan license plates. Floridians said they had never seen anything like it.

Now, I feel for the unemployed. I would like to see everyone have a job (especially all teen-agers—and the dirtier and harder the better).

But most of my friends were in Chicago working because they couldn't afford to go to Florida and sit on a beach or fish. Besides supporting themselves, they had to pay their income taxes.

So it didn't make sense to me that people in the freezing North would be working to pay income taxes that would then be used to provide unemployed people with a chance to take a long vacation in the sunny South. I don't think that's the way unemployment compensation was intended to work.

Then there is the student loan program. As I understand it, I'm pretty dumb because for the last four years I did not have my oldest son get a loan.

The reason I didn't was because I could afford to pay his tuition. And my Milwaukee Ave. background gave me a work ethic that says: If you can pay for it, don't borrow.

But I'm dumb because I could have let him get a loan, which would be repaid at very moderate interest rates—and in shrunken inflationary dollars—after he finished college.

Then I could have taken the money I used to pay his tuition and invested it at much higher interest rates. And when we finally added the numbers, I would have turned a neat profit. The interest I earned on an investment would have been bigger than the interest I later paid on the student loan.

But when somebody makes a profit, it's coming from somewhere. And in the case of the student loans, the profit I could have made would have been coming from somebody else's taxes. And it doesn't seem fair that people who earn enough money to pay college tuition should be indirectly subsidized by those who can't.

Nor does it seem fair that free hot lunch programs should be provided for children whose parents can afford to provide their own hot lunches.

Now, before my liberal friends call to scold me about turning into a heartless, right-wing, capitalist running dog of Wall Street, please. . . .

Cross my heart and hope to die—I am all for giving food stamps to people who really need them. But I mean really. I grew up in a Depression household where women could perform kitchen miracles by stretching a chicken or a piece of rockhard beef all around the dinner table. But if the ladies had shopped for frozen convenience foods and TV snacks, we'd have eaten the wallpaper three times a week.

And I'm for unemployment comp. But not a special program that lets some people live better while out of work than while on the job.

I'm for helping any struggling family get a kid through college. I'm for giving hot lunches to poor families. I'm for most of the major welfare programs. My heart bleeds with the best of them.

But you have to be blind not to see that in the 48 years since Roosevelt's New Deal began, one Congress after another has had one New Deal after another. And their motto has been: When in doubt, give somebody something.

If nothing else, the law of averages says that once in a while, some program isn't needed and ought to be dumped.

Reagan's cuts might not all be fair. But until I see somebody's ribs sticking out because of him, I'm not going to wring my hands.

In the meantime, I admit that after four years of listening to The Peanut drone on and on about how tough his job is, how complicated everthing is, and how nothing works, it was almost a shock to hear somebody say: "Here's what I'm going to do."

See? The day after the election I said that having tried all kinds of presidents recently, we might as well try one who isn't too bright.

And I was right. Reagan hasn't figured out how tough the job is, and how complicated it is, and how nothing works.

If he just stays that way, maybe it will work.●

TRIBUTE TO TOM IORIO

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 11, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I rise today to pay tribute to Mr. Tom Iorio, of late the Deputy Doorkeeper of this body. I came to know Tom very well during my 12 years in this body and was greatly saddened by his recent passing.

Tom was a man who was greatly respected by all who knew him. He dealt with Members of this body fairly, with honesty and dignity. He carried out his duties faithfully and was always a credit to the Congress of the United States.

It is with deep regret that I noted his death and I wanted to express to his family my sympathy. I join with them in their sorrow.●

GOODWILL INDUSTRIES NATIONAL BOARD OF DIRECTORS MEETS IN WASHINGTON

HON. NORMAN D. SHUMWAY
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. SHUMWAY. Mr. Speaker, it has been my pleasure to work with Goodwill Industries for many years. I have been associated with the Goodwill Industries in Stockton, Calif., as a member of the board of directors and, more recently, as a board member of Goodwill Industries of America.

Goodwill Industries provides employment, training, and rehabilitation to thousands of handicapped persons all over the country and in many other nations. Last year, almost 50,000 persons were provided services including training, work experience, vocational evaluation, job seeking skills, and placement. In 1980, Goodwill Industries placed over 8,000 handicapped and disadvantaged persons into competitive private sector jobs. It is indeed a very effective and important community organization.

The board of directors of Goodwill Industries of America is meeting in the Washington area this week. They will be hosting a reception tomorrow night, Wednesday March 18, from 6 p.m. until 8 p.m. in the Senate caucus room for Members of Congress. I hope that you will join me in taking that opportunity to meet the leaders of Goodwill Industries and to find out more about this fine organization. Many of the directors will also be calling on you while they are here in Washington. I hope that you will be able to talk with them and find out what Goodwill Industries is doing in your district or State.

I think you will find the following article about Goodwill Industries both interesting and informative:

THIS IS GOODWILL INDUSTRIES

THE GOODWILL PHILOSOPHY

Goodwill Industries of America, Inc., is firmly committed to the proposition that the best kind of rehabilitation program is that which brings handicapped people into the mainstream of community living. We are living in a new era of opportunity for handicapped people. Many more handicapped people are being offered opportunities to lead full lives—lives unimpeded by educational, vocational and mobility barriers. The hallmark of our rehabilitation programming has always been flexibility, innovation, diversity—a determination to create programs that meet the real needs of handicapped people.

When translated into rehabilitation programs, "Helping the Handicapped Help Themselves" means that we firmly believe that through vocational training programs handicapped people can be integrated and reintegrated into useful occupations.

GOODWILL SHELTERED WORKSHOP PROGRAMS

The primary work function in a Goodwill Industries workshop is the recycling of clothing and household articles donated by the general public.

Donations are left at Goodwill boxes or attended collection centers. The material is brought into Goodwill facilities, where it is sorted, cleaned, repaired and generally made ready for sale. Donated goods are then sold in Goodwill stores.

The proceeds from the sale of donated material are used to pay the workers and to provide the ancillary services and to offset the added costs of running sheltered workshops. These added services may include counseling, subsidized food and transportation services and special equipment.

Handicapped workers are employed in many types of jobs in Goodwill Industries, from collection to final sale of donated materials. These workers develop marketable skills in such areas as dry cleaning and laundering, radio and television repair, upholstering and merchandising.

When materials are donated to Goodwill Industries, at least four important social purposes are accomplished: a handicapped person receives skill training; handicapped workers receive fair wages for their work; budget shoppers are provided opportunities to counter the inflationary pinch of rising costs; and Goodwill's recycling operations help preserve dwindling supplies of natural resources.

CONTRACT WORK: AN EXPANDING SOURCE OF WORKSHOP PROGRAMS

Goodwill Industries is increasingly active in the area of contract work. Under contracts with business firms and the government, handicapped employees work on projects ranging from electronic assembly to sorting and packaging. The workers are compensated in accordance with their actual production, even during their on the job training periods.

TYPICAL REHABILITATION SERVICES

Rehabilitation services at each local Goodwill vary in type, process and intensity depending on the needs of the community. Since the purpose of a local program is to assist in meeting the needs of the individual, care is taken to develop those activities and services which compliment other community programs. Typically, a Goodwill will offer services which include:

Vocational assessment or evaluation.—These services identify the positive vocational aptitudes of each individual and relate them to the community job market. Vocational testing, guidance and career counseling, exploration and comprehensive planning are all part of this process.

Adjustment services.—These services provide an individual with the opportunity, through structured programming, to develop positive attitudes toward work, gain real work experience and training, increase tolerance for work, and enhance self-care and independent living skills.

Training.—A wide variety of specific skills training programs teach individuals the techniques and process of jobs that exist in the local community. Training programs have competent trainers or instructors, up-to-date tools and equipment and a defined curriculum.

Job seeking skills and placement.—These programs are designed to teach an individual the proper techniques of seeking and obtaining employment. Additionally placement services are provided by initiating employer contacts and consulting with prospective employers.

COMMUNITY INVOLVEMENT

In the community Goodwill Industries cooperates with other nonprofit social service organizations to provide needed services to handicapped and disadvantaged persons. Some examples follow:

Health Care: diagnostic and therapeutic speech, hearing and language services; medical diagnostic and referral services; occupational and physical therapy services; and medical consultation services.

Independent Living: transitional living programs; teaching basic self-care skills; providing instruction in recreational activities; and teaching mobility skills.

Psychological Services: diagnostic psychological services; specific therapeutic and counseling services; coordinating self-help support groups; and art therapy services.

Educational Services: basic remedial education services; teaching English as a second language; providing G.E.D. instruction; and providing tutorial teaching skills training programs.

Consultation Services: technical assistance to employers on job redesign; technical assistance in the area of barrier removal; assistance in the area of on-site job training; and assistance in affirmative action programs.

Transportation: coordinating special transportation services; providing special transportation vehicles and services; and consultation on special transportation design.

Housing: Half-way houses for persons leaving mental institutions; apartment complexes designed for physically handicapped persons; and group homes.

INTERNATIONAL COUNCIL OF GOODWILL INDUSTRIES—AN ACTIVE PARTNER IN THE DEVELOPMENT OF REHABILITATION LEADERSHIP AROUND THE WORLD

In over thirty countries today, private, nonprofit rehabilitation organizations founded on the Goodwill Industries concept, and often using the Goodwill name, relate to one another through membership in the International Council of Goodwill Industries.

When transplanted to other countries, the Goodwill concept of vocational rehabilitation has taken several forms. Depending on the host country's social, economic and political make-up; an international Goodwill program emphasizes specific vocational training programs, job placement in local enterprise, the encouragement of cooperatives, the support of independent entrepreneurs, or the subsidy of sheltered employment workshops. All international Goodwill programs, however, share the common goal of contributing to the economic well being of their clients and diminishing the clients' burden on the local community.

VOLUNTEERS—GREATEST RESOURCE

The Goodwill Industries Volunteer Services (GIVS) is one of the nation's largest volunteer groups helping handicapped persons. GIVS is more than 15,000 strong and is growing. These men and women from all walks of life and of all ages contribute hundreds of thousands of hours annually to the Goodwill program and bring in substantial funding through community promotional programs. More than 4,500 volunteers serve as members of the local and national Board of Directors.

Major goals of this volunteer corps are: interpreting Goodwill to the public, helping raise money, promoting donations of household goods and of contract work, and working directly with Goodwill's disabled people, often in the areas of recreation, social development, personal hygiene and grooming, and education.

HISTORY

In 1902, a young minister, Dr. Edgar J. Helms, pastor of Morgan Memorial Chapel in the south end of Boston, became concerned about the welfare of handicapped and unfortunate people in his community. He conceived a plan of "not charity, but a chance". The plan was simple. Clothing and household articles were collected from homes and other sources. Handicapped men and women were given the opportunity to learn trades, acquire skills, and receive income through repairing the contributed articles. Resale of the restored items financed the operation.

The enterprise was incorporated as Morgan Memorial Cooperative Industries and Store, Inc., in 1905. The idea spread to other cities. One, in Brooklyn, New York, started in 1915, established the name of Goodwill Industries, which has since become universal.

Today there are Goodwill Industries in more than 170 communities in the United States and 46 affiliated organizations in 31 countries.●

INTRODUCTION OF THE MARITIME ADMINISTRATION AUTHORIZATION BILL, MARCH 17, 1981

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. JONES of North Carolina. Mr. Speaker, I am pleased to be a cosponsor of the Maritime Administration authorization bill introduced by MARIO BIAGGI, chairman of the Subcommittee on Merchant Marine.

This particular authorization was submitted by the Carter administration and has several key differences from the budget proposed by the Reagan administration, particularly in the area of shipbuilding and loan guarantees.

We on the Committee on Merchant Marine and Fisheries intend to cooperate with the new administration and look forward to working together to provide much needed improvements in our maritime capability. Judging from campaign statements made by President Reagan he is well aware of the vital importance of maintaining U.S. shipyards and trained workers to build and operate merchant ships.

The Subcommittee on Merchant Marine has scheduled hearings on the Maritime Administration authorization next week at which time those issues will be aired and thoroughly discussed. Since the administration has not, as of this date, submitted its authorization request, the maritime expenditures proposed by the previous administration will serve as a logical point of departure for our debate.

It is our hope that the Reagan budget is submitted in time to be considered at the upcoming hearings, and that it will presage the era of a revitalized U.S. maritime industry.

Compared to other areas that are just as important to our National defense, the merchant marine is already working on a limited budget. The key question is not how to cut further but how to better utilize available resources, both private and public, which must be dedicated to a revitalized merchant marine.●

INTRODUCING LEGISLATION CONCERNING RELOCATION OF SPORTS FRANCHISES

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. STARK. Mr. Speaker, I am introducing legislation today to assess capital gains tax against the owners of sports franchises which abandon communities that consistently support them.

My bill would treat the relocation of a franchise contrary to the provisions in the legislation as a sale of the franchise for an amount equal to the fair market value of the franchise at the time of the move.

Franchise movement would not be treated as a sale if one of three conditions were met. The conditions are: First, one or more of the parties to the lease agreement on the former home stadium violated the lease; second, the home stadium or arena is inadequate for competitively operating the franchise; or third, the franchise has incurred a net operating loss for 3 consecutive years.

This legislation would not preclude franchise relocation if the move were necessary for the economic survival of the team. It would, however, impose a tax on owners who wished to relocate only to get a bigger bite of the pie.

It is no secret that in my district, the world champion Oakland Raiders want to move to Los Angeles not because the franchise is losing money or even in danger of doing so, but because the market in Los Angeles is so much larger, and profitable, for the owners of the franchise.

Unfortunately, no consideration was given to the people and small businesses of Oakland, Alameda County and the Eastbay area who have for 13 years supported the Raiders not just as fans, but as taxpayers.

The Oakland Chamber of Commerce has compiled detailed estimates of the economic impact of the Raiders on Oakland and Alameda County. The total amount of direct revenues because of the Raiders last year was almost $37 million. This loss of $37 million in business would also mean the loss of more than 1,300 full- and part-time jobs.

It is more than evident that the impact of moving a profitable sports franchise from Oakland will deal a potentially crippling blow to the economy of the Oakland area. This possibility looms greater in light of the proposed drastic slash in Federal aid to this area of high unemployment.

The next of the legislation follows:

H.R. 2557

A bill to amend the Internal Revenue Code of 1954 to provide that certain moves of sports franchises will be treated as sales

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part IV of subchapter P of chapter 1 of the Internal Revenue Code of 1954 (relating to special rules for determining capital gains and losses) is amended by adding at the end thereof the following new section:

"SEC. 1256. CERTAIN MOVES OF SPORTS FRANCHISES

"(a) GENERAL RULE.—For purposes of this subtitle—

"(1) a prohibited move of a sports franchise shall be treated as a sale of such franchise for an amount equal to the fair market value of such franchise (as of the time of such move), and

"(2) any gain from such sale shall be taken into account for the taxable year in which the move occurs and shall be recognized notwithstanding any other provision of this subtitle.

"(b) PROHIBITED MOVE.—For purposes of this section—

"(1) IN GENERAL.—Except as provided in paragraph (2), the term 'prohibited move' means any change in the home stadium of a sports franchise if the new home stadium is more than 50 miles from the former home stadium.

"(2) EXCEPTION.—The term 'prohibited move' shall not include any change described in paragraph (1) if it is established to the satisfaction of the Secretary that—

"(A) 1 or more of the parties to the lease agreement on the former home stadium failed to comply with a provision of material significance to the agreement and such noncompliance cannot be remedied within a reasonable period of time,

"(B) the former home stadium is inadequate for purposes of properly and competitively operating the franchise, and the stadium authority demonstrates no intent to remedy such inadequacies, or

"(C) the sport franchise has incurred a net operating loss (as defined in section 172(c)) for each of the 3 taxable years preceding the taxable year in which the move occurs.

"(c) OTHER DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) SPORTS FRANCHISE.—The term 'sports franchise' means any franchise to operate a sports enterprise. Such term includes all property (including player contracts) used (or held for use) in connection with the operation of such franchise.

"(2) WHEN MOVE OCCURS.—A prohibited move shall be treated as occurring as of the time the sports franchise begins operations at the new home stadium.

"(3) HOME STADIUM.—The term 'home stadium' means the physical facility in which the sports franchise performs more than ⅓ of its regular season sporting events.

"(4) SECTION APPLIES ONLY WHERE GAIN RESULTS.—Subsection (a) shall not apply if the application of such subsection would result in the recognition of a loss.

"(5) BASIS ADJUSTMENTS.—The Secretary shall prescribe such regulations as he may deem necessary to provide for adjustments in basis to reflect gain recognized under this section."

(b) The table of sections for part IV of subchapter P of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1256. Certain moves of sports franchises."

(c) The amendments made by this section shall apply to prohibited moves (as defined in section 1256(b) of the Internal Revenue Code of 1954 as added by subsection (a)) occurring after March 17, 1981, in taxable years ending after such date.●

VIGIL FOR FREEDOM

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. GORE. Mr. Speaker, I am pleased to join my colleagues in this year's Vigil for Freedom. It is extremely important that we continue to acknowledge those persons who have been denied permission to leave the Soviet Union and who are not only prisoners of body but of conscience.

Today, I would like to set forth the case of Yuri Fiodorov, a 37 year-old Russian who has been imprisoned since 1970 for an attempted escape from the country. Yuri, who had earlier been imprisoned for 5 years for anti-Soviet activities in his youth, was in effect, hounded by the Soviet KGB police force because of this past conviction. As a result, he decided to join a group of Jewish friends in the ill-fated escape attempt.

Despite his personal situation, however, he refused to cooperate with the authorities who tried to force him to assist the prosecution of his friends. Instead, he made a passionate plea for mercy and justice on behalf of his comrades.

One of those persons who also made the escape attempt with Yuri and who was convicted in the trial was Alexsei Murzhenko, a young Ukranian whom Yuri had met while serving his earlier prison sentence. Alexsei was sentenced to 14 years for his role in the escape effort and is now in a labor camp in Moscow. He, too, refused to assist KBG officials during the trial and steadfastly defended his friends.

Both of these courageous men should be remembered by those of us who continue to speak out on behalf of those held against their will inside the Soviet Union. The cause for freedom is one which can never be forgotten as long as there are persons such as Yuri and Alexsei, prisoners of conscience. And until they are released, the conscience of every free citizen of the world cannot rest.●

TRIBUTE OF ED MILLS

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. BENJAMIN. Mr. Speaker, I am pleased to bring Edgar L. Mills to the attention of the House. I appreciate the opportunity of presenting these remarks on the retirement of Ed Mills as editorial page editor for the Post-Tribune.

Ed Mills is one of the rare individuals who you can rightly say loved his wife, his profession, and his community, and its people.

Ed married his wife Anne 29 years ago. It is my fondest hope that they will continue to share many, many more years of good health and joy.

Ed Mills was born to journalism. Following his education at the University of Oklahoma and development as a student correspondent, he officially entered his profession in 1931. Except for serving his country as an artillery captain during the Second World War and a brief sojourn with the Veterans' Administration, Ed Mills remained true to his profession for the next half century.

Ed served on the Oklahoma News for 6 years following his graduation. He then joined the Associated Press staff until 1947 when he made the fortuitous decision to join the staff of the Post-Tribune.

It is indicative of Ed Mills' class, style, and ability that he began his career at the Post on the copy desk only to become news editor and later assistant to the managing editor.

In 1963, when the Post-Tribune wanted to start a morning newspaper, Ed Mills was tapped. He later returned to the Post and was named editorial page editor in 1965. At all times he wisely used the power of the press for the benefit of those who read his work.

Although the Governor of Indiana recognized Edgar Mills' contribution by presenting him with the Honor Award, the highest tribute paid to Ed was by his own newspaper. It refused to allow him to retire for 7 years.

Ed has composed with compassion. He has written with precision. He has always demanded respect.

Ed Mills served in other ways. As an active participant in a public institution he never forgot his private obligation to people. His kindness and unflagging energy touched numerous community organizations. He served the Gary Anselm Forum and the Friends of the Gary Public Library. He has served as a member of the Gary Human Relations Commission and chairman of the Lake County Community Development Committee and the Salvation Army. He was the force behind the creation of the Post-Tribune's citizen advisory board and deacon of the Century Christ Church.

Rare is the civic or professional group that did not feel the presence of Ed Mills.

Mr. Mills' career was driven by a desire to excel, tempered by a sense of humanity. Rare is the person who is able to reflect on a life lived that was both successful and humane.

Perhaps Charles Dickens said it best in "A Christmas Carol." Edgar L. Mills is "as good a friend, as good a master, and as good a man as the good old city knew."

That others could say that of us, we can only hope. That we can say that of Ed Mills, we know.

Ed, as you chart a new course and raise your sail, may the wind always be gentle.●

THE TRA PROGRAM REPRESENTS A SPECIAL COVENANT WITH WORKING MEN AND WOMEN

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. KILDEE. Mr. Speaker, the administration is proposing a destructive 76-percent cut in trade readjustment allowances (TRA), also known as the trade adjustment assistant (TAA) program. I firmly believe this is an irresponsible position and it would break the Government's word with working men and women.

TRA was created by Congress after the principle of free trade was adopted as Government policy in 1962. In exchange for the free trade policy, the Government at that time promised that workers would receive special financial assistance if they lost their jobs due to an influx of competing imports. The Government has kept its word since the Trade Act of 1964 providing TRA.

TRA has been the salvation of hundreds of thousands of displaced workers and their families in many industries. Without TRA, economic conditions in many industrialized States last year would have reached depression era levels. Last year, more than $69 million in TRA was paid to displaced workers in the Seventh Congressional District of Michigan, which I represent. This money in turn was circulated throughout the community, helping small retail and service businesses survive in an area where unemployment was running as high as 25 percent in June 1980—then the highest rate in the Nation.

I want to recommend to my colleagues the excellent testimony on TRA that was presented February 26, 1981, by Leonard R. Page, associate

general counsel of the U.A.W. Mr. Page's testimony before the Subcommittee on Trade of the House Ways and Means Committee merits close reading by those who want a fuller understanding of TRA. Mr. Page presents the background and provides a compelling case on why the Government should keep TRA intact. I am pleased to share Mr. Page's testimony with my colleagues by reprinting it here:

STATEMENT OF LEONARD R. PAGE, ASSOCIATE GENERAL COUNSEL UNITED AUTOMOBILE, AEROSPACE AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA

Mr. Chairman, my name is Leonard R. Page. I am an Associate General Counsel in the UAW Legal Department, Detroit, Michigan. The International Union, UAW, represents approximately 1,300,000 workers and their families in North America. I have been coordinating the UAW's participation in the adjustment assistance program and I welcome this opportunity to testify before your Subcommittee on that program.

Without TRA (Trade Readjustment Allowances) the economies of the Midwest and automotive states in other parts of the country would have reached depression levels last year. Hundreds of thousands of auto workers and their families have been able to maintain a decent standard of living while looking for new work or awaiting recall from their former employers. Without this program most of our members would have exhausted state unemployment and supplemental unemployment benefits (SUB) last fall. By now, these hundreds of thousands of workers and their families would have been forced onto already swamped public assistance roles.

The worker adjustment assistance program arose from a special covenant made with labor. In proposing the Trade Expansion Act of 1962, this government recognized that reductions in trade barriers benefited both consumers and foreign relations while possibly damaging a relatively small sector of domestic workers periodically displaced by increased imports. The government therefore promised that its promotion of so-called "free trade" programs would only occur within a system of special adjustment assistance to help these displaced workers. The country as a whole has been receiving the alleged benefits of so-called "free trade". It seems fair that the other side of this covenant should continue to be honored.

Although the program has recently exceeded its projected costs, I wish to emphasize these soaring costs cannot be traced to abuses or problems in the program itself. No undeserving worker is receiving benefits. Increased imports of Japanese cars are the problem; permanently unemployed workers receiving Trade Act benefits are only the result. But, if the government's trade policies permit 27 percent of new car sales to be imports, then U.S. auto workers have a right to expect federal assistance. The program is now being criticized because it is doing exactly what it was intended to do.

Moreover, there is nothing unusual about workers unemployed as a result of federal programs requiring more benefits than those unemployed due to other causes. Congress has enacted approximately 20 programs in many sectors of the economy to provide assistance to workers displaced as a result of federal activity and policies. The rationale for all these programs is the same: federal policies enacted for the common good, which cause unemployment, should provide special federal compensation.

We are shocked, therefore, that the President's Budget Report now targets the trade adjustment assistance program for a 76 percent reduction in TRA benefits. The Administration's rationale for this huge cut is that "cash payments are being made to thousands of workers regardless of their intent to seek alternative employment in new and growing industrial sectors."

The claim that laid off auto workers aren't interested in jobs in other sectors of our economy is false and slightly infuriating. Auto workers are interested in jobs, not TRA. Rockwell International Corporation recently approached the UAW to discuss the development of centers and programs for retraining auto workers to defense industry jobs. Since announcing these discussions on February 13, we have been swamped with inquiries from our laid off members.

Moreover, in January, 1980 the Michigan Employment Security Commission surveyed certified auto workers and found that 78% were interested in retraining and 38% were willing to relocate to take jobs. The State of Michigan originally planned to open two training and job relocation centers in the Detroit area. This program was viewed as too ambitious by the U.S. Department of Labor and only one office was authorized. Then, when training funds ran out in March, 1980, this single office closed its doors.

This claimed budget rationale thus touches a sensitive nerve because it exposes a classic "Catch 22" situation: the principal hurdle to auto workers taking jobs in other industries has been the failure to fund and promote the retraining and job relocation aspects of the adjustment assistance program itself.

The President's Budget Message also projects a savings of over $3 billion over the next six years. The present certifications will have run their course before the cuts can be enacted this October. Even then there are serious questions as to whether the proposal can be retroactively applied to workers already certified. No savings will therefore be generated on present certifications.

Even more important is the fact that none of the currently certified auto plants are likely to be recertified in the immediate future. The Trade Act specifically limits an individual to 52 weeks of benefits. The individual's benefit period cannot be extended by a new certification. Thus once the present certification periods have expired in 1982, we can anticipate costs returning to normal. Over the first four years under the Trade Act of 1974, the entire program cost averaged less than $200 million a year.

The present 1980-81 costs should be therefore viewed as an aberration which we all hope will never be repeated. It would be most unfair to make a budgetary evaluation of the program based on the current costs. The Congress is being asked to breach a long-standing covenant with labor in exchange for questionable savings from a $200 million a year program.

These cost considerations must also be balanced against the fact that the total value of imports for 1980 exceed $318 billion; of that total, $15 billion is attributable to imported automobiles.

The specific proposal, outlined in the Reagan Budget document, is to cut the present TRA benefit amount. TRA is currently equal to 70% of the average weekly wage, not to exceed the national average weekly manufacturing wage. It is offset by state unemployment benefits and payable for 52 weeks with a 26 week extension for workers age 60 or in approved training programs.

The President's proposal makes TRA payable only after state unemployment insurance had been exhausted and at amounts equal to state unemployment benefits. This proposal would create 50 different TRA benefit levels and would substantially reduce the present weekly benefit.

But even more objectionable is the fact that it would totally destroy the concept of "adjustment assistance" which is the core of the present program. Congress has heretofore always maintained that worker adjustment assistance is an attempt to compensate and help workers injured by federal trade policies. This proposal would reduce TRA to an extended federal unemployment insurance program. It would reduce benefits to cover only subsistence level expenditures for food, rent and utilities. No portion of the TRA would be left over to help the worker maintain a standard of living or find a new job.

This proposal—to make state unemployment insurance the primary benefit level for TRA—must also be viewed against pending proposals to cut the federal extended benefits program. If both sets of proposals are enacted, future TRA recipients will be doubly hurt.

And yet the Budget Message claims that the "purpose of the proposed reforms is to refocus the TAA program on the primary purpose—adjustment to changed conditions." It is hard to imagine how paying lower benefits will improve an unemployed worker's ability to adjust. If that is the Administration's real objective, then we invite it to adopt our proposals to fund and promote the training and job relocation aspects of the program.

The economic message also states that the proposed changes are based on a study and recommendation by the General Accounting Office (GAO). In November, 1979 the GAO released a study of the 1974-75 auto certifications covering about 80,000 workers. That study concluded that most of the benefits were paid retroactively after the workers had been recalled, and therefore not in time to provide real assistance. The GAO also claimed that these workers were not interested in training and were already receiving private supplemental unemployment benefits, known as SUB.

The UAW submits that the GAO study is based on outdated statistics and improper assumptions. The fundamental error with the GAO study lies in the fact that the 1974-75 automobile industry layoffs were temporary. In the case of temporary layoffs, it is obvious that workers expecting recall are not interested in training and job relocation. This is not true of the current layoffs. The majority of these layoffs are likely to be permanent; most of the workers will not be recalled.

The survey of the Michigan Employment Security Commission, noted above, proves that workers themselves are well aware of the difference. Permanently laid off workers want retraining and job relocation. They also need more than state unemployment if we expect them to make a real adjustment to a new career.

The GAO study and the economic message also criticize the fact that auto workers

are entitled to SUB and that the retroactive receipt of TRA requires the SUB previously paid for the same week be returned to the SUB Trust Fund. SUB is a private unemployment assistance system, negotiated by the UAW with its major employers, to supplement state benefits. It was never intended to provide workers with more income for a week of unemployment than while employed. Under the UAW Master SUB Agreements, workers who receive retroactive TRA payments on top of SUB and state unemployment benefits are required to return the SUB overpayments to the plan trust fund. The SUB plan then resumes benefits after the TRA benefits are exhausted. Approximately 7,000 workers a week are currently exhausting TRA and are returning to the SUB program. We know of no fairer way to handle the SUB program.

In sum, we believe the situation on which the GAO study was based simply does not exist today. Permanent layoffs require different programs than temporary layoffs. Neither the study nor its recommendations are therefore applicable.

The UAW has been critical of many aspects of the present adjustment assistance program. Nor are we alone. In the March, 1979 background paper of the Congressional Budget Office entitled "U.S. Trade Policy and the Tokyo Round of Multilateral Trade Negotiations" we note the following conclusion:

"Some mechanisms exist in the United States to redistribute the gains of freer trade and to mitigate the injury suffered by displaced workers. These mechanisms—unemployment compensation and trade adjustments assistance are the most obvious examples—are far from adequate, however, to compensate fully those who suffer as a result of action that will bring a larger gain to the rest of the economy."

The non-TRA aspects of the program (training, job search and job relocation) have been suspended since March of 1980. If we really want workers to adjust to new careers in other areas of the country, then the training and job relocations programs must be made part of the entitlement package so that they are not subject to suspension when they are needed most. The Secretary of Labor must also do more to promote these aspects of the overall program so that there is, in fact, real worker participation and adjustment.

The failure to cover those workers who provide essential parts and services to import-impacted end products is a serious inequity in the program. Under the present law, workers in a so-called captive parts plant—for example, an A-C Spark Plug plant of General Motors—can receive benefits because they are engaged in the manufacture of an import-impacted automobile (an end product). But workers at a Champion Spark Plug plant, an independent parts supplier, who produce identical parts for the same automobile, are not eligible. The Department of Labor claims that they are engaged in the manufacture of automobile parts rather then automobiles. Independent parts supplier workers, therefore, cannot use increased imports of automobiles as a basis for claiming TRA but may look to imports of the same automotive parts they produce if they wish to receive program benefits. But these parts suppliers are just as unemployed from Japanese imports as the G.M. spark plug workers.

Coverage now depends not on what the worker does, but who owns the plant. If G.M. were to purchase the Champion Spark Plug plant, the workers would get benefits. Adjustment assistance should not turn on the identity of the corporate owner. Parts and service workers should be covered under the same standards used for end product workers.

Something must also be done about the slow state processing of individual worker claims. Once a certification is issued by the Secretary of Labor, a four-month delay is common before the worker receives his first TRA check. Part of the problem is the complex formula for computing the TRA benefit. The formula should be simplified and it should remain constant throughout the benefit period.

But the major cause of the delay is state inertia. The Trade Act has a 60-day time limit for the Secretary of Labor to make his decision once the petition is filed. But there are no time limits on state processing of individual worker claims. Strict time deadlines should be developed and rigidly enforced.

Mr. Chairman, it has been a pleasure to testify before your Subcommittee and to share with you the views of the United Auto Workers on the trade Adjustment Assistance program. We urge that this subcommittee support full funding levels for this program consistent with the needs of workers who have lost their jobs through no fault of their own because of our nation's trade policies.

Thank you.●

A NEW GI BILL—YES—BUT THE VIETNAM VETERAN IS STILL WITH US, TOO

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. EDGAR. Mr. Speaker, starting March 17 and continuing on the 19th, the 24th, and 25th, the House Veterans' Affairs Subcommittee on Education, Training and Employment will conduct hearings and receive testimony from over 50 witnesses on H.R. 1400. The legislation would provide a new GI bill for the All-Volunteer Force. If approved, this new concept in an education and training program could both reinstate the traditional value of veterans' readjustment assistance and provide a much-needed recruitment and retention tool to bolster the all-volunteer military. This proposal could very well be a final and last-ditch effort to provide the incentive to strengthen the quality and quantity of personnel within the All-Volunteer Force and forestall an all-out return to the draft. In doing so, we feel it will not be necessary to break the bank at the same time.

The GI bill concept has received widespread support both in the Congress and the military. During the Presidential campaign, then candidate Ronald Reagan spoke out strongly in favor of the idea as a tool to improve both the quality and meaning of voluntary military service.

Mr. Speaker, time does not stand still. Those of us who serve on the House Committee on Veterans' Affairs and in the Congress must be prepared to meet new problems and new challenges whenever they arise. However, in doing so, we must be very careful not to become so preoccupied with present concerns that we lose sight of our ongoing commitment to fulfill past promises and past longstanding obligations.

Of the 30 million American veterans who still rely on the Congress for assistance, support, and recognition, 9 million served during the Vietnam era; 2.8 million served in Vietnam and its theater of operations. While the vast majority of the Vietnam veteran population has been able to utilize and benefit from veterans programs and services, there are still thousands who continue to struggle with long-term serious problems directly related to wartime service.

Last week the House Committee on Veterans' Affairs increased funding levels in its budget recommendation to expand and extend both the readjustment counseling program (Operation Outreach) and significant targeted employment and job training assistance for Vietnam era veterans. This action came immediately following the revelation that the administration had recommended these valuable services be eliminated in fiscal year 1982.

As chairman of the House Veterans' Affairs Subcommittee on Education, Training and Employment, I plan to support these initiatives in full. We have a continuing obligation to meet the needs of all those who serve or who have served in defense of this Nation. The value of a new benefits package for the All-Volunteer Force has very little meaning if we renege on our commitment to those who served in prior wars. We should not forget the lessons we learned from Vietnam, nor should we turn our backs on those who fought that war and remember it still.●

SOLZHENITSYN AND MUGGERIDGE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MICHEL. Mr. Speaker, who is the greatest human being of our time? Many of us would choose Alexandr Solzhenitsyn, whose literary genius and fierce determination to tell the truth about the evils of our time make him a prime candidate for such a title.

Speaking of great, it so happens that another truly great writer and great man, Malcolm Muggeridge, has recently written a beautiful and moving piece on Solzhenitsyn's life and work. It is a rare occurrence when one great writer tells the world about another. I

commend this brilliant essay to your attention.

I am inserting in the RECORD the article "Solzhenitsyn Reconsidered" by Malcolm Muggeridge, published in the Saturday Evening Post, April 1981.

The article follows:

SOLZHENITSYN RECONSIDERED

(By Malcolm Muggeridge)

Ever since Alexandr Solzhenitsyn's address at Harvard University, the changed attitude of the media pundits in the West toward him has become manifest. Old media hands like myself get to know the signs—the casual innuendo, the throwaway line ("not the liberal we would like him to be"), the tone more in sorrow than in anger, the barking in unison as the consensus pack moves collectively toward the kill.

It was in the Harvard address that he deviated most drastically from the basic liberal orthodoxy that freedom consists in being allowed and provided with the means to do whatever anyone has a mind to, and that a free society is one in which this is possible and the means readily available, the supreme example of such a society being, of course, the United States. What magnified his offense from the consensus point of view, making it quite intolerable, was that, on his own admission, Solzhenitsyn derived his view of freedom from the New Testament rather than from such impeccable sources as the American Declaration of Independence and the judgments of the U.S. Supreme Court, in effect repeating to his Harvard audience what he had already written in his "Letter to the Soviet Leaders": "I myself see Christianity today as the only living spiritual force capable of undertaking the spiritual healing of Russia." (emphasis added)

In his Gulag Archipelago books, Solzhenitsyn established once and for all the role and extent of forced labor camps as an instrument of terrorism in the USSR. Thenceforth, thanks to him, apologists for the Soviet regime will have to take due account of the Gulag Archipelago rather than seeking to deny its existence, or dishing it up as part of an essentially humane penal system. Then, in his autobiographical work, The Oak and the Calf, he deals with the pains and penalties of being a writer in the USSR, describing his own experiences as a dissident between his release from the labor camps and his expulsion abroad in 1974.

In a sense, of course, all serious writers are in some degree dissidents; but whereas in the so-called free world their concern is to earn a living, in the USSR conformity with the party line is obligatory, and to deviate from it in word or even in thought can involve not just penury and obscurity, but a one-way ticket to the Gulag Archipelago as well. As a sometime political prisoner (in Soviet slang, a Zek), Solzhenitsyn was not allowed to come to Moscow. So, on his release, he worked as a teacher of mathematics in the provinces, devoting all of his spare time and abundant energies to writing.

In ordinary circumstances the procedure would have been to submit his work to some local or national publication or publishing setup. In Solzhenitsyn's case, this was precluded because the subject of his writings has been precisely the terrorism and mental chicanery whereby a Marxist oligarchy has ruthlessly imposed its will and ideology on a subservient population. Being a Zek himself, Solzhenitsyn felt a duty to the others he had left behind in the Gulag Archipelago to speak up for them, telling his fellow countrymen and the world about their suffering and privations and the monstrous injustice of their treatment. In all that he has written and spoken and done, he has been true to his duty. And, let it be remembered, he could perfectly well have settled, as, for instance, Maxim Gorky did, for being a distinguished Soviet author, free to travel abroad, well provided with foreign currency and honored at home and abroad. All that would be required of him would be to keep off a few sensitive themes. But this was what he was in no circumstances prepared to do.

Solzhenitsyn has the honesty to admit that his self-imposed duty has proved arduous and often frustrating. When he completed the first draft of The Oak and the Calf in the spring of 1967, he entertained a hope that he might be released from the agonizing role he had chosen for himself. Six years later, when he prepared the text for publication, he asked himself more urgently than ever when the din of battle would cease for him. "If only," he writes, "I could go away from it all, go away many years to the back of beyond with nothing but fields and open skies and woods and horses in sight and nothing to do but write my novel at my own pace." Now, in enforced exile, he has the additional anguish of observing how, in the West, where the means to be free still exist, people have wearied of freedom, finding it an intolerable burden, and are all unconsciously sleepwalking into the very servitude Solzhenitsyn has so valiantly and faithfully resisted and denounced.

In the circumstances in which he was placed on his release from the labor camps, he had no choice but to hide away his writings as he completed them, in the expectation that they would one day be published and fulfill their purpose. In every moment away from his teaching, he tells us, he wrote and wrote, diligently, day after day and sometime night after night. when, as a veteran free-lance practitioner, I think of the difficulty of producing commissioned copy to meet a deadline. I marvel at the books he produced in this manner, so brilliantly, so conscientiously and so nobly disinterested in their purpose. Take the case of the Gulag books, very dear to his heart and not just a literary feat of the highest order, but, as well, an integral part of the history of our time and, for that reason alone, forever memorable. They were no mere exercise in writing, he had to collect in the greatest secrecy the testimonies on which the books are based, at the same time scrupulously protecting his sources in the knowledge that the consequences for them would be ruinous if it came out that they had provided him with information. Nonetheless, the books were completed while he was still living in the USSR; and in due course, a copy of the manuscript was sent abroad, so that whatever might happen to him, the peoples of the West would know what the Gulag Archipelago was like and what it signified to Russians and others forcibly absorbed into the Soviet sphere of influence.

In his career as an undercover writer, Solzhenitsyn was greatly beholden to Samizdat, the clandestine publishing system established in the USSR, steadily growing in output and influence. Now it has spread through the whole country, and its productions are printed, not handwritten or cyclostyled as in the early days. All Solzhenitsyn's forbidden works have been circulated by Samizdat and have reached tens of thousands of readers despite the KGB's efforts to stop it. With one or two notable exceptions, it can be taken for granted that whatever serious literature is being produced by the so-gifted Russian people bears the Samizdat imprint. Some notion of the gap between what Samizdat published and the officially produced volumes displayed in the bookshops may be deduced from the recent award of the Lenin Prize for Literature to Brezhnev, whose flat-footed sentences in his speeches and addresses can scarcely be considered prizeworthy. If Western publishers wanted to retaliate for the fiasco of their efforts to hold a bookfair in Moscow, a good idea would be to mount a Samizdat exhibition in London or New York and ask Solzhenitsyn to open it. I can't, however, see them doing this.

The big break came for Solzhenitsyn when Nikita Khrushchev, while still the head man in the Kremlin, praised his book, One Day in the Life of Ivan Denisovich—about life in the labor camps—and authorized its publication in the USSR. How exactly this came about remains obscure, and anyway, shortly afterwards, Khrushchev reverted to the worst kind of Stalinist censorship. Nonetheless, the book was duly published and widely acclaimed, so that Solzhenitsyn became a celebrity at home and abroad. Also—which was more important for him—he came into contact with Novy Mir, the leading literary magazine in the USSR, and its editor, Tvardovsky. Solzhenitsyn's account of this truly remarkable man and of the relationship between them makes fascinating reading.

Tvardovsky was torn between joy in his own literary talent and genuine appreciation of literature and of Solzhenitsyn's genius and his satisfaction at finding himself a member of the top Soviet elite with all the privileges that went therewith, including a dacha in a restricted area—an inner conflict that led him, like so many of his fellow-countrymen, to resort increasingly to vodka. The affection between the two men survived all hazards, and when, as a result of a stroke, Tvardovsky became helpless and incoherent, Solzhenitsyn sat patiently and lovingly at his bedside. At his funeral he mourned his passing, both for Russia's sake and on his own account. In a particularly venomous attack on Solzhenitsyn in Harper's magazine, George Feifer alleges that in his account of his transactions with Novy Mir and Tvardovsky, Solzhenitsyn has vilified both. What Solzhenitsyn does show—and I am sure justly—is that Novy Mir, despite its good record in Soviet terms, has no choice when it comes to the crunch but to obey its political masters. Likewise Tvardovsky, despite the essential nobility of his character.

In retrospect, it is hard to make any sense of the vacillations of Soviet policy in dealing with Solzhenitsyn. After the fame he acquired from the publication of One Day in the Life of Ivan Denisovich, he soon found himself once again being trailed by the KGB, as well as excluded from Novy Mir and expelled from the Writer's Union, and organization wholly controlled by the authorities.

As the struggle to silence Solzhenitsyn went on, he fought back single-handedly and managed to hold his own for a time—until his expulsion abroad settled matters.

Running through everything Solzhenitsyn has written about his struggle to stand up to "them," the present masters and manipulators of the Russian people, there is the assumption of his Christian faith. He neither expounds nor stresses it; but the reader is

conscious of it all the time—acquired in the Gulag Archipelago, where, being totally deprived of freedom in earthly terms, he came to understand what constituted true freedom—the glorious liberty of the children of God about which the Apostle Paul speaks so eloquently. In the second Gulag book, in the wonderful chapter called "The Ascent," he even refers thankfully to his time in the labor camps as having brought him this illumination, and I truly believe that he would have found it more congenial to resume his old Zek existence rather than to watch, as he has had to do in his compulsory exile, the continuing surrender to "them" of whatever power, authority and influence still pertains to what we go on calling Western civilization.

Now, with the consensus pack after him and with his Western readers requiring variety and the crazed expectations of an illusory kingdom of heaven on earth such as he cannot possibly provide, his immediate worldly prospects must be considered uncertain. Yet there is no sign of his own courage and determination faltering. "In moments of weakness and distress," he writes, "it is good to tread closely in God's footsteps." He goes on:

"Where would I be in a few days' time—in jail or happily working at my novel? God alone knows. I prayed. I could have enjoyed myself so much, breathing the fresh air, resting, stretching my cramped limbs, but my duty to the dead permitted no such self-indulgence. They are dead. You are alive. Do your duty. The world must know all about it."

Well, thanks largely to Solzhenitsyn, the world now does know all about it, but his battle with "them" goes on. It is one man against the Kremlin, which might seem hopeless odds, but when that one man is Solzhenitsyn, against all the odds he must win. As he concludes his splendid Nobel Prize lecture: "One word of truth outweighs the world."●

GOVERNMENT FIGHTS GOVERNMENT—THE LEGAL SERVICES CORPORATION—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. McDONALD. Mr. Speaker, part I of this item appeared in the CONGRESSIONAL RECORD of March 11, 1981, on pages 431 and 432. Part II gives further insight as to how the Legal Services Corporation hopes to avoid any cuts in its budget and any rollback in its radical efforts to reshape our society. I commend it to the attention of my colleagues:

GOVERNMENT FIGHTS GOVERNMENT—THE LEGAL SERVICES CORPORATION—PART II

This year it will be necessary for us to get our reauthorization through Congress. The Senate will not approve our appropriations without a reauthorization. We will also need to work again with the Budget Committees in the House and Senate. Last year, the budget process played a major role in setting priorities on substantive legislation as well as appropriation levels. Finally, confirmation in the Senate of LSC Board nominees may require some efforts by the legal services community.

Although an affirmative political strategy has not been fully developed, it will include at least the following components:

1. Selling the merits of legal services to Congress, media and others at the local, state and national level. Much of this will be done by local people and local programs.

2. Developing a broad range of support from a wide sector of group and organizations and making it in the interest of these groups for legal services to continue without restrictions. This will require effective work at a local, state and national level by legal services programs around the substantive issues affecting the members of the groups and organizations from which we seek support.

3. Improving our relationships with the private bar. We are developing a concrete partnership with the American Bar Association and other bar associations to preserve and expand legal services. This will require full implementation of the Delivery System Study Policy Report and increased involvement of private lawyers in the delivery of legal services. As part of our strategy we are seeking increase funds for expansion in the Fiscal Year 1982 Budget request. By seeking funds from Congress, we believe we can obtain support for the maintenance and expansion of existing programs and prevent mandates in the Legal Services Corporation Act that would reallocate current resources.

4. Developing an affirmative response to Congressional efforts to impose restrictions on legislative representation and other limitations on the scope of representation to be provided to our clients.

To develop this affirmative strategy we are preparing at least two background papers for circulation and discussion. John Dooley is preparing a paper discussing the private bar issues and options to address them. We are also preparing a paper analyzing possible options to prevent legislative representation restrictions. We will be meeting with a number of people to discuss each of these issues and will be holding strategy discussions with the coalition members in early January.

In considering our affirmative strategy we are meeting with many advocates who are experienced in political and legislative strategy in Washington. We are seeking their views on how to take the initiative, how to best use the private bar issue and how to prevent restrictions on case types or the scope of representation.

Regardless of our efforts in Washington, an affirmative legislative strategy is dependent upon effective relations on a local level with congressional offices, with state and local bar associations, and with organizations and individuals who are potential supporters and allies.

WHAT MUST BE DONE

Each legal services program must undertake the following:

1. Develop a specific action plan at state and sub-state levels. This plan should detail how each state will seek to maintain and improve or develop Congressional relations, relations with local and state bar associations, relations with allies and supporters, and relations with local and state governmental entities. The plan must also discuss efforts to develop and improve media relations and develop new media contacts. Finally, the plan should specifically include concrete steps to maintain, improve and/or develop meaningful relations with poor people's organizations.

Many states have already developed such plans. Others are beginning to do so and will be completing the plans at the regional meetings.

These plans will require every program to shift program resources to undertake the efforts outlined in the plan and to change the priorities and work of project directors and staff.

2. Appoint a program coordinator or coordinators who will have overall responsibility for coordinating the implementation of the state and sub-state plans and assuring that all survival activities are carried out.

3. Develop timely and effective communications with the state coordinator. The state must assure that the coordinators have adequate staff and a means of communicating effectively and in a timely manner with all programs.

4. Develop effective internal communications networks that assure all staff with adequate and timely information about developments nationally and within state and local areas.

5. Continue to identify people who have contacts with officials of the Reagan Administration. State Coordinators and relevant Washington actors should be informed of these contacts. Please make sure I am informed of these contacts.

6. Continue to identify potential Board nominees who are supportive of legal services and yet potentially acceptable to a Reagan Administration. Names of potential nominees should be sent to Howard Eisenberg at NLADA.

7. Analyze new members of Congress from your area and review all old members of Congress. What is needed is carefully complied information about all members of Congress. This includes: attitudes, public statements and prior voting records toward legal services and other social benefit programs; their supporters and major contributors from within the bar and general community; possible contacts with their supporters; and their political base in the district or state. This information should be sent to the state coordinator and Office of Government Relations. OGR will develop an analysis of each Congressional person and office. The completed analysis will be sent to each state and program coordinator. The analysis will also include such information as prior Congressional voting records on legal services, positions on other poor people's issues, committee assignments, names and background of key staff, and which members influence this member.

The difficulties we will face now and during the next few years will require sacrifice and discipline by LSC and program staff. Among other things:

1. We must start taking this effort very seriously if we are to succeed.

2. When program coordinators are asked to do something by the state coordinator, by LSC or members of the coalition, they must act responsibly and without delay to see that the tasks are done or that we are immediately informed that they can be done so that we can take the necessary actions to see that they are done.

3. This is the time to act and act quickly to organize within each state and local program to shore up and strengthen the base of political support.

4. Coordinated activity is important. This is not a time to act totally independent of the effort that is being initiated. Project directors and staff will have many good ideas, practical suggestions, intelligence and experience to share with national actors and

with other programmatic people. It is important to work together and keep in touch.

COALITION BUILDING

A critical means of strengthening the local political base is to develop coalitions and working relationships with local organizations and individuals who would see it in their interest to assure the continuation of an aggressive legal services program.

Effective coalitions and working relationships will involve programs assisting these groups and organizations in concrete ways. Merely acting in concert or seeking assistance will not be sufficient. The local program must actually assist groups, individuals and coalition members so that they have a real stake in the survival of the legal services program. The legal services program must become an integral part of their activities.

Usually coalitions and working relationships will evolve out of common work on substantive issues. Legal services should seek out others in the community who may be involved on similar issues of concern to the program and client community. They should also seek to participate in activities by others that affect issues and problems of the client community.

There are a variety of groups with whom local programs can develop relationships. Some are involved in advocacy for the poor (such as Community Action Programs); some are involved in services for the poor. Many are involved in common issues which affect both the poor and the members of the groups (e.g., unions and food stamps; Associations of Retarded Persons and special education; elderly organizations, etc.) Many are involved directly in advocacy for populations which include the poor (civil rights, etc.).

In developing working relationships and coalitions on substantive issues, legal services programs and staff should not forget their principal role as advocates for the poor. The point of developing working relationships and coalitions is to strengthen the power of poor people not to shift the program toward a different population. Legal services should not be viewed as compromising the interests of poor people for its own survival or for the broader good of the coalition. Moreover, legal services should seek to involve poor people directly in the coalitions and bridge relationships between poor people and individuals and organizations with common interests or issues.

THE BROADER PICTURE—THE NEEDS OF OUR CLIENTS

The struggle for survival of aggressive legal services should never be perceived by us to be a higher priority than the struggles that poor people will face during the next several years as this new administration and Congress attempt to curtail social benefit and entitlement programs and civil rights activities. We must not under any circumstances stop using most of our resources and most of our energies to continue providing aggressive impact advocacy to improve the lives and power of poor people.

Moreover, we must take immediate steps to develop effective efforts within each state and on a national level to preserve the gains won by poor people and their advocates during the last 15 years. And we must continue to strive to increase social benefits, improve housing and health care, prevent arbitrary private and public actions, improve job and educational opportunities, and eliminate discrimination.

This will require targeting increased resources on substantive issues which will arise on a national and state level: development of more effective national and state networks of staff, clients and other advocates and allies; improved communications to each state about national developments and within each state about national, state and local developments; strengthening our capacity for legislative and administrative advocacy; and developing more effective strategies that use all of the tools available including more effective use of litigation as well as community education, legislative and administrative representation, networking and coalition building.

Working with national and state support projects, we are strengthening current efforts and developing new approaches that will assist local and state programs in undertaking these critically important activities for survival of poor people's basic needs. Although there are different networks that will be used to work directly on these "substantive" activities (i.e., the substantive networks that have developed through national and state support projects), we will keep all state coordinators informed of national substantive developments.

Thus, as we enter this struggle for our own survival, we must never forget that the purpose of our effort and the shift of some resources to our survivial is not to save ourselves (or our jobs), not to save our current ways of doing things or even our current structures for that matter. Instead, the purpose of our efforts to preserve for poor people a force that they can call upon to use to improve their economic and social well-being.●

TRIBUTE TO GRACE PLAZA RESIDENTS: A WORTHY GROUP SPEAKS

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, a short while ago, I had the distinct privilege to visit a most energetic and inspiring group of constituents from New York's Sixth District which I so proudly represent.

The people I speak of are the residents of the Grace Plaza Nursing Home and Health Related Facility in Great Neck, N.Y.

My visit to this fine health-care facility as a newly elected Member of Congress was a moving experience, one which I will long remember.

The residents' response to my presentation of a flag which had flown over the U.S. Capitol was truly inspirational. Their unbounding expressions of patriotism and gratitude served as a stirring reminder of America's proud and ongoing heritage of freedom.

I am therefore, deeply honored, to submit for publication in the CONGRESSIONAL RECORD, the welcoming speech made in my behalf by Miriam Hoffman, a resident at Grace Plaza. It is a speech worthy of consideration as there is much to learn from the wisdom and experience of those who live life to its fullest.

PRESENTATION OF THE AMERICAN FLAG

(By Miriam Hoffman)

Congressman John LeBoutillier, Grace Plaza Staff Members, and Residents, it is, indeed, a distinct privilege and pleasure to have you, Congressman, with us today. On behalf of the Residents of Grace Plaza, I welcome you as a Guest of Honor. You have come here on an unusual mission—Patriotic, Inspiring, and Thoughtful. Our Residents, of whom I am one, heartily and with enthusiasm, greet you. You have come to make a presentation to Grace Plaza of an American Flag, which has a very special and significant meaning, and you will have the pleasure of telling this audience all the details.

What a thrilling moment for us to be the recipients of this banner! How grateful we are to you, Congressman, that this flag with a special meaning will enhance our flagpole and proudly wave in front of Grace Plaza. Can we forget this kind gesture of friendship? Can we ever forget the freedoms that we Americans enjoy under this banner? Truly, this is a Red Letter Day and makes "history" for Grace Plaza.

Our Residents would like you to know that we are still politically active. We vote each year and, for those of us who cannot reach the polls, we vote an absentee ballot. We are interested, also, to inform you that our Residents spearheaded the movement for the passing of bills #19457S and #2738A, by means of mailings and publications for the support of our cause. We introduced these bills in Nassau and Suffolk County Nursing Homes.

Mr. Congressman, may I, on behalf of our Residents and Staff members, express deep gratitude for your efforts in coming here from Washington to make possible this cordial visit to make your presentation. You have made us happy and proud. Please come again.

Thank you, Congressman John LeBoutillier.●

WEST VIEW—AMERICA AT ITS BEST

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. WALGREN. Mr. Speaker, this past year the borough of West View celebrated its 75th anniversary.

I join the residents of West View in their special pride for a community which is committed to preserving the important values of our society while planning for an exciting future.

The history of West View dates from the days when the French and Indians ruled the Ohio Valley. I have reprinted a short extract from the borough's publication, West View Horizons, and I encourage my colleagues to read the story of West View, an American community at its best:

HISTORY OF WEST VIEW

Any history of anywhere must go back to the time of unrecorded history, to the time before man, when the land belonged to the animals. The buffalo herds first found the narrow corridor of long, regular, connecting ridge tops with intermittent springs that provided a dry route for their migrations.

When the redmen came they made use of these beaten and deeply worn thoroughfares to travel incredible distances. The northern Indians, the Susquehannocks, the Delawares, and the Shawnees of Pennsylvania, as well as the Iroquois of New York followed these trails in their continuing wars with the southern Catawba and Cherokee nations.

When white explorers and traders first found the juncture of the two rivers that form the mighty Ohio to the west, the Senecas, Onendagas and Cayugas were traveling down from the Lake Country by way of French Creek, Venango, through present Evans City to Shannopin's Town (in the Lawrenceville Section of Pittsburgh). This Venango Trail crossed through East Liberty to the mouth of Turtle Creek and on down to Cumberland, Maryland; Winchester, Virginia, and along the Shenandoah Valley to North or South Carolina.

The Venanago Trail becomes a part of the history of West View because the Perry Highway follows in general the early route of the buffalo and Indians.

The French at Fort Duquesne and the British at Fort Pitt used the Trail as a connecting route to forts on the Great Lakes and in Canada.

Col. Henry Bouquet marched a small army of his famous Royal Americans (British Regulars) down the trail in the summer of 1760, the year after the building of Fort Pitt. Edward G. Williams, author of the Bicentennial history of Ross and West View, quotes a journal of Thomas Hutchins who made the trip with Bouquet. Lt. Hutchins was an engineer and his journal is very detailed. According to it, the troop camped the night of July 7, 1760, on the hillside near the present location of the Ross Municipal Building, close to the West View line. Hutchins reports the camp was "by several springs."

During the Revolutionary War and for some time thereafter, all this land north of the rivers was Indian land. There were tribes living on islands in the river.

In order to keep soldiers in the Revolutionary army, the Pennsylvania Assembly promised to donate land to the soldiers after the war. The army pay in continental money depreciated so rapidly that it became practically worthless. The inflation that we have today was nothing compared to that period.

After the war, a schedule was set up to adjust the army pay to its correct value. Certificates were issued to the soldiers in compensation that were redeemable in gold or silver or for the purchase of land.

The state set up a large tract of western land, including the area of Ross and West View as Depreciation Land. To finance the redemption of the certificates, land was sold at auction in Philadelphia.

Originally, this area was part of Pitt Township, Westmoreland County. Allegheny County was formed in 1788.

The original Act provided that a tract of 3,000 acres fronting on both the Ohio and Allegheny rivers should be reserved for later use of the State.

In 1796, the western part of the area, on a north-south line running through the mouth of Pine Creek was partitioned into Pine township and in 1803, Ohio Township was formed including all of the western tier of townships and boroughs on the Ohio River. This partition left Pine township with a strip of land six miles wide and sixteen long, from the rivers to the Butler County line.

In five years, the land in the southern part of Pine township had been taken up rapidly. The Venango Trail had become the Franklin Road. Thirty residents of this southern area petitioned the court on November 15, 1808, asking that the township be divided by a line from the eight-mile tree on Franklin road, running east and west.

Their petition was approved at the November term of 1909 and the new township was named Ross in honor of an eminent Pittsburgh attorney, James Ross.

The Borough of Allegheny was formed in 1828 from part of the Reserve Tract and in 1835, Reserve Township was taken from Ross and part of the Reserve Tract.

Shaler township took away about two miles from the eastern side of Ross and a larger area of Indiana Township in 1847.

Ross remained the same size from that time until the formation of West View Borough in 1905.

So much, then, for the geographical history of the area. It is people who make an area grow.

All that virgin land across the river was very attractive to the settlers of Fort Pitt. As early, perhaps, as 1760, James Boggs had settled on the north side of the river. Indian wars and the troubles of the Revolution forced him to leave his home. He was permanently established there by a grant of land in the Reserve Tract in 1783. Boggs died soon after getting the grant. His widow married James Robinson, who moved to the Boggs holdings. Boggs obtained a charter to operate a ferry from Pittsburgh to the Venango Trail and built a house which became an inn.

At this time, Casper Reel, reportedly the first settler in Ross and West View, enters the story. Casper was a skin dresser by trade. He came to Fort Pitt from Germany, by way of Baltimore and Lancaster. His father died on the voyage from Germany and his mother and brother were killed by marauding Indians in Lancaster.

Casper came to Fort Pitt in 1773 at the age of 31. He is reported to have been the bearer of the news of the fighting at Lexington and Concord on April 19, 1775. His news roused the people at the fort to become part of the Revolutionary movement.

There were two factions in Fort Pitt, Pennsylvanians and Virginians. Reel joined a Virginian company commanded by Capt. John Gibson. When St. Clair's 2nd Pennsylvania Regiment was formed, Reel marched with it to Canada and Ticonderoga. He survived battle, hunger, weather and disease to return home. In another enlistment, he fought the Battle of Brandywine to turn back an invasion of Pennsylvania.

He joined General Hand's command at Fort Pitt in 1778 and remained there until the end of the war.

After an absence of 10 years, he returned to Lancaster and married Elizabeth Wise. He returned to Pittsburgh with his wife and their first child in 1784. During the next ten years, the couple had four more children and Reel bought two fine lots on Fifth Street between Smithfield and Wood. He sold the lots at a profit and decided to buy a farm.

Traveling out the Venango Trail, he found the land he wanted in the next valley beyond where Bouget and his army had camped. His land included what is now the western fifth of West View, including West View Park, Highland Country Club and the Gass Plan.

The sale of this Depreciation Land had not been successful. The average price had been 34 cents an acre, with some going as cheap as eight cents. As a result the government had suspended the sale of the land until in 1782, a fixed price of $20 per hundred acres was set by the legislature.

Reel surveyed the lines of his own property, staking off 727 acres. He built a small cabin along a creek between Cornell Avenue and West View Park. In 1792, Indian attacks drove him back to Pittsburgh for the country was still Indian land.

It was not safe to return to the land north of the river until Gen. Anthony Wayne had defeated the Indians at Fallen Timbers in 1794 and the Treaty of Greenville signed in 1795.

Reel had a new log house ready for his family by the spring of 1795. Twin sons, the first white children born in this area, named David and Casper Jr., were born January 22, 1798.

This first home, its log walls covered with clapboard, still stands at 148 Georgetown Avenue.

The Reel family became outstanding members of the new area. Casper himself, was the first Collector of Internal Revenue for an area that reached from the Allegheny River to Lake Erie. His son, Conrad, followed him in this post and was also the first postmaster at Perrysville, the first Post Office north of the river. Conrad also established the first woolen mill in Allegheny County.

David and Casper both became farmers. David was a member of a Methodist group which later became the Bellevue Methodist Church and Casper Jr. was one of the group that founded the Hiland Presbyterian congregation.

David built his farm house which still stands on Courtney Mill Road. Casper Jr. built his farm house on a hill that is now part of Highland Country Club golf course. It was moved to be incorporated into the present clubhouse.

Another brother, John, was killed in action on the Maumee River in Ohio, during the War of 1812. Casper Sr. went to Ohio to bring back his body for burial in the family plot that is now surrounded by the country club golf course.

Preservation of the burial plot was part of the sales agreement with the club. Casper Sr., his wife, several other members of the family and a servant are buried there.

There are many tales told of that original settler. One is that he was out hunting one day during his first attempt at settlement. An Indian arrow barely missed him and he barricaded himself in the cabin to fight off an attack. He was running out of ammunition when a passing troop of soldiers drove off the Indians. The troops were reportedly scouring the countryside for Simon Girty, a notorious renegade and outlaw.

Girty, perhaps, has no place in this history, except that his name was given to the stream that runs from West View into Millvale. Girty sided with the British during the Revolutionary War and teamed up with a group of renegade Indians. They terrorized white settlers and peddled their scalps to the British for $10 apiece.

According to legend, the ostracized Indians and Girty would kill the white settlers, taking anything of value to be traded or sold at a later date. They roamed the area as far as Richland Township.

Girty double-crossed his Indian allies and took the plunder from its hiding place. He reportedly buried it along a tributary of the Allegheny River.

The Indians returned from their raiding party sooner than expected and discovered Girty's treachery. They trailed him to the spot where he was burying the spoils, but his instincts saved him from the ambush they had planned.

Girty was able to elude the Indians by his famous run through the creek bed located in Ross, along Babcock Boulevard that bears his name. He disappeared into Indian country and apparently died, blind and infirm in Canada.

Later historians claim, however, that Girty's Run got its name, not from Simon's escape, but in honor of another brother, Thomas, who remained loyal to the American cause and who eventually settled his family in the extreme southeast corner of the township. He had been a ranger and scout in the Westmoreland militia and was an all-round good citizen.

The Venango Trail became the highway of travel north to the new town of Franklin, growing up at the mouth of French Creek, where Fort Venanco once stood. The trail soon became known as Franklin Road.

Farmers to the north drove their cattle, sheep and hogs along the Franklin Road, that later became the Perrysville Plank Road and the Perry Highway. Herds would be driven from Mercer or Crawford Counties or even from Ohio, for sale in Pittsburgh's slaughter houses.

Of a necessity, the inns along the road, provided large fenced enclosures where the animals could be penned up over night.

The poorer farmers who could not afford the price of lodging at the inns, used open meadows along the road to bed their herds and flocks. One of the favorite spots, because of the supply of fresh water available in a pond, was at the corner of the highway and Highland Avenue, in what is now Wellington Heights.

In 1849, the Franklin Road became the Perrysville Plank Road when planks of wood were laid to eliminate the mud. Only one half of the road was planked. The loaded wagons rode on the planks and the empty wagons rode on the mud side.

Installation and maintenance of the planks turned the road into a toll road, and toll gates were set up at intervals to collect a fee for the privilege of traveling on the improved surface. Toll gates were located at Waldorf Street on the city line, near the present Ross Municipal Building and at Rochester Road. A fourth toll gate was located near the present entrance to Highland Pines.

West View's famous Horseshoe Bend was constructed at the time of the 1849 improvements. Prior to that, the road had run from the intersection of Bellevue Road down the steep hill to West View Park entrance.

The Plank Road was the only road north until the road was paved with bricks as far as Keown's Hotel on Three Degree Road in 1911.

The automobile made the bumpy road obsolete and a macadam surface smoothed the way until concrete arrived. It was 1929 before a $40,000 30-foot wide reinforced concrete road was constructed from the Five Mile House to the City line. All of these improvements were far in the future and the early settlers of the area had no dream of the busy highway the Venango Trail would become.

Stage coaches ran regularly on the Franklin Road to Mercer, Meadville and Erie. Stage relay stations were established in Perrysville, Wexford and Warrendale. Mail was delivered weekly as early as 1801. By 1818, mail came twice a week and three times by 1824.

Franklin Road became Perry Highway following the War of 1812 when supplies for Commodore O. H. Perry's fleet in Lake Erie were transported along it.

Evergreen Hamlet, a Utopian village, was founded in 1851 in the southeast corner of Ross. William Shinn and Associates established a society of refinement and culture in the style of the English aristocracy. The plan ended in financial failure following the death of Shinn in 1865. Matthew Cridge, an Englishman, came to the Hamlet that year, built a home and became the leader of a new group of residents. Cridge also built the Evergreen Hotel, a fine hostelry in that day.

At the turn of the 20th Century, many Pittsburghers were moving out of the city to get away from the smoke and dirt of the mills. The area of Ross near the city line was experiencing a building boom.

The Allegheny-Bellevue Land Co. divided up the estates, constructed sewers and laid gas and water lines. Streets were laid out, electric lights installed and a street car line started to operate from the city Blind Stop, just above the present Ross Municipal Building.

One of the early builders in the area was Frederick C. Martsolf who came to the area in 1904 and constructed 50 homes. In the spring of 1905, he conceived the idea of forming a borough and took an active part in its organization.

Quarter sessions court ordered the incorporation of the borough of West View, March 20, 1905. The holdings of the Freehold Real Estate Company, which had acquired hillside and farm lands that had been part of the original tracts of Reel, Hilands and others, were incorporated into the borough. The new borough had 640 acres in a sprawling plan, but a square mile nevertheless. The court ordered the first election to be held May 16, 1905. Walter Nixon was appointed judge of election and W. J. Martsolf and Frank McManus, operator of Donegal Inn, were named inspectors.

WEST VIEW THEN—AND NOW

Just about 100 votes were cast in that first election in 1905. In the 1977 election for mayor, 2,363 votes were cast. Women have always taken an active roll in politics in the borough since being granted the right to vote soon after World War I. West View now has a woman, Mary K. Bernhard, on council and a number of women have served on the school board through the years. The 1970 census shows a population of 8,312.

The police department has grown from one man on a motorcycle to a force of 9, including a chief, lieutenant and two sergeants with three police cars. One chief of police, William A. Quigley, was killed in the line of duty in September, 1927. Quig, as he was called, was chasing a truck on his motorcycle. The truck stopped suddenly. Quig ran into it. He died of injuries in Suburban Hospital. He had been a member of the police force for 15 years.

Traffic, which was controlled by a hand-operated stop and go sign, is now controlled by five electric traffic signals on the highway.

The street maintenance crew of nine men is supervised by John Hoellerman and Ron George. A borough manager, Harry J. Gruener, directs the day-to-day operation of borough business.

The borough provides free garbage and rubbish pick-up. The streets are all paved and well-lighted with street lights.

The schools have grown from 30 pupils at Highland School and about an equal number at Oakwood to about 1,300 in the North Hills School District that has a school population of 6,504.

As the borough moves into the final quarter of its first century, the future looks even brighter.

The proposed shopping center on the park property with its major grocery store, department store and as many as 32 other shops will attract customers from all over the North Hills area. Such an influx of outsiders is sure to bring additional business to existing stores, too.

Application has been made for federal grants and loans which will widen and extend Center Avenue, modernize the present business district along the highway and, in general, improve the borough.

Robert Browning could have been describing West View when he wrote: "Grow old along with me. The best is yet to be—the end of life for which the first was made."●

SURRENDERING IN THE WAR ON HUNGER

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. MILLER of California. Mr. Speaker, last week I took the well to share with my colleagues information about the effectiveness of the supplemental feeding program for women, infants, and children (WIC), which has been proven both to save lives and save money. The President's proposals would severely cut participation in the WIC program, which serves only low-income women, infants, and children, determined by medical assessment to be at nutritional risk. These participants, by most anyone's definition, are the truly needy.

I would like to share with my colleagues a recent article from the Los Angeles Times which describes how the administration's budget proposals affecting Federal food programs belie the administration rhetoric and would take a serious toll on the health and nutritional status of many, many low-income Americans. The article follows:

[From the Los Angeles Times, Mar. 12, 1981]

SURRENDERING IN THE WAR ON HUNGER—FOOD AID FOR NEEDY WOMEN, CHILDREN FACES SHARP CUT

(By James C. Webster)

The Reagan Administration claims that its proposed cuts in food assistance would not deny the "truly needy." The evidence is otherwise, even granting the Administration's bare-bones definition of true need. This became clear when Budget Director David A. Stockman went after the Special Supplemental Food Program for Women, Infants and Children, which targets prescribed food packages (infant formula, fruit, eggs and dairy products) to 2.2 million pregnant women, nursing mothers and infants with identified high nutrition risks.

Advocates argue that the program's rapid growth, from a $50 million pilot in 1974 to

its present $1 billion budget, has come about because of overwhelming evidence that it's one of the few federal projects that serve their purpose and are cost-effective, too. Even the conservative Heritage Foundation recommended keeping the program at current spending levels because "there is evidence that (it) does in fact improve nutrition." Stockman's analysts at the Office of Management and Budget will be hard put to refute the evidence.

One of the late Sen. Hubert H. Humphrey's most passionate arguments for the program, which he authored, was the surprisingly poor infant mortality rate in the United States—at 15 per thousand, almost double that of Japan or the Scandinavian countries. A frequently cited study by Harvard University's School of Public Health has since found that women in the program gave birth to low-weight babies only 6% of the time, compared with 10.1% for women in the study's control group. The study concluded that every $1 spent on the program for pregnant mothers saved $3 in hospital costs for their babies, because low-birthweight babies are prone to illness and long-term medical complications such as retardation and poor eyesight.

Now Secretary of Agriculture John R. Block has the unenviable job of selling cuts in the program to Congress, despite his own department's studies of the program and infant mortality. A Department of Agriculture analysis of seven Indian reservations in Montana reports that infant mortality dropped from 31.5 per thousand to 16.6 after the program was begun on the reservations.

To propose cutting almost one-third from a program with proven results and popular acceptance, on top of major surgery on food stamps and school lunches, while leaving some farm subsidy programs untouched will risk giving credibility to the charge that Reagan wants to balance the federal budget on the backs of the poor, the disabled, the elderly, even the hungry.

Even the strongest advocates of the food-stamp program will concede that it is marred by fraud, waste and abuse. Carter Administration appointees in charge of food stamps spent much of their time tightening error rates and improving management. But the Reagan proposal for $1.8 billion in cuts in the $12.4 billion program does not attack fraud and abuse. Instead, it seeks to deny eligibility to so-called "non-needy" families at the upper end of the eligibility list—mostly the elderly on pensions or people working at low-wage jobs.

The proposed reduction of $1.7 billion in the $4.1 billion school-lunch and child-nutrition programs also would hit the "truly needy," notwithstanding a White House declaration to maintain free school lunches for lowest-income families. Those families would be affected by Reagan's proposals in two ways. (1) The value of their free lunches, $1.02 a meal this year, would be counted as income in determining their eligibility for food stamps, thus reducing the food-stamp coupons that they receive for meals prepared at home. (2) Big cuts in federal aid for reduced-price and fully paid meals are likely to boost per-meal prices and cause students to drop out of the school-lunch program, either threatening the very existence of the program at many schools or turning the lunch room into an economic ghetto of poor and minority youngsters.

Stockman's zeal in trimming the food-assistance programs, and Block's acquiescence in cutting them rather than farmers' programs, may have bought more political trouble for their boss, the President, than he bargained for. While antagonizing the poor, who don't have much political clout, the Administration also has gored the ox of several special-interest lobbies with considerable muscle in Congress:

Farmers. All told, Department of Agriculture food programs this year are budgeted at $18.5 billion. Because farmers get 38 cents of every retail food dollar, the food programs represent $6.8 billion in farm income.

Grocers and manufacturers. Because they get most of the rest of the retail food dollar, they too stand to lose from a possible overall cut of $4.3 billion from Department of Agriculture programs.

Farm-commodity organizations. They support programs under which the department buys surplus commodities (peanuts, raisins, flour, vegetable oil, potatoes, poultry) to give to schools and institutions.

The dairy lobby. It stopped cold the efforts of the last three administrations to eliminate or cut the school-milk program that puts $120 million into the dairy market.

If the food-assistance budget cuts become symbolic of the political difference between the Administration's laudable goal of restraining federal spending and the wild-spending Democrats in Congress, it would be a tragedy, for feeding the hungry has never been a partisan issue. While President Kennedy's New Frontier and President Johnson's Great Society invoked compassion for the poor, the greatest expansion of food programs happened during Nixon's presidency. Nor was it Carter who in his first year in office declared war on hunger; that, too, was done by Nixon.

Political lines in Congress likewise have blurred when the issue is feeding hungry people. Former Sen. Herman Talmadge of Georgia, conservative chairman of the Agriculture Committee, was proud of his contribution to the expansion of the school-lunch program; Sen. Robert Dole (R-Kan.) stood shoulder to shoulder with Sen. George McGovern (D-S.D.) in almost every legislative improvement of the food-stamp program.

One of the principal engines behind the commitment to end hunger in this land of food abundance was a study by Field Foundation doctors who visited several poor rural counties in the 1960s and shocked the conscience of the nation with their findings of starvation and malnutrition reminiscent of famine-plagued Africa. In the late 1970s they went back to the same poverty pockets, and reported "far fewer grossly malnourished in this country than there were 10 years ago." They credited federal food programs for the turnaround.

Unless Ronald Reagan wants to be known as the Republican who surrendered the war that Nixon launched on hunger, he had better rein in his zealous budget-cutters and point them in another direction.●

FURTHER THOUGHTS ON EL SALVADOR

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. EDGAR. Mr. Speaker, amidst the testimony we have heard from both sides on the merits of whether to send U.S. military assistance to El Salvador or not, I find the remarks of Archbishop James A. Hickey before the Inter-American Affairs Subcommittee particularly well-reasoned and persuasive, supported as they are by the weight of the U.S. Catholic Conference and Church.

My own trip to Central America convinced me that the role of the church in the Salvadoran reform movement has been surprisingly overlooked and its importance underrated. Archbishop Hickey, long familiar with El Salvador from firsthand experience, noted in his testimony that

> • • • long before there were charges of outside intervention there was a struggle on behalf of large numbers in El Salvador for social, political and economic change. • • • To ignore this long struggle of a people for justice, dignity and freedom is to misunderstand the nature of the conflict today in El Salvador.

The archbishop speaks out forcefully in stating the church's opposition to military aid and intervention from all outside powers, a viewpoint I wholeheartedly share. I urge my distinguished colleagues to study the archbishop's thoughtful remarks in order to familiarize themselves with the church's opinion of the current situation in El Salvador. The testimony follows:

TESTIMONY OF MOST REV. JAMES A. HICKEY FOR THE U.S. CATHOLIC CONFERENCE BEFORE THE INTER-AMERICAN AFFAIRS SUBCOMMITTEE OF THE HOUSE FOREIGN AFFAIRS COMMITTEE ON U.S. POLICY TOWARD EL SALVADOR—MARCH 5, 1981

Mr. Chairman and Members of the Committee: I am Archbishop James A. Hickey, Archbishop of Washington. I testify today in the name of the U.S. Catholic Conference (USCC), the agency which represents the Catholic Bishops of the United States in issues of public policy. I am accompanied today by Father J. Bryan Hehir and Mr. Thomas E. Quigley of the USCC staff. I wish at the outset to express, Mr. Chairman, my personal appreciation and that of the USCC for this opportunity to present our views on the situation in El Salvador and the relationship of U.S. policy to that conflict.

In introducing this testimony, I stress that I come before this subcommittee as a pastor. The Church's concern for any events in the political or economic order is rooted in its concern for the human person. It is what happens to people, especially the poor, which is the focus of the Church's attention as it speaks to questions of public policy, domestic or foreign. On this basis, the Catholic Bishops in the United States have spoken often to the El Salvador question, precisely because of the impact which U.S. policy has on the lives of large numbers of the poor and oppressed in El Salvador. In addition to this general concern which I share with my fellow bishops in the United States, I have a personal connection with the situation in El Salvador from my six years as the Bishop of Cleveland. That diocese has a pastoral team in El Salvador. I maintained regular contact with them, visted them often, talked with the Church leaders in El Salvador, came to know the

people and their country. Two of the missionaries who were slain, Sr. Dorothy Kazel and Miss Jean Donovan, served there at my request and direction. In consequence I speak from personal acquaintance with the work of the Church in El Salvador especially as it took shape under the leadership of Archbishop Romero, who was assassinated a year ago this month.

I. A HISTORICAL PERSPECTIVE

I want to stress the value of a historical perspective for the debate regarding the present conflict in El Salvador. Couched largely in terms of "super-power politics" the current discussion seems to forget that for a long time the people of El Salvador have been struggling for social justice and for participation in the life of their society. The conflict which now captures our attention has been going on, admittedly in less visible and less noteworthy terms, for decades. We need perhaps to reflect on the infamous massacre of the campesinos in 1932. The nature of the conflict in El Salvador is a perduring one. My point is that long before there were charges of outside intervention there was a struggle on behalf of large numbers in El Salvador for social, political and economic change. The conflict has been over land, wages, the right to organize and the issue of political participation. To ignore this long struggle of a people for justice, dignity and freedom is to misunderstand the nature of the conflict today in El Salvador.

As a Catholic bishop, I wish to stress that a specific dimension of the El Salvador situation requires attention: the role of the Church. Here again historical perspective is crucial. To understand the role that the Church in El Salvador is playing today, we must see its pastoral decision to give special attention to the poor. This it did in the light of the teachings of the Second Vatican Council, of the Medellin (1968) and Puebla (1979) Conferences of the Latin American Bishops and of the teaching of Pope John Paul II. The changing posture of the Church in Latin America in the last fifteen years, from a socially conservative position to that of the leading voice for reform and social change, can be traced to the experience and teaching of Vatican II. It was the Council which called the Church to stand as the sign and safeguard of the dignity of the human person (*Guadium et Spes*, No 76). It was the Council which called the Church to see in "the signs of the times" an invitation to witness to the Gospel. The Church in Latin America responded to the conciliar call in a systematic and prophetic fashion. Through the Medellin Conference and the Puebla Conference it outlined a pastoral plan of evangelization which includes the defense of human dignity and the promotion of human rights as essential elements.

The Church in El Salvador exemplifies this larger movement of the Church in Latin America. Under the pastoral leadership of Archbishop Romero and of Bishop Rivera y Damas it has followed the imperative of the Puebla Conference, "to make an option for the poor" and it has brought it about that the Church is intimately joined to the struggle of the people of El Salvador for social justice and social reform. Catechists, members of the *communidades de base* (Christian family groupings) together with other laity and clergy have taken to heart the Gospel message and have tried to live it genuinely in all facets of their lives. From a truly spiritual perspective they have tried to introduce Christian principles to farming, business and government. For attempting this renewed Christianization of their country they have been called communists, subversives; and they have suffered persecution, even death for the Gospel. An Archbishop, eleven priests, thousands of lay people and now four American missionaries are dead in that effort.

At the same time, in fulfilling this ministry, the Church of El Salvador has drawn support from the words of Pope John Paul II. His recent statements in the Philippines about the right of workers to share in the fruits of their labor apply with striking similarity to the situation in El Salvador. Equally applicable is the forceful statement of the Holy Father that, "Even in exceptional situations that may at times arise, one can never justify any violation of the fundamental dignity of the human person or of the basic rights that safeguard this dignity." The Church's ministry in El Salvador and throughout Latin America since Medellin has been at the service of human dignity and human rights. It is my conviction that one cannot understand the role of the Church in El Salvador today apart from these themes. Furthermore, one cannot understand the situation in El Salvador apart from the Church and its ministry.

II. FROM HISTORY TO PERSPECTIVES ON POLICY

A sense of the social and religious history of the Salvadoran struggle for justice shapes my views on the present policy debate in the United States about El Salvador.

I share the apprehensions expressed last week by the United States Catholic Conference in testimony before the Foreign Operations Subcommittee of the House Appropriations Committee. Our mutual concerns are based on the way the El Salvador conflict has come to be seen, principally in the last few weeks, as a United States-Soviet or United States-Cuba test of will and strategy. While not denying that an international dimension of the conflict exists, we are very concerned that the internal quest for justice by the people of El Salvador receive due and proper regard in the policy debate of the United States. We can never achieve worldwide justice and peace by failing to recognize and support the efforts for justice and peace in the single nation of El Salvador.

It would be particularly unfortunate, in my view, if our necessary and proper concern for the security of the United States were to be used as justification for additional United States military aid to the present government in El Salvador. Neither the USCC nor I am complacent about the actions of other outside powers in the El Salvador conflict. To quote the USCC testimony, we find "the involvement of the Soviet Union (and other Eastern bloc nations) on its own or through Cuban cooperation, in the internal struggles of Central America, is unwarranted, unhelpful and ultimately unacceptable behavior on the part of a superpower". Our position is to oppose military aid and intervention from all outside powers. We urge and support political pressure and other diplomatic measures by Latin American nations and by ourselves and our allies to stop the flow of arms from Cuba through Nicaragua to El Salvador. But as a part of this approach we earnestly and vigorously oppose the sending of United States military assistance to El Salvador.

Our opposition to military aid has been based on the conviction that such aid associates the United States with the actions of the security forces which, in our view, still remain uncontrolled. A further reason for opposing military aid at this time is the danger of so strengthening the power of the military that the ever-present possibility of a rightist coup would be increased. This, in my judgment, would in turn provoke reversal of the land reforms and an increased repression of the people that could result in a civil war of immense proportions. The United States should not be associated with such a chain of events.

In the long term no nation can be kept from freedom, from the exercise of human dignity or from the use of its land by force of arms. And in that same long term our American government should be remembered, not as the supplier of arms used to kill the people, but as a government that stood for the dignity and integrity of the human person and the free exercise of God-given rights. This is our American heritage and tradition.

A particularly ominous development of recent policy is the introduction of more United States military advisers into El Salvador. I find the move risky to the point of being reckless. It confirms the worst suspicions of Latin Americans that we are slowly preparing for an invasion of El Salvador. It could be used by unfriendly powers to justify similar actions. It will increase the volatility and symbolic significance of the conflict for us if any United States military personnel are injured or killed. I am particularly concerned that the sending of any American military personnel commits the United States to the conflict in a way which is difficult to reverse. Furthermore, it is my understanding that since United States law prohibits the training of the Treasury (hacienda) police or other internal police forces of a foreign power, our advisers may not be in a position to remedy those elements of the Salvadoran security forces most in need of restraint.

The problem in El Salvador is rooted in the need for political and economic reform within the country. United States diplomacy should be aimed at producing such reforms; military aid, in my view, mortgages our potential to do this.

III. PROPOSALS FOR POLICY

To promote the absolutely necessary reforms within El Salvador will require United States diplomatic pressure, but also continuing amounts of United States economic assistance. I realize we are now sending much assistance to the Salvadoran government. In distinction from its position on military aid, the USCC does not oppose economic aid, it encourages it. I wish to add a strong personal plea for an increased United States effort to provide emergency aid for El Salvador for long-term development assistance that will benefit the common working man and woman. There are specific needs of the moment—from aid for the refugees left homeless when their homes and villages are destroyed by military action, to the replacement of bridges and power stations destroyed by guerrilla action, to necessary medical supplies. This kind of aid, rather than more equipment for the security forces, is what the United States should be contributing to the situation.

On the diplomatic front, there is a notable silence in our American policy with regard to fostering that kind of political dialogue in El Salvador which a basic resolution of the conflict will require. I realize the complexity of this topic at the moment; the efforts of West Germany testify to the difficulty of serving as catalyst for political discussions. Yet I am not satisfied that it is sufficient to say that the Church in El Sal-

vador has offered to mediate and that the Salvadoran Government has, in principle, agreed; that it is the left which refuses to negotiate. I believe that there are ways in which approaches can be made to the various elements which form the opposition to the present government in El Salvador. I believe that options are open to our government to encourage that dialogue between all parties which is so necessary for a true and lasting peace. The United States voice at a political level is a unique one; in collaboration with other key nations we may be able to open channels of communication which move the civil strife from the fields and homes of the campesinos into the political process.

Finally, I wish to address a topic which is of the highest concern to the Church in the United States: the investigation of the murders of our four American missionaries. In that connection I add also the murder of the three labor leaders, two of whom were American citizens. Without entering into the details of the investigations, I simply want to cite the degree of doubt and suspicion in church circles here and in El Salvador with regard to the nature and pace of the investigation. Furthermore, I wish to express the concern we have that the progress and outcome of the murder of the churchwomen has been divorced from other aspects of United States policy. In December we understood that the seriousness of the investigation would be taken by the United States Government as one important sign of the commitment of the Junta to discipline the security forces. In recent weeks we find little or no stress, at the level of United States policy, on the connection between the progress on the investigations and United States aid to the Salvadoran Government. The missionaries are important to us because they gave their lives in the service of the poor and of the Gospel. However, they are also important because their deaths, like those of the labor leaders, remind us of the thousands of ordinary Salvadorans who have been murdered, principally from the political right, and whose deaths have gone unrequited. The Church in the United States will not forget what the missionaries have done; we will not let this issue rest unresolved.

I close, Mr. Chairman, where I began: with a plea for a perspective on the tragic conflict in El Salvador. The pressure of the present debate should not move the United States down a road which both we and the Salvadoran people will regret. The conflict there has deep roots; it reaches into the life of a people too long denied the fruits of their labor, too long denied meaningful participation in the life of their society. The United States reponse should address the roots of the conflict: it is not principally a matter of guns but of justice. My prayer is that our government will be of assistance in achieving a political solution in El Salvador, a solution based on justice, charity and a full recognition of the dignity of the human persons involved.●

HUNT FOR SILVER—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 1981

● Mr. McDONALD. Mr. Speaker, in the interest of fairness to the Hunts, who, in my view, were very unfairly treated in the press last year over supposed manipulation of the silver market, I am today inserting in the CONGRESSIONAL RECORD, part I of an article from American Opinion magazine that appeared in December of 1980. Written by Gary Allen, it pretty well demolishes the myth of the manipulating and scheming Hunts that was given by the press last year. I commend it to the attention of my colleagues. Part I follows:

[From the American Opinion magazine, December 1980]

HUNT FOR SILVER

(By Gary Allen)

Nelson Bunker Hunt, fabled son of the legendary billionaire H.L. Hunt, of Texas, has been called "Silverfinger" by financial journalists eager to dramatize his silver investments in the purple ad hominems of a James Bond novel. Hunt is neither an eccentric villain out of James Bond nor a sinister schemer in the mold of J.R. Ewing of the "Dallas" television series. He is, in fact, a happy combination of sober realist and idealistic visionary. He is a sober realist because he understands the perilous direction in which our civilization has been headed—the political instability, the civil turmoil, the financial catastrophe of hyperinflation and moral bankruptcy. And he is an idealistic visionary because he is working for a better world in which the people govern themselves and their economy without being victimized by a paper aristocracy which profits by manipulating government and inflating currencies.

Mr. Hunt is a faithful Christian, friendly, unassuming, and temperate. He refrains from both liquor and tobacco, flies tourist class on commercial airlines, and dresses simply. A member of the National Council of The John Birch Society, he is a determined patriot and a formidable opponent of Establishment Insiders who seek to make America one more colony in a New World Order.

Earlier this year, Bunker Hunt and his brother Herbert were targets of one of the most spectacular swindles in financial history. This was marked by the now-infamous silver crash that culminated on March 27, 1980. But before we describe this biggest holdup since the Brinks job, let's examine some of the reasons the Texas billionaire set out to acquire one hundred million ounces of silver rather than, say, a million pounds of kumquats.

It has been alleged by the usual Establishment propagandists that the Hunt brothers were irresponsible "speculators" in silver and that it was their actions that produced the silver debacle. But Bunker Hunt was not a speculator in silver. Speculators are short-term players. They do not buy their holdings to keep, as Hunt was doing and continues to do. People gamble on the future price of pork bellies to make money in a relatively short period—not as a long-term investment. With gold and silver, on the other hand, there are many who—like the Hunts—see the metals as cash and prefer them to paper money. They are investors for the long term. Thus Bunker Hunt put a fortune in silver for three reasons:

(1.) Mr. Hunt is aware that for the past twenty years world production of silver has been in the neighborhood of 300 million ounces annually while consumption has been about 500 million ounces. This means that every year the world comes up short on silver by about 200 million ounces. This "shortfall" has been made up from silver mined and stored over hundreds of years. Since about a third of the world's silver is in the form of jewelry in India—and is locked up there because of the Indian Government's prohibition of its export—Bunker Hunt quickly calculated that the "shortfall" would soon consume all the available reserves of silver and produce a price squeeze. The price of silver was bound to rise dramatically.

(2.) Most people still listen to Walter Cronkite telling them that inflation is rising prices. But, Mr. Hunt knows that rising prices are the effect of inflation and that the cause is huge federal deficits that are spun out into the economy as fiat credit and currency. Bunker believes that the politicians will continue to pump money into the economy, in effect buying votes from the unproductive to be paid for by reducing the value of the savings of the productive. Deficit money takes on value only by diluting the purchasing power of all the money that is already in circulation. Mr. Hunt realized that this process might continue until it takes a wheelbarrow full of Washingtons and Lincolns to buy a Big Mac.

(3.) Should the purchasing power of our currency approach zero in a hyperinflationary nightmare, the people would demand a more stable means of exchange. At that time, gold would be too precious to be used in the everyday monetary transactions of the average citizen and silver coins would once again become a means of exchange. But it will not be the face value that is stamped on the coin which is important (i.e, ten cents, twenty-five cents, fifty cents), but the silver content of the coins. A dime might have the same purchasing power as ten dollars in currency.

For these three reasons the Hunts began buying silver in the 1970s as a hedge against inflation and political chaos—an investment which had to increase in value due to the increasingly short supply in comparison to the increasing world demand on the metal. Nonetheless, some have accused the Hunts of trying to "corner" the silver market. To "corner" a market one would have to acquire enough of an essential commodity to obtain a virtual monopoly in it and be able arbitrarily to set the price. That was not the Hunt objective. As Alan Trustman observes in the September issue of Atlantic:

"* * * Their behavior was not typical of that of cornerers. In the first place, they told everybody who would listen what they were doing; they were big, big buyers and intended to buy more and more. A cornerer operates in secret until he owns substantially the entire available supply, and then he squeezes the surprised innocents who have sold short and must buy in higher.

"You would have to have been belligerently deaf and disbelieving and anything but innocent to sell short and then be caught surprised if Nelson Bunker and William Herbert had cornered silver and demanded that you deliver. Everybody knew they were buying and willing to pay a higher price.

"In the second place, they never tried to squeeze anyone. They took their deliveries slowly, over many months, even accepted in settlement of some of their contracts noncertified silver not on deposit with the exchanges, and gracefully rolled the bulk of their futures forward into later and later months so as not to squeeze the sellers. Cornerers? Not quite."

While it is true that the Hunts wished to acquire large quantities of silver, as we have noted, they had the soundest of reasons for doing so. Which is why they went into the futures markets. As silver's price continued to go up, the value of the Hunt silver futures rose rapidly, and those paper profits were used to borrow more money with which to buy more silver futures positions.[1]

As this mountain of silver grew with the rise in price, the "shorts" who had agreed to deliver silver they didn't have, and therefore had to buy silver at increasingly higher prices to fulfill their contracts, grew progressively more nervous. Those who go heavily short in a rising market lose. Having to purchase silver at a high price in order to deliver it for a low price is not a good situation in which to find oneself. But, just like every other player, the "shorts" knew the risks when they contracted. They were all over twenty-one and none arrived in town atop a wagonload of pumpkins. Mr. Trustman reports what happened:

"* * * the short sellers of silver were very short and in very hot water. They had had plenty of advance warning, and, as one month after another rolled around where the longs never tried to squeeze the shorts, (and could not have done so even if they wished to, with the CFTC[2] and the ruling bodies of the exchanges looking on), it became more and more difficult to sympathize with the short sellers of silver. But short they were, and facing the prospect of enormous, crushing loss."

In other words, these players had made a mistake in the market—a crucial mistake. Trustman continues:

"Silver was going out of control. As the price of silver mounted, it became ridiculous in the eyes of many exchange members. Six dollars an ounce? Seven dollars? For silver? Sooner or later the bubble would break. If not, they could always make it break. It would be their duty, they would claim, to make the price break, for the benefit of the makers and users [of silver] and for the protection of the public. And some of them—we suspected and now know from the CFTC—shorted silver, selling futures on silver they did not own."

The higher the price of silver went, the more the "shorts" stood to lose. Facing enormous losses, some of them used their influence on the governing bodies of the commodity exchanges to sabotage the market and support the shorts at the expense of the longs—primarily the Hunt brothers. They did this by getting the exchanges to change the rules in the middle of the game. As Herbert Hunt later remarked: "To put it in the terms of a football analogy; the game starts, the rules are changed, and finally when you get to the last quarter the referee says only the other side can have the ball."●

[1] A commodity futures contract is a legally binding agreement to buy or sell a designated amount of a given commodity, at a specified time in the future, and at a price agreed on at the time the contract is made. On every side of a futures contract there is a "long" investor and a "short" investor. The "long" believes that the price will be higher when the futures contract comes due in anywhere from one to eight months. The "short" investor on the other side of the same contract is banking on the price being lower at the time the contract comes due. Hunt was "long" on thousands of contracts for five thousand ounces of silver each. He obviously expected the price to continue to go up, and added to his positions.

[2] Commodity Futures Trading Commission, the government bureau which oversees the futures trading industry.

HOUSE OF REPRESENTATIVES—*Wednesday, March 18, 1981*

The House met at 3 p.m.

The Chaplain: Rev. James David Ford, D.D., offered the following prayer:

Seek the Lord while He may be found, call upon Him while He is near.—Isaiah 55: 6.

O Lord, You dwell in the eternal reaches of the heavens, and yet You live in the human heart. Your promises ring from the mountaintop, and yet You listen to the personal cry of each of Your people. Help us, O Lord, to hear Your voice and see Your presence in the seemingly ordinary run of life, that we may minister in love to those nearest to us. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

APPOINTMENT OF DELEGATION TO ATTEND CONFERENCE OF INTERPARLIAMENTARY UNION IN MANILA, PHILIPPINES

The SPEAKER. Pursuant to the provisions of title 22, United States Code, section 276a-1, as amended by Public Law 95-45, the Chair appoints as additional members of the delegation to attend the Conference of the Interparliamentary Union to be held in Manila, Philippines, April 20-25, 1981, the following Members on the part of the House: Mr. PICKLE of Texas; Mr. DE LA GARZA of Texas; Mr. HAMILTON of Indiana; Mr. DANIELSON of California; Mr. BOWEN of Mississippi; Mr. LEVITAS of Georgia; Mr. RHODES of Arizona; Mr. BROOMFIELD of Michigan; Mr. MCCLORY of Illinois; and Mr. VANDER JAGT of Michigan.

RESIGNATION AS MEMBER AND APPOINTMENT AS MEMBER OF SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

The SPEAKER laid before the House the following resignation from the Select Committee on Narcotics Abuse and Control:

HOUSE OF REPRESENTATIVES,
February 27, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House,
H-205, The Capitol.

DEAR MR. SPEAKER: I appreciate very much the honor of being appointed by you to serve on the Select Committee on Narcotics Abuse and Control. Much needs to be done to alleviate the serious national problem imposed by illicit drugs, and the Committee can be helpful in dealing with many facets of the problem.

Nonetheless, I have taken on added responsibilities as a member of the Committee on Government Operations and do not feel that I will be able to devote the time and attention to the Select Committee as its mandate requires. Therefore, I respectfully request that my appointment be vacated and another Member appointed in my stead.

Best wishes,

STEPHEN L. NEAL,
U.S. Congressman.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to House Resolution 13, 97th Congress, the Chair appoints the gentleman from California, Mr. MATSUI, as a member of the Select Committee on Narcotics Abuse and Control to fill the existing vacancy thereon.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
March 17, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 3:35 p.m. on Tuesday, March 17, 1981 and said to contain a message from the President wherein he transmits the Seventh Special Message for Fiscal Year 1981 under the Impoundment and Control Act of 1974.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

PROPOSALS TO RESCIND AND REDUCE BUDGET AUTHORITY AND ONE NEW DEFERRAL—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-32)

The SPEAKER laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 81 proposals to rescind a total of $11.1 billion in budget authority previously provided by the Congress. In addition, I am proposing to reduce authority to incur obligations for direct loans by a total of $751.8 million and I am reporting one new deferral of $3.4 million. These proposals are an integral part of my plan to reduce government spending.

The details of the rescission proposals and the deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *March 17, 1981.*

SECRETARY BELL HITS NAIL ON HEAD ON BUSING

(Mr. MOTTL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOTTL. Mr. Speaker, all of us concerned about our public schools should welcome the remarks of Education Secretary Bell concerning court-ordered busing and its disastrous consequences.

Secretary Bell pledged during a Sunday public affairs program that he would keep his Department out of busing cases. Further, the Secretary indicated support for our neighborhood schools constitutional amendment, to put an end to this destructive judicial policy.

Secretary Bell hit the nail on the head when he observed that court-ordered busing isolates the parent from the neighborhood schools, handicapping parental participation. I could go on at length about many other destructive characteristics of court-ordered busing.

But suffice it to say that it is indeed a pleasure to have a Secretary of Education who recognizes court-ordered busing for the immense failure that it is.

Please sign discharge petition No. 1, at the Clerk's desk.

WHICH DAY IS IGNORE EL SALVADOR DAY?

(Mr. STUDDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STUDDS. Mr. Speaker, the Reagan administration has not made it clear to us whether today is one of those days when we should ignore El Salvador because it is relatively unimportant, or whether today is one of

those days during which El Salvador acts as sort of a latter-day maginot line against the international Communist conspiracy.

We would be very thankful if Secretary Haig could provide us with an El Salvador crisis calendar so that we could adjust our attention span accordingly. On the off-chance that today is one of those days we are encouraged to think about El Salvador, I speak now briefly in my own behalf and on behalf of the 72 other Members of the House who are sponsoring H.R. 1509, a bill to prohibit military aid to that country.

I and some of my colleagues to follow take this opportunity to make clear to this administration that El Salvador is not an issue which will simply fade gracefully from the consciousness of the Congress or the American public. El Salvador is not a water faucet. It is an ongoing human tragedy of terrible proportions.

Today we begin what we intend to be a series of demonstrations of our determination to make certain that the issues of El Salvador are fully and clearly explored and that the nature of our commitment to the Salvadoran junta is clearly understood by the American people.

We intend to ask now in vigorous and forthright terms those questions which Congress waited far too long to ask with respect to America's involvement in Vietnam.

JOINT REFERRAL TO COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS AND COMMITTEE OF ENERGY AND COMMERCE OF H.R. 1916, FEDERAL RESERVE ACT AMENDMENTS

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that the bill (H.R. 1916), a bill to amend the Federal Reserve Act with respect to certain reserve requirements, be jointly referred to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

DANGEROUS ESCALATION IN EL SALVADOR

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, the latest reports from the distinguished gentleman from Maryland, Chairman LONG, and the latest news from the administration reaffirm my belief that our country is walking sideways, and blindfolded, into a needless military involvement in El Salvador.

We have been down this twisted road before, Mr. Speaker—and not so many years ago that the course can be forgotten by those of us who will soon be reviewing the requests for further military aid appropriations. This dangerous escalation began with the shipment of small arms to the unpopular military-backed government in San Salvador; it grew with the gradual shipment of 10 Huey helicopters, the millions of dollars in additional military assistance, the steady buildup in U.S. military advisers.

Now we learn that a further contingent of advisers—a squad of Green Berets—is on its way to El Salvador to train the regime's troops in the latest counterinsurgency tactics, and to instruct them in the use of the hardware we have and will be sending them.

I urge the President to heed the lessons of recent history and diligently avoid an unjustified, unnecessary, and politically unacceptable military involvement in El Salvador. And I urge my colleagues to add their voices to those who would turn America's attention to a peaceful, political solution to the Salvadoran conflict, not a military one.

Our active presence in El Salvador will only widen and prolong an internal war—and it is a war in which America does not belong, a war America does not want.

CRISIS IN EL SALVADOR DID NOT START YESTERDAY

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, the crisis in El Salvador did not start yesterday. In fact, the Marxists and the problems that exist with it have been there for nearly 50 years. Clearly we are not going to solve it in a very short period of time.

It is my feeling and I think those of many Americans that the Carter administration erred on the side of providing more military assistance and economic assistance at the expense of human rights with its January decision.

In spite of that and in spite of the time that the new Reagan administration had, it has not used that time wisely, so we find ourselves embroiled in a situation where more arms are provided, more economic assistance without any consideration of the human rights values that are involved.

Ironically, as we change this policy, we have to consider all aspects. We have to consider the OAS force and our position of neutrality with regard to El Salvador and our policies with relation to the other countries in South and Central America.

Although we are told again and again that there are no combat troops, these OAS people and the peacekeeping force they represent are a convenient target for guerrilla activities, either from the left or the right; so as we change the policy, we have to recognize that we change our posture and position with regard to our avowed neutrality.

President Reagan's decision to send military advisers and increased military assistance to El Salvador represents a basic change in U.S. policy. The immediate ramifications of this policy change affect our relations with all Central American countries as well as the Organization of American States (OAS), the security organization for the Western Hemisphere. In addition, the new U.S. posture toward El Salvador unnecessarily endangers the lives of the nine U.S. servicemen already assigned to an OAS mission to monitor the Honduras-El Salvador border.

Since World War II, the basic policy of the United States has been to rely on the OAS to keep the peace in Latin America. It was in accord with this policy that the OAS established a peacekeeping force along the Honduras-El Salvador border following the outbreak of hostilities between those two countries in 1969. According to the U.S. Department of the Army, American servicemen have been part of the OAS force since 1976.

Despite assurances from the White House that there are no American servicemen in regions of hostility in El Salvador, these American servicemen have been and continue to participate in OAS jeep and helicopter patrols on the border where guerrilla activity is taking place. These soldiers wear American uniforms. Seven of them fly U.S. Army helicopters which are the same type as the helicopters now being sent as part of the administration's aid package. The other two American servicemen patrol the remote border areas in jeeps, accompanied for the most part only by a driver.

These OAS-American servicemen certainly are vulnerable guerrilla targets. News reports indicate they have been under fire. Last December one American helicopter piloted by the U.S. crew returned from a patrol with three bullet holes in its side. Fortunately, thus far no one has been wounded.

The viability of this OAS peacekeeping force, like similar U.N. forces in the Middle East, is predicated on the fact that it is neutral and has the support and participation of noninvolved members. While the U.S. manpower contribution to the peacekeeping force is relatively small, it does represent an important factor. Through its participation in the OAS action, the United States appropriately signaled its com-

mitment to a neutral, multilateral approach to conflict resolution.

President Reagan's new policies in El Salvador have drastically altered the circumstances of our involvement in that country and will have a marked effect on world perceptions of U.S. neutrality with respect to El Salvador. We have given a significant military commitment to the government of that country. The American servicemen in the OAS force have been undercut because the neutrality which permitted their functioning in the OAS force has been seriously eroded.

The presence of the nine American servicemen in the demilitarized zone provides a convenient target to leftist and rightist guerillas. This OAS-American contingent wears uniforms not unlike those of the U.S. advisers training the El Salvadoran troops. Any attack on these servicemen would surely further destabilize El Salvador and escalate our commitment and presence in that country.

I believe that the administration has not considered the full implications of its actions in El Salvador. In the midst of the announcements of our policy change toward El Salvador—according to a United Press International report—the contract for American participation in the OAS peacekeeping body was continued until July 1981. Clearly there appears to be a lack of coordination of policy. The left hand does not seem to know what the right hand is doing. Such an approach to policymaking is a sure road to disaster.

I hope that the President will reassess his approach to our relations with Latin America. The past multilateral approach has proven successful. Cooperation with our hemispheric neighbors is preferable to unilateral action. I believe that the military advisers are a mistake. Nevertheless, their introduction is U.S. policy and the implications of that policy must be thought through.

Why is it necessary to continue to keep those Americans on the OAS peacekeeping force? Surely the presence of these nine Americans in an OAS force numbering in the hundreds is not crucial to its success. If anything, under present circumstances it detracts from the OAS mission. As Prof. Robert R. Riggs, formerly of the University of Minnesota and a leading expert on international organization and international law, said:

> The introduction of U.S. advisers into El Salvador makes our continued participation in the peacekeeping forces suspect.

I have asked Secretary of State Alexander Haig to request the immediate removal of these nine American servicemen from El Salvador. Their lives are in danger as they have not been before. Their presence, with the change in the U.S. military posture, diminishes the world's perception of OAS neutrality. And their continued participation in the border patrols only increases the opportunities for any of the forces involved in the Salvadoran conflict to challenge the United States and force some type of retaliatory action.

We are engaged in the most sensitive and dangerous political maneuverings in El Salvador. Prudence and commonsense dictate that we avoid ambiguities. Despite our decision to intervene unilaterally, we should signal our support for the principle of OAS involvement. The way to do this under the present circumstances is to withdraw American participation. The United States has decided to coach. It can no longer serve as a referee.

ADMINISTRATION POLICY IN EL SALVADOR IS BOTH MORALLY AND STRATEGICALLY WRONG

(Ms. MIKULSKI asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Ms. MIKULSKI. Mr. Speaker, I rise to state my opposition to the present administration policy in El Salvador. I believe our policy is wrong both morally and strategically. We will never win peace by encouraging terrorism; we will never win respect by winking at the murder of American citizens; we will never impress the rest of the world by arming the murderers of nuns and peasants.

When I traveled to Central America this year, I met with many Salvadoran refugees. They told me that they had to flee their villages because uniformed military officers were using American equipment to make war on a peaceful civilian population. The soldiers of El Salvador arrive in American helicopters to kill and torture men, women, and children. They use rape as a weapon of terror. They carry out particular atrocities against pregnant women and young children.

I do not believe that the people of the United States want to go on sending arms to a government that cannot or will not stop its own troops from attacking its own people. I do not believe that our constituents want to see their tax dollars used to help buy guns that will murder archbishops saying Mass and nuns working to teach people to read and write.

I urge my colleagues to join me in saying: No more. No more arms to El Salvador. No more military advisers; no more Green Berets; no more American involvement; no more American weapons to make war on the Salvadoran people.

U.S. INTERVENTION IN EL SALVADOR GRAVE RISK TO PEACE

(Mr. AuCOIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AuCOIN. Mr Speaker, during a factfinding trip to El Salvador, our colleague, the gentleman from Maryland (Mr. LONG), was quoted this week as saying that he wishes that the President of the United States would read a few books. The Congressman's message is that past failures of the United States in both Vietnam and in Central America are well documented, and if ignored at this crucial juncture, they gravely risk the cause of cooperation in the hemisphere, peace, and social justice.

To add to what Congressman LONG has said, I would only express this hope: That the President of the United States will listen to the voice of the American people.

U.S. military intervention in El Salvador has nothing to do with protecting democracy, and the American people can see that. The misery of the exploited Salvadoran people has been deepened by their Government and the American people can see that, too.

Our leaders are telling us that we are fighting terrorism in El Salvador, but the American people know that the very military establishment we are supporting has terrorized its own people for years.

Mr. SPEAKER, my mail shows that with each new dispatch of military aid and advisers to El Salvador, we find a deepening opposition of the American people. Many of the letters I receive are copies of letters sent directly to the White House. Those letters speak the truth; namely, that the problems in El Salvador are not military, that they deal with social justice and repression.

□ 1515

OPPOSITION TO MILITARY INVOLVEMENT IN EL SALVADOR

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, I rise in opposition to our growing military involvement in El Salvador.

It is clear to me that the risks of this involvement are rising each day. Yesterday, for the second time in as many weeks, our San Salvador Embassy was strafed by machinegun fire. Although no one was injured, the incident highlights the impunity with which both rightwing and leftwing extemists can attack American personnel.

Under these conditions it makes no sense at all for us to be escalating our military presence in El Salvador. We are committing ourselves to a military struggle on behalf of a civilian junta that still lacks political legitimacy. In doing so, we are undermining the junta's only genuine chance of defeat-

ing the extreme left by building popular support around political and economic reforms.

While resuming military aid, the Carter administration, at least, had persuaded the junta to adopt a sweeping program of land reform. Now, by promising unconditional military backing, the Reagan administration risks losing the leverage required to push through these reforms. Instead the flow of American arms and military advisers will force the civilian government to accommodate its own antireform military.

El Salvadoran President Duarte understands this danger and has cautioned against further military aid and advisers. Our allies in Central America also understand this: Mexico and Venezuela, in particular, fear that President Reagan's military focus will heighten the use of arms in neighboring unstable countries like Guatemala, Nicaragua, and Honduras.

It is time for us to remember that our greatest foreign policy failures of the past decade—Vietnam and Iran—resulted from wrapping ourselves in close military ties to politically unstable regimes. We must not repeat this mistake in El Salvador.

GOVERNMENT TERRORISM IN EL SALVADOR

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, we are told by the new directors of foreign policy in the Reagan administration that the old emphasis on human rights has been replaced in our dealings with other nations by a new emphasis on combating terrorism. While human rights considerations have certainly disappeared from our new counsels of state, the much vaunted antiterrorist policy is proving to be a very strange animal.

In El Salvador at the present time there are so-called death squads that roam the towns and much of the countryside at will, carrying out summary executions with impunity. Some 10,000 Salvadorans have been killed in the past year; 2,000 more have died at the hands of the death squads, police, and armed troops since January. Moderate politicians like Col. Adolfo Majano have been driven out of government service and have had to go into hiding in fear for their lives. Catholic nuns have been brutally murdered by the roadside and no efforts have been made to find their killers. Other religious leaders, writers, and thousands of ordinary peasants and workers go daily in fear of their lives.

Yes, there is certainly a condition of terror in El Salvador today. But the terrible twist to this sad story is that the source of this terror is the ruling junta of the country, which supports a campaign of murder and intimidation against its own people, through the National Guard and the armed paramilitary extremists opposed to all social and land reform. As a part of the President's new antiterrorist policy, our Nation is now supporting that junta with military arms and training. I wonder how long it will be before the administration's antiterrorist policies will lead them to commit American troops to help the Salvadoran junta even more in their campaign of terror? Hopefully, before that fateful day the U.S. Congress will recognize the bankruptcy of a Latin American policy that supports organized governmental terrorism against women and children and all forms of dissent.

EL SALVADOR POLICY A DISASTER

(Mr. SHANNON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHANNON. Mr. Speaker, for the last several weeks Members of this Chamber have come into the well to condemn American involvement in the politics of El Salvador. Throughout this period there has been a growing concern in the country that we are being lead into another Vietnam. This concern is seen in every district across the country and I think the mail of most Members will reflect it.

Yet throughout this period there has been an eerie silence on the Republican side of the aisle on the issue of El Salvador. Is support for the President so strong in those Republican districts that these Members are afraid to criticize this policy? Is support for the President so strong that they are afraid to stand up and condemn oppression and killing of American clergy people? I would hope not.

The time has come for us to get on with the business of dealing with our economic problems in this country. El Salvador should not obstruct that task. I ask the Republican Members to join with us, to join with us in convincing the President, in convincing the Secretary of State that our policy in El Salvador is a disaster.

THE SO-CALLED CUTS IN THE REAGAN BUDGET

(Mr. DONNELLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONNELLY. Mr. Speaker, Congress and the public must be warned that many of the so-called cuts in the Reagan budget will not actually reduce Government spending. They merely reestimate spending levels to reflect the administration's unrealistic and rosy economic assumptions.

The Congressional Budget Office has taken a good hard look. They conclude the administration has underestimated spending by $20 to $25 billion because it has overestimated the impact of its policies on inflation, unemployment, interest rates, and economic growth.

The economists and budget analysts who have testified in committee have agreed overwhelmingly—the administration's economic assumptions are not realistic.

Even the Republican-dominated staff of the Senate Budget Committee concludes the White House has overstated savings by $5.7 billion.

This Congress is committed to a genuine reduction in Federal spending. However, we would not be doing our duty if we passed a budget based on a mathematical sleight of hand.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. DONNELLY. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I would like to associate myself with the remarks of the gentleman in the well.

Practically no reputable professional economist now supports the economic assumptions of the Reagan budget. On March 12, this country's three outstanding economic forecasting firms testified regarding the economic assumptions. Robert Gough, vice president of Data Resources, Inc.; Lawrence Chimerine, chairman of Chase Econometrics, and Lawrence Klein, of Wharton Econometric Forecasting Associates, Inc., all disagreed with the administration's inflation projections which show the Consumer Price Index decelerating from 10.5 percent this year—fourth quarter to fourth quarter—to 7.2 percent in 1982. Their estimates for 1982 were 9.5 percent for Wharton, 9.7 for Chase, and 10.2 for DRI.

Chimerine was joined by Gough in defining the present inflation as cost-push inflation compared to a demand pull claimed by the administration.

The three firms were equally in disagreement with the administration's assumption of a growth rate of 4.2 percent in 1982. The firms' forecasts are 3.6 percent for Chase, 2.3 percent for Wharton, and 3.5 percent for DRI.

The testimony of these three noted economists demonstrates that the President's projections concerning reduced inflation and interest rates can only come true if his pie-in-the-sky economic assumptions are valid. Increasingly, the Nation's economists disagree with these assumptions.

THE PRESIDENT SHOULD OBEY THE LAW

(Mr. OTTINGER asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, I rise once again to call on President Reagan to obey the law and honor the war powers resolution by reporting to Congress on his decision to send military advisers to El Salvador.

The President came into office on a campaign of respect for law and order, and it is clearly a semantic subversion of the War Powers Act not to submit this most important question for congressional consideration.

The implications of this military intervention are just dawning. I set up the Peace Corps in Latin America and, indeed, in El Salvador. I can tell my colleagues there is nothing the Latins fear more than a renewal of American military interventionism as a policy in that continent.

Furthermore, it completely undermines our efforts to try and get the international community to express their repulsion and to put pressure on the Russians to get out of Afghanistan. If the Russians are minded to go in with military troops to Poland, our intervention in El Salvador makes it far easier for them to do so.

The President should obey the law and submit this question to Congress. That is why I have introduced House Concurrent Resolution 87, which calls on the President to report to Congress under the war powers resolution with respect to his actions in El Salvador. I urge support of this resolution, and I am inserting a copy of it in today's RECORD:

H. CON. RES. 87

Concurrent resolution declaring that the President's decision to commit United States military personnel to El Salvador requires that he comply with section 4(A) of the war powers resolution

Whereas the war powers resolution is designed to insure Congress a full deliberate role in the involvement of United States military personnel in hostilities abroad;

Whereas introduction of United States military personnel in El Salvador clearly involves those personnel in hostilities and endangers their safety: now, therefore, be it

Resolved by the House of Representatives (the Senate concurring) That the President's decision to commit United States military personnel to El Salvador requires that he comply with section 4(A) of the war powers resolution in order to preserve the integrity of the war powers resolution and insure the full and cooperative judgment of both the Congress and the President with respect to the introduction of United States military personnel into that country.

REAGAN ADMINISTRATION NEEDS SPEEDY ORGANIZATION

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, our Republican brethren also appear to be somewhat frustrated by the slow pace of the administration in making its programs work. The chairman of the Senate Energy Committee, JAMES MCCLURE, was quoted as castigating Energy Secretary Edwards for the slow pace of filling the top jobs at the Department of Energy.

An agency cannot function without leadership. I join Senator MCCLURE in urging the administration to speed up the appointments to key positions at DOE and the other agencies. We must get the administration organized so that we can get on with the urgent business of our country.

EL SALVADOR

(Mr. MAVROULES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAVROULES. Mr. Speaker, many of us have begun to suspect that the Reagan administration sees El Salvador as an updated version of Vietnam.

Indeed, all the signs are there.

American advisers are being sent to El Salvador, and opponents of the Reagan policy are being denounced as nervous nellies—the same label used in the sixties to describe Vietnam war critics.

But the truth is that El Salvador is not Vietnam.

Social and economic justice have opportunities in El Salvador that they never had in Vietnam.

Sending guns and military advisers is no way to take advantage of these opportunities.

Meaningful land reform, on the other hand, would.

Let us then work toward that goal.

Let us also encourage free elections, not random violence. And let us, finally, help Salvadorans reap the rewards of peace and economic prosperity.

KEMP-ROTH TAX PROPOSAL NEEDS CAREFUL REVIEW

(Mr. MATSUI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MATSUI. Mr. Speaker, a significant component of President Reagan's tax program is the proposed 30-percent income tax cut over a 3-year period. During the past 2 weeks before the Ways and Means Committee, a number of highly professional and outstanding economists have questioned the advisability of enacting such Kemp-Roth tax legislation.

On March 12, the principal economic forecasters in the country rejected the personal income tax program supported by the Reagan administration. Robert Gough, vice president of Data Resources, Inc., testified:

On a net basis, one cannot escape the conclusion if one believes in the relationships that have governed our economy in the past, that the net effect of the President's program, based on the President's schedule, is to make the inflation rate worse.

Lawrence Chimerine, chairman of Chase Econometrics, stated:

The magnitude of the tax cuts in the years ahead significantly exceeds the total net budget reductions after increases in national defense are included, especially in later years . . . The likely effect would be a continuation of extremely high interest rates, possibly even higher than we are now experiencing.

The Chase chairman recommended that a smaller personal tax cut now would be appropriate with a review of the situation within a year.

Both Gough and Chimerine offered the alternative of changing the timing of the cuts, which would affect an extension of the period of 12 to 18 months.

President Reagan promised the American people on February 18 that he would take effective steps to control escalating inflation and higher interest rates. But these noted economists predict that the President's Kemp-Roth proposal may only guarantee increasing inflation and more burdensome interest rates. Given these potential real risks, the precipitate enactment of Kemp-Roth by the Congress would be improper. Kemp-Roth demands a careful review.

THE SLASHING OF THE EDUCATION BUDGET

(Mr. PEYSER asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. PEYSER. Mr. Speaker, in continuing in my effort to keep the House informed on what colleges around the country are saying concerning the slashing of the education budget by this administration, I am entering into the RECORD today a letter from Juniata College in Congressman SHUSTER's district, Mount Union College in Congressman REGULA's district, Livingstone College in Congressman HEFNER's district, New Mexico Highlands University in Congressman LUJAN's district, and the Inter American University of Puerto Rico in the district of Congressman CORRADA.

I would like to extract, if I could, one paragraph, Mr. Speaker, from the Mount Union College. It says:

It is my fervent hope that Congress will recognize the importance of continuing to aid our young people in their educational pursuits. Short-range budgetary measures

simply will not be beneficial in the long run if our common interest in the education of our youth is undermined.

I support and urge others to support full funding of the Pell grant and support of the guaranteed student loans.

The letters are as follows:

JUNIATA COLLEGE,
Huntingdon, Pa., March 10, 1981.

Hon. PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: I do appreciate your recent letter concerning your position regarding the education budget. I am sure that most every educator in America agrees with you. A recent issue of the Chronicle of Higher Education indicated that higher education, among other things, is a $50 billion business and that it is very much a part of the economy. The famous Reagan silent majority—the middle class (whatever that means)—will be hit and hit hard if the guaranteed student loans are attacked by the budget axe. The young people who represent the lower economic group who wish to obtain college degrees and thus improve themselves and become more productive human beings and thereby increase the tax base for the nation will be harmed if the Pell Grants suffer.

Juniata College, a small college of 1300 students, is more than willing to take an active part in your effort to ward off this attack on higher education.

Sincerely yours,
FREDERICK M. BINDER,
President.

MOUNT UNION COLLEGE,
Alliance, Ohio, March 10, 1981.

Hon. PETER A. PEYSER,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR REPRESENTATIVE PEYSER: I want to express my strong appreciation for your awareness and concern regarding the problems that are likely to be encountered by the students and their parents who are depending upon some aid through either Guaranteed Student Loans or Basic Educational Opportunity (PELL) Grants if the decision is made to cut back these programs severely. It is quite likely that such action will not only limit student choices among institutions which they want to attend but will also result in many students simply not going on to college. Moreover, the increased expenditures in financial aid, when accompanied by the projected declines in enrollment over the next few years, will lead to financial difficulties that many independent colleges will simply not be able to bear. It is my fervent hope that Congress will recognize the importance of continuing to aid our young people in their educational pursuits. Short range budgetary measures simply will not be beneficial in the long run if our common interest in the education of our youth is undermined. I support and urge others to support full funding of the Pell Grants and maintenance of the GSL program for middle income families. I understand perfectly the abuses that have occurred in relation to the latter but I believe these can be more effectively controlled and, perhaps, limited on the very high upper level.

Thank you for your interest. You can count on our continued support in this most significant issue.

Sincerely,
G. BENJAMIN LANTZ, JR.,
President.

LIVINGSTONE COLLEGE,
Salisbury, N.C., March 6, 1981.

Congressman PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR MR. PEYSER: Thank you for your letter of February 25 expressing your concern for the Reagan Administration's recommendation to cut student loans and basic opportunity grants.

We at Livingstone College are certainly aware of the very serious impact that these cuts could have on the ability of our students to meet their financial obligations. In light of this fact, we are certainly willing to take an active part in the effort to fight against the proposed cuts.

According to our Director of Financial Aid, we have tried to utilize our student financial aid funds in the most efficient manner possible and consequently have been able to assist a large percentage of our enrollees. A cut in our present funds would result in a large number of students having to contribute a much more substantial amount toward the payment of their school fees. Since the present unemployment situation offers minimal opportunity for students to earn extra money, it may become virtually impossible for many talented and deserving persons to obtain an education.

We will, therefore, support your efforts in whatever way we can.

Please let us hear from you soon.

Sincerely yours,
F. GEORGE SHIPMAN,
President.

INTER AMERICAN UNIVERSITY
OF PUERTO RICO,
March 9, 1981.

Hon. PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: The proposed cuts by the new Administration in student assistance programs is of deep concern not only to this institution, but also to all of higher education in Puerto Rico. Even with the current level of student assistance in basic grants and loans, the students of Puerto Rico can barely manage to continue their studies from one year to the next. Any cut at all in student financial aid to Puerto Rico would create hardships for students and institutions of higher education of disastrous proportions.

Typically, Puerto Rican families have enormous faith in the value of education. During the recent years of student financial aid, young Puerto Rican men and women have enrolled in institutions of higher education at a rate unparalleled in our history. Any cut in this assistance would deny opportunities to pursue higher education to several hundred young people.

It is impossible for me to emphasize with mere words the critical position into which higher education in Puerto Rico would be placed if the proposed cuts in student financial aid become a reality. Your interest and assistance in preserving, at the minimum, the current level of student assistance is deeply appreciated by the entire higher education community of Puerto Rico.

Sincerely,
RAMON A. CRUZ,
President.

NEW MEXICO HIGHLANDS UNIVERSITY,
Las Vegas, N. Mex., March 11, 1981

Representative PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR MR. PEYSER: Your concern for the proposed cuts in Student Financial Aids are not only appropriate but it is also heart warming to hear that you are expressing such concern.

Enclosed please find a breakdown of financial aid programs and monies allocated to students at New Mexico Highlands University. If you will note from the figures, New Mexico Highlands University would experience a real crisis if the proposed cuts are carried out, since 89-90% of our students are on financial aid.

Our proposed 81-82 federal allocation is less than 80-81. In addition, the proposed 81-82 allocation might be subjected to approximately a 30% reduction. This reduction would cause an extreme hardship on the students at New Mexico Highlands University. I will be contacting senators and representatives from New Mexico on this matter. In addition, there will be students expressing their opinion about the proposed cuts.

I sincerely hope that this information will be of help to you in your attempt to prevent such drastic cuts. Thank you for your time and consideration.

Sincerely,
MATTHEW D. PADILLA,
Dean of Students.

Enclosure.

MEMORANDUM

To: Dr. Matthew Padilla.
From: Joe P. Martinez, Director, SFA.
Date: March 4, 1981.

Following is the information you requested regarding 1980-81 funding levels and 1981-82 projected funding for student aid.

Program	1980-81 Federal allocation	Name of students	Amount committed	Average award
BEOG		1,168	$969,489	830
SEOG-IY	$57,694	161	62,349	387
SEOG (National disaster)	71,540	138	65,525	475
SEOG (Renewal)	115,433	165	113,913	690
NDSL	12,575	350	255,000	729
CWS	275,625	550	424,038	771
NMSLP	381,610	241	381,610	1,583
FIL	Open	23	47,206	2,052
USA	Open	13	26,007	2,000

DISTRIBUTION OF AID BY INCOME LEVEL

[In percent]

Income level	Overall	NDSL	SEOG	CWS	BEOG	SEOG
$0 to $5,999	57	62.0	77	60	56	81
$6,000 to $11,999	23	18.0	23	22	24	19
$12,000 to $17,999	13	16.0	3	14	13	0
$18,000 to $23,999	5	3.0	1	3	5	0
$24,000 to $29,999	1	.5	0	1	1	0
$30,000 and over	1	.5	0	0	1	0

Distribution by income level for New Mexico State Loan Program should be completed by Friday, March 6, 1981. Information of Social Security is not readily available. Generally because of the type of student we serve and the treatment of Social Security for need determination the full

amount of Social Security received by the student has been considered part of the parents income rather than directly available for education.

Based on the current funding formula for projected 1981-82 federal allocation for the College Based Programs our Institution conditional guaranteed would be at the level of funding received in 1979-80. We should receive a tentative commitment letter within the next two weeks.

NDSL*	$6,000
CWS	316,250
SEOG I	44,368
SEOG R*	114,704

* Subject to 30% reduction for 1981-82.

Should you require additional information, please contact me. Thank you.

EL SALVADOR

(Mr. BROWN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROWN of California. Mr. Speaker, from my decade-long experience with the Vietnam war, I am convinced that this country's leaders act with wisdom on foreign policy issues only when the people understand the problems and demand just and humane responses. We are far from that with regard to the situation in El Salvador.

More than 10,000 people died last year in El Salvador, many at the hands of the military. By condoning such actions by the El Salvadoran junta, the United States is aiding and abetting the military in the destruction of more lives and property. We cannot deny this culpability.

Yes, we do have some responsibility to that small, Central American country, and now is the time to determine how we shall fulfill that responsibility. No amount of military assistance will provide political stability for the nation, or economic prosperity for the campesinos of El Salvador.

The policy decision must be made now, before it is too late to change our direction. We ultimately saw the errors of our ways in Vietnam, but it divided and splintered this Nation which is only now recovering. Must we learn our lesson twice?

OPPOSITION TO MILITARY INTERVENTION IN EL SALVADOR

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEAVER. Mr. Speaker, I rise to oppose our military venture in El Salvador. It means the policy that took us to Vietnam has not changed. Indeed, the sounds from our tragic involvement in Vietnam are ominously similar in El Salvador.

We hear of advisers, body counts, search-and-destroy missions, the domino theory. I ask, Will we end up destroying El Salvador in order to save it?

THE UPRISING OF 1932—EL SALVADOR

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute, to revise and extend her remarks, and to include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, it is rare that a summary of Salvadoran history is made without mention of the uprising of 1932.

I thought it would be useful for our understanding of current events in El Salvador to have a little more background on the uprising and the resulting massacre of Indians.

The following passage is taken from "El Salvador," by Alastair White (Praeger: New York, 1973):

THE 1932 MASSACRE IN EL SALVADOR

The rebellion took the form of concerted attacks by campesinos (agricultural workers and peasants), armed almost exclusively with machetes, during the night of 22-23 January 1932, on the public buildings of the western towns. The towns of Izalco, Sonzacate, Nahuizalco, Juayúa, and Tacuba were captured, but the soldiers in the largest cities of Sonsonate, Santa Tecla, and Ahuachapán were able easily to repulse the attacks; in San Salvador a mutiny in the principal barracks had been part of the plan, but it came to nothing. Then the carnage of campesinos began. Seventy-two hours after the revolt began, almost all the small towns had been recaptured by the army, and the massacre took the form of mass executions of suspects, which could often mean anyone wearing Indian dress or indeed almost anyone at all. Estimates of the number who died vary widely, but 15,000 to 20,000 is likely. The figure of 30,000 is often used by the political Left. The repression can be described as a massacre, because of the undoubtedly large numbers killed in cold blood after resistance had ended. There was an attempt to justify it on the other side with stories of murder and rape, but these have been investigated by the politically impartial American historian Thomas P. Anderson, and found to be unfounded: in all probability, not more than half a dozen civilians were killed by the rebels, and certainly not more than thirty.

□ 1530

THE SAME OLD STORY IN FOREIGN POLICY

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, how soon we forget. It was not long ago that many colleagues were standing in this well criticizing the Carter administration for a foreign policy which they said isolated the United States and which put our country in a position of losing respect around the world.

A Wall Street Journal article this week by Walter Mossberg indicates that exactly the same thing is happening, perhaps in a much more serious and long-lasting way, under the Reagan administration. With their 1950's approach to viewing everything in the world in terms of an East-West confrontation, the Reagan administration is bound to get us in very serious trouble.

One high-level adviser to the President, when asked, "Why El Salvador?" responded, "Why not?"

I think that the incident reflects a very real possibility that if it is not El Salvador it will be Angola or Mozambique or somewhere in the Middle East, perhaps saving General Viola of Argentina or General Pinochet of Chile.

CONGRESSMAN CHARLES BENNETT'S REMARKS AT DEDICATION OF LYNDON BAINES JOHNSON WINDOW

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, on Sunday, March 15, the National Christian Church here in Washington dedicated a beautiful church window in memory of President Lyndon Baines Johnson, 36th President of the United States, and in honor of the former pastor of that church, Dr. George Davis.

President Johnson worshiped regularly at the National Christian Church and found great comfort in both the thoughtful and moving sermons of Dr. Davis and in his personal relationship with him as a great individual American. Among the high points of the ceremonies were the Scripture readings presented by Hon. Patricia Harris, former Secretary of Health, Education, and Welfare, and by Hon. Marvin Watson, former Postmaster General of the United States. I was privileged to present Congressman CHARLES BENNETT, the speaker for this occasion, attended by a large and overflowing crowd. It was fitting that Congressman CHARLES BENNETT speak to the congregation because there are many similarities in his background and in President Johnson's background. Congressman BENNETT is chairman of the Sea Power Subcommittee of the House of Representatives and President Johnson once served on this equivalent committee when he was in the Congress. Congressman BENNETT's grandfather, Dr. George Broadhurst, was a contemporary pastor alongside Dr. Alexander Campbell, who was the founder of the present-day Christian Church. Congressman BENNETT's grandfather founded and served as president of the Midway College in Kentucky and President Johnson's

great-grandfather, Dr. George Washington Baines, was founder and president of Baylor University.

The address by Congressman BENNETT was impressive and thoughtful, and I wish to include it herewith in the RECORD for the benefit of the Members:

SPEECH OF CHARLES E. BENNETT AT DEDICATION OF PRESIDENT JOHNSON'S WINDOW IN THE NATIONAL CITY CHRISTIAN CHURCH, MARCH 15, 1981

It is wonderful to be here together this afternoon to dedicate this beautiful window in memory of Lyndon Baines Johnson, the 36th President of the United States; and also to honor his beloved pastor here today, Dr. George Davis.

As a Congressman from Florida, this is my church when I am in the Washington area. Many times I have sat only a few seats apart from President Johnson and his family as we listened to the stirring and inspirational sermons of Dr. Davis. The three of us treasured our brotherhood. In the tradition of this church, we were not merely members of a church but brothers.

As we sat here one Sunday morning I thought to myself that this church where President Johnson worshipped ought someday to have a memorial window to him and to the other President who worshipped in this congregation, President James A. Garfield. Shortly after the death of President Johnson, I approached the pastor about this and tendered the first contribution to the project, which others have so sacrificially augmented to the successful conclusion we celebrate today.

I have just spoken with Jack Valenti, who in his splendid book about the President entitled "A Very Human President", said of President Johnson "he detached himself from any dogma; indeed, found rigidly-fixed doctrine as unappetizing in religion as in politics."

This is the essence of the belief of the Disciples of Christ. We Christian Brothers believe as the founder of our brotherhood, Alexander Campbell believed, when he said:

"God now speaks to us only by His word. By his Son, in the New Testament, he has fully revealed himself and His will. This is the only revelation of His Spirit which we are to regard."
